=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/career-scope-of-ma-sociology-in-21st-century.html>

=====

Sociology is a comprehensive and beautiful subject; the subject not only unlocks the doors of exciting career opportunities across the globe but also an enjoyable subject. The more you will study Sociology deeply, the more curiosity you will develop to understand society and human behavior. In this 21st century, the career scope of sociology is not limited to teaching and civil service examination, rather a higher degree in Sociology such as MA Sociology prepares you for exciting and well-paid employment opportunities in the global market.

If we define Sociology in a broad sense, then it is not just a subject, it is a world within itself. Sociology is the study of family issues, advantages & disadvantages of marriage, deviance, cause of divorce, criminology, group interaction (study of how people interact in a group), gender roles (study and analyze the role of different genders), sexuality, public policy, development studies, aging, social inequalities, etc. Study of Sociology also imparts sound understanding of the function of society and the impact of sociological change on the individual. Different subjects like History, Economics, Psychology, Political Science, and Anthropology contributes to the study of sociology.

The duration of MA Sociology is two years, and a person who takes MA Sociology Admission, he/she studies about Sociological Theories and Concepts, Research Methodologies in Sociology, Sociology of Development, Sociology in India, Democracy and Development of India, Sociology of Education, Diaspora and Transnational Communities, Sociology of Religion and Urban Sociology, etc.

How MA Sociology Prepares Students for Today's Global Job Market?

MA Sociology lays stress on finding solutions to complex questions through research, data analysis, and high-level critical thinking. Besides, the postgraduation degree in Sociology develops an array of practical skills in students that are valuable to many industries. Below are some top learning outcomes of MA Sociology that prepare students for today's global job market.

MA Sociology develops critical thinking and problem-solving skills of students. Sociology students are proficient in doing research and survey, collecting data, analysis of data, and come up with valuable insights.

MA Sociology degree develops the leadership skills of students.

The theories in Sociology are based on research, and because of that students are exposed to research methods to a greater degree than most liberal arts students.

The curriculum of MA sociology is based on data and research, thereby students acquire a high level of computer literacy.

The course develops interpersonal and cross-cultural skills in students, thereby they are proficient to interact with other people, no matter what is their background.

The Eligibility Criteria for MA Sociology:

Students who have completed graduation in any stream with 45% marks from any recognized University/ College, they are eligible for MA Sociology admission.

The Career Scope of MA Sociology:

Upon completion of MA Sociology, students can appear in prestigious government exams like UPSC, with Sociology as an optional subject.

Students of Sociology have great knowledge of society, thereby they can get employment opportunities as a survey researcher and market researcher.

If a person wants to make career in teaching, he/she can appear in the exam like UGC NET, and after qualifying the exam they can work as a lecturer/professor in Indian Universities/ Colleges.

Sociology postgraduate students can get employment opportunities as Policy Analysts, the job responsibility of a Social Policy analyst is to analyze the social issues and suggest recommendations to address those issues.

There is a great demand for Sociology postgraduates in the print and electronic media.

There is also option of working as a subject matter expert/ content writer.

MA Sociology degree also allows a person to make a rewarding career as a Management Consultant and Human Resource Specialist.

Why Choose Mangalayatan University for MA Sociology?

B. Tech CSE- A Course That Offers Magnificent Career Opportunities and Ensures Bright Future

Assuredly, nowadays in the sphere of engineering education, the popularity of B. Tech Computer Science and Engineering is the highest among students. The course not only unlocks the doors of great career opportunities, but also enable students to uplift their analytical skills, logical skills, and problem-solving skills. The course focuses on the theoretical foundations of information and computation and its practical implementation and application in computer systems.

The duration of B. Tech Computer Science Engineering course is four years that comprises of eight semesters. In the first year of engineering, students learn about Engineering Mathematics, Physics and Chemistry, and Engineering drawing. From the second year, they are exposed to core computer science subjects like design and analysis of algorithms, operating systems, object-oriented programming, computer organization, system programming, interfacing through microprocessor lab, artificial intelligence, database management systems, software engineering, java programming, etc.

Course Snapshot

Course Snapshot
Factor Details
Duration 4 years / 8 semesters
Year - 1 Engineering Mathematics, Physics & Chemistry, Engineering Drawing
Core CSE (Year 2 onwards) Design & Analysis of Algorithms, Operating Systems, OOP, Computer Organisation, Microprocessor Lab, AI, DBMS, Software Engineering, Java, etc.

4 years / 8 semesters

Engineering Mathematics, Physics & Chemistry, Engineering Drawing

Core CSE (Year 2 onwards)

Design & Analysis of Algorithms, Operating Systems, OOP, Computer Organisation, Microprocessor Lab, AI, DBMS, Software Engineering, Java, etc.

Why CSE Graduates Are in High Demand

India is a leading country in the sphere of providing IT services, and the Indian IT companies have put a profound impact on the global business by offering cutting-edge IT services and gained the super trust and revenue for the nation. Resultant, there is always a great demand for computer science graduates in the leading IT companies in the world. In this 21st century, when the world is moving towards technological advancement and modernization, and there is extensive use of computers in almost every walk of life, then computer science engineering graduates have excellent opportunities to offer something revolutionary and useful for the society and the nation.

Eligibility Criteria for B. Tech Admission in Computer Science and Engineering:

Person who has completed 10+2 in Physics, Chemistry, and Mathematics with 50% marks from any recognized board/institute, he/she is eligible for B. Tech admission in Computer Science and

Engineering.

Person who has completed engineering diploma in computer science from any recognized college, he/she is eligible for B. Tech lateral entry admission. In the lateral entry admission programme, person gets admission in the second year of engineering.

Person who has completed B.sc Mathematics with 50% marks from any recognized University; he/she is also eligible for B. Tech lateral entry admission in computer science and engineering.

The Career Scope of Computer Science and Engineering Degree:

Person can make career as a Software Engineer. The job responsibility of a software engineer is to execute full lifecycle software development, writing clean codes, and ensuring the operational feasibility of the project.

There is an option to make a career as a Hardware Engineer. These professionals do research, design, develop, test, and oversee the installation of computer hardware like computer chip, circuit boards, systems, modems, keyboards, and printers.

There is an option to make career as a System Designer. These professionals involve in system designing, Logical & Physical Designing of the system.

Person can make career as System Analyst. The job responsibility of the System Analyst is to do research about the existing problems and plan solutions for the problem.

There is an option to make career as a Network Engineer. These professionals involve in designing, implementing, and troubleshooting of computer networks.

Person who wants to make career in academic, he/she can do M. Tech and research in some resolutory domain of computer science like parallel computing, artificial intelligence, and quantum computing, etc.

Apart from the above, after degree in computer science and engineering person can make career as a web developer, web designer, data scientist, data analyst, android application developer, iPhone application developer, etc.

Some top companies that recruit computer science degree holders at decent PayPacket are TCS, Infosys, HCL, Wipro, TechMahindra, Hewlett-Packard, International Business Machines Corporation, etc.

Why Choose Mangalayatan University Aligarh for BTech in CSE Admission?

Mangalayatan University is one of the best private university in india for B. Tech admission in Computer Science and Engineering. The University also offers B. Tech lateral entry admission in Computer Science and Engineering. Since inception in 2006, the Department of Computer Science of the University is preparing adroit computer engineers who are doing excellent job at national and international companies.

The University has dexterous and high-qualified teaching faculty who are committed to develop problem-solving skills, analytical skills, and logical skills in students; which is a foundation to become an excellent programmer in the future.

The department of Computer Science of the University promotes interdisciplinary research & innovation-based activities in emerging areas of technology globally.

The University encourages entrepreneurial spirit in students and focuses on industry-oriented teaching.

=====

B. Tech Civil Engineering- A Core Engineering Branch That Unlocks the Doors of Rewarding Career.

There is a famous quote about Civil Engineers, “The best creator next to the God is Civil Engineer”. In this 21st century, where new-age engineering courses are pulling the attention of students, the same the popularity of old engineering branches is still high. Civil Engineering is one of the core branches of Engineering, whose range and the application is broadest and the most visible.

Civil Engineering courseis not just brick, mortar, and cement; rather it is an art and science of building the simplest to complex engineering marvel, which leaves people spellbind. Taj Mahal, Hoover Dam, Leaning Tower of Pisa, Burj Khalifa, Great Wall of China and London Bridge, etc. are some examples of magnificent work of Civil Engineers.

Amongst all branches of engineering, Civil Engineering is the oldest branch of engineering whose objective is to develop the infrastructure for the nation. The credit of building power plants, dams, airports, seaports, highways, inland waterways, and industrial plants, etc. goes to civil engineers. Apart from that, civil engineers also build commercial complexes, skyscrapers, tunnels, bridges, roads, urban rapid transport systems, sports stadia, and so on.

Therefore, whether you are in a rural area or metro city; you can’t deny the significant role of civil engineers in the infrastructure development of the nation. In a matter of higher studies and employment opportunities, a person can make magnificent career in civil engineering. The job responsibility of civil engineers is challenging but equally exciting, where a person gets opportunity to explore different destinations, learnsa lot of things and makes a bright future.

Eligibility Criteria for B. Tech Civil Engineering Course after 12th:

Person who has completed 10+2 in Physics, Chemistry, and Mathematics with 50% marks from any recognized board/institute, he/she is eligible for B. Tech admission in Civil Engineering course.

Person who has completed engineering diploma in civil engineering from any recognized college, he/she is eligible for B. Tech lateral entry admission. In lateral entry admission programme, person gets admission in the second year of engineering.

Person who has completed B.sc Mathematics with 50% marks from any recognized University; he/she is also eligible for B. Tech lateral entry admission in civil engineering.

The Career Scope after Civil Engineering Degree Course

After completing degree in Civil Engineering, person can appear in the Indian Engineering Services exam which is conducted by the UPSC.

Person has option to choose higher studies after B. Tech Civil Engineering. After completing engineering degree, he/she can do M. Tech in Structural Engineering, Transportation Engineering, Geotechnical Engineering, Hydraulics, and Water Resources Engineering, etc.

There is a great demand of Civil Engineers in all major construction projects which is carried out by central and state government agencies.

Every year Indian Armed Force and Military Engineering Services recruit civil engineers through competitive examinations.

Private sectors like Larson and Turbo, Simplex Projects Ltd, Jaypee Group and DLF, etc. recruit Civil Engineers at a decent Pay Packet.

If a person is equipped with an entrepreneurship mindset, he/ she can open their own engineering consultancy.

Why Choose Mangalayatan University for Civil Engineering Programme?

Mangalayatan University is one of the best private engineering colleges in north India for B. Tech admission in Civil Engineering. The University also offers B. Tech lateral entry admission in Civil Engineering. Since inception in 2006, the University has grown tremendously and is now well recognized for its high-quality education, rigorous curriculum, constructive teaching style, and good campus placement record.

The dexterous civil engineering faculty of the University assists students to achieve their academic goal, and encourage students in life-long learning. Besides, high-quality teaching, the Civil Engineering department of the University keeps sharp eye on the latest changes in the field of civil engineering and prepares students according to it, thereby no students could leave behind to acquire the latest knowledge.

The University has cutting-edge labs for experimentation and research works. Specialization offered at the post graduation level that imparts global exposure in terms of employability like Structural Engineering, Environmental Engineering, Construction Management, Geotechnical Engineering, and Water Resource Engineering.

Why Mangalayatan University is the best college for B. Tech in Civil Engineering? Academic excellence, highly-qualified teaching staff (all are Ph.D. degree holder), high-quality teaching, and practical cognizance makes Mangalayatan University the best college for B. =====

SOURCE (WEB): <https://www.mangalayatan.in/blog/why-is-bcom-honours-course-better-than-bcom.html>

=====

Both B.Com [Bachelor of Commerce] and B.Com (Honors) are undergraduate degrees in the commerce stream, take the same time-duration of 3 years to be completed, and the syllabus of both these is almost the same. However, in some prestigious universities the study curriculum of the B.Com (Hons) is somewhat enlarged or in-depth and thus, quite rigorous. Again, a major difference in respect of curriculum and teaching of both these courses in commerce is in the approach of learning; with the b.com (hons) course imparting greater professional depth and employable skills.

To guide and help students after 10+2 standard, who are interested in making careers in the commerce discipline, this concise blog offers precious and discerning information about both contents of these courses, difference between these courses, answer to the question "why is b.com honours course better than b.com?", and admission to b.com (hons) to a hugely popular university in UP and north India.

Below some Difference better bcom or bcom honours

The course of B.Com or B.Com (Pass) just offers sufficient information about or an overview of all segments/areas which make up the commerce stream. During this b.com course, specialization is not provided in any of these areas, only an overall information about all the constituent areas. On the other hand, the final year (3rd year) of the B.Com (Hons) course also offers specialized knowledge in the chosen area in detail, to boost professional/employable skills. The specialization area/field of commerce could be accountancy, economics, finance, etc. Hence, for deeper studies in commerce stream, b.com (hons) is undoubtedly better.

Owing to above-mentioned fact, generally for admission to the b.com (hons) course, mathematics in 10+2 is considered compulsory, along with good knowledge in English.

Generally, the cut-off for admission to the B.Com (Hons) is higher than that for the admission to B.Com (Pass) in the majority of commerce colleges/prestigious universities.

As B.Com (Hons) is more business-oriented and in-depth, it is highly suitable for making a lavish career in Chartered Accountancy.

The industrial markets give greater weightage to B.Com (Hons) holders. Hence, there exist more and better job opportunities in the market for b.com (hons) students, along with better salaries and packages. The b.com (pass) holders are not given much importance by the business industry, unless they possess a PG degree or a professional degree such as CA, MBA, or CS.

Enhance Your Career Growth with a B.Com Program

B.Com Hons Admission in Mangalayatan University Aligarh

Considering all above-mentioned facts and factors, prestigious and farsighted Mangalayatan University (MU) of Aligarh conducts only the B.Com (Hons) to help and provide the interested students better career opportunities in the discipline of commerce. Its affluent and

employment-oriented bcom honours course is hugely popular, particularly by students residing in the NCR and northern India.

For its bcom honours admission, required are 12th pass qualification with mathematics subject, and at least 50% marks in aggregate. Duration of its B.Com (Hons) course is 3 years, and its overall cost is quite reasonable and easily affordable even by financially poor students. A variety of financial aids are also granted by the university to students falling under many specific categories. The curriculum of this rich and prolific course at undergraduate level has been well-designed by the veteran academicians and industry experts, for offering better productivity and growth. Besides theoretical knowledge, practical and industrial trainings are also offered to the students, along with expert guidance for development of professional skills and career. Here, it may also be just mentioned that Mangalayatan University was set up in 2006 and is duly recognized by UGC. Its 70-acre magnificent campus contains all modern and affluent academic and campus facilities. Through steady and admirable performance in the professional discipline of commerce, MU seeks to emerge out as a very famous and best commerce admission college in Aligarh, NCR, and the north India in near future.

For Admission at MU:

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/why-is-integrated-btech-mtech-course-is-better-than-only-btech-course.html>

=====

To help interested or ambitious students (after their 12th with PCM), given here are precious pieces of information about the integrated b.tech m.tech course, and its advantages over the only b.tech course in the related engineering discipline. For some ambitious students, the integrated (b.tech+m.tech) course is certainly more beneficial than the b.tech course in the concerned engineering discipline.

The B.Tech. course in any engineering discipline is a 4-year course, and it offers only the degree of the Bachelor of Technology. For further professional growth, a b.tech holder may require to pursue the M. Tech. in any specialization area of the same discipline. The m.tech course takes two years. On the other hand, the integrated (B. Tech.+ M. Tech.) course is a 5-year engineering course which offers two degrees in the selected engineering discipline, both the bachelor's and master's degrees. The following are some significant differentiating factors between the two courses, which also answer to the question "why is integrated b.tech m.tech course better than only b.tech course?", which will help the students in their respective course selection ---

Key Differences Between B.Tech and Integrated B.Tech + M.Tech

The b.tech course is highly suitable to those students who quickly want a job in the concerned industry just after completion of this course. However, only this b.tech degree is not much appreciated by the employers. Only entry to assistance level jobs will be available to them at low-to-average salaries. This also happens due to the burgeoning number of b.tech holders every year in the country.

The integrated b.tech-m.tech course is highly suitable to those students who seek to gain specialization in any specific segment of the selected engineering discipline, and have interest in teaching or research. Normally, the holders of integrated courses find much better job opportunities and preference in the concerned industry, as compared to those only with b.tech degrees. The doctoral research is accessible only after the m.tech in the relevant discipline. Again, quicker jobs or/and higher posts are achievable easily by the integrated or dual degree holders.

The B.Tech. course takes 4 years, while the integrated or dual degree course takes only 5

years. The b.tech holders will require to spend 2 more years to achieve the m.tech degree, at the same or different institute or university. In the case of the integrated course, there is saving of one precious year, and there is no need to take admission to a different institute. Hence, the overall time and cost are quite lesser for the integrated or dual-degree course.

Forbtech admissionas well as admissions to the integrated b.tech+m.tech courses in various hugely popular engineering disciplines, roaring Mangalayatan University has been a widely famous university in Uttar Pradesh and NCR for over a decade. Well-based near the Aligarh city, about 20 Km from the Yamuna Expressway, MU is duly recognized by UGC and is an innovative member of AIU. Its 70-acre magnificent campus contains a world-class academic infrastructure well-equipped with all modern and affluent resources and facilities. At present, invited are sincere applications from all over India for its b.tech as well asintegrated b.tech m.tech admissionin mechanical/civil/electronics and communication engineering/CS Course Admission. The most notable among its various resources and facilities are the following --- hi-tech classrooms, laboratories, and computer centers; veteran and innovative teaching and research faculties of high renown; proactive and responsible training & placement cell; separate hostels for boys and girls; and well-rounded facilities for spending a rather creative and comfortable college life.

CS Course Admission

For Admission in Mangalayatan University:

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/what-is-the-difference-between-bsc-and-bsc-honours-degree-course.html>

=====

Both B.Sc. (General or Pass) and the B.Sc. (Honours) are hugely popular undergraduate courses in sciences. Again, at most of the Indian universities and institutes, each of these courses takes a duration of three years. Also, the syllabus of each of these two courses is almost the same, differ only the approach of learning and career aims. This concise blog highlights the main difference betweenB.Scand B.Sc honours degrees/courses, and also gives information about admissions to each of these courses in NCR.

In general, the following are the major differences betweenb.sc (general) and the b.sc (hons)at most of the institutes and universities located across India: ---

The B.Sc. (General) is generally considered as being an ordinary bachelor's degree in science, which is basically designed to offer the undergoing students a broad foundation necessary for a science-based career, with a special focus on multidisciplinary learning. This b.sc (general) course offers specialization in no anyscience subject, but gives a strong foundation knowledge in various science subjects/segments like physics, chemistry, mathematics, botany, zoology, and other life sciences.

The course of B.Sc. (Hons) aims at providing an advanced and specialized theoretical and research skills in the chosen science subject, along with an overall knowledge in the sciences, in order to provide to the students a strong platform for an advanced academic or professional career. Academically, b.sc (hons) is regarded as being a more standard degree as compared to b.sc (general). Prestigious universities may also demand a rigorous dissertation from every student for completion of the B.Sc. (Hons) course.

In respect of job prospects, the b.sc (hons) is considered more productive and beneficial than a normal b.sc (general) degree, and therefore, employers often give preference to b.sc (hons) over the b.sc (general).

Which is the Best Course for Students B.Sc Or B.Sc Hons?

In general, the B.Sc (Hons) is considered superior to the general B.Sc., both academically and professionally. However, selection of bsc or bsc hons course, may also depend upon the aims and career prospects of the student.

If the student desires to make a detailed study in any of the main sciences (physics, chemistry, mathematics, etc.), then the course of B.Sc. (Hons) is more suitable. On the other hand, if a student just wants to have a multidisciplinary and balanced learning in sciences, then, B.Sc. (general) is preferable.

Again, the course of b.sc (hons) is most suited and preferred when a student has high career ambitions, particularly in the scientific research and innovations. This specialized undergraduate course in sciences is highly elegant for enhancing employability of the pursuing students across a broad range of careers in the science-related fields (such as academia, corporate & business, professions & services, scientific research, law, marketing, etc.)

Prosperous Mangalayatan University (MU), which is at present one of the most famous universities in NCR and northern India, conducts both these very popular science courses at undergraduate level. Located near Aligarh city in Uttar Pradesh, this visionary university was set up in 2006 and is a duly recognized university by UGC. Boosted by its association with AIU, MU conducts ace-quality and employment-friendly B.Sc. (General) and B.Sc. (Hons) courses of international standards.

Its affluent academic infrastructure, hostel facilities, veteran and renowned teaching faculties, well-equipped laboratories, hi-fi computer center, well-stocked libraries, practical & industrial training facilities, etc., make its science courses at undergraduate to doctoral levels superlative and highly sought-after in the north India and beyond.

And for bsc hons admission eligibility, mode and course duration please click at bsc hons admission in physic/chemistry/mathematics

For Admission in MBA Courses in MU:

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/what-is-the-difference-between-mba-and-mba-dual-specialization-courses.html>

=====

The MBA (Master of Business Administration) course/program is at present one among the most popular and highly preferred postgraduate courses in India and countries worldwide. The mba course is all about running a business smoothly and profitably, and attaining a leadership position in the concerned economic sector and market. Due to huge and ever-growing popularity of mba programs in india, today the majority of well-resourced and prestigious universities of India conduct these courses in many popular specialization areas/fields. One such university in the north India is the innovative Mangalayatan University (MU), which has been widely famous owing to its superlative and cutting-edge mba programs and other degree courses in various technical and non-technical disciplines. This concise blog illustrates "what is the difference between mba and mba dual specialization?", along with highlighting certain advantages of the mba-dual specialization, and admission to this course at MU.

An Master of Business Administration course generally lasts for two years and offers master's degree in any one selected specialization field/area. But, the 'MBA-Dual Specialization' course offers this degree in any two desired specialization areas in the same course-duration of two years. Exclusive information in support of the mba-dual specialization course is mentioned in

the section just below. MU conducts only the mba-dual specialization program, and precious information regarding itsmba dual specialization admissionis provided separately under the lowest section of this blog.

Read Also-Future Scope of Dual MBA Specialization in India - Is A Dual MBA Worth It?

What Should i Choose MBA Or MBA-Dual Specialization?

It all depends on your interest and aims in career. If you desire to prosper in any single specialized field in your MBA career, then the MBA with one specialization area, is most suitable to you. However, this may limit your job opportunities. But, you will be very strong and ingenious in your single specialization field.

On the other hand, if you cherish to support your MBA career with two different specialized areas/fields, then, themba dual specialization programis the best option. After this course, you may work simultaneously in two areas for a company, or in any of the two areas, depending upon the requirements/circumstances. Again, dual specialization enhances the job opportunities. Lastly, the disciplinary knowledge and capabilities of handling two areas simultaneously or occasionally, are boosted by the dual specialization mba course, leading ultimately to a lavish and well-paid MBA career. The foregoing illustrates in brief the scope of mba dual specialization in the current and intensely competitive professional and corporate worlds.

Begin your Leadership Journey with anMBA Degree

MBA-Dual Specialization Admission Open in Mangalayatan University, Aligarh (UP) India

For top-notch and innovative dual-specializationMBA courses, steadily progressing and highly prestigious Mangalayatan University (MU) of Uttar Pradesh (located near Aligarh city in the extended NCR) has been highly distinguished in the north India for over a decade. Duly recognized by UGC and a fast thriving member of AIU, MU has all modern and laudable resources and facilities for such creative and momentous professional courses.

At present, MU conductsmba dual specialization coursescovering the following four hugely popular and preferable specialization fields/areas --- Human Resources Management (HRM), Finance, Marketing, and International Business (IB). Every candidate pursuing this course will be made specialized in any two of these four areas, during the course. Selection of the two specialization areas will depend upon the interest and discretion of the student. Currently, earnest applications are being sought by the university for admissions to themba dual specialization in hr/ finance marketing/ international business, from all over India and abroad.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/biotechnology-courses-importance-and-impact-in-medical-field-and-healthcare-sector.html>

=====

Biotechnology is a recently developed research-oriented science which combines technologies with the biological systems & living organisms to develop or make products/processes useful to human beings and for certain beneficial purposes.

For past many decades, biotechnology has been very beneficial in the fields of medical & healthcare, agriculture & farming, dairy, horticulture & floriculture, food processing, energy production, environmental sustainability, chemicals, textiles, industrial manufacturing processes, etc. Consequently, Biotechnology has now become a very popular discipline/subject for higher studies in India and abroad.

In India, developments in this field have been highly significant, and therefore, today India

is regarded as being one among the top 12 biotechnology destinations in the world, and the third largest biotechnology hub in the entire Asia Pacific region.

This blog gives sumptuous information about the importance and benefits of biotechnology in medical, healthcare, and other fields, the most popular biotechnology courses in India, thebiotechnology coursesscope and importance, and admissions to these courses in the country.

Some of the highly significant achievements and benefits made possible by use of biotechnology are the following ---

So far, over 250 medicines, vaccines, and healthcare products have been developed using biotechnology to help patients suffering from many curable and incurable diseases. Theimpact of biotechnology on medical and healthcare sectorhas been very conspicuous.

Through use of agricultural biotechnology, millions of farmers in countries worldwide are now increasing their crop yields, preventing or minimizing crop damages from insects and pests, and reducing the harms to environment due to farming.

Scientists are producing biofuels and chemicals from the renewable biomass, to reduce the greenhouse gas emissions.

And, numerous improvements and refinements in above-mentioned fields have been well-facilitated by biotechnology for betterment of our lives and making the environment sustainable.

Today in India, the mostpopular biotechnologycourses are the following :

These courses facilitate progressive employments at varying levels in all above-mentioned fields. For further progress, required will be doctoral courses (MPhil and PhD) in biotechnology or in the specific subfields of this discipline. Prestigious and innovative Mangalayatan University (Aligarh) has been one of the highly-admired universities in the northern India for admissions to these both academic courses in biotechnology.

Set up in 2006, mangalayatan university is duly recognized by UGC and is a dynamic member of AIU. It has all necessary and lavish resources and facilities for offering rather rich & varied and professional education in biotechnology, coupled with practical and industrial training. Guidance for development of professional skills and the placement services are also provided by this one of the hugely famous universities in the north India.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/bca-or-bsc-it-which-course-is-better-after-12th.html>

=====

In today's world of computers, information technology, and computerized systems in almost every economic sector, both these technical courses are hugely popular in India and abroad. Both these degrees offer fast-progressing and well-paying jobs, but in certain distinct areas which are described below.

This concise but sumptuous and discerning blog offers very beneficial information about these eminent computer courses, the key differentiators between these two courses/degrees, and BSc IT andbca admissionsin India.

Pursuable after (10+2) standard, each of these two undergraduate courses takes three years in general. BCA stands for the Bachelor of Computer Applications, while the BSc IT signifies the Bachelor of Science in Information Technology. Broadly, the selection of any of these two courses for higher studies depends on the interest and career aims of the students.

BCA vs B.Sc IT: Important Differences Every Student Should Know

BSc IT deals mainly with information technology, internet, and database management (covering core areas like operating systems, data structure and database applications) and thus, the hardware component. On the other hand, BCA is primarily involved in computer applications and software component (including programming in the languages of C, C++, Java, etc.), along with knowledge in the areas of financial accounting and operations management. Hence, for those students who want to make a career in the computer applications, programming, and software development, the BCA course is better (than BSc IT) option; while for the students who are desirous of finding advanced job opportunities in the internet technology and database operations & management, the BSc IT course is better.

Generally, the BCA and MCA are more prominent to the IT recruiting agencies, than the BSc IT and MSc IT.

BCA is more productive and favorable for getting jobs in the corporate sector; while BSc IT is more suitable for making careers in the academia and disciplinary research.

Boost your Future Career with the BCA or B.Sc IT Program

BCA or B.Sc IT Program

It may be hoped that the foregoing answers to the question that “between bca and bsc it which course is better after 10+2?” based on career goals of the students. Students are advised to choose the appropriate course, analyzing the above-mentioned key differentiators between bca and bsc it, to achieve the desired post in their respective professional career. As far as Bachelor of computer applications admission is concerned, the Mangalayatan University of Aligarh is at present, a hugely popular and renowned university in the northern India.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/difference-between-fine-arts-visual-arts-and-performing-arts-courses.html>

=====

Art has been an inseparable part of our lives since time immemorial. Anything which is appealing to our senses or/and is thought-provoking may be said an art. Arts can encompass a rather wide range of human activities and the products of such activities. Broadly, the arts can be classified into the following major categories: -

Performing Arts

This concise blog gives brief introduction to these all types of arts, differences among these, and admissions to the courses related with these in India, especially in the northern India.

The Fine Arts course are those artistic/creative arts which are created by the artists mainly for appreciating and enjoying the loveliness of the nature or the things belonging to the

nature. Imaginativeness, aesthetics,

meaningfulness, or intellectual pleasures are the inherent and salient features of the fine arts. The simplest examples of the fine arts are drawing, painting, sculpting, graphics, and so on.

But now, the hugely popularity of the fine arts has also encompassed some other types of arts or activities, which are termed as the Visual Arts. Some most prominent types of visual arts are the following ---

Pottery and jewelry designing

Crafting with wood or metals

Printmaking and filmmaking

Decorative handicrafts

Poetry and literature

People engaged in the fields of fine arts and visual arts are generically termed as being artists.

On the other hand, the Performing Arts are those arts which are performed using certain talents/skills by the performers before the public audience. The most common examples of performing arts are

Drama and theatre

Music and instrumental performances

Magic and illusion acts

Oratory and recitation

Mime and musical theatre

The people who are active in the field of performing arts are generically called as performers (and not artists).

The foregoing serves for making difference between fine arts & visual arts and the performing arts, for informational help to the readers. Additionally, one broad distinction may also be made as the following :- for fine arts and visual arts, the artists use paint, canvas, and other materials to create the art objects; on the other hand, for the performing art, a performer uses his/her voice or specific bodily gestures to present artistic expressions or entertain the audience.

Courses Offered by Mangalayatan University's Department of Fine Arts and Visual Performing Art

Prestigious, discerning, and innovative Mangalayatan University (Aligarh) conducts a wide range of high-quality and prolific courses in fine arts, visual arts, and the performing arts, to help the interested students and artists & performers. After completing these courses, which are offered at varying academic levels, the students are able to get progressive and well-paying jobs in the fields of academia, advertising, media & entertainment industries, graphics and animation, drama houses and theaters, music videos & video games, fabric industries, and film production houses.

The Department of Visual and Performing Arts, which is a very important academic departments of

a broader faculty division of the university, named as the Faculty of Humanities, at present conducts the following courses in these fields ---

The diploma in fine arts (D.F.A) - 1 Year Program

The diploma in animation - 1 Year Program

The diploma in digital arts - 1 Year Program

The bridge course in fine arts - 1 Year Program

The bachelor of fine arts (B.F.A) - 4 Year Program

6The master of fine arts (M.F.A) - 2 Year Program

And, the doctoral courses of M.Phil. and Ph.D. in these fields.

Currently, theBFA admisisonandMFA coursesare offered in the areas of painting, applied arts, instrumental music, and the vocal music. Soon many other areas and many new courses in these disciplines will be started by the mangalayatan university (MU), to meet the ever-growing demands of students, artists, and performers located in the northern India, other regions of the country, and many foreign countries. To know about the admission open in fine arts and visual and performing arts at Mangalayatan University (MU), please call/WhatsApp at +91-9359-555-55.

The syllabus of each of all above-mentioned courses is comprehensive and profession-oriented, and the teaching and training are provided by well-experienced and renowned teaching faculties in their respective fields. Guidance for development of professional skills and career is also offered to the pursuing students.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/why-is-integrated-ba-bed-better-than-a-separate-ba-and-then-a-bed.html>

=====

An Integrated Course is the full-time academic course which offers two significant academic degrees after its completion. Some examples of such integrated courses are (BA+B.ED), (BA+LLB), (BBA+MBA), (B.Tech+M.Tech), etc. For past many years in India, the integrated courses have been gaining fast and huge popularity, including particularly the integrated courses mentioned above, over pursuing two separate degree courses one by one. This statement also gives answer to the question "why is integrated ba-b.ed better than a separate ba and then a b.ed, to enlighten the students in general.

According to academicians, professionals, and industry experts, the following are the main features which render the integrated courses better and preferable to undergoing two separate degree courses subsequently: ---

Generally, an integrated course saves one grand year of the student.

Students can start right after class 12th, and achieve two degrees at the end of the course.

Integrated courses may be available in a variety of combinations, hence, choice of subjects is also available.

Generally, the integrated course offers more comprehensive and in-depth knowledge, and there is

no repetition of study materials.

In case of the two separate degree courses, the student has to undergo admission and selection procedure twice; the student may also need to change the institution.

Boost your Future Career with the B.A B.Ed Program

B.A B.Ed Program

Why is Mangalayatan University a Best Option for Education/Teaching Courses in India?

Well-established adjacent to Aligarh city, Mangalayatan University is now a quite eminent name for superlative and impeccable education & teaching courses offered at diverse academic levels, particularly in the northern India. Duly recognized by UGC, this fast-prospering university offers the following education courses as per the provisions and regulations of the NCTE (National Council for Teacher Education). Conducted expertly and dedicatedly by its Institute of Education & Research (IER) of the university, these teaching courses are the following ----

B. Ed (Innovative)

Integrated BA-B. Ed

Integrated B.Sc. - B. Ed

Integrated B. El. Ed

And M.Phil. & Ph.D. (Education).

The B.Ed innovative course just takes only 1.5 years, while the M.Ed lasts for two years. The integrated courses are designed compactly to take only four years each, while the doctoral courses in education individually take at least three years. Currently, applications are being invited for admissions to its all courses excepting the doctoral research courses in education & teaching. Among the integrated courses of Mangalayatan University, the most popular are the integrated BA B.Ed admission and the B.Ed admission.

In order to prepare highly talented, innovative, and punctilious teaching professionals, MU offers the above-mentioned courses which are well-embellished with the following features --- opulent and compact study curricula, teaching by veteran and innovative professors and research experts, lavish and hi-tech academic infrastructure, reasonable course fees, and the ever-growing national and international reputation of Mangalayatan University.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/what-is-the-difference-between-hotel-management-and-hospitality-management.html>

=====

The broad tourism & hospitality industry/sector encompasses both the hotel industry and the hospitality industry. Today, the tourism & hospitality sector is one of the highly significant economic sectors in any well-developed or fast developing country, inevitably including fast-paced India. This ever-growing sector contributes over 10% to the global GDP, along with employing a massive number of professionals, executives, and administrative & sportive staff. The paragraphs below, offer concise but sumptuous information about the hotel and hospitality industries, difference between hotel management and hospitality management, and the various jobs and career options available after completing courses in these fields in India and abroad. Moreover, the lower section contains very beneficial information about the qualities of diverse

courses conducted by prestigious Mangalayatan University (Aligarh) of North India in service to both these industries.

The term hotel management admission is mainly concerned with the efficient and impeccable management of all various operations & activities of a hotel or a lodging-related public establishment. Thus, a course in hotel management teaches the management techniques applicable to the various operations of such an establishment, like administration, housekeeping, catering, maintenance, marketing, etc. Hence, hotel management focuses primarily on managing all aspects related with the proper functioning of a hotel or hotel industry.

On the other hand, the Tourism and Hospitality Program is all about flawless and satisfying administration and management of any of the diverse industries encompassed by the hospitality sector. The various industries or segments covered by the hospitality sector are the following --- Hotels, Restaurants, and Resorts; Travel & Tourism; Events Management; Relaxation Industry; Food & Beverages Industry; etc. Thus, the hospitality management equips the students with necessary knowledge and skills for hospitality administration in the concerned industry/segment of the broad hospitality sector.

Again, since the hospitality management covers a wide range of industries, it offers abundant career opportunities to the students/professionals at varying hierarchic levels, including the posts of hotel/restaurant manager, events manager, executive chef, accommodation manager, catering manager, casino manager, and so on. However, after completing a diploma or bachelor's degree in hotel management, accessible are jobs only in the hotel domain such as hotel/resort manager, catering or housekeeping staff, and so on. Lastly, it is generally seen that in the hospitality sector, even the entry-level jobs pay well; and in the hotel industry, the salaries of professionals grow with increasing experience.

Why Should Students Consider MU for Hotel and Tourism & Hospitality Management Courses?

Steadily prospering and highly renowned Mangalayatan University (MU), which is an eminent university in the northern India with its prominence expanding fast nationwide and internationally, conducts many top-notch and professional courses in both the fields of hotel management and the hospitality management. Pursuable after (10+2) standard, these courses are the following ---

Diploma in Hotel Management – DHM (duration – 1.5 years)

Bachelor in Hotel Management -BHM (duration – 3 years)

Diploma in Tourism & Hospitality/Culinary Arts (duration – 1 year)

Advanced Diploma in Tourism & Hospitality/Culinary Arts (duration – 2 years)

Bachelor of Vocation (B.VoC) in Tourism & Hospitality/Culinary Arts (duration – 3 years)

These highly admired courses are expertly conducted by its Department of Tourism & Hospitality Management, which was established in 2023. The curriculum of each of all above-noted courses is rich & comprehensive but compact, and up-to-date with the modern requirements in the concerned industries. In addition to theoretical knowledge, practical and industrial training is also facilitated by the university, along with guidance for development of personality and professional career. Visionary MU was established in 2006 and is a duly recognized university by UGC. Again, its membership with AIU helps the university in making its various courses in almost all very popular professional disciplines of international standards. Lastly, its Training and Placement Cell (T&P Cell) is highly efficient and responsible, with promising contacts and rapport with over 300 companies, MNCs, firms, and organizations located in India and abroad. These all impressive features of the hotel and hospitality management courses of MU make these hugely popular and famous in the northern India and beyond.

For Admission in Hotel and Tourism & Hospitality Management in Mangalayatan University

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/3-main-reasons-why-should-you-pursue-a-degree-in-journalism-mass-communication.html>

=====

In today's world of well-developed and ever-refining communications and information technologies, careers in the sector of mass communication and journalism (MCJ) are undoubtedly fast progressive, well-paying, and illustrious, provided that the professionals (in this sector) are creative, eclectic, and duly sophisticated & discerning. Again, this vast and varied sector has many segments to provide bright and booming employments and careers at varying hierarchic levels. Consequently, now a large fraction of students opt for entrance into the world of MCJ, after 10+2 or graduation. These matters are illustrated further separately in the paragraphs below.

Journalism and mass communication course is all about presenting certain creative or significant information to a large and eclectic population eloquently and responsibly, using any of the various means of communication. The motive of such communication could be providing necessary information or education, motivation or entertainment, or any fertile support for success or growth. In general, the various segments in the sector of MCJ are the following --- print & electronic media, audio-video production, radio & broadcasting, photography, advertising, public relations, event management, filmmaking, and the new media.

The following are 3 main reasons for the ever-growing popularity of and preference to rich and prolific courses in MCJ in India and abroad ----

A Strong Platform for Expressing Oneself and Expanding One's Network -For a person who loves writing/any art, experimentation & research, and expressing one's mature views on various matters of social and national importance, the field of mass communication & journalism is really very promising and satisfying. This profession will also enable him/her in building ever-expanding network with other like-minded people, along with earning name, fame, and wealth. This sector also offers abundant opportunities for travelling, researching, and exploring to broaden one's horizons.

Offers Multiple Career Options -This vast and dynamic sector offers a rather wide range of career options as journalists, press reporters and editors, publishers, photographers and videographers, public relations executives, script and copy writers, filmmakers, event managers, advertising professionals, news readers and anchors, orators, marketing professionals, film critics, fashion communicators, corporate PR professionals, and many more. Any of these careers can be chosen based on one's specific interest, capabilities, and ambition in life.

Helps in Leading an Illustrious Professional and Social Life -For an aware citizen who is creative, ambitious, and fond of living a benevolent life, the field of MCJ is very suitable. Along with earning professional success, renown, and wealth, he/she can also serve the society and the nation at large, by choosing an apt career in the sector of mass communication and journalism.

Thus, careers in mass communication and journalism also offer the satisfaction and privilege of serving the society and nation, besides the personal and professional creativity and satisfaction.

Boost your Future Career with the B.J.M.C Program

Why Should Students Prefer Mangalayatan University for BA/MA in Mass Communication and Journalism?

In north India, highly renowned and prosperous Mangalayatan University (MU) has been hugely popular and widely famous for ace and cutting-edge courses in mass communication and journalism which are conducted at levels ranging from undergraduate to doctoral. Not only the northern India, students and professionals belonging to other regions of the country and abroad, also come to MU every year in large numbers to pursue these MCJ courses of international standards. Here, information about only its mjc admission, is being provided to help the interested or ambitious students and professionals.

Well-resourced and innovative MU of Aligarh offers all affluent education, professional guidance, and training & placement facilities to the pursuing students, to make them ready for quick and lavish employments in diverse segments of the sector of MCJ. Moreover, the overall cost of each of these bachelor's and master's degree courses in mass communication & journalism is just reasonable and hence easily affordable by all. MU is duly recognized by UGC and has been a vibrant member of AIU. Spread over 70-acre, its magnificent academic infrastructure has been offering top-notch, employment-friendly, and innovative courses in almost all technical and non-technical disciplines since its inception in 2006.

Currently, sincere and solemn applications for its mjc admission as well as mjc admission 2019 are invited from all over India and abroad. All necessary pieces of information related with these admissions 2019 may readily be found just by visiting its website (University's website).

SOURCE (WEB): <https://www.mangalayatan.in/blog/why-are-careers-in-pharma-courses-trending.html>

=====

At present, the pharmaceutical industry is one of the fastest-growing industries in India and other rapidly developing countries of the world, including the BRICS countries. According to industry experts, the size of the global pharma industry is expected to reach the level of \$ one trillion by the year 2024, and the continent of Asia will account for around 65% of the total global sales in the pharmaceutical industry. As far as the Indian pharmaceutical industry is concerned, it ranks third in the Global Pharma Index. Hence, the careers in pharmacy course industry are now rather bright, fast-progressive, and well-paying in India, Asia, and other fast-developing countries worldwide.

Key Growth Drivers of the Pharma Industry

Constantly getting refined medications to a rather wide range of existing diseases

Regular discoveries of many new ailments and diseases every coming year

The need to curb the rising cost of healthcare

Intense competition among pharma companies at regional, national, and international levels

And, fast emerging markets (such as BRICS) for the existing as well as new pharmaceutical drugs and products.

The above-mentioned growth drivers in the pharma industry of India or abroad imperatively necessitate the following: employment of highly talented and innovative pharma professionals at varying hierarchical levels; highly qualified and research scientists to meet the requirements of new research avenues in the sector of pharmaceuticals; and cost-effective production and diversification of pharma products to cater to the existing and new markets. The foregoing

explains the affluence of career options after pharma programs at different academic levels.

Pharma Courses Offered by Mangalayatan University, Aligarh

As Mangalayatan University is a visionary and fast-progressing university in northern India, it duly considers all the above-noted scenarios and requirements (existing and emerging) of the pharmaceutical sector of India and abroad, and consequently, it conducts top-notch and highly professional pharma courses at varying academic levels. It has also been observed that the number of students pursuing pharma programs in India grows every year by over 25%. Also, India is at present one of the largest exporters of pharma generic drugs in the world.

Well-resourced and up-to-date Mangalayatan University (MU) of Aligarh conducts the following courses in pharma to help ambitious students and professionals ---

Pharmacy Programs Offered at MU:?

Diploma in Pharma (D. Pharma);

Undergraduate course in pharma (B. Pharma);

Postgraduate course in pharma (M. Pharma);

Doctoral Research courses in pharmaceutical sciences (M.Phil. and Ph.D.).

Currently, for the session 2025-26, MU invites sincere applications for its mpharma, bpharma, and pharma courses admission from students across India and abroad. All these courses are duly approved by the Pharmacy Council of India (PCI).

It may also be just mentioned that for bpharma admission, MU has been a very popular university in Uttar Pradesh.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/5-main-reasons-for-steadily-booming-architecture-industry-in-india.html>

=====

The architecture industry of India, which gives elegant and highly impressive structural designs to buildings and other concrete structures in various sectors, has been steadily prospering to make India well-developed and glamorous, and also to open doors to a variety of career opportunities in the industry.

In general, the following are the most prominent sectors utilising the modern structural designs and models

Homes and Offices

Residential Apartments and Complexes

Buildings in the Commercial and Retail sector

Companies, Industries, and Industrial Complexes

Buildings in the Tourism & Hospitality and Entertainment sectors

Urban Development and Infrastructure

Educational Institutions and Universities

Hospitals and other Public-serving entities

Roads, Highways, and Flyovers

And, concrete structures in other sectors.

Read Also -What Should be the Priorities of Today's Architecture Courses

Thus, the ambit of the architecture industry in India or any other fast-developing country is rather extensive, and creates copious jobs every year.

Top 5 Main Reasons for the boom in the Architecture Industry of India at present and in future years

Glowing Incomes and Luxurious Lifestyles

Fast-paced Industrial and Economic Growth

Boom in the Commercial and Retail Sectors

Ever-growing Domestic and International Tourism

And, Steady Urban and Infrastructural Developments

Hence, undoubtedly, the future in the architecture industry in India is presently rather bright and growth-oriented. For serving in all above-mentioned sectors, architects are imperatively required at diverse hierarchical levels, including the Architecture Engineers/Designers, Architectural/Technical Assistants, Project Assistant Managers, Data Analysts, Interior Designers, Architectural Historians/Journalists, and Landscape Architects.

Consequently, now a considerable fraction of students prefer for b.arch course after completing their 10+2 education, in order to build booming and well-paying careers in the Indian architecture industry. But, for meeting these objectives, the pursued architecture course must be adequately affluent and innovative.

Giving due weightage to all above-mentioned facts and factors, prestigious Mangalayatan University (MU) of Aligarh conducts a rather rich and professional B.Arch course at present. Soon, master's and doctoral courses in architecture, engineering & technology will be started. The B.Arch course of Mangalayatan University is duly approved by the Council of Architecture (COA).

Currently, information about its b.arch admission may readily be found on its website. In addition to well-rounded theoretical knowledge in architecture, engineering & technology, MU also offers necessary practical and industrial training to the pursuing students, guidance for developing professional skills, and placement services to talented students.

Mangalayatan University is at present a hugely famous and reliable university in northern India with ever-expanding prominence nationwide and internationally. According to MU, in addition to abundant disciplinary knowledge, the students of architecture and engineering are now also required to design models which meet the modern requirements of better durability & sustainability, cost-effectiveness, appealing aesthetics, increased safety, and energy-efficiency.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/career-scope-after-architecture-courses-priorities-of-todays-architecture-courses.html>

=====

The vast and varied discipline of architecture is mainly associated with the planning, designing, construction, and maintenance of the various types of buildings and other physical/concrete structures, strictly as per the requirements and preferred aesthetic looks. These concrete structures may range from homes and offices to the residential, commercial, and industrial complexes. Structures associated with the urban development and town planning may also be encompassed by architectural engineering. More information about the career scope after architecture degree courses in India and abroad, is provided separately under the section just below.

In today's world of architecture, the most prominent and preferable necessities and expectations are the following in connection with the above-mentioned categories of building structures

Stronger and securer construction and architectural designs

Cost-effectiveness

Highly impressive and innovative architectural designs

Increased safety considerations

Stunning and advanced aesthetics

Energy efficiency

Conformance to requisite lifestyle, comfort, and luxury

Eco-friendliness

Advanced but sustainable architectural engineering & designs

Hence, the priorities of today's architecture courses are undoubtedly to incorporate all above-noted requirements and niceties into the modern curricula. Again, these architectural courses must be supported by proper disciplinary and industrial trainings and updated information related with the prevailing as well as fast-emerging architectural trends. Mangalayatan University of Aligarh does take into account these all requirements of the modern courses in architecture engineering and technology. Exclusive information about the b.arch admission in mangalayatan university is provided separately under the lowest section of this blog.

Also Read-Why Students Prefer B.Arch Course after Completing 12th

Career Scope After Architecture Degree Courses

After completing a sumptuous bachelor's or master's degree in architecture, a technocrat can

easily find a fast-progressive and well-paying job in a variety of professional settings. Apart of these, he/she can also work as an independent architect or build one's own business in the field of architecture. The most prominent avenues for employment to the architects are the following --- construction and urban development companies, public works departments, interior designing, upkeeping of historical & architectural heritages, media, and personal architecture firms. In construction, urban development, and interior designing sectors, architects have to erect and decorate the following building structures --- homes, offices, residential apartments, industrial complexes, buildings in the retail sector, building in the hospitality and entertainment sector, hospitals, stadiums, and so on. However, the post and salary packages of the architects will depend upon the factors mentioned in the lower section. In general, the posts/designations achievable by the architects (based on their levels of degrees) are the following

Architecture Draftsman/Designer/Engineer

Technical/Architectural Assistant

Project Assistant Manager

Architectural Historian/Journalist

Landscape Architect

How Mangalayatan University Supports the Architecture Industry

At present, only the B.Arch. Bachelor of Architecture course is conducted by prestigious Mangalayatan University of Aligarh. Soon, affluent and innovative courses in architectural engineering & technology for offering the master's and doctoral degrees will be started. The B.Arch. course of mangalayatan is of 5-year duration and is rather rich in curriculum, and is duly approved by the COA (Council of Architecture).

As far as its b.arch course is concerned, well-resourced and ingenious mangalayatan university (MU) also provides practical and industrial training and guidance for development of professional skills and acumen, in addition to the affluence and well-rounded theoretical knowledge in the discipline. As the field of architecture is closely associated with engineering & technology, art, aesthetics, and imaginative thinking, these facts are also taught to the pursuing students, to imbibe in them the necessary professional skills, disciplinary creativities, and admirable caliber.

Efficiently supported by a world-class academic infrastructure and erudite and mellowed teaching and research faculties, MU strives for opening new horizons in the sector of architecture in India in coming years. Again, through including the master's and doctoral degree courses, and offering in those, the same quality of teaching and training, MU desires to become a widely renowned and best architecture college in India, particularly in the northern India in near future. Information about itsarchitecture courses admissionmay be readily found just through visiting its website.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/how-a-bachelor-of-technology-b-tech-degree-can-accelerate-your-career.html>

=====

A Bachelor of Technology Degree (B. Tech Degree) is much more extensive and in-depth as compared to a diploma in any particular discipline of engineering. Hence, the B.Tech. A degree in the concerned engineering stream is undoubtedly the most suitable and fertile degree for forging ahead in the relevant industry in India or any country abroad. Again, theb.tech degree coursemust be sufficiently rich in curriculum as well as supported by necessary practical and

industrial training, to make the pursuing candidate duly employable and progressive.

Then, for further career growth required will be current information related to the concerned industry, including the latest technologies used, growth trends, and future scenarios. Support of senior professionals and industry experts will also be required from time to time for prospering steadily in one's professional career. Later on, the technocrat can thrive fast based on his/her experience, competency, hard work, and further higher education in the discipline. Thus, in a nutshell, an affluent and employment-friendly b.tech degree taken from any well-resourced and prestigious university/institute is certainly highly elegant for accelerating one's career in the concerned field/industry.

Ambitiously well-founded and prestigious Mangalayatan University, which is located adjacent to the city of Aligarh (Uttar Pradesh), is one such widely renowned university, particularly in northern India, for such superlative and propelling engineering degrees in various hugely popular disciplines. More information about its B.Tech courses in many different engineering disciplines, along with the btech courses scope, is exclusively provided under the lowest section of this blog.

Read Also-Which Degree Course is the Best: BCA or BTech CSE after 12th Grade?

The Current Scenario of B.Tech Education in India?

At present, though India is one of the largest producers of engineers in the world, it is still suffering from the shortage of high-quality engineering education and proper industrial and professional training. Consequently, the majority of its engineering graduates have poor employability. This fact is also supported by a study performed by 'Aspiring Minds' (an employability assessment company) in 2017, which concluded that about 95% of India's engineers were not fit for jobs in software development. Such an astonishing report was also published by McKinsey about a decade ago, stating that just about one quarter of the engineers in India were actually employable then. Thus, to improve the current scenarios in India's engineering education, its substandard engineering education and training must be replaced by high-quality education of international standards. Prestigious and innovative Mangalayatan University of Aligarh is well-equipped and dedicated to offering such ace-quality engineering education in various hugely popular engineering disciplines, as it has been doing for decades.

The main reason for the low to substandard quality of engineering education in India has been the fast growth of low-quality engineering colleges in India for the past many decades. These deficient and incompetent engineering colleges & institutes are in addition to the IITs, NITs, and other highly prestigious universities and institutions (conducting courses in engineering & technology, and applied engineering & sciences) of national and international prestige. Today, the majority of big and booming companies prefer to employ engineering graduates from these renowned institutions or require high GATE scores.

The consequent results of the low employability of engineering graduates in India may be seen in the ever-increasing number of seats remaining vacant in a large fraction of private engineering colleges, and in the closure of over 100 low-quality engineering colleges every year in India, caused by the declining magnitude of engineering admissions and stricter rules of AICTE. According to the AICTE, around 75000 engineering seats remain vacant every year in the entire country; around 150 engineering colleges get closed annually; and less than half of the engineering graduates of the country find jobs through campus placements. As per a new rule of AICTE, engineering colleges which lack proper infrastructure and get less than 30% admissions for five consecutive years will have to be shut down.

How Mangalayatan University Aligarh Strengthens the Engineering Sector?

A widely famous university of the north India, fast-paced and innovative Mangalayatan University (MU) of Aligarh has been conducting ace-quality and fully professional btech courses in engineering & technology in many hugely popular engineering streams at the undergraduate,

postgraduate, and doctoral levels. Meritorious students belonging to nearby States and other States across India have been harnessing these courses of international standards and fast employability. So far, the proactive, well-connected, and responsible Training & Placement (T&P) Cell of MU has lavishly placed its numerous highly talented and innovative engineering graduates in over 300 companies located in India and abroad. Set up in 2006, visionary MU is duly recognized by UGC, has been a dynamic member of AIU, and has bolstered promising academic collaborations with numerous Indian and foreign universities and institutions, the majority being well-established in India, China, and Canada. Again, a large number of its engineering faculties and research scholars have published their enlightening and innovative research papers in many journals and magazines of national and international fame, so far, besides attending many engineering seminars and conferences in entire India. MU has been recognized as the "most promising engineering institute in Uttar Pradesh" by the Ranking 2019 of Jagran New Media.

As far as the Bachelor of Technology? courses are concerned, MU at present offers affluent and employment-boosting B.Tech in civil engineering, mechanical engineering, computer science engineering, and electronics and communication engineering; many new streams will soon be included. Btech admission open in Mangalayatan University. The engineering courses of MU are well-supported by state-of-the-art laboratories, computers & IT facilities, relevant latest technologies, well-stocked libraries, workshops & industrial training resources, training & placement (T&P) cell, and a well-structured mentorship program, in addition to top-notch theoretical knowledge and updated industry information.

Compact and 3-year b.tech CSE lateral entry courses are also conducted in above-mentioned engineering streams. Also, to help ambitious students, its centre for development of personality & professional skills and career guidance provides well-rounded guidance regarding the career after the Bachelor of Technology and subsequent career growth. Lastly, for higher education after btech, well-equipped MU has also been a prominent and perfect choice in northern India.

the aim of increasing awareness about heart health. In which the students actively participated to understand the

providers may recommend iron supplements. These should be taken under medical supervision. Encourage students to take iron supplements with vitamin C-rich

Regular Health Screening : Schools can implement regular health checks to

identify students at risk of anemia, especially girls, athletes, and those with dietary

Educational Programs :Schools and communities can organize workshops. - Nutrition education

Impact on Academic Performance and Well-being

Iron deficiency anemia can have a profound effect on students'

academic and social lives:

- Cognitive Impairment Iron is essential for brain function. A deficiency can lead to decreased attention span, impaired memory, and slower cognitive processing, affecting learning and test

- Reduced Physical Stamina Fatigue can lead to decreased participation in physical education, sports, and other extracurricular activities.

- Emotional and Behavioral Changes Students may experience mood swings, irritability, and social withdrawal, impacting their interactions with peers and teachers.

- Increased Absenteeism Frequent illnesses due to a weakened immune system may cause students to miss school, leading to academic challenges.

Causes of Iron Deficiency Anemia in Students

1. Poor Dietary Habits
2. Increased Nutritional Needs During
3. High Levels of Physical Activity
4. Socioeconomic status

Symptoms of Iron Deficiency Anemia

- Fatigue and Weakness
- Pale Skin
- Shortness of Breath
- Dizziness and Headaches
- Poor Concentration Difficulty focusing

- Cold Hands and Feet feeling unusually cold
due to poor blood circulation.

A two-day national seminar sponsored by the Indian Council of Historical Research has been
organized by the Department

of Visual and Performing Arts at Mangalyatan University. The aim of the national seminar
organized on the topic of the role

of Indian visual and performing arts in preserving traditional heritage was to understand the
interrelationship between art,

culture and society and to encourage innovation through discussions. Art experts, researchers
and students from all over the

country were invited to the seminar and they shared their views and experiences.

The chief guest at the seminar was Prof. Lovely Sharma, recipient of the Kala Bhushan Award and
former Vice Chancellor

of Raja Mansingh Tomar Music University. The keynote speaker was Prof. Pankaj Mala Sharma,
recipient of the Music

Service Award, special guest was Director of Mewar University Prof. Chitralkha Singh, special
guest was National Award

winner Dr. Rambali Prajapati. Guests in the second day's session were Mr. Awadhesh Pratap
Singh, ICHR Coordinator Dr.

Ved Prakash Singh and Dr. Arka Dev Bhattacharya. During this, Co-Director of ICHR Dr. Vinod
Kumar was present. Dr.

Poonam Rani was the coordination of the event.

t. Debashish Chakraborty, Associate Professor of Mangalayatan

PUUniversity, famous for the wonderful coordination of Indian classical

music and ragas, has succeeded in making a very easy and small model of

Indian slide guitar. In this manufacturing process, he has taken care of many

important technical and classical aspects, making this instrument more attractive and easy to use. It will not only be a musical instrument, but will also provide a new experience to music lovers.

angalayatan University's

l i b r a r i a n D r . A s h o k

Kumar Upadhyay's latest

book 'Application of ICT in Library and Information Center' was released.

The book was released by Dr. Vikram

Sharma, University Librarian, Central University Himachal Pradesh. The book explains how digital technology is transforming libraries, focusing on tools such as digital cataloging, OPAC and digital libraries.

Infertility counseling camp was organized under the joint aegis of Paramedical Institute of Vocational Education and Nova IVF Fertility of Mangalayatan University.

In the camp organized in Mangalayatan Hospital, free counseling related to infertility was provided to the married people. Infertility specialist Dr. Keya Parashar Jain gave proper counseling to the people after conducting preliminary examination. He told that IVF is no less than a boon for childless parents. But due to lack of awareness, people are deprived of the happiness of having children. Patients who came to the camp will also be given free TVS ultrasound. Director Prof. RK Sharma told that the purpose of the camp was to make people aware about infertility.

Department of Agricultural of Mangalayatan University Celebrated World Food Day in which the Head of the Department, Prof. Pramod Kumar, told how important food preservation is for us and in which ways we can preserve food. Dr. Akanksha Singh shared information about balanced diet and hunger index. On this occasion, students of the department Gunjan, Satyam, Anjali,

Suraj, Vivek also expressed their views on food preservation. Second year student Shalini took an oath to preserve food items that are wasted in various ways. On this occasion, Prof. Ajay Kumar Dubey, Dr. Pawan Kumar Singh, Dr. Mayank Pratap, Dr. Pratyaksh Pandey and Pankaj Kumar etc.

Five talented students of Mangalayatan University, a leading institute in the field of higher education, have been shortlisted for jobs. The selected students have got a prestigious place in a renowned company Learning Roots with a package of 6.06 LPA. Giving this information, Training and Placement Incharge, Dr. Vipin Kumar, said that the students were selected during the recently organized placement drive. The success of these students reflects the university's commitment to providing quality education and preparing students for skills in the era of competition. The university's academic curriculum and industry-oriented training programs have enabled students to excel in various fields. Students of the first semester of the Department of Tourism and Hospitality Management of learned the tricks of food production. During this, they demonstrated the skill of preparing Mughlai sweets. The students mastered the preparation of Mughlai sweet

Though industrialisation plays a very important role in the social and economic development of a nation in many ways such as providing employment to masses; increasing income of people; improving agricultural productivity by mechanization; etc., industrialization is also a significant factor leading to degradation of the environment. Burning of coal and fossil fuel; discharging harmful chemicals and gas in water, soil and atmosphere; dumping hazardous wastes including e-wastes and radioactive wastes; causing noise, air and water pollution; depleting water level; depleting fertility of soil; excessive extraction of minerals and natural resources; global warming; climate change; etc. have threatened sustainable development. Brundtland Commission defined sustainable development as “development that meets the needs of the present without compromising the ability of future generations to meet their own needs”. Indian Government has adopted various measures for

promoting sustainable development. One such measure has been taken under Companies Act 2013 by making CSR a legal obligation for certain class of companies and including promotion of sustainable development as one of the permitted activities under CSR. In this paper the authors attempt to study the impact of industrialization on environmental sustainability, the concept of corporate social responsibility (CSR), and how CSR contributes in promoting environmental sustainability.

Keywords : Corporate Social Responsibility, CSR, Sustainable Development, Industrialization, Industrial Development, Sustainability, Environment Degradation, Companies Act

IMPACT OF INDUSTRIALIZATION ON
ENVIRONMENTAL SUSTAINABILITY AND

THE ROLE OF CORPORATE SOCIAL RESPONSIBILITY

1 Women's Empowering through the Ages In India Gyaneshwari & Dr. Saqufta Praveen 0975-802X

Journal of Economics

Ravindra Bharati University.

2 Empowering women in colonial India: A struggle for

Gyaneshwari & Dr. Saqufta Praveen 0973-855X Madhya Pradesh Journal of

Madhya Pradesh Institute of

Social Science Research.

Studies on stower veild of Maizeworth baral application

Kumar Gaurav, Sharada Dubey, &

Podwar Garima 2320-7035 International Journal of Plant

and soil science

4 Feeding the future: Vertical Farming and Urban

Vikas Yadav & Sharada Dubey 1001-4055 Journal of Propulsion technology Director of the China Aerospace

Electromechanical Group

Market performance of colliflower in Eastern Uttar

Pawan Kumar Singh

2349-9400 Journal of Crop and weed

Crop and Weed Science Society,

Seedling sustainability: Innovative practices in modern

Dr. Akanskha Singh & Dr. Pramod

Kumar 1001-4005 Journal of Propulsion technology

Director of the China Aerospace

Harvesting health: The role of natural - rich crops Dr. Akanskha Singh & Dr. Pramod

Cultivating change: Women in agriculture breaking

Mayank Pratap & Vikas Yadav

1001-4005 Journal of Propulsion technology

Blossoming profits: The business of flowering farming Dr. Pramod Kumar and Sharada

Dubey 1001-4005 Journal of Propulsion technology

10 A study of dry flower extracts of tagetes erecta as herbal

pesticides on larval mortality and emergency of agrotis

Saurabh Mishra & Ravi Shekhar 2063-5346 European Chemical Bulletin ECB, Journal

11 Investigating flavonoid extracts from medicinal plant

evaluating their anti-cancer potential, mechanism and

synergistic impact on colon cancer

Saurabh Mishra, Ravi Shekhar &

Sharada Dubey 0253-7214 Journal of advanced Zoology Association Advancement

Influences of the moringa olifera seed on

corcyraephallonica rice moth damaging rice lepidopteras

2515-8260 European Journal of Molecular

and Clinical medicine

European Journal of Molecular &

Clinical Medicine, London

Studies on growth and yeild of Oyester mushroom

(Pleurotus Ostreatus) grown under different leaves layer

with difference leave of wheat straw

Sharad Dubey, Saurabh Mishra,

Promod Kumar, Pushpa Yadav &

Vijay K. Pathak

2277-7695 The Pharma Innovation Journal

The Pharma Innovation, New

Production and Optimization of Astaxanthin by Phaffia

rhodozyma under Submerged Fermentation

Soni Singh, R. Samanta, BP Panda,

B Mishra, Swarnim Rai 1006-7043 Journal of Herbin Engineering

Metagenomic Study for the Diversity Analysis of

Soni Singh, R. Samanta, Ravi

Shekhar, B Mishra, Swarnim Rai 1006-7043 Journal of Herbin Engineering

In-silico exploration of cyanobacterial bioactive

compounds for managing diabetes: Targeting alpha-

amylase and beta-glucosidase

Afreen Khanam & Arbab Hussain

2949-866X Inteligent Pharmacy

Therapeutic Efficacy of Natural Product 'C-Phycocyanin' in Alleviating Streptozotocin-Induced Diabetes via the Inhibition of Glycation Reaction in Rats Arbab Hussain and Afreen Khanam

1422-0067 International Journal of

molecular sciences

A Perspective on the Impact of Advanced Glycation End

Products in the Progression of Diabetic Nephropathy

1389-2037 Current protein and Peptide

Bentham Science, Netherland

Uncertainties, phototoxicity, health impacts, and
agricultural and environmental concerns of nanomaterials
in the food industry

Arbab Hussain and Afreen Khanam

978-0-323-99682-2 Nano-technology and nano-
material in agricultural industry

Tips to Help Keep Your Children Healthy During the Winter

This the season for runny noses, fevers, and germs everywhere: winter. As parents, we often dread the cold and snowy months. it's usually the time of year when so many of our kiddos get sick. There are steps you can take to help your kids stay as healthy as possible through the winter. Some germs will undoubtedly make their way into your home. It may be unavoidable. When it comes to winter health, there are some things you and your children can do to try your best to leave those germs behind and lessen the risk of getting sick.

General Winter Health Tips for All Children

- Teach good handwashing techniques.
 - Teach your kids 'cough etiquette.'
 - The American Academy of Pediatrics describes recommends teaching children to turn their heads and cough or sneeze into a disposable tissue or the inside of their elbow
- #### How to Handle Specific Medical Conditions

Unfortunately, washing your hands and getting a flu shot won't help you avoid other health problems that can be triggered by winter weather. You or your children may have conditions that are exacerbated during the winter months.

Dry Skin : A lack of humidity from the cold, dry air outside and the warm, dry air inside often leads kids to have itchy, dry skin during the winter. This can especially be a problem on a child's hands, which is made worse by frequent hand washing, and around his mouth (perioral dermatitis). Using

a mild soap or soap substitute when your child bathes and then quickly applying a moisturizer for eczema within a few minutes can help to avoid and treat dry skin. You may have to reapply the moisturizer several times during the day

Eczema: Kids with eczema often have red, itchy skin year-round, but it can be worse in the winter. Talk to your child's pediatrician if your usual eczema regimen isn't working during the winter. They can give you advice on treating hard-to-control eczema, especially if using a topical steroid and moisturizer isn't working to control your child's

Nosebleeds : When caused by dry air, nosebleeds can be prevented by moisturizing your child's nose with saline spray or a nasal gel each day. Keep in mind kids can also get nosebleeds when they have colds, sinus infections, or

Winter Health Safety

There are other safety issues to take into consideration during the winter months. When the weather gets cold, not only do you have to dress your children appropriately. But the furnace and fireplace go on, bringing in another set of issues. Don't skip over these tips for making your home safe for your kids, and yourself.

Install a carbon monoxide detector: Everyone should do this in general, but it's extra important if you use a fireplace or other non-electric heating source. Test your home for

Keep your kids physically active during the winter: It is often too cold for outdoor sports unless you live in an area where you can play hockey, kabddi or regularly go for play.

Kids can stay active in the winter by taking up an indoor/outdoor games sport, such as kabddi, kho-kho, tennis

,badminton,or regular games.etc.

Dress kids appropriately for the cold weather: You should typically add one extra layer to whatever an adult would wear to be comfortable. Kids should wear several layers of loose-fitting, light, tightly woven clothing under a heavy jacket to keep them warm when they are outside. Don't forget mittens or gloves, a hat, a scarf, and waterproof boots, especially if they are going to play in the snow.

Eat Fatty Foods

It is often said that eating foods rich in oil or ghee is good for winter. Many people in North India eat more of foods rich in fat content during the winter because the body loses fat in winter and skin becomes dry. In order to provide some moisture to the skin, one can prepare foods with cream, butter, oil, ghee, etc. There is no harm providing parathas, eggs, etc to children in winter. Eggs generate heat in the body which is good for winter. However do not end up feeding too much also.

Ensure that kids wear warm clothes in winter. Providing warm clothes in winter prevents children from falling sick. In case, the weather is very cold, you can also give your kids socks or gloves. Children can wear a sweater while going out or to school. Thick clothes will help your child feel warm and cosy. Mother's hug can also make children feel warm, happy and nice. Warm clothes provide comfort

Moisturize Skin

Skin often becomes dry during winters. Hence, ensure that your child's skin is moisturized well enough. You can buy moisturizer and some lip balm for the lips after consulting

your doctor. In case, skin becomes extra itchy or dry, you can certainly consult a doctor. Sometimes skin becomes scaly and dry causing discomfort. If the moisturizer does not help then speak to a doctor. As mentioned earlier, eating fatty foods also helps in making skin healthy during winters. Skin which is well-hydrated does not become dry. a gentle oil massage on regular base can cause healthy and moisturize skin with good tone and strength. oil could be mustard, rogan-badam or any others are available in the

Sleep on a Mattress

Ensure that children sleep on a mattress. Tell them to avoid lying on bare ground or charpai without mattress. use the woollen mattress if they used to charpai. The floor is often cold during the winter and children can fall sick lying on bare floor. Children should also avoid remaining bare body during winter. Sleep on bed or mattress preferably. Close the doors and windows at night as your child can fall sick due to the cold air.

Bathe in Warm Water

Children should bathe in warm water during winter. They can also sip warm water while they are at home. Ask children to dry themselves properly with a towel after

Winter Health Myth vs. Fact

1. Myth: -Extra vitamins and minerals can keep your kids from getting sick in the winter

Some parents load their kids up with extra orange juice, vitamin C, and other vitamins that claim to boost their immunity. However, they likely won't keep your kids from catching colds and the flu during the winter.

2.Myth: Kids can catch a cold from playing out in the cold weather, especially if they don't wear a jacket or their hair

Colds and the flu are caused by viruses, not by being outside in the cold. if your child is playing outside with someone who is sick with a cold, they may very well get

3.Myth: Kids can play outside as long as they want when Kids are at risk for frostbite and hypothermia, so have them come inside to warm up at regular intervals, especially if they start to feel cold or tired.

4.Myth: Kids need an antibiotic every time they have a runny nose, especially once the discharge is green or This is perhaps one of the more dangerous winter health myths. It can lead to the overuse of antibiotics.

5.Myth: You can get the flu from a flu shot. The flu shot is made from a killed virus, so it can't cause the flu. The nasal spray flu vaccine is made from a live, attenuated virus.

6.Myth: Your kids can stop their allergy medicines during Not all kids have seasonal allergies that are only triggered during the spring or fall. Some kids have year-round allergies, even during the winter.

Online B.A. - Bachelor of Arts 2026

When you want to pursue Online B. A (Bachelor of Arts), Mangalayatan University is the answer for your career escalation. The program covers a variety of subjects, including English communication, an overview of political theory, the Indian Constitution, public administration, Western political thinkers, the history of Medieval India, India's foreign policy, and The United Nations, among many others. Online BA Programs are designed to equip students with quality knowledge in the field of arts. Online programmes in B.A is a way of promoting students for other professional training and certification. It not only helps them to take up other course programmes but also allows them to continue with their job employability while pursuing the course program. During the online undergraduate degree in B.A, the study materials and other resources are provided by the university viz. recorded lectures etc.

Online BA degree from NAAC A+ accredited

Various specializations available in Online BA

Benefits of online BA Degree Programs in India at Mangalayatan University Online
Mangalayatan University's distance BA program not only balances your work and study commitments, it allows you to work from the comfort of your office or home. The course program is not restricted to any classroom –learning, eventually managing study and employment commitments. The university provides resources like academic counselling, mentorship, and career support, helping students succeed in their studies and future careers. Mangalayatan University's reputation adds value to the degree.
Online Bachelor of Arts Admission Eligibility Criteria
The student should have completed senior secondary school education from a recognized board with computer science as one of its subjects at the 10+2 boards examination. The student should have attained 45% of aggregate marks in senior secondary school education.
Online BA Program Duration
Online BA course duration is a 3-year program
Online BA Admission Fees for Indian Nationals

Component	Amount (₹)
Course Fee	₹ 5000/- Per Semester
Exam Fee	₹ 1500/- Per Semester
One-Time Registration Fee	₹ 1000/-
First Year Fee	₹ 14,000/- Per Year
Total Program Fee	₹ 40,000 (all inclusive)

Career Opportunity after Distance BA Course
Working Professionals Degree Course
Online BBA degrees hold various career options after the completion of the programs. After studying the students can become teachers or lecturers, writers, journalists, NGO activists, or can take up further higher studies in master programmes like M.A or MBA in their specialized field. The career opportunity is vast and varied and is based on project-based learning aligned with current market trends. An Online BBA also enhances critical skills like leadership, strategic thinking, and problem-solving, making graduates valuable assets in many industries. The flexible, remote format further ensures career progression without taking a break from current employment.
Why Choose Mangalayatan University for an Online BA
Working Professionals Degree Course
Mangalayatan University Online BA admission is a tremendous opportunity to shape a professional career in more leaps and bounds. University boasts a faculty team with significant qualifications and expertise in their fields, offering a conducive and collaborative environment for both teaching and learning. At Mangalayatan, faculties are known for their blend of academic knowledge and practical experience, which supports a teaching style that not only covers theoretical foundations but also applies real-world insights. These academic qualifications and online BA programs hold a promising career where you can embark on a journey of a bright future by specializing in some field such as journalism or mass communication or as a historian etc.

Benefits of Pursuing an Online Undergraduate Degree Program

- Flexible Learning-** Study at your own pace while balancing work and personal commitments.
- Cost-Effective & Accessible-** Enjoy affordable education from anywhere in the world.
- Global Learning Resources-** Gain access to expert faculty and comprehensive study materials from reputed institutions.
- Affordable Admission-** Enroll in undergraduate programs without financial strain.

Choosing the Right Online Bachelor Degree Program

For both academic and professional advancement, choosing the appropriate bachelor's program is essential. Think about the following:

- Make sure the program has been accredited and approved by the UGC.
- Examine the faculty's experience and the relevance of the curriculum.
- Check for placement help, alumni reviews, and student support services.

In addition to offering UGC-approved online undergraduate courses that are accepted throughout India, Mangalayatan University in Aligarh also gives students the academic and career guidance they need.

Online Undergraduate Admission Eligibility and Application Process

To enroll in an online bachelor program, candidates must fulfil the following criteria:

- Completion of 10+2 (senior secondary education) from a recognized board.
- Online application submission, document verification, and fee payment complete the process.

Online Undergraduate Course Duration

Most online undergraduate programs take 3 to 4 years to complete, depending on the course and specialization.

Career Opportunities and Salary Prospects After an Online Bachelor's Degree Program

Graduates can explore career opportunities in multiple industries based on their specialization:

- Graduates can pursue careers in technology, business, banking, healthcare, and academia.
- They can work as supervisors, strategists, advisors, researchers, or top-level executives.

Salaries differ by field and expertise, typically ranging from ₹4 LPA to ₹20 LPA. Students can clear the path for successful postsecondary education and career advancement by selecting the appropriate online undergraduate course.

Career opportunities after completing an Online MBA in Human Resource Management (HRM) from Mangalayatan University for working professionals are steady, varied, and growth-oriented. This curriculum prepares students for mid-level and senior HR positions across industries by giving them extensive knowledge of personnel management, organizational behavior, labor regulations, performance evaluation, and strategic HR planning. Graduates can find employment in corporate organizations, manufacturing facilities, IT companies, healthcare facilities, educational institutions, and multinational corporations as HR managers, talent acquisition specialists, HR business partners, training and development managers, payroll

managers, and employee relations officers. Working professionals who want to advance, take on leadership roles, or change professions in the HR field without quitting their existing positions may find the course extremely helpful. Skilled HR specialists are in great demand due to India's increasing emphasis on labor optimization, compliance management, and employee engagement. Mangalayatan University's online format enables workers to develop management experience and industry-relevant abilities while juggling work and school. Graduates can also look for jobs in startup HR operations, corporate training, compliance advisory, and HR consulting. Additionally, some students advance into strategic positions like Organizational Development Consultant or HR Analytics Manager. All things considered, Mangalayatan University's Online MBA-HRM program enables working individuals to advance their careers, increase their earning potential, and play a significant role in corporate development and people management tactics. Why Choose Mangalayatan University for an Online MBA in HR Management Degree Course? For working people, Mangalayatan University's online MBA program offers a fantastic chance to advance their careers. The university offers a synchromatic atmosphere for the best teaching and learning experiences thanks to its highly skilled and experienced faculty. These academic credentials and online MBA programs can accelerate your professional development and help you develop your career most effectively.

Benefits of the Best Online MBA in HRM in India at Mangalayatan University Online

Online MBA-HRM from Mangalayatan University offers several worthwhile advantages, particularly for Indian working professionals and future HR leaders.

Because the program is approved by UGC, employers in a variety of industries will appreciate and recognize your degree nationally, increasing your credibility and career mobility.

Its adaptable online learning structure saves time and money compared to typical MBA programs by enabling you to manage work, personal obligations, and studies without moving or attending in-person classes.

Graduates of this online MBA program can pursue a variety of job options in industries including IT, finance, retail, and manufacturing, including HR leadership, talent management, organizational development, and consulting.

The degree is a wise investment for long-term professional development since it raises your profile for higher executive programs or advanced certifications.

Online MBA in HR Management Admission Eligibility Criteria

Applicants should be a graduate in any stream (Science, Arts, Commerce) from a reputed College or University.

Professional Graduates like BTech/CA/ ICWA, etc. from recognized University are also eligible to apply.

Mangalayatan University Online PG Diploma Programs
Online PG Diploma in English Literature and Linguistic Studies Program
Online PG Diploma in English Literature and Linguistic Studies Admission 2026
A Post Graduate Diploma in English Literature and Linguistic Studies is a one-year postgraduate programme that provides knowledge of English literary texts, their critical theories, and the scientific study of language. It is a specialized programme made for individuals who hold a bachelor's degree and want to gain expertise in the analysis of literature and the mechanics of the English language. The "online" modality means the entire curriculum, including lectures, assignments, and exams, is accessible via the university's Learning Management System (LMS), offering flexibility.
This online PG diploma program in India integrates two primary academic fields: English Literature is a field which involves the critical study and analysis of various literary genres from different historical periods, like British, American, and Indian writings in English. Students learn to interpret texts within their cultural, social, and political contexts and engage with various literary criticisms and theories.
Linguistic Studies is a component that focuses on the structure and function of the English language. Topics often include phonetics (speech sounds), phonology, syntax (sentence structure), semantics (meaning), and pragmatics.

Online PG Diploma in Political Studies and Governance Admission 2026

APost Graduate Diploma in Political Science and Governanceis a one-year postgraduate programme for students interested in understanding how politics and governance shape societies at local, national, and global levels. Students gain advanced knowledge and understanding about political and governance systems, public policies and relations of India with other countries.

Theonline PG diploma course in Indiaoffers diverse topics such as political theory, Indian and comparative politics, public administration, constitutional studies, governance and public policy, international relations and development studies. Along with the above, the course also touches upon concepts like good governance, transparency, accountability, decentralisation and citizen participation.

Students gain skills to evaluate political institutions, government performance, and policy outcomes. This makes the program relevant to current administrative and political challenges.

The online method of delivery provides flexibility to the students with the entire course, including lectures, assignments and exams being accessible through the university's online Learning Management System (LMS).

Welcome Note
Another huge addition in the current academic year has been the full-fledged implementation of the Mentorship program for every student at Mangalayatan University. Each student is attached to one faculty member for the full duration of his or her stay at the Mangalayatan University campus. Parents are regularly updated by the mentor, with assistance from the Parents Information System, on every aspect of their ward's performance and growth in the university. This is a key development born out of our belief that the best way to develop our young students' career is when the three stakeholders - parents, the institution and industry - work hand in hand to facilitate and monitor the students' progress.

Home>Department>Department of Agriculture Department of Agriculture About the Department The Department of Agriculture was established in 2018 under the Institute of Engineering & Technology and is strengthened with hundred percent doctorate faculty, supporting infrastructure and seventy Five Acre land. The curriculum of Diploma Agriculture, B. Sc. Agriculture, are designed in such a way that it focuses on the overall development of an individual. Great emphasis during the classes is laid on core fundamentals, concepts, field practicals, and the examinations are designed to reflect the understanding of the fundamentals in practical fields. Course work is further augmented by field practicals, course projects, seminars and presentations so that the students become proficient in inculcating team values. In order to boost interest in other disciplines, the students can take up electives and/or

audit courses from department other than their core area of specialization. Agriculture Students are exposed to latest industry practices through several industrial visits during their course. Students are also encouraged to undergo industrial training during their summer vacations. The training provides the students with adequate exposure in tackling live problems encountered in working of industrial entity. Through seminars and lectures the students get an opportunity to interact with eminent personalities from the corporate world and the academia. In addition to these the Agriculture department also organizes various mock interview sessions and personality development workshops that help students shape the pre requisite skills. Vision: "To assure food security to the people of the Republic of India and make agriculture a profitable and attractive enterprise with new innovations and research in the field of Agricultural sciences". Mission: To provide high-quality teaching, research and development to the students with the ability to apply fundamental principles of Agriculture sciences. To develop a unique academic curriculum designed throughout the interaction with the major stakeholders like industry, NGOs, banks and professional societies. To promote research and training on sustainable development of Agriculture production, cost management in farming, farm mechanization, crop and animal husbandry. To ensure the increased net farm income to the farmers through various research schemes, innovative programs and welfare measures. Home>Department>Department of ArtsDepartment of ArtsAbout the DepartmentThe Department of Arts was established with a long-sought vision of the university's leaders and thinkers to provide cutting-edge education from introductory to advanced, in the field of Humanities. It started with a mission to enable its students to hone the skills required to fight the challenges of the society. Humanities at MU is a liberal, safe and an inclusive space which identifies and nurtures the young leaders of this country giving them ample of opportunities to dream and discover. Department of Arts at MU is a rich amalgamation of traditional and unconventional which scores a distinctness and creditability.Since its establishment, the Department of Arts has been fostering critical thinking and motivating students to edify their disposition. In pursuit of providing academic and scholastic ambience, the Department has always motivated seminars, debates, group discussions, writings and research gathered in from the margins and has sheltered voices responding to the literary canons of the empire. Its academic achievement lies in nurturing the creativity and scholarly abilities of its students and preparing them to study overseas and find new and fruitful prospects.The department has catered to the need of providing a better academic environment to students belonging to different walks of life, regions, nationalities and communities. The department has a pan-university presence for its faculty members teaching Communicative English to not less than thousand students, ranging from Humanities and Commerce, Bio Science to Engineering.The carefully structured syllabi of different courses running by the department focus not only on the development of communication skills of students but also include papers incorporating themes and topics ranging from Literatures, to Interdisciplinary studies, which also spreads over the idea of turning theory

into practice. Its faculty members have made notable contributions in the field of translation studies by guiding and contributing UGC research projects. Committed to the pursuit of excellence in higher education, the department offers degrees at Bachelor, Masters and Ph. D levels in English Literature, Political Science, History, Sociology, and Economics. VISION "To promote excellence in teaching and research by nurturing a culture of practical skill based learning and grooming students to be morally and socially responsible professionals who will be sensitive to the larger societal goodness". MISSION To generate, disseminate and preserve knowledge for the benefit and betterment of society. To create productive and progressive atmosphere for holistic development of students. To strengthen the value of nation building, social harmony, community welfare, heritage preservation and to promote cultural and linguistic diversity. Department of Pharmacy, IBMER
About the Department
Department of pharmacy is committed to provide state of art facilities to the young pharmaceutical scientist and pharmacist to match the modern requirement of pharmacy industry. Course curriculum and pedagogy contain learning of latest tools & techniques so that the student can conquer a perfect niche in the scientific world. The department not only teaches the student but also grooms their personality by soft skill classes and group discussions etc. The strength of the department lease with the well experienced and highly qualified, dedicated, research oriented faculty members. The department encourages the students for attending national and international conferences to match with the recent advances in pharmacy. The Institute also focuses on creating strong research facilities for its students and to impart knowledge and excellence among the students to become expert contributors in pharmaceutical Sciences industries or academics. Vision "To be at the forefront of education, training and research in pharmaceutical sciences and pharmacy practices and to set benchmarks in evolution of excellence in pharmaceutical studies for better growth of pharmaceutical industry". Mission To impart knowledge, foster skills and build competencies in pharmaceutical sciences. To develop and advance the knowledge' skill set and attitude of pharmacists and faculty members. To promote research activities in pharmaceutical sciences and interdisciplinary fields translating research into healthcare. To create and nurture professionals who can provide comprehensive pharmaceutical care to patients, improve patient outcomes, and meet societal needs for safe and effective drug therapy. Home>Department>Institute of Business Management and CommerceInstitute of Business Management and CommerceAbout the InstituteThe Institute of Business Management and Commerce (IBMC) has established itself as a premier center for management and commerce education since its inception as the Institute of Business Management in 2007. Over the years, the institute has expanded its academic portfolio and now offers a wide range of programs including MBA, BBA (Honours with Research)/BBA (Honours), B.Com. (Honours with Research)/B.Com.(Honours), M.Com., PGDM, BHM programs. The institute further strengthened its academic excellence by introducing its Doctoral Program in 2010.With a strong alumni base of over 3,500 graduates, IBMC takes pride in its students who are successfully placed in reputed organizations such as Infosys, Wipro, Coca-Cola, Ceasefire, The Leela Palace, Hilton Double Tree Goa, ITC, Courtyard Marriott,

Nippon, HDFC, Heinz India, Reliance Insurance, Bank of Baroda, and Canara Bank. The institute is supported by a dedicated team of experienced academic mentors committed to the holistic development of students. Renowned academicians and industry experts from prestigious institutions like IIMs, EDI, and AMU regularly visit the campus to share their knowledge, insights, and professional experiences with learners. At IBMC, the core focus is on imparting value-based education, driven by the vision of building a progressive society through the transformation of human resources into valuable human capital. To further strengthen academic excellence and professional exposure, the institute has established strategic collaborations with reputed national and international organizations such as the Entrepreneurship Development Institute of India (EDI), Mudra Institute of Communications Ahmedabad (MICA), National Small Industries Corporation (NSIC), the University of California, Riverside, and Grant Thornton at various points in time. In collaboration with Grant Thornton, the institute has initiated the offering of advanced industry-oriented courses focusing on areas such as digital marketing and business analytics. These courses are designed to bridge the gap between academic learning and industry requirements, providing students with practical exposure, professional competencies, and enhanced employability. Aligned with the vision of the National Education Policy (NEP) 2020, the institute has proactively implemented NEP guidelines by adopting multidisciplinary education, skill-based learning, flexible curriculum structures, and outcome-based education. This initiative aims to equip students with critical thinking, innovation, and employability skills required in the dynamic global environment.

The students of INPS are being given practical training in Mangalayatan University and in some government set-up. During clinical duties of practical sessions, the students are being taught and trained by the expert doctors and senior paramedical and nursing mentors. INPS is concerned for the wellbeing and security of its students and which is why we have our own security systems with CCTV Surveillance, In-house hostel facility having 24x7 Warden available, Sick Room, Transportation facilities, Wi-Fi etc.VisionTo dedicate health services to all over India by preparing Graduates and Under Graduates to assume leadership roles in education, research, nursing practice, challenge boundaries and build bridges for a healthier world.MissionAims to develop efficient professionals for health care sector at par with international standards including managerial skills and scientific care for the Human Being.To inculcate teamwork, imbibe leadership qualities, professional ethics and social responsibilities in students and faculty.

Institute of Nursing and Paramedical Sciences (INPS) is situated in the Mangalayatan University and has a sprawling campus. INPS is having the best infrastructure at par with the high standards required for colleges. It has got the best of the faculty, state-of-the-art Laboratories, High Resource Library, and other facilities. The students of INPS are being given practical training in Mangalayatan University and in some government set-up. During clinical duties of practical sessions, the students are being taught and trained by the expert doctors and senior paramedical and nursing mentors. INPS is concerned for the wellbeing and security of its students and which is why we have our own security systems with CCTV Surveillance, In-house hostel facility having 24x7 Warden available, Sick Room, Transportation facilities, Wi-Fi etc.

To dedicate health services to all over India by preparing Graduates and Under Graduates to assume leadership roles in education, research, nursing practice, challenge boundaries and build bridges for a healthier world.

Aims to develop efficient professionals for health care sector at par with international standards including managerial skills and scientific care for the Human Being.

To inculcate teamwork, imbibe leadership qualities, professional ethics and social responsibilities in students and faculty.

Department of Library and Information Science
About the Department
The Department of Library and Information Science offer

Bachelors', Masters', PGDLAN and Ph.D. Programs. The ever-changing technology has a direct bearing on library practices and on LIS education. The course aims at providing trained manpower to manage different types of libraries and information centres which, over a period of time have undergone changes in terms of needs, functions, types, tools, techniques and range of services offered. The Department endeavours to meet new standards of success in library management based on the increasing quest of knowledge and excellence with a pragmatic mindset. Vision "To build a strong teaching and research environment in the field of Library and Information Science to meet the ever evolving global needs and challenges in Library and Information Science profession". Mission To provide quality Library and Information Science education to meet the need of the profession. To educate the students in the philosophy of library, basic principles, fundamental laws and professional ethics. To provide exposure of latest tools and technologies in the area of Library and Information Science and Knowledge Management. Objectives The purpose of the Department of Library and Information Science is to stimulate interest in, participation in, and knowledge of all the facets of library and librarianship. The objectives of the department are as under: To provide students an understanding of the basic principles and fundamental laws of Library and Information Science and to enable them to understand and appreciate the functions and purpose of the libraries and information centres. To professionally train the students in diverse area of librarianship To educate the students in the philosophy of librarianship, basic principles, fundamental laws, professional ethics and management of library and information centres. To enable the students to understand and appreciate the functions and purposes of library and information centres in the changing social cultural, technological and economic environment. To provide students the knowledge of Information Technology (IT) and its application in library and information activities. To train the students in the advanced skills of information knowledge, gathering, processing, organization and retrieval. To train the students in information knowledge analysis, repackaging and marketing. To provide the students thorough understanding of IT applications in information environment including networks and communication systems. To train the students in the analysis, planning and management of the systems of library and information centres. To provide an understanding of research methods and activities of research organizations. Department of Journalism and Mass Communication

About the Department

The Department of Journalism and Mass Communication at Mangalayatan University offers ample of opportunities to students to gain practical work experience through industry oriented curriculum, internships, Industrial visits, and placements in a prominent media organizations and also interaction with leading professionals. We provide propitious environment to the students to produce high-quality project works to match professional standards and goals. We provide students the practical exposure right from the beginning so that the students can build confidence enhance their personality and make a journalistic approach towards their career.

Media sector especially television and web media in India and worldwide has grown several folds in the last two decades and is projected to continue growing in the coming decades. The virtual explosion in the process of creation and consumption of information and communication demands intellectual and professional skills to face the challenges and avail the opportunities brought about by the transformative force of India's communication revolution. The department offers the flexible academic program to study emerging disciplines in the field of Journalism and mass communication and trains students for several exciting career options emerging from the convergence of technologies and communication processes. Our program is a blend of theory and practical designed to stimulate the creative muscles. The students study and undergo training in various domains like reporting, writing and editing for print media, feature writing, photography and photojournalism, advertising and public relations, event management, web journalism, print design, anchoring and electronic media production, film studies, media law, radio journalism, media management and research. Their perspectives are further broadened by classes on the Indian economy, Indian politics, international relations and culture & communication. They realize the importance of developing critical and lateral thinking, employed intelligently in crafting communication. The department has state-of-the-art infrastructure and equipment to train the students to meet industrial goals. It aims at preparing finest media professionals who are not only sound in world-class media techniques but also sensitive in fine artistic values as well as the socio-cultural environment of India and the world. Currently, the department offers UG, PG and Ph.D. Programs.

Vision To become a full-blown Department of Journalism and Mass Communication that would set global standards for media education, research and training.

Mission To excel students in a multicultural environment to be critical thinkers, innovative professionals and writers, and leaders in the field of journalism. To create new knowledge that contributes to understand community and global issues through media studies.

Why DJMC, Mangalayatan University? The course is specially designed to equip students with a multi-skilled qualification approach for rapidly emerging domain in which skills, career and job market are increasingly transient. So the department of Journalism and mass communication trains students in order to meet industrial goals and sustain in media industry. We have...

- A full-fledged Community Radio Station for radio aspirants
- A fully equipped news room studio for television program production
- Media laboratory for print media production
- Publishing a half yearly newsletter "MangalSampark"
- Utilise smart class room facilities such as Smart android TV set, Projector, online lectures, Power point presentation
- Professional competent faculties from reputed universities/ institution

Infrastructure

The TV Studio The modern Television Studio at IJMC has a distinct identity and is one of its kinds in the region. It has two different sets for shooting various types of television shows. One of the set being specially designed for chroma shoots is facilitated with proper Studio Lights and the other is created for a One to One Interview based show. It is acoustically treated and fully sound proof.

MU - Community Radio Station- Radio Naraad 90.4

The Institute is home to the state-of-the-art Radio Studio which is essentially a community Radio setup. The Radio Channel- 'Radio Naraad' 90.4 is in process of developing programs for broadcast and is planning to start transmitting radio programs as an independent media unit of the organization in a very soon. This in turn will provide a facility for the media students to work in the radio environment. Besides this the radio station will also help in community development. This is the prime attraction and the USP of the Institute as the students are getting the opportunity to learn the role of a Radio Jockey, a Radio Program Producer and Music Arranger.

Editing Lab The PCR cum Editing Lab is the extension of the TV Studio. It is well connected with the studio. It also has a modern edit suite for Non Linear Editing on Apple's FCP. The Apple's Final Cut Pro is the latest editing machine used in the media industry for editing of television programs and films. It's a platform for the media

students to learn the basics of a Film Making Process, Video Camera Handling and Operation, Video Editing, Television Program and News Production, Anchoring, and Studio Management. The Print Media Lab The media Lab of the Institute has around twenty five desktop computers fully loaded with essential and required computer software's used in the media industry such as the Photoshop, Corel DRAW, Quark Express, After Effects, Adobe Premiere Pro, Sound Pro, etc. Besides all this the lab is well connected with internet facility through wireless connections. Here the students learn the basics of Designing, Page Making, Photo Journalism, Copy Editing, Web Designing, Logo & Ad Designing etc. Audio Visual Classroom The AV classroom provides the facility of community watching in the Institute and a concept of Saturday Cinema was introduced in the institute in 2009, where the students get an opportunity to watch an award winning film from the parallel and the mainstream cinema every weekend. Here they learn to appreciate a film and observe the film as a critic. They are also asked to review the film after the screening as part of the program. It is organized on every Saturday during the activity classes. Media Projects The students of final year of UG and PG Programs undergo a 1 week intensive training in video production after which they produce their own projects. Department>Department of Journalism and Mass Communication

About the Department The Department of Journalism and Mass Communication at Mangalayatan University offers ample of opportunities to students to gain practical work experience through industry oriented curriculum, internships, Industrial visits, and placements in a prominent media organizations and also interaction with leading professionals. We provide propitious environment to the students to produce high-quality project works to match professional standards and goals. We provide students the practical exposure right from the beginning so that the students can build confidence enhance their personality and make a journalistic

approach towards their careerMedia sector especially television and web media in India and worldwide has grown several folds in the last two decades and is projected to continue growing in the coming decades. The virtual explosion in the process of creation and consumption of information and communication demands intellectual and professional skills to face the challenges and avail the opportunities brought about by the transformative force of India's communication revolution. The department offers the flexible academic program to study emerging disciplines in the field of Journalism and mass communication and trains students for several exciting career options emerging from the convergence of technologies and communication processes. Our program is a blend of theory and practical designed to stimulate the creative muscles. The students study and undergo training in various domains like reporting, writing and editing for print media, feature writing, photography and photojournalism, advertising and public relations, event management, web journalism, print design, anchoring and electronic media production, film studies, media law, radio journalism, media management and research. Their perspectives are further broadened by classes on the Indian economy, Indian politics, international relations and culture & communication. They realize the importance of developing critical and lateral thinking, employed intelligently in crafting communication. The department has state-of-the-art infrastructure and equipment to train the students to meet industrial goals. It aims at preparing finest media professionals who are not only sound in world-class media techniques but also sensitive in fine artistic values as well as the socio-cultural environment of India and the world. Currently, the department offers UG, PG and Ph.D. Programs. Vision To become a full-blown Department of Journalism and Mass Communication that would set global standards for media education, research and training. Mission To excel students in a multicultural environment to be critical thinkers, innovative professionals and writers, and leaders in the field of journalism. To create new knowledge that contributes to understand community and global issues through media studies Why DJMC, Mangalayatan University? The course is specially designed to equip students with a multi-skilled qualification approach for rapidly emerging domain in which skills, career and job market are increasingly transient. So the department of Journalism and mass communication trains students in order to meet industrial goals and sustain in media industry. We have... A full-fledged Community Radio Station for radio aspirants A fully equipped news room studio for television program production Media laboratory for print media production Publishing a half yearly newsletter "Mangal Sampark" Utilise smart class room facilities such as Smart android TV set, Projector, online lectures, Power point presentation Professional competent faculties from reputed universities/ institution Infrastructure The TV Studio The modern Television Studio at IJMC has a distinct identity and is one of its kinds in the region. It has two different sets for shooting various types of television shows. One of the set being specially designed for chroma shoots is facilitated with proper Studio Lights and the other is created for a One to One Interview based show. It is acoustically treated and fully sound proof. MU - Community Radio Station- Radio Naraad 90.4 The Institute is home to the state-of-the-art Radio Studio which is essentially a community Radio setup. The Radio Channel- 'Radio Naraad' 90.4 is in process of developing programs for broadcast and is planning to start transmitting radio programs as an independent media unit of the organization in a very soon. This in turn will provide a facility for the media students to work in the radio environment. Besides this the radio station will also help in community development. This is the prime attraction and the USP of the Institute as the students are getting the opportunity to learn the role of a Radio Jockey, a Radio Program Producer and Music Arranger. Editing Lab The PCR cum Editing Lab is the extension of the TV Studio. It is well connected with the studio. It also has a modern edit suite for Non Linear Editing on Apple's FCP. The Apple's Final Cut Pro is the latest editing machine used in the media industry for editing of television programs and films. It's a platform for the media students to learn the basics of a Film Making Process, Video Camera Handling and Operation, Video Editing, Television Program and News Production, Anchoring, and Studio Management. The Print Media Lab The media Lab of the Institute has around twenty five desktop computers fully loaded with essential and required computer software's used in the media industry such as the Photoshop, Corel DRAW, Quark Express, After Effects, Adobe Premiere Pro, Sound Pro, etc. Besides all this the lab is well connected with internet facility through wireless connections. Here the students learn the basics of Designing, Page Making, Photo Journalism, Copy Editing, Web Designing, Logo & Ad Designing etc. Audio Visual Classroom The AV classroom provides the facility of community watching in the Institute and a concept of Saturday Cinema was introduced

in the institute in 2009, where the students get an opportunity to watch an award winning film from the parallel and the mainstream cinema every weekend. Here they learn to appreciate a film and observe the film as a critic. They are also asked to review the film after the screening as part of the program. It is organized on every Saturday during the activity classes.

Media Projects The students of final year of UG and PG Programs undergo a 1 week intensive training in video production after which they produce their own projects. It can be a Documentary Film, a Short Fiction, a TV Show, a News Bulletin or a Docudrama. After the completion of these projects, screening is arranged for the general audience.

Centre for Philosophical Sciences
About the Institute
About the Centre
There is a need to bring about a balance between professional and ethical education so that students coming out of our educational system become responsible citizens of the world. Keeping this objective in mind, The Centre of Philosophical Sciences has been established. The Center is currently focusing on Jain Philosophy. The Centre offers Master of Arts and Ph.D. in Jain Philosophy. It provides intensive mentoring to our students both in and beyond the classroom in a wide variety of forums and organizes workshops, seminars and conferences, including major national or international events. It is currently headed by Professor Jayanti Lal Jain. Mangalayatan University has signed the Memorandum of Understanding with International School for Jain Studies, New Delhi, Pandit Todarmal Smarak Trust, Jaipur and Teerthdham Mangalayatan, Aligarh. These institutions have rich experience in conducting Jain Education and Mangalayatan University is benefited from them.
Vision
Make philosophical education relevant to the changing world of professionalism, desire to grow into a personality, develop inquisitive questioning spirit in metaphysical perspective, and promote ethical values based on the metaphysical attitude with strong community service motive.
Mission
Make philosophical academic rigor applicable to practical life of mundane world
Promote best use of global practices to make philosophical attitude relevant to students through use of technology
Make students and faculty to imbibe moral and ethical values in their life
Create campus environment conducive to promote metaphysical interest
Promote holistic view of life with proper appreciation of different philosophies in the world.

Home>Department>Paramedical Institute of Vocational EducationParamedical Institute of Vocational EducationAbout the DepartmentAffiliation & Accreditation:Affiliated By UGC, MHRD & AICTE.Healthcare is one of the fastest-growing and most essential sectors in today's world, and within it, paramedical sciences form the backbone of patient care and support services. Doctors and nurses are often seen as the front face of healthcare, but the efficiency, accuracy, and success of medical treatments depend heavily on the expertise of paramedical professionals who assist in diagnostics, therapeutic interventions, and rehabilitation.At Mangalayatan University, paramedical courses are carefully designed to meet the evolving demands of modern healthcare. These programs are specialized skill-oriented courses that aim to develop competent healthcare professionals capable of working in diverse medical settings such as hospitals, clinics, diagnostic laboratories, rehabilitation centers, and emergency care units.Students enrolling in paramedical programs gain in-depth knowledge of medical sciences while also

developing hands-on practical training through laboratories, workshops, hospital postings, and clinical exposure. The curriculum balances theoretical understanding with experiential learning, enabling students to apply classroom knowledge in real-life medical situations. Vision The vision of the Paramedical Institute of Vocational Education (PIVE) is to establish itself as a pioneer in skill-oriented healthcare education, dedicated to producing highly competent, compassionate, and ethically responsible paramedical professionals who serve as the backbone of the healthcare system. PIVE aspires to create a dynamic learning environment where vocational excellence is integrated with clinical exposure, modern technology, and hands-on training, ensuring that every graduate is industry-ready and capable of addressing real-world healthcare challenges. Ultimately, the vision is to position the institute as a center of excellence in vocational paramedical education, empowering students with skills that ensure employment and lifelong learning in the healthcare sector. Mission Quality Education: To provide a strong foundation of knowledge in paramedical sciences through a balanced blend of theory, clinical practice, and modern technology. Skill Development: To impart hands-on training in diagnostic, therapeutic, and rehabilitative techniques, preparing students to meet real-world healthcare challenges. Research & Innovation: To promote a culture of inquiry, innovation, and evidence-based practices in paramedical sciences. Ethics & Empathy: To instill professional ethics, compassion, and effective communication skills for delivering patient-centered care. Community Engagement: To extend healthcare services and awareness to rural and urban communities through outreach programs, thus strengthening public health. Mission Quality Education: To provide a strong foundation of knowledge in paramedical sciences through a balanced blend of theory, clinical practice, and modern technology. Skill Development: To impart hands-on training in diagnostic, therapeutic, and rehabilitative techniques, preparing students to meet real-world healthcare challenges. Research & Innovation: To promote a culture of inquiry, innovation, and evidence-based practices in paramedical sciences. Ethics & Empathy: To instill professional ethics, compassion, and effective communication skills for delivering patient-centered care. Community Engagement: To extend healthcare services and awareness to rural and urban communities through outreach programs, thus strengthening public health.

Affiliation & Accreditation: Affiliated By UGC, MHRD & AICTE.

Affiliation & Accreditation:

Healthcare is one of the fastest-growing and most essential sectors in today's world, and within it, paramedical sciences form the backbone of patient care and support services. Doctors and nurses are often seen as the front face of healthcare, but the efficiency, accuracy, and success of medical treatments depend heavily on the expertise of paramedical professionals who assist in diagnostics, therapeutic interventions, and rehabilitation.

At Mangalayatan University, paramedical courses are carefully designed to meet the evolving demands of modern healthcare. These programs are specialized skill-oriented courses that aim to develop competent healthcare professionals capable of working in diverse medical settings such as hospitals, clinics, diagnostic laboratories, rehabilitation centers, and emergency care units.

Students enrolling in paramedical programs gain in-depth knowledge of medical sciences while also developing hands-on practical training through laboratories, workshops, hospital postings, and clinical exposure. The curriculum balances theoretical understanding with experiential learning, enabling students to apply classroom knowledge in real-life medical situations.

The vision of the Paramedical Institute of Vocational Education (PIVE) is to establish itself as a pioneer in skill-oriented healthcare education, dedicated to producing highly competent, compassionate, and ethically responsible paramedical professionals who serve as the backbone of the healthcare system. PIVE aspires to create a dynamic learning environment where vocational excellence is integrated with clinical exposure, modern technology, and hands-on training, ensuring that every graduate is industry-ready and capable of addressing real-world healthcare challenges. Ultimately, the vision is to position the institute as a center of excellence in vocational paramedical education, empowering students with skills that ensure employment and lifelong learning in the healthcare sector.

Quality Education: To provide a strong foundation of knowledge in paramedical sciences through a balanced blend of theory, clinical practice, and modern technology.

Skill Development: To impart hands-on training in diagnostic, therapeutic, and rehabilitative techniques, preparing students to meet real-world healthcare challenges.

Research & Innovation: To promote a culture of inquiry, innovation, and evidence-based practices in paramedical sciences.

Ethics & Empathy: To instill professional ethics, compassion, and effective communication skills for delivering patient-centered care.

Community Engagement: To extend healthcare services and awareness to rural and urban communities through outreach programs, thus strengthening public health

Opportunities after an Online PG Diploma in Education for Working Professionals

After completing a PG Diploma in Education online course in India, students get access to several roles in schools, colleges, edutech companies, NGOs and government sectors. Several opportunities exist after completing the Online PG Diploma in Education for working professionals, such as:

Role	Profile Description
School Teacher	Designing lessons, managing classrooms, assessing student progress and supporting students using modern pedagogy.
Supporting students with special needs	Academic Coordinator/ Curriculum Developer
Developing, refining and updating the Curriculum, analysing academic training and planning.	Creating syllabus, learning materials and evaluation methods in accordance with NEP standards.
Academic Institution Administrator	Managing institution operations, staff development, budgeting and compliance with statutory requirements.
Educational Consultant	Advising on policy, program evaluation and institutional improvements.

Why Choose Mangalayatan University for an Online PG Diploma in Education Classes?

Flexible Online Learning for Working Professionals: The online, self-paced learning course offered by UGC approved Mangalayatan University with NAAC A+ accreditation makes it easy for working professionals to study anytime from anywhere, thereby helping them balance work, family responsibilities and education effectively.

Inclusive Curriculum: The curriculum, which is at par with regular courses

offered from Mangalayatan University, approved by UGC-DEB (Distance Education Bureau), ensures national recognition of the degree. The course offers advantages over a regular course by providing focused, practical training in a short time frame. Experienced Faculty & Support: Mangalayatan University has dedicated and highly qualified faculty members who collectively contribute to designing the curriculum, delivering methodologies and also support students regularly throughout the course. Strong Career & Higher Education Pathways: The course is useful for those students aiming to gain NEP-aligned skills and outperform traditional BEd holders in competitive roles. The course also helps students get lateral entry and credit transfers in further master's and doctoral programs (such as MEd (Master of Education) or MA in Education) as per UGC norms under NEP 2020.

Updated and industry-relevant curriculum:The course focuses on core and advanced concepts of operations research, data analysis, cryptography, and computational mathematics, meeting industrialist and academic demands.

Career and academic advancement:It enhances subject expertise and opens pathways to teaching, research assistance, higher studies, or technical positions.

Online PG Diploma in Science (Mathematics) Admission Eligibility CriteriaApplicants should be a graduate in Science from a recognized board to be considered a candidate. The candidates should have achieved atleast 45% aggregate marks in a bachelor's degree under the graduate programme.

Working professionals and those who are seeking career advancement must enrol in this programme.

Online PG Diploma in Science (Mathematics) Course Duration in IndiaThe Post Graduate Diploma in Science (Mathematics) is anonline programmeand can be completed in a time span of one year.

Online PG Diploma in Mathematics Admission Fees for Indian Nationals.The complete Admission Fee Structure for the Online PG Diploma in Mathematics for Indian Nationals is given below.

Fee Component	Amount (₹)
Course Fee	₹ 12000/- Per Semester
Exam Fee	₹ 1000/- Per Semester
One-Time Registration Fee	₹ 1000/-
Total Program Fee	₹ 27,000 (all inclusive)

Opportunities after an Online PG Diploma in Mathematics for Working ProfessionalsAfter pursuing a PG Diploma in Science (Mathematics), professionals can get job opportunities in positions like coaching centres, online learning environments, and in schools as mathematics instructors or teaching assistants. Technical professionals can create their careers to work inIT and the software industryas data analyst, business analyst, algorithm developer, or software tester. Those working inbanking, insurance, and financecan pursue careers in risk analysis, actuarial support, quantitative finance, credit analysis, and investment research. Additionally, the credential enhances conceptual understanding, which facilitates the transition into research support positions in both public and private R&D enterprises. It provides a solid basis for professionals who want to pursue higher education, such as an M.Sc. Science (Mathematics), PhD programs, or speciality certifications. Furthermore, the course's analytical and problem-solving abilities are useful in fields including scientific publication and data analysis. All things considered, the program assists working professionals in developing their skills without interfering with their careers.

Why choose Mangalayatan University for an Online PG Diploma in MathematicsStudy classes?UGC-Approved and Accredited Programs– Mangalayatan University's online PG diploma courses are recognized by the University Grants Commission (UGC) and hold a NAAC A+ grade, ensuring your qualification is valid and valued by employers and institutions.

Flexible Online Learning– The online format lets you study anytime, anywhere, making it ideal for working professionals who need to balance career and education without disruption.

Industry-Relevant Curriculum– The curriculum is designed to build both conceptual knowledge and practical analytical skills, helping you stay updated with developments in mathematics and related fields.

Experienced Faculty and Support– Courses are delivered by qualified faculty with expertise, and you get access to academic support, study materials, and mentorship throughout your program.

Career Advancement Opportunities– The diploma enhances subject knowledge and improves prospects for academic progression, research roles, or technical positions in science and education sectors.

Advantages of Top Distance Learning PG Diploma in Science (Mathematics) in India

Flexibility for learners:Distance learning supports students and working professionals to study at their own convenience without compromising on their other commitments and liability.

Cost-effective education:PG Diploma in Science (Mathematics) is an affordable course to pursue.

The fees are lower than regular courses, and students save on travel, accommodation, and relocation expenses.

Access to reputed institutions: Mangalayatan University is one of the prestigious universities that is recognized by UGC and offers PG Diploma programs in Mathematics.

Updated and industry-relevant curriculum: The course focuses on core and advanced concepts of operations research, data analysis, cryptography, and computational mathematics, meeting industrialist and academic demands.

Career and academic advancement: It enhances subject expertise and opens pathways to teaching, research assistance, higher studies, or technical positions.

Online PG Diploma in Science (Mathematics) Admission Eligibility Criteria

Applicants should be a graduate in Science from a recognized board to be considered a candidate.

The candidates should have achieved at least 45% aggregate marks in a bachelor's degree under the graduate programme.

OVERVIEWGiven the pace at which global technology and industry are progressing, no education institution can sustain excellence without being in-step with industry. At Mangalayatan University, we seek to not only be abreast of these changes, but also be catalysts for progress in several fields. Mangalayatan University is in talks to partner with leading organizations, particularly multinational firms, and professionals to set up regular campus interactions, workshops and trainings for students and faculty, including Centers of Excellence like the Andritz Centre already being set up.

Event Name : WORLD IMMUNIZATION WEEK 2025

Category of the Event : AWARENESS ABOUT VACCINES AND

Theme : "Exploring possibilities in Ayurveda"

Date : 30/04/2025

Time : 2 PM TO 4 PM

Venue : A-Block; Hall No.- 301

No. of the Participants : 75

KEY NOTE SPEAKER/RESOURCE PERSON WITH BRIEF INTRODUCTION: -

1. CHIEF GUEST:

Dr Manoj Kumar Sharma (Principal, HoD & Professor, Dept. of DG, MAMC&RC)

2. Other guests

(i) Dr Rajesh Dhakad (HoD & Professor, Dept. RS&BK)

(ii) Dr Pankaj Rathod (HoD, Dept. of Panchakarma)

(iii) Dr Nidhi Soni (HoD, Dept. of Rog Nidan)

(iv) Dr Aishwarya Babu (Assistant Professor, Dept. of RS&BK)

Event Description: -

On 30/04/2024 Activity committee, MAMC&RC, had organized a programme on the occasion of "World Immunization Week 2025" to spread awareness about immunization and try to explore the possibilities in Ayurveda, which was the theme of the event. Different activities were organized throughout the week, like essay competition and poster competition. Programme

started with the prayer of “God Dhanvantri”. Then guests were welcomed to take chairs on the podium. First chief guest of programme Dr Manoj Kumar Sharma, spoke about importance of immunization and immunomodulator drugs described in Ayurveda texts. After that result of Poster Competition was announced by Dr Aishwarya Babu. Mr. Rohit Dhawan, Ms. Astha Prajapati & team and Mr. Shahrukh Shah won the 1st, 2nd and 3rd prize respectively. Then, winners

presented their poster in front of audience. Then, result essay competition was announced by Dr Nidhi Soni. Ms. Niharika, Ms. Shruti Garg and Ms. Anya won the 1st, 2nd and 3rd prize respectively. All the winners awarded with the prizes. Then, Dr Rajesh Dhakad gave the speech on immunization in ayurveda. And vote of thanks by activity coordinator Dr Arpit Sah.

=====

Event Name : Guest Lectures

Theme : “Trends and Development in Ayurveda”

Date : 19/05/2025

Time : 2 PM TO 5 PM

Venue : Auditorium Hall

No. of the Participants : 100

2. Guest Speaker:

(i). Dr Naresh Garg (Director, SN Herbals)

(ii). Dr Pooja Sabharwal (Professor, Dept. of Rachana Sharir; In charge Academics, and OSD-Director at CBPACS, under Govt of NCT of Delhi CBPACS)

The guest lecture event began with the auspicious lighting of the lamp by the esteemed guest speakers and the

principal, symbolizing the removal of darkness and the ushering in of knowledge. This ceremonial start signified

the collaborative spirit and sanctity of the occasion. Following the lamp lighting, students presented a soulful

rendition of the Dhanvantri Mantra, invoking divine blessings for health, knowledge, and well-being, which set

a serene and respectful tone for the day.

Dr Manoj Kumar Sharma , the Chief Guest and Principal of MAMC&RC, then delivered a formal welcome

address. He greeted all attendees warmly, appreciated the initiative behind the lecture series, and emphasized the

importance of ongoing education and knowledge sharing in the field of Ayurveda. Subsequently, the Principal

extended a floral welcome to each of the guest speakers as a token of appreciation for their valuable presence and

contribution. In a reciprocal gesture, Dr Pankaj Rathore felicitated the principal with a floral bouquet, recognizing

his unwavering support for academic enrichment.

The first guest lecture was delivered by Dr Naresh Garg from 2:00 PM to 3:00 PM on the topic "Trends and

Opportunities in the Ayurveda Industry." His presentation covered innovation in Ayurveda, future

opportunities in the sector, and the integration of Ayurveda with modern healthcare systems. His engaging

discourse and real-world insights captivated the audience and inspired the students.

Following Dr Garg's session, Dr Pooja Sabharwal took the stage to speak on "Ayurveda as Co-Operative –

Viksit Bharat @ 2047." She elaborated on the global opportunities in Ayurveda and encouraged students to

pursue research within the field. Her session concluded with an interactive discussion, where she addressed

student queries and motivated them to explore and contribute to the growth of Ayurveda through innovation.

To honor their contributions, both Dr Naresh Garg and Dr Pooja Sabharwal were felicitated by Dr Manoj Kumar

Sharma and Dr Pankaj Rathore with certificates of appreciation and mementos. The event concluded with a

heartfelt vote of thanks by Dr Pankaj Rathore. He expressed gratitude to the guest speakers for their enriching

talks, the principal for his visionary leadership, and the organizing team and students for their active involvement.

He emphasized the role of such events in fostering academic growth and professional development among

Dr. Pratyendra Pal Singh and Dr. Arpit Sah were actively involved in organizing the event. The anchoring was

successfully conducted by Dr. Aishwarya Babu and Dr. Rashmi Bairva. The audience included Dr. Hemant

Bhardwaj, Dr. Vedprakash Sharma, Dr. Shivansha, along with several other faculty members and students.

Photographs: (three to four Geotagged-photographs with caption)

CERTIFICATE: Not for participants

PRESS CLIPPING (WITH CAPTION): -

COME OF THE EVENT: -Programme was held successfully which help students to explore treads and future opportunities in the field of Ayurveda.

Signature Principal Signature tour Coordinator

Acknowledgement:

At the outset, we would like to convey our sincere gratitude to the Mangalayatan University, Aligarh for giving this unique opportunity to participate in the academic visits at the MAMR&RC. We would also like to convey my sincere thanks to Dr. Manoj Kumar Sharma, Principal & Dean, MAMR&RC for giving great support.

We are highly indebted to Dr. Rajesh Dhakad, Vice -Principal and HoD Department of Ras Shastra & Bhaishajaya Kalpana for his guidance and constant supervision as well as for

providing necessary information regarding the visit locations.

This was a unique experience to work as a group during the visit to Chandigarh-Shimla-Kufri.

We enjoyed the study tour and learned many things during this visit.

Objective of the Tour

As the part of NCISM curriculum field exposure is essential for subject understanding and practical application. There are few objectives which were focused during visit:

1. To provide practical exposure to Ayurvedic concepts studied in 2nd Professional subjects such as Dravyaguna, Rasashastra & Bhaishajya Kalpana, Roga Nidan, and Charaka Samhita.
2. To study Ayurveda-based lifestyle modification programs implemented at health
3. To gain practical exposure to Yoga Asanas, Pranayama, Dhyana, and relaxation techniques used for health promotion.
4. To understand the role of Yoga and Meditation in stress management, mental health, and prevention of lifestyle disorders.
5. To encourage students to adopt and propagate healthy lifestyle practices based on Swasthavritta and Yoga principles.
6. To develop professional attitude, discipline, and teamwork through experiential
7. To improve communication skills by interacting with practitioners, pharmacists, and

10:30 AM: Reached centre

10:45 AM – 11:30 AM – Yoga session

11:30 AM – 1 PM – Complete tour to centre

1:00 PM – Lunch at centre

1: 30 PM – left for Aligarh

7: 00 PM – Dinner at Panchkula

20th December 2025; 9 AM reached Mangalayatan University

Indian Institute of Advanced Study, Shimla, Himachal Pradesh

(16th December 2025)

Visit to IIAS & Horticulture department

At Indian Institute of Advanced Study (IIAS), students gained exposure to

interdisciplinary research, academic resources, and the historical significance of the institution,

which helped broaden their intellectual perspective beyond conventional classroom learning.

The interaction emphasized the importance of research, critical thinking, and documentation in

higher studies. The visit to the Horticulture Department complemented their Ayurveda

curriculum by providing practical knowledge of medicinal plants, cultivation techniques, plant identification, and sustainable horticultural practices. Students learned about the role of soil,

climate, and organic methods in enhancing the quality of medicinal herbs used in Ayurvedic

formulations. Overall, the visit strengthened the students' understanding of the scientific and

practical foundations of Ayurveda, encouraging experiential learning and a deeper appreciation of research and plant-based therapeutics.

Himalayan Nature Park & Kufri Zoo, Shimla, Himachal Pradesh

(17th December 2025)

Visit to Kufri Zoo, Shimla

The visit to Himalayan Nature Park and Kufri Zoo was a valuable learning experience

for the students, offering direct exposure to the rich biodiversity of the Himalayan region.

Students observed various endemic and medicinally important plant species as well as native

wildlife, helping them understand the close relationship between ecology, conservation, and

human health. The visit enhanced their awareness of environmental balance, wildlife

conservation, and the impact of habitat preservation on natural resources used in Ayurveda.

Interactions with forest and park officials provided insights into biodiversity management, conservation strategies, and the importance of protecting endangered species. Overall, the visit

reinforced the concept of harmony between nature and health, enriching the students' ecological understanding and supporting holistic principles central to Ayurveda.

Patanjali Wellness Centre; Aashirwad Health Retreat, Shimla,

Himachal Pradesh

(19th December 2025)

Visit to Patanjali Wellness Centre, Shimla

The visit to Patanjali Wellness Centre, Aashirwad Health Retreat, Shimla, was a highly enriching and immersive learning experience for the Ayurveda students. The day began with a one-hour practical yoga session, where students actively participated in asanas, pranayama, and meditation, gaining firsthand insight into their therapeutic benefits for physical and mental well-being. This was followed by an interactive session that delved into the scientific principles

behind yoga, naturopathy, and Ayurveda, highlighting their integrated approach to preventive healthcare and holistic healing. Students also explored the wellness centre and observed various

therapies offered, such as infrared steam baths, colon hydrotherapy, and other detoxification treatments. These practical exposures helped students understand the application of traditional therapies in a modern wellness setting and their role in promoting overall health. The visit not

only reinforced theoretical concepts but also provided students with a broader perspective on evidence-based traditional practices and their relevance in contemporary healthcare systems.

Following faculties were found on paper.

06 faculties were suspected to be working on paper and called for virtual hearing. 01 out of 06 has been

considered to be regular teachers . 05 (04+1(consultant)) faculties found on-paper.

1. Teaching staffs:-

3. Further, the visitation report and all other related documents were assessed in terms of the enforced regulations namely,

the "Indian Medicine Central Council (Requirements of Minimum Standard for under-graduate Ayurveda Colleges and

attached Hospitals) Regulations, 2016", provisions under the NCISM Act, 2020 and relevant Regulations thereunder. On

careful examination of the assessment report it is found that your college is not fulfilling the notified and approved

criteria due to the following shortcoming: -

2. Further, the hearing with regard to faculty suspected to be working only on paper but physically not present was conducted

on 10.07.2024 & 11.07.2024 and recommendation of the hearing committee was placed in the 97th Board meeting of

Medical Assessment and Rating Board for Indian System of Medicine (NCISM) held on 12.07.2024 and the same was

approved that five of your faculty who were suspected to be working only on paper, namely Dr. Abhay Dhulap

Narsingrao (AYRS00767), Dr. Alka Ashok Sagote (AYRB00756), Dr. Mahesh G Hiremath (AYKC02166) Dr.

Vaishali Ramadas Gholap (AYSS01094) and Dr. Sanjay Swaraj Deshmukh (Consultant) cannot be considered as

regular teachers and same was communicated to you vide letter ref. no. Teacher Verification/MARB/2024 dated 02.08.2024.

1. Further, to assess the available facilities of teaching, non-teaching, hospital staff, practical training and other infrastructure

facilities at your college namely Mangalayat an Ayurveda Medical College and Research Center, 33rd Milestone

Aligarh-Mathura Highway, PO: Beswan, Aligarh - 202145, Uttar Pradesh (Inst. Id-AYU0642), inspection of your

college was conducted on 05.02.2024 & 06.02.2024 on hybrid mode as a part of annual visitation by the visitation team

of Medical Assessment and Rating Board, NCISM to process the 2nd Renewal of Permission with intake capacity of 60

seats in UG Course in UG (BAMS) course for the academic session 2024-25 under section 29 of NCISM Act, 2020

and relevant regulations thereunder .

With reference to the subject mentioned above, I am to inform you that in pursuance of the provrsron of National

commission for Indian System of Medicine Act, 2020, the Indian Medicine Central Council Act,1970 (48 of 1970) has been

repealed with effect from the 11th day of June, 2021. With effect from the said date, the Central Council of Indian Medicine

constituted under sub-division (1) of section 3 of the Indian Medicine Central Council Act, 1970 (48 of 1970) shall stand

dissolved. Now, in exercise of the powers conferred by sub-section (3) of the section 1 of the said Act, the Central Government

hereby notifies that all the provisions of the National Commission for Indian System of Medicine Act, 2020 has been come into

force with effect from the 11th day of June, 2021.

Mangalayatan Ayurveda Medical College and Research Center,

Furthermore, in addition to the above
teacher , one higher facu lty Dr. Anjali
has been issued offer of appointment.
She has given her consent of joining
on said position.

g) The offer of appointment and consent of joining of Dr. Anjali are attached as Annexure-4A

II. It is further informed that minimum 15% of undergraduate seats of the permitted intake capacity of 48 seats [instead

of 60 seats] shall be treated as All India Quota. The counseling for seats under All India Quota shall be conducted by

respective counseling authority as designated by Central Government for A.Y. 2024-25 and counseling for the remaining

85% seats or as the case may be, shall be conducted by the concerned Counseling Authority of that State/UT. The

permission of the college stands withdrawn if the college fails to comply with the aforesaid direction of the

Central Government/NCISM for All India Quota or the students admitted thereunder.

I. The college shall submit an undertaking in the form of affidavit duly notarized within one month explaining the details of

providing EPF and ESI facilities to the teaching, non-teaching staff of the Colleges/Hospitals and regularly paying the

same as per the provisions of Employees' Provident Funds and Miscellaneous Provisions Act, 1952 & ESI Act, 1948 and

relevant Rules and Regulations.

12. Therefore, 2nd Renewal of Permission is granted to Mangalayatan Ayurveda Medical College and Research

Center, 33rd Milestone Aligarh -Mathura Highway, PO: Beswan, Aligarh - 202145, Uttar Pradesh (Inst. Id

AYU0642) with intake capacity of 48 seats [instead of 60 seats] in UG (BAMS) course for the academic session

2024-25 under section 29 of NCISM Act, 2020 subject to the condition that college is fulfilling the following

conditions as mentioned below: -

11. Hence, after applying the seat reduction policy 2024-25 under section 28 (1) (f) of NCISM Act 2020, college is

fulfilling the basic eligibility criteria for issuance of 2nd renewal of permission with 48 seats [instead of 60

seats] in UG (BAMS) course for the academic session 2024-25 under section 29 of NCISM Act, 2020.

There is deficiency of 02 teachers for issuance of Conditional Permission for academic session

2024-25 as per

Schedule- V Note (iii) of MSR 2016. Therefore, in accordance with seat reduction policy 2024-2025, seat reduction

in the intake capacity shall be considered by reducing the intake strength by 200/o of total intake capacity.

Accordingly as per Schedule- V Note (iii) of MSR 2016 the deficiency of teacher for up to sixty intake capacity shall not

exceed more than ten percent of total requirement. As per the Hearing Committee observation and approval of Minutes in

the 106th Board meeting of MARBISM, college is having only 13 total eligible teaching faculties after considering Dr.

Alka Ashok Sagote (AYRB00756) Professor in the Rasa Shastra & Bhaisajya Kalpana & Dr. Vaishali Ramdas

Gholap (AYSS0094) Professor in the Ayurved Samhita & Siddhant department as an eligible faculty as

approved in 106th Board Meeting.

a. "For deficiency of every one teacher, seat reduction in the intake capacity shall be considered by

reducing the intake strength by 10% of total intake capacity."

Further, as per the decision of 106th Board meeting, Board observed that the college is not fulfilling the basic eligibility

criteria for issuance of conditional permission for UG (BAMS) Course under section 28 of NCISM Act 2020 for

the Academic Session 2024-25. However, the Board decided to issue 2nd Renewal of Permission for the UG

course as per the approved Seat Reduction Policy in accordance of Section 28 (1) (f) of NCISM Act 2020 for

failing to maintain the minimum essential standards for the Academic year 2024-25, wherein it is mentioned

Further, Medical Assessment and Rating Board, NCISM was in receipt of a letter vide ref no. MU/MAMCRC/Prin./2024-

25/ 39 dated 23.09.2024 regarding the payment of imposed monetary penalty of Rs. 75 Lakh in installments. Further,

the 1st installment of Rs. 25 Lakh has been received through Demand Draft and same was placed in the 109th

Board meeting of Medical Assessment and Rating Board, NCISM held on 04.10.2024. Board acknowledged the

receipt of 1st installment of Rs. 25 Lakh , through DD no. 495938 dated 23.09.2024 and

instructed that

remaining 02 equal installments of Rs. 25 lakhs shall be paid within 06 months or before issuance of permission

of academic year 2025-26 whichever is earlier and same was communicated to you vide letter of even no. dated

Further as per the request of all the 05 faculties who were found on paper, re-verification of documents of 05

faculties namely, Dr. Mahesh G Hiremath (AYKC02166), Dr. Alka Ashok Sagote (AYRB00756), Dr. Vaishali

Ramadas Gholap (AYSS01094), Dr. Abhay Dhulap Narsingrao (AYRS00767), Dr. Sanjay Swaraj Deshmukh

(Consultant) was conducted on 30.08.2024 and recommendation of the designated committee was placed in the 105th

Board meeting of Medical Assessment and Rating Board for Indian System of Medicine (NCISM) held on 06.09.2024.

The Board discussed and decided to consider the 02 faculties namely, Dr. Vaishali Ramadas Gholap (AYSS01094),

Dr. Alka Ashok Sagote (AYRB00756) as neither regular nor as on paper faculties in the college and same was

communicated to you vide ref no Teacher Verification/MARB/2024 dated 20.09.2024.

After considering the above 02 faculties, Availability of total teaching staff is Available $\times 100\% = \frac{76.47}{100} \times 100 = 76.47\%$ Required 17

Thereafter, the observation of hearing committee based on the submission made by the college representatives during

hearing and assessment report of the NCISM have been carefully re-examined in terms of Regulation 3 of the "Indian

Medicine Central Council (Requirements of Minimum Standard for under-graduate Ayurveda Colleges and attached

Hospitals) Regulations, 2016", provisions under the NCISM Act, 2022 and relevant regulations thereunder, and once

again the recommendation of Hearing Committee was placed in the 105th Board meeting of Medical Assessment and

Rating Board for Indian System of Medicine (NCISM) on 06.09.2024.

5. The Registrar, Mahayogi Guru Gorakhnath AYUSH University, I.A.S/P.C .S. Coaching Centre, Near Prem Chand Park,

Narmal Campus, Gorakhpur-273001 Uttar Pradesh for information (vc@mgaugkp.ac .in)

(vc.ayushuniversitygkp@gmail.com)

20. The fulfillment of the conditions given above may be made within the time period specified and compliance report should

be submitted by the college to President, Medical Assessment and Rating Board for Indian System of Medicine. The Medical

Assessment and Rating Board for Indian System of Medicine will verify that the conditions have been fulfilled for

considering the permission for the academic session 2025 -26.

19. The college administration may take up the matter for recognition of the qualification under section 35 of the NCISM Act,

2020 at that time when the first batch of students admitted against this course appears for the first final professional

examination of the said course.

18. The college has to develop the requisite infrastructure for I, II and III professionals well in time as per the norms which will

be verified by the medical assessment and rating board and accordingly the permission for taking admissions in subsequent

academic session will be considered.

17. The College administration will ensure that sufficient qualified teachers and non-teaching staff in the college and requisite

staff in the hospital, as per the NCISM ACT and relevant regulation thereunder, are in position before the admission of the

4th batch of students in the 1st professional BAMS is made, under intimation to the Medical Assessment and Rating Board,

i) All the requirements under the provisions of the NCISM Act, 2020 and relevant Regulations made thereunder should be

fulfilled in toto.

ii) All the requirements of minimum standard of infrastructure and teaching & training facilities as specified in MES

(Assessment & Rating for Undergraduate Ayurveda Colleges and Attached Teaching Hospitals) Regulations, 2024.

iii) All the requirements of the National Commission for Indian System of Medicine (Minimum Standards of Undergraduate

Ayurveda Education) Regulations, 2022.

iv) The shortcomings mentioned in Point no. 5 above.

16. The following requirements should be fulfilled by the college by 31st December, 2024 and compliance report

should be sent to get permission for the academic session 2025-2026:

14. Further, as per Sub-section (7) of Section 29 of NCISM Act, 2020, the Medical Assessment and Rating Board for

Indian System of Medicine may conduct evaluation and assessment of any University or medical institution at any time,

either directly or through any other expert, having integrity and experience in medical profession, without any prior notice

and assess and evaluate the performance, standards and benchmarks of such University or medical institution and if the

college is found to be not maintaining the Minimum Essential standards as specified in the concerned Acts & Regulations

then in accordance of Section 28 (1} (f) of NCISM Act ; 2020 the issued permission of the college shall deemed

to be withdrawn and denial of permission shall be issued by MARBISM for stoppage of admission for that

particular or the subsequent academic year .

15. Discrepancies, if any, may be immediately brought to the notice of Medical Assessment and Rating Board for Indian System

of Medicine, NCISM.

13. Admissions made in violation of the above conditions will be treated as invalid and action will be initiated under NCISM Act

& Regulations there under.

III. It is also informed that determination of fee and all other charges in respect of 50% of seats in private Medical -

Institutions and deemed to be University should be as per the guidelines issued by NCISM vide ref no.

BUSS/Fee/ASU/2022 -23 dated 16.09.2022 . Fees of the remaining 50% of seats are to be fixed as per the guidelines of

Fee Fixation/Regulatory Committee (FRC) of respective State/UT/Deemed to be University.
