Complete a diploma to gain practical skills and employment.

Pursue a degree later for career advancement.

Add specialized diploma courses after earning a degree.

Obtain industry certifications alongside academic qualifications.

This combination creates a strong academic profile while ensuring practical competence, making candidates more attractive to employers.

What Do Employers Prefer in 2026?

Here are a few basic questions you need to ask yourself to assess the right option.

What career do I want to build?

Do I want to start working quickly?

Am I interested in higher education?

Do I prefer practical learning or academic study?

What are the industry's qualification requirements?

What are my financial and time commitments?

Answering these questions will help you choose the qualification that aligns best with your aspirations.

Why Choose Mangalayatan University Aligarh for Diploma & Degree Programs?

Based in Aligarh, the Mangalayatan University Aligarh is a NAAC A+ rated top university in Uttar Pradesh offering diploma and degree courses in various fields that are focused towards industry-oriented learning and growth. The University offers experienced teachers, upgraded learning facilities, and skill-based education to make students job-ready for the future. Career-readiness and an affordable fee structure further benefit students, as do internship programs and placement services. Selected either a diploma or a degree, Mangalayatan University Aligarh is able to support the employability and growth of the students in the future.

Both diploma and degree programs have the potential to help you build rewarding and successful careers.

Diploma courses are characterized by specialized skills, faster employability, and practical experience,

Degree programs are more comprehensive and knowledge-oriented in terms of long-term career growth and academic opportunities.

In today's competitive market, skills and knowledge matter the most, and it is not solely about whether you are a Diploma or a Degree holder. So, focus on your skill set and technical knowledge. Learning Pays.

Government vs Private University in India: Fees, Placements & Career Comparison

Choosing a university is a big decision for students after they finish class 12. The choice of university will shape their future career and life. The most pertinent query that comes to mind is whether they should go to a government university or a private university. Both government and private universities have their own pros and cons, and the best choice will depend on many factors.

What is a Government University?

A government university is an institution that is funded and managed by the government. Since they are funded by the government, the cost of education is lower. Government universities are known for having experienced teachers, a reputation, and many opportunities for research. However, to get admission to a government university, students need to appear for a test and have good grades in certain courses.

What is a Private University?

A private university is an institution that is managed by a private individual, group, or organization. These universities recover the cost of providing education from tuition fees, donations, and private investments. Private universities focus on upskilling in the latest skills. The private universities provide better options for courses and are relatively easier in terms of admissions.

Government vs Private University – Key Differences

Parameter	Government University	Private University	Tuition Fees	Lower	Higher	Admission Process
Competitive entrance exams	Easier and flexible	Infrastructure	Usually older	Modern and advanced	Faculty Exposure	Experienced academic faculty
Industry professionals and international exposure	Placement Support	Depends on university reputation	Strong industry tie-ups	Course Variety	Traditional programs	Diverse and emerging courses
Research Opportunities	Strong in many institutions	Growing with better facilities	Scholarships	Government-funded schemes	University-specific scholarships	

Competitive entrance exams

Easier and flexible

Modern and advanced

Faculty Exposure

Placement Support

Depends on university reputation

Strong industry tie-ups

Traditional programs

Diverse and emerging courses

Research Opportunities

Strong in many institutions

Growing with better facilities

Government-funded schemes

University-specific scholarships

Which University Is Better for Different Students?

It is very essential to understand that both Private and Government Universities are at par considering the need of the aspirants. Given below few parameters that will enable you to understand which University you belong to?

Best for Low Budget

A low course fee is one such pointer that measures the credibility of the course program. Therefore, there are both private and Government Universities that offer affordable programs to students to excel in their respective careers.

Best for Placements

Both Private and Government University calls /invites recruiters for campus placement events

where many companies come and directly hire final-year students and give spot offers.

Best for Modern Courses

Based on the transformation in the education industry in India, there have been many skill-enhancing courses with the advent of Information and Communication Technology (ICT) and more refinements in core subjects, leading to opportunities for learning modern courses in both private and Government Universities.

Best for Research

Both Private and government universities give options for research and implementing experiential learning through practicals and real-life problem-solving. But it has also been felt that the laboratories and equipment are not that advanced and new compared to those in private universities, where the opportunity is endless and result-oriented.

How to Choose the Right University

Instead of just thinking about whether a university is government or private, you should look at many things, such as:

If the university is accredited.

How good the teachers are.

If students get jobs after they graduate.

What courses are available?

If you can get an internship.

If the university works with companies.

What the facilities are like.

Why Choose Mangalayatan University Aligarh?

Among the top private University in Uttar Pradesh, Mangalayatan University Aligarh, has been positioned as one of the most liked and coveted universities that not only offers you an industry-relevant curriculum to shape your future but also has degrees that are recognized by the prominent statutory bodies of India like UGC, AIU, and NAAC A+ accreditation under their belt. Students also have access to state-of-the-art laboratories, digital learning materials, internships, and placement support.

Government universities provide education at a lower cost, while Private universities have better facilities, flexible learning and variety of courses to choose from.

Ultimately, students should focus on selecting a university based on its academic excellence, placement opportunities, faculty, accreditation and alignment with their career objectives.

LLB vs MBA: Which Course is Better for Career Growth in India?

Gone those days, when being a graduate would earn you a job at a good company. Now, it is mandatory to have a professional qualification that not only gives you an edge in applying for a job and getting a better one but also helps you upskill your technical /specialized skill. Some of the specialised programs that can be pursued after completing graduation in any stream are either aLLB programBachelor of Laws or a Master of Business Administration (MBA).

Though being different in the scope of study, both are professional qualification are very popular among students and hold a prestigious career to kick start their professional journey.

With reference to the Indian context, both these courses are attributed to be among the best professional courses for students, provided their skill set and career aspirations match the same, and to help you make an informed decision.

Understanding MBA and LLB

AnMBA program(Master of Business Administration) is a postgraduate degree with 2 years of course duration. While pursuing an MBA, the aspirant has a large number of specializations to choose from, viz. operations, strategy, and entrepreneurship, finance, human resources, sales and marketing, etc., across various industries.

An LLB (Bachelor of Laws) is a professional law degree that equips students with thorough knowledge of legal principles, criminal law, constitutional law, intellectual property rights, corporate law, taxation, and legal procedures. This Law course can help you take up your career as legal advisors, advocates, judges (through examinations), corporate lawyers, or legal consultants.

MBA vs LLB: Key Differences

Parameter	MBALLB	Course Type	Postgraduate	Professional Degree	Professional Law Degree	Duration	2 Years	3 Years (after graduation) or 5 Years (integrated)	Primary Focus	Business Management & Leadership	Law & Legal Practice	Career Domain	Corporate, Banking, Consulting, Startups	Judiciary, Litigation, Corporate Law, Government	Higher Studies	PhD, Executive MBALLM, PhD	Entrepreneurial Opportunities	High	Moderate	Demand Across Industries	Very High	High
Postgraduate Professional Degree																						
Professional Law Degree																						
3 Years (after graduation) or 5 Years (integrated)																						
Business Management & Leadership																						
Law & Legal Practice																						
Corporate, Banking, Consulting, Startups																						
Judiciary, Litigation, Corporate Law, Government																						

PhD, Executive MBA

Entrepreneurial Opportunities

Demand Across Industries

Career Opportunities and Salary Comparison

Career options are rewarding for both MBA and LLB, but the type of work varies.

Career Opportunities after MBA

An MBA opens doors across almost every sector of the economy. Since every organisation requires capable managers, MBA graduates enjoy diverse employment opportunities.

Popular career options include:

Product Manager

Management Consultant

MBA graduates can work in industries such as Information Technology, Healthcare, FMCG, Manufacturing, Banking and Financial Services, E-commerce, Education, Telecommunications, Hospitality and Consulting. With experience, MBA professionals often move into senior leadership positions such as General Manager, Vice President, Director, Chief Executive Officer (CEO), or Chief Operating Officer (COO).

Career Opportunities after LLB

An LLB offers multiple career pathways in both public and private sectors.

Some of the leading career options include:

Judicial Officer (after qualifying examinations)

Legal Officer in PSUs

Company Secretary (with additional qualification)

Law Officer in Banks

Compliance Manager

Law graduates can also prepare for Judicial Services Examination, UPSC Civil Services, Public Sector Undertaking recruitment, Legal Officer recruitment in banks, Higher education such as LLM or PhD. Experienced lawyers specialising in corporate law, taxation, mergers and acquisitions, arbitration, or intellectual property can earn significantly higher incomes.

Salary Comparison for MBA vs LLB

Although salaries vary depending on institution, experience, and employer, the average salary trends are as follows:

In general, MBA graduates find their salary potential to be greater when they are working in

the corporate sector, and legal professionals find their salary to be higher with specialization, reputation and years of practice in the legal profession.

MBA vs LLB: Which Course Should You Choose?

There is no universal winner because both qualifications serve different professional aspirations.

Choose an MBA if you:

Aspire to become a business leader or entrepreneur.

Enjoy solving business challenges and managing teams.

Want opportunities across multiple industries.

Prefer faster corporate career progression.

Are interested in strategy, marketing, finance, or operations.

Choose an LLB if you:

Have a strong interest in law and justice.

Enjoy research, argumentation, and legal analysis.

Wish to practise in courts or specialise in corporate law.

Aspire to join the judiciary or public service.

Seek a profession with long-term stability and specialised expertise.

Read Also-LLB Course Details, Admission, Full Form, Duration, Eligibility, Top Colleges, and Career

Interestingly, many professionals combine LLB and MBA qualifications to strengthen their career prospects.

An MBA with an LLB is especially valuable in areas such as:

Corporate Governance

Risk Management

Mergers & Acquisitions

Intellectual Property

Legal Consulting

Business Strategy

Professionals with expertise in both business and law are increasingly sought after by multinational corporations, consulting firms, and regulatory organisations.

Begin your Technology Journey with aMBA or LLB Program

MBA or LLB Program

Why choose Mangalayatan University for MBA or LLB?

Rather than choosing the course solely based on the salary or how popular the course is One must take admission in a course based on their career interest and future goals to consider. Mangalayatan University Aligarh is the most pioneering private University in Uttar Pradesh in this field that offers both MBA and L.L.B programmes. It depends on the aspirant what he/she chooses.

The university is recognized by the University Grants Commission (UGC) and is accredited by NAAC A+, which offers a preferred learning environment and a future plan for educational investment.

Based solely on salary or popularity, students should assess their aptitude, preferred work environment, and aspirations before making this important educational investment.

An MBA is the most coveted professional qualification that is equally rewarding and helps you in your career trajectory. MBA career opportunities are huge in India and abroad. You can get leadership roles in quick succession with corporate advancement, and greater flexibility across industries.

On the other hand, L.L.B. takes you to a legal profession with long-term stability and opportunities in corporate law, criminal law, civil disputes and other litigation matters. Growth in law is slow but persistent, which may take longer to establish. Experienced legal professionals can achieve exceptional professional recognition and financial success.

Ultimately, the better qualification is the key to a successful career, and it smoothly aligns with your interests, strengths, and long-term career goals.

People also ask

Q1 - Which is better, MBA or LLB? Your aptitude and passion for the subject will define which course is better ,L.L.B or MBA. Although L.L.B + MBA is also a powerful option to excel in your career. Q2 - Can I pursue an MBA after completing an LLB? Yes. MBA after L.L.B will certainly open doors to legal positions in corporate giants like Reliance or TATAs etc. Q3 - Which course offers a higher salary? Again this question rests on your aptitude and skill that you have gained over the years and how you implement your knowledge to build your career both professionally and monetarily. Q4 - Is an MBA easier than an LLB? Both programs have diverse learning approaches. MBA focuses on business management and leadership, along with a subject of corporate Law and other management practices whereas LLB is a legal study and open doors to the Bar Council of India (BCI). Q5 - Which course has better career scope in India? No matter what profession you choose, the most important point is to understand your professional interest and how much you enjoy your profession while being on the job.

Q1 - Which is better, MBA or LLB?

Your aptitude and passion for the subject will define which course is better ,L.L.B or MBA. Although L.L.B + MBA is also a powerful option to excel in your career.

Q2 - Can I pursue an MBA after completing an LLB?

Yes. MBA after L.L.B will certainly open doors to legal positions in corporate giants like Reliance or TATAs etc.

Q3 - Which course offers a higher salary?

Again this question rests on your aptitude and skill that you have gained over the years and how you implement your knowledge to build your career both professionally and monetarily.

Q4 - Is an MBA easier than an LLB?

Both programs have diverse learning approaches. MBA focuses on business management and leadership, along with a subject of corporate Law and other management practices whereas LLB is a legal study and open doors to the Bar Council of India (BCI).

Q5 - Which course has better career scope in India?

No matter what profession you choose, the most important point is to understand your professional interest and how much you enjoy your profession while being on the job.

Research & Development Cell

Profile of the CellAs a matter of policy, the Mangalayatan University encourages its faculty members to undertake research, innovations and consultancy work at University level and in collaboration with outside agencies. Appropriate Research and consultancy projects, providing much needed services to the industry, also benefit the concerned faculty members and the organization in several ways. Research and consultancy projects provide first-hand knowledge of the current problems of industry. The faculty members also get an opportunity to apply their ideas for finding out the solutions to the problems in emerging areas. Furthermore, the consultancy work also provides incentives for their contributions to all stakeholders. The Scientific Research Cell of the Mangalayatan University, Aligarh look after all the research activities of the University, starting from project drafting, submission, management, recruitment of research personnel, interactions with the funding agency, innovations, protection of IPR and technology transfer along with monitoring of research activities of the University. Additionally, cell plays a vital role in the initiation of new research, consultancy and innovation initiatives at the University premises. At the cell, we help foster an ecosystem of sustainable collaborative and interdisciplinary research, innovation and consultancy programmes with industries and renowned academic and research institutions. We work to fulfill the administrative support, offer IPR protection for technologies developed and transferred and organize interdepartmental collaborative workshops, seminars and conferences to open gateways of future sustainable R&D initiatives at the Mangalayatan University.

Roles & Responsibilities of DeanThe Dean will work under the esteemed guidance of Hon'ble Vice Chancellor of the University and will perform his duties for the... Promotion of Scientific Research and Consultancy in the University. Designing and drafting of important policies as per the requirement. Intellectual support to the faculty undertaking scientific research and consultancy work. IPR support, management and protection to the faculty members and research scholars. Monitoring the execution of scientific research and consultancy activities of the University. Signing of MoU and promotional role by liaising with industry and government organizations for research and consultancy. Felicitation of outcome based scientific research and Intellectual property of faculty members and research scholars. Any other activities that may be assigned from time to time by the University.

Rules and Regulations for Research/ Consultancy Projects Individuals or Departments shall take up projects after taking approval of the Dean (SRIC) through the Head of the concerned Department. All funds/Financial assistance in connection with Projects should be received in the name of Mangalayatan University, Aligarh. Consultancy project from any sponsor can be taken up for a minimum amount of Rs. 1,00,000/- excluding GST. For consultation work involving only site visit or personal discussion a minimum amount of Rs. 10,000/- per man/day for faculty and Rs. 2,000/- per man/day for technical and other non-academic staff may be charged. Report(s) and data originated out of project are the joint Intellectual Property of the sponsoring agency and the investigators which can be used by the sponsor for its own use only and cannot be disclosed to a third party without prior consent of the sponsor and the Principal Investigator. The IPR policy of the university shall be applicable as such in protection of Intellectual property. However, if there is a condition in MoU signed between the Sponsoring agency and PI, regarding the IPR issue that will take precedence over the condition laid down as per the above para. The report of the Sponsored Research and industrial consultancy projects will be kept by PI for a period of 03 years from the date of closure of the project and for routine testing. If a case of malpractice or misconduct is found/established by a fact finding committee against a staff member in connection with project(s), the Hon'ble Vice Chancellor, on the recommendation of Dean, SRIC may prohibit the concerned staff member to take part in any new project either as Principal Investigator or co-investigator, till such time that a final decision is taken by the appropriate committee in the matter. However, in such cases the concerned staff member will be expected to complete his/her obligations in the on-going project(s) with which he/she is connected, in order that the on-going projects and obligations to the sponsor do not suffer. All

purchases under projects shall be made as per the University norms. In case of equipment which is to be carried outside, the same should be insured before they are taken out. Faculty members may accept honorary membership of board of directors of companies with the condition that there will not be any direct involvement of the faculty in concerned industry/company. A sitting fee is payable to an expert other than those involved in the project for attending consultation meetings duly notified by PI in connection with the project work with the approval of Dean (SRIC). Research Monitoring Committee A senior officials monitoring committee will look after the progress of scientific research and consultancy projects in every 6 months wherein the project Investigator will give a ppt presentation on the progress and outcome of the project. Dean, - Chairman Director Research - Member Head of the concerned Department or his nominee - Member Head of one more Department from relevant field or his nominee - Member Principal Investigator - Member One expert from outside the University in relevant field, if required - Member Prof. Dr. Ravi Kant, FRSC (UK), FICS, FLS (UK), MACS (USA) Dean, Room No -101, Narmada Block Mangalayatan University Aligarh-Mathura Highway, Beswan, Aligarh, Uttar Pradesh E-Mail: ravi.kant@mangalayatan.edu.in Telephone No.: +91-7217011074 Ext.327; Mobile: +91-7217011074

CENTRE FOR INDIAN KNOWLEDGE SYSTEM (IKS)IntroductionIndian Knowledge Systems (IKS) encompass the rich and varied intellectual resources which developed and evolved in the long history of Indian subcontinent. Based on holism and experiential wisdom IKS encompass diverse fields such as philosophy, languages and literature, mathematics, engineering, sciences, astronomy, architecture, agriculture, ayurveda, yoga, visual and performing arts, environmental science and management etc.In view of the significance of this heritage, Government of India and University Grants Commission (UGC) have stressed on integration IKS with higher education. The intention is to record and document indigenous knowledge, not just in its own right, but within the contemporary challenges of climate change, health and well-being, resources management and social cohesion. Integrating ancient and modern knowledge systems as a basis for innovation, critical thinking and nation building.In the contemporary education system, IKS is considered as an ensemble of multidisciplinary learning. It invites students and researchers to take into account indigenous viewpoints, work with local communities, and develop culturally rooted (but global) solutions.Through teaching, research, training, and outreach, IKS initiatives seek to bridge the gap between tradition and modernity, thereby fostering pride in India's intellectual heritage and contributing to sustainable development in the 21st century.The Centre for Indian Knowledge System has been established by Mangalayatan University, Aligarh to sensitize and educate the faculty members and students regarding the different aspect of Indian Knowledge. This shall develop knowledge eco-system and integrate IKS in curricula, teaching and research.Objectives of the Centre for Indian Knowledge SystemsTo include Indian Knowledge Systems into current higher education courses, encouraging respect for traditional knowledge alongside advancements in science.To conduct training programs, workshops, and certificate courses for students, faculty, and researchers on various aspects of IKS.To encourage multidisciplinary research that investigates the use of IKS in tackling current issues pertaining to sustainability, health, the environment, the economy, and society.To educate stakeholders through publications, conferences, seminars, and exhibitions about the depth and worldwide significance of IKS.To interact with practitioners, knowledge holders, and local communities in order to promote communication and dissemination.To create connections with industry, research organizations, and national and international institutions for cooperative IKS initiatives.To promote collaborations for co-creation and information exchange with communities and traditional knowledge bearers.Constitution of Centre for Indian Knowledge SystemS. CENTRE FOR INDIAN KNOWLEDGE SYSTEM (IKS)

Indian Knowledge Systems (IKS) encompass the rich and varied intellectual resources which developed and evolved in the long history of Indian subcontinent. Based on holism and experiential wisdom IKS encompass diverse fields such as philosophy, languages and literature, mathematics, engineering, sciences, astronomy, architecture, agriculture, ayurveda, yoga, visual and performing arts, environmental science and management etc.

In view of the significance of this heritage, Government of India and University Grants Commission (UGC) have stressed on integration IKS with higher education. The intention is to record and document indigenous knowledge, not just in its own right, but within the contemporary challenges of climate change, health and well-being, resources management and social cohesion. Integrating ancient and modern knowledge systems as a basis for innovation, critical thinking and nation building.

In the contemporary education system, IKS is considered as an ensemble of multidisciplinary learning. It invites students and researchers to take into account indigenous viewpoints, work with local communities, and develop culturally rooted (but global) solutions.

Through teaching, research, training, and outreach, IKS initiatives seek to bridge the gap between tradition and modernity, thereby fostering pride in India's intellectual heritage and contributing to sustainable development in the 21st century.

The Centre for Indian Knowledge System has been established by Mangalayatan University, Aligarh to sensitize and educate the faculty members and students regarding the different aspect of Indian Knowledge. This shall develop knowledge eco-system and integrate IKS in curricula, teaching and research.

Objectives of the Centre for Indian Knowledge Systems

To include Indian Knowledge Systems into current higher education courses, encouraging respect for traditional knowledge alongside advancements in science.To conduct training programs, workshops, and certificate courses for students, faculty, and researchers on various aspects of IKS.To encourage multidisciplinary research that investigates the use of IKS in tackling current issues pertaining to sustainability, health, the environment, the economy, and society.To educate stakeholders through publications, conferences, seminars, and exhibitions about the depth and worldwide significance of IKS.To interact with practitioners, knowledge holders, and local communities in order to promote communication and dissemination.To create connections with industry, research organizations, and national and international institutions for cooperative IKS initiatives.To promote collaborations for co-creation and information exchange with communities and traditional knowledge bearers.

To include Indian Knowledge Systems into current higher education courses, encouraging respect for traditional knowledge alongside advancements in science.

To conduct training programs, workshops, and certificate courses for students, faculty, and researchers on various aspects of IKS.

To encourage multidisciplinary research that investigates the use of IKS in tackling current issues pertaining to sustainability, health, the environment, the economy, and society.

To educate stakeholders through publications, conferences, seminars, and exhibitions about the depth and worldwide significance of IKS.

To interact with practitioners, knowledge holders, and local communities in order to promote communication and dissemination.

To create connections with industry, research organizations, and national and international institutions for cooperative IKS initiatives.

To promote collaborations for co-creation and information exchange with communities and traditional knowledge bearers.

About Tathastu ICSTathastu ICS was founded with a simple yet powerful vision—to bridge the gap between academic education and competitive examination preparation. Every year, thousands of aspirants dedicate several years of their lives to the Civil Services Examination. Many struggle not because of a lack of hard work, but because of the absence of proper guidance, mentorship, and a structured approach. Tathastu ICS was established to address this challenge.Led by Dr. Tanu Jain (Ex-AFHQCS), who has personally experienced the UPSC journey and served in the Government of India, Tathastu ICS provides aspirants with the direction, clarity, and mentorship required to navigate one of the most demanding examinations in the country. Our approach goes beyond merely completing the syllabus. We focus on building strong conceptual foundations, developing analytical thinking, improving answer-writing skills, and cultivating the temperament required for success in public service. Through a combination of expert faculty guidance, structured study plans, personalised mentorship, and continuous evaluation, we aim to make UPSC preparation more efficient, focused, and outcome-oriented.At Tathastu ICS, we believe that with the right guidance, disciplined effort, and consistent mentorship, every serious aspirant can maximise their potential and confidently pursue their dream of serving the nation.Apply Now

About Tathastu ICS

Tathastu ICS was founded with a simple yet powerful vision—to bridge the gap between academic education and competitive examination preparation. Every year, thousands of aspirants dedicate several years of their lives to the Civil Services Examination. Many struggle not because of a lack of hard work, but because of the absence of proper guidance, mentorship, and a structured approach. Tathastu ICS was established to address this challenge.

Led by Dr. Tanu Jain (Ex-AFHQCS), who has personally experienced the UPSC journey and served in the Government of India, Tathastu ICS provides aspirants with the direction, clarity, and mentorship required to navigate one of the most demanding examinations in the country. Our approach goes beyond merely completing the syllabus. We focus on building strong conceptual foundations, developing analytical thinking, improving answer-writing skills, and cultivating the temperament required for success in public service. Through a combination of expert faculty guidance, structured study plans, personalised mentorship, and continuous evaluation, we aim to make UPSC preparation more efficient, focused, and outcome-oriented.

At Tathastu ICS, we believe that with the right guidance, disciplined effort, and consistent mentorship, every serious aspirant can maximise their potential and confidently pursue their dream of serving the nation.

Catch The RainThe University is working on objective, to sensitizing and educating students and society on issues related to depleting water table and water resource management.The rivers are the backbone of human civilization which provide fresh water that is the basic necessity of human life. The rivers are also used to generate electricity. Rivers areunder threat due to pollution practices. The conservation of natural resources is priority. To sensitize students towards conservation of water resources, following activities are undertaken.The nomenclature of all academic and administrative blocks has been done on the names of rivers like GANGA, YAMUNA, KRISHNA, KAVERI, NARMADA, SARASWATI, GODAVARI, CHAMBAL, TAPTI, SHIPRA, SINDHU, and BRAHAMPUTRA. New academic blocks have also been named as AMRAVATI, MAHANADI, SABARMATI, and the Hostel is named GOMTI SUMANGALAM. The New Boys Hostel is named SHARDA. This helps to acquaint the students with India's rich heritage.The university uses sprinklers for watering parks, the poly-house, herbal garden, crop museum, seed production units, etc., for water conservation.The Department of Agriculture is spreading awareness among local farmers about water conservation,

rainwater harvesting, and the use of sprinklers for irrigation purposes. The university initiated promoting the sprinkler irrigation system by distributing sprinkler systems to marginal farmers in surrounding areas such as the villages of Mohakampur and Bona. A value-added course on Water Conservation & River Protection is offered across all disciplines. One of the thrust areas of research has been identified as Water Conservation and Reduction of Pollution.

Auditorium A fully air-conditioned, state-of-the-art Auditorium, having around 300 seating capacity, provides the perfect venue for large-scale events of national and international importance such as conferences, seminars, workshops, placement programmes and cultural events.

The auditorium is well-furnished, equipped with the modern audio and video systems. The spacious foyer outside the auditorium is the ideal area for registration, displays, and serving refreshments. Gomti Sumanglam Hostel MU provides eco-friendly accommodation facilities to students and faculties in hostels with uninterrupted supply of water and electricity. The University offers separate hostels for boys and girls supervised 24X7 by wardens and vigilant security personnel. Life-on-campus not only helps students to study but to socialize with their peers. The campus hostels are surrounded by lush green lawns and playing fields. MU offers students the choice of comfortable boarding facilities of double and triple rooms with AC and non AC. Facilities for indoor games like TT, carom, chess etc. are also available. Students enjoy a homely and comfortable stay with a sense of camaraderie and fraternity. Gym The gymnasium is well furnished with the latest machines and exercise equipment. The University's Gymnasium can be accessed by the students, faculty and staff members throughout the day. The gym provides an ideal atmosphere for the students and other members for overall development. Hospital With the presence of Mangalayatan Hospital and Mangalayatan Ayurvedic and Research Centre on campus, students' well-being is ensured. Health care facilities are available 24X7 to students, faculty and staff. Mess Centralized Air- conditioned mess with over seating capacity of 250 serves hygienic, quality food prepared by professionally-qualified cooks to the students. Besides central mess our university has cafeteria which caters to the taste buds of budding professionals where pure, nutritious and hygienic food is being served. Open Air Theatre Located between the academic blocks, open air theatre provides good ambience to students to celebrate various cultural events like celebration of religious festivals, commemoration of important days and other events held under the aegis of NSS etc. Indoor & Outdoor Games Sports help to develop a healthy body. Healthy mind resides in healthy body and regular physical exercise helps to maintain healthy body, preventing chronic diseases and learning the skills necessary to maintain a healthy lifestyle. University has well developed infrastructure for various games like Cricket, Basketball, Table Tennis, Badminton and Indoor games like Chess, Carrom etc. These provide students to learn and socialize. Regular competitions are organized throughout the year at university level which provides an opportunity for students. Students also get a chance to represent the university at various competitions at National level. Security University provides complete safe and secure ambience to residents. Security personnel's are deployed at all strategic points and proper vigilance and monitoring is carried out. The security infrastructure includes CCTV cameras and walkie-talkies.

Implementation of National Education

Extended NCR, 33rd Milestone, Aligarh - Mathura Highway

Beswan, Aligarh - 202146 (India)

Website: www.mangalayatan.in

In pursuance of the vision and guiding principles of the National Education Policy (NEP) 2020, Mangalayatan University hereby adopts this University Policy for NEP Implementation to transform higher education through a holistic, flexible, multidisciplinary, and learner-centric

NEP 2020 envisages higher education institutions as spaces that foster critical thinking, creativity, ethical reasoning, research orientation, and social responsibility, while ensuring access, equity, quality, affordability, and accountability. In alignment with this national vision,

Mangalayatan University commits itself to restructuring its academic, administrative, and governance frameworks to respond to the evolving educational, societal, and economic needs of the country.

The University has initiated phased implementation of NEP 2020 provisions, particularly in undergraduate education, in accordance with UGC guidelines issued from time to time. This policy seeks to consolidate, formalize, and strengthen these initiatives, and to provide a comprehensive institutional framework for systematic and sustainable NEP implementation.

Vision Statement:

“To nurture students into creative, ethical, skilled, and socially responsible global citizens through value-based, multidisciplinary, and inclusive education.”

The objectives of NEP 2020 implementation at Mangalayatan University shall be as follows:

1. To restructure undergraduate academic programmes in accordance with the Four -Year Undergraduate Programme (FYUGP) framework with multiple entry and exit options.
2. To promote multidisciplinary and flexible learning pathways through the Choice Based Credit System (CBCS) and the Academic Bank of Credits (ABC).
3. To integrate skill development, vocational education, research orientation, innovation, and employability into all academic programmes.

4. To adopt Outcome-Based Education (OBE) aligned with the National Higher Education Qualifications Framework (NHEQF).
5. To strengthen digital, blended, and technology -enabled learning through MOOCs, SWAYAM, and ICT-based pedagogy.
6. To promote Indian Knowledge Systems (IKS), constitutional values, ethics, sustainability, and cultural heritage.
7. To enhance faculty capacity building, interdisciplinary teaching, research excellence, and entrepreneurship.
8. To ensure equitable access, inclusivity, student support, and quality assurance across all

3. ACADEMIC RESTRUCTURING UNDER NEP 2020

In accordance with the vision of the National Education Policy (NEP) 2020, Mangalayatan University will undertake comprehensive academic restructuring to ensure flexibility, multidisciplinary learning, academic mobility, and outcome -oriented education. This restructuring shall be implemented in a phased and systematic manner, in alignment with the guidelines issued by the University Grants Commission (UGC) and other statutory bodies from

3.1 Adoption of the Four-Year Undergraduate Programme (FYUGP)

Mangalayatan University will implement the Four-Year Undergraduate Programme (FYUGP) as the foundational framework for undergraduate education across all Schools, Departments, and Centres, except where programmes are governed by statutory professional councils such as AICTE, NCTE, BCI, PCI, or similar bodies. In such regulated programmes, NEP provisions shall be adopted to the extent permissible within the respective regulatory frameworks.

The FYUGP framework is designed to:

- ☐ Promote holistic and multidisciplinary education
- ☐ Provide flexibility in learning pathways
- ☐ Integrate skills, research, and experiential learning
- ☐ Facilitate academic mobility and lifelong learning

Under FYUGP, undergraduate education will move away from rigid, single -discipline structures towards an integrated and learner-centric academic model.

3.2 Multiple Entry and Exit System

In alignment with the National Education Policy (NEP) 2020 and UGC guidelines on the Four-Year Undergraduate Programme (FYUG), the University implements a flexible Multiple Entry and Exit (MEE) system. This enables students to enter, exit, or re-enter undergraduate programmes at defined stages without academic penalty, fostering equity, flexibility, and lifelong learning.

Students may exit with recognized qualifications upon earning the minimum prescribed credits, as outlined below:

☐ Entry Flexibility: Students can join at Year 1 or laterally enter higher years with equivalent prior credits via ABC transfer.

☐ Credit Accumulation and Transfer: All earned credits are stored in the Academic Bank of Credits (ABC), allowing seamless re-entry, credit transfer across UGC-recognized institutions, or resumption after breaks, subject to equivalence evaluation.

This MEE framework minimizes dropout stigma, accommodates working professionals and diverse learners, and promotes skill-based progression toward employment or higher

3.3 Programme Structure and Credit Framework

All undergraduate programmes shall be structured in accordance with the Choice Based Credit System (CBCS) and FYUGP guidelines, ensuring clarity, transparency, and flexibility in credit

Exit Stage Qualification Minimum Credits

End of Year 1 Undergraduate Certificate 40 credits 1 year

End of Year 2 Undergraduate Diploma 80 credits 2 years

End of Year 3 Undergraduate Degree 120 credits 3 years

End of Year 4 Undergraduate Honours /

Honours with Research

160 credits 4 years

The programme structure shall comprise:

☐ Major Discipline Courses forming the core specialization.

☐ Minor Discipline Courses enabling interdisciplinary exposure.

☐ Multidisciplinary Courses introducing students to diverse knowledge domains.

☐ Ability Enhancement Courses (AEC) focusing on language, communication, and

foundational skills.

☞ Skill Enhancement Courses (SEC) emphasizing practical, industry -relevant

☞ Value-Added Courses (V AC) addressing ethics, environmental awareness, and societal concerns.

☞ Internships / Projects providing real-world exposure.

☞ Research Dissertation for students opting for Honours with Research.

The detailed credit distribution and semester-wise structure shall be approved by the Academic Council based on UGC-prescribed frameworks.

3.4 Multidisciplinary and Minor Degree Framework

To promote intellectual breadth and cross-disciplinary learning, Mangalayatan University will offer Minor Disciplines alongside Major Disciplines within undergraduate programmes.

Key features include:

☞ Students pursuing a Major Discipline may opt for a Minor Discipline from a different

☞ Minor Disciplines will carry a prescribed number of credits and be completed alongside

☞ Inter-Faculty and Inter -Departmental coordination shall be encouraged for offering multidisciplinary combinations.

This framework shall enable students to acquire diverse competencies, enhance employability, and foster innovation by integrating knowledge from multiple domains.

3.5 Integration of Skill Development, Internships, and Experiential Learning

Academic restructuring under NEP 2020 shall emphasize skill-based and experiential learning as integral components of undergraduate education.

☞ Skill Enhancement Courses (SEC) shall be embedded in all programmes to develop professional, technical, and soft skills

☞ Value-Added Courses (V AC) shall focus on ethics, environmental sustainability, civic responsibility, and entrepreneurship

☞ Mandatory internships, fieldwork, or project work shall be incorporated to provide industry and community exposure

☞ Experiential learning shall be aligned with local, national, and global workforc e

This integration shall ensure that graduates are industry -ready, socially aware, and capable of

adapting to evolving professional environments.

3.6 Research Orientation at Undergraduate Level

In order to foster a culture of inquiry and innovation, the University shall integrate research

orientation into undergraduate education.

Measures shall include:

- ☐ Introduction of research methodology components
- ☐ Undergraduate research projects and dissertations for eligible students
- ☐ Faculty mentorship for student research
- ☐ Opportunities for presentation, publication, and innovation

Students opting for the Honours with Research pathway shall undertake a structured research dissertation, thereby strengthening the research ecosystem at the undergraduate level.

3.7 Curriculum Review and Academic Governance

To ensure continuous relevance and alignment with NEP 2020, the University shall adopt a robust curriculum governance mechanism.

This shall include:

- ☐ Periodic curriculum review by Boards of Studies (BOS)
- ☐ Approval and oversight by the Academic Council
- ☐ Alignment with National Higher Education Qualifications Framework (NHEQF)
- ☐ Incorporation of feedback from industry, alumni, students, and other stakeholders

Curriculum restructuring shall be dynamic and responsive to emerging knowledge areas, societal needs, and national priorities.

3.8 Transition and Implementation Provisions

The University acknowledges that NEP 2020 implementation is phased and evolutionary.

Transitional arrangements shall be made to:

- ☐ Protect the academic interests of existing students
- ☐ Ensure smooth migration to revised curricula
- ☐ Avoid disruption in teaching, learning, and assessment processes

All restructuring measures shall be implemented with due notice, clarity, and institutional

4. TEACHING–LEARNING AND ASSESSMENT REFORMS

In alignment with the core principles of the National Education Policy (NEP) 2020, Mangalayatan University shall undertake comprehensive reforms in teaching –learning processes and assessment systems to promote learner-centricity, conceptual understanding, critical thinking, creativity, and real-world applicability of knowledge. These reforms shall be

guided by Outcome -Based Education (OBE), academic flexibility, and continuous

4.1 Learner-Centric and Outcome-Based Pedagogy

The University shall adopt a learner-centric pedagogical framework that shifts the focus from rote learning to conceptual clarity, analytical reasoning, and application of knowledge.

Key features shall include:

- ☐ Adoption of Outcome-Based Education (OBE) aligned with the National Higher Education Qualifications Framework (NHEQF)
- ☐ Clearly defined Programme Outcomes (POs), Programme Specific Outcomes (PSOs), and Course Outcomes (COs)
- ☐ Alignment of teaching strategies, learning activities, and assessment methods with intended learning outcomes
- ☐ Periodic mapping and review of CO–PO attainment

Faculty members shall be encouraged to design courses that foster independent learning, inquiry, and reflective thinking.

4.2 Innovative and Experiential Teaching–Learning Methods

To enhance learning effectiveness and engagement, the University shall promote diverse and innovative pedagogical approaches, including:

- ☐ Experiential and activity-based learning
- ☐ Project-based and problem-based learning
- ☐ Case studies, and role plays
- ☐ Fieldwork, internships, and community engagement
- ☐ Laboratory-based and hands-on training
- ☐ Collaborative and peer learning

Such methods shall be integrated into course delivery wherever pedagogically appropriate and

academically feasible.

4.3 Blended, Digital, and Technology-Enabled Learning

Recognizing the role of technology in modern education, Mangalayatan University shall strengthen blended and digital learning ecosystems.

- ☐ Use of Learning Management Systems (LMS) for content delivery, assignments, and

- ☐ Integration of MOOCs, SWAYAM, and other approved online platforms in accordance

- ☐ Development of digital learning resources such as recorded lectures, e-content, and

- ☐ Adoption of ICT-enabled teaching tools

- ☐ Faculty training in digital pedagogy and instructional design

Blended learning shall complement, and not replace, face-to-face instruction.

4.4 Flexible Learning Pathways and Student Choice

In consonance with NEP 2020, the University shall provide flexibility in learning pathways by:

- ☐ Allowing students to choose elective, minor, and multidisciplinary courses

- ☐ Facilitating credit transfer through the Academic Bank of Credits (ABC)

- ☐ Enabling lateral movement across disciplines, subject to eligibility criteria

- ☐ Supporting self-paced and modular learning where feasible

This flexibility shall empower students to personalize their academic journeys in accordance with their interests, aptitudes, and career aspirations.

4.5 Continuous and Comprehensive Assessment Framework

Assessment reforms shall focus on continuous evaluation and holistic measurement of learning outcomes, moving beyond high-stakes, end-semester examinations.

The assessment framework shall include:

- ☐ Continuous Internal Evaluation (CIE)

- ☐ Formative assessments such as quizzes, assignments, presentations, and projects

- ☐ Summative assessments including end-semester examinations

- ☐ Practical, laboratory, and field-based assessments

- ☐ Evaluation of internships, projects, and research work

Assessment tools shall be designed to evaluate not only knowledge acquisition but also analytical ability, problem-solving skills, creativity, and ethical understanding.

4.6 Transparent, Fair, and Inclusive Evaluation Practices

The University shall ensure that assessment and evaluation processes are transparent, fair, and inclusive, in compliance with UGC regulations.

☐ Clearly defined evaluation criteria and rubrics

☐ Timely declaration of results

☐ Mechanisms for re-evaluation and grievance redressal

☐ Provision for inclusive assessment practices for students with disabilities

☐ Adoption of bilingual question papers and responses wherever permitted

Evaluation standards shall be uniformly applied across programmes and disciplines.

4.7 Academic Integrity and Ethical Assessment

To uphold academic standards and credibility, the University shall promote academic integrity and ethical conduct in teaching and assessment.

☐ Measures to prevent unfair practices and plagiarism

☐ Use of plagiarism detection tools

☐ Sensitization of students to academic ethics

☐ Strict adherence to examination regulations

Ethical assessment practices shall reinforce trust, accountability, and academic excellence.

4.8 Monitoring, Review, and Continuous Improvement

The University shall establish mechanisms to monitor and continuously improve teaching – learning and assessment practices.

☐ Periodic academic audits

☐ Student feedback on courses and faculty

☐ Review by Boards of Studies (BOS) and IQAC

Insights from monitoring processes shall inform curriculum revisions, pedagogical improvements, and policy refinement.

5. FACULTY DEVELOPMENT AND CAPACITY BUILDING

Considering the central role of faculty in NEP implementation, the University shall strengthen faculty capacity by organizing regular Faculty Development Programmes (FDPs) focused on the National Education Policy (NEP), Outcome -Based Education (OBE), Information and

Communication Technology (ICT), and innovative pedagogical practices to enhance teaching–learning effectiveness. Continuous training will be provided to enable faculty members to design and deliver multidisciplinary and flexible curricula in alignment with NEP objectives. The University will also encourage academic excellence and innovation by offering incentives for quality research publications, patents, consultancy, innovation, and community outreach activities. Further, institutional support will be extended to promote interdisciplinary teaching

and collaborative research through joint projects, research clusters, and partnerships with other

academic and research institutions.

6. PROMOTION OF INDIAN LANGUAGES AND MULTILINGUALISM

In alignment with the National Education Policy (NEP) 2020, the University will actively promote Indian and regional languages, fostering multilingualism and cultural literacy among students. The University shall encourage the use of bilingual teaching –learning methods and materials wherever feasible, ensuring that students are able to engage with content in both English and their regional or mother tongues.

Students will also be allowed to respond in Indian languages during assessments, as per the specific programme guidelines, thereby supporting linguistic inclusivity and comfort in expression. Additionally, the University shall promote the study and appreciation of Indian literature, culture, and heritage through both curricular and co -curricular activities, including

workshops, seminars, cultural festivals, and literary events. These initiatives aim to strengthen

linguistic proficiency, cultural understanding, and respect for India 's diverse linguistic traditions while preparing students to participate effectively in a multilingual society.

7. RESEARCH, INNOV ATION, AND ENTREPRENEURSHIP

Mangalayatan University will foster a vibrant research and innovation ecosystem by establishing and strengthening Innovation and Incubation Ce ntre to support creative ideas, start-ups, and technology -driven initiatives. Research components will be syst ematically integrated at the undergraduate and postgraduate levels to inculcate inquiry, critical thinking,

and problem-solving skills among students. The University will actively promote start-ups, entrepreneurship, and problem-based research aligned with societal and industry needs, while also encouraging faculty and student participation in innovation-driven activities. Further, strategic collaborations with industry, reputed research institutions, and government agencies will be pursued to enhance research capacity, facilitate knowledge transfer, and ensure the practical relevance and impact of academic research.

8. INDIAN KNOWLEDGE SYSTEMS AND VALUE-BASED EDUCATION

The University shall integrate Indian Knowledge Systems (IKS) by embedding curriculum content rooted in Indian traditions, philosophical thought, and indigenous knowledge across relevant disciplines wherever possible. Dedicated courses and modules on ethics, environmental awareness, constitutional values, and social responsibility will be introduced to promote holistic and value-based education. In addition, the University will encourage experiential learning through yoga, community service, and cultural and heritage programmes, fostering physical well-being, ethical consciousness, cultural sensitivity, and a sense of national and social commitment among students.

9. GOVERNANCE AND IMPLEMENTATION MECHANISM

A University-level NEP Cell shall be constituted under the leadership of the Hon'ble Vice Chancellor to ensure effective governance and systematic implementation of the National Education Policy (NEP). The NEP Cell shall be responsible for planning, overseeing, and periodically reviewing the implementation of NEP provisions across academic, administrative, and support units of the University. It shall act as a coordinating body to facilitate alignment among various departments, schools, and statutory bodies, ensuring smooth execution of NEP-driven reforms. The Cell shall also maintain comprehensive documentation, monitor compliance with regulatory and accreditation requirements, and prepare reports for internal review and submission to appropriate authorities, thereby ensuring transparency, accountability, and continuous improvement in NEP implementation.

9.2 Institutional Integration

The implementation of the National Education Policy (NEP) shall be institutionally integrated

into the University 's core governance and quality assurance mechanisms to ensure sustainability and effectiveness. NEP -related initiatives, outcomes, and reform s shall be systematically embedded within the processes of the Internal Quality Assurance Cell (IQAC) for continuous monitoring, assessment, and improvement. The Academic Council shall regularly deliberate on NEP implementation, including curriculum reform s, pedagogical innovations, and academic regulations, to ensure policy alignment and informed decision -

10. STUDENT SUPPORT AND INCLUSIVITY

The University shall ensure comprehensive and inclusive student support systems aimed at promoting academic success, personal well -being, and equitable access to opportunities. Structured academic mentoring and counselling mechanisms shall be strengthened to address students' academic, psychological, and career -related needs. The University shall expand financial aid, scholarships, and fee support schemes to assist meritorious students as well as those from economically weaker sections. Special measures and targeted interventions shall be implemented to support disadvantaged and underrepresented groups, ensuring inclusivity, equal participation, and retention in higher education. Further, placement services, career guidance, entrepreneurship mentoring, and innovation support systems shall be enhanced to improve employability, foster career readiness, and encourage self-employment and start -up initiatives among students.

11. MONITORING AND EV ALUATION

The Monitoring and Evaluation mechanism shall ensure effective, transparent, and outcome -oriented implementation of the National Education Policy (NEP) across the Unive rsity. The Internal Quality Assurance Cell (IQAC) shall play a central role in reviewing progress, identifying gaps, and facilitating continuous improvement through evidence-based assessment.

¶ IQAC shall conduct annual, structured reviews of NEP implementat ion covering academic reforms, pedagogy, assessment practices, research initiatives, and student support systems.

¶ Periodic implementation and compliance reports shall be prepared and submitted to the Academic Council and other statutory bodies for review, guidance, and policy -level

¶ Observations and recommendations of statutory bodies shall be documented and acted

upon in a time-bound manner.

Systematic stakeholder feedback shall be collected from students, faculty, administrators, alumni, and employers to assess ground-level impact and effectiveness.

Feedback analysis and review outcomes shall inform policy refinement, strategic planning, and corrective actions to strengthen NEP implementation on a continuous

Mangalayatan University is fully committed to implementing the National Education Policy (NEP) 2020 in phased manner, with the goal of creating a holistic, multidisciplinary, inclusive,

and globally competitive academic ecosystem. The University aims to transform teaching, learning, and research practices by emphasizing academic flexibility, skill integration, experiential learning, research orientation, and value-based education. These initiatives are designed to ensure that students receive an education that is both relevant to contemporary needs and rooted in ethical and cultural values.

Through responsive governance, robust student support systems, faculty development, and strengthened industry-academia linkages, the University seeks to create an environment conducive to innovation, critical thinking, and lifelong learning. Special attention will be given

to inclusivity, ensuring equal access and opportunities for students from diverse backgrounds, as well as promoting ethical, environmental, and social consciousness across all programs.

By aligning its academic and administrative practices with NEP objectives, Mangalayatan University aspires to develop graduates who are not only competent professionals but also ethical citizens, innovative thinkers, and responsible contributors to national and global development. The University envisions its students emerging as well-rounded individuals capable of making meaningful contributions to society while upholding the values of integrity, creativity, and social responsibility.

SOURCE (PDF): <https://www.mangalayatan.in/docs/Multiple-Entry-and-Exit-System.pdf>

=====

In alignment with the National Education Policy (NEP) 2020 and UGC guidelines on the Four Year Undergraduate Programme (FYUG), the University implements a flexible Multiple Entry and Exit (MEE)

system. This enables students to enter, exit, or re -enter undergraduate programmes at defined stages

without academic penalty, fostering equity, flexibility, and lifelong learning. Exit Options and Credit

Requirements Students may exit with recognized qualifications upon earning the minimum prescribed

credits, as outlined below:

¶ Entry Flexibility: Students can join at Year 1 or laterally enter higher years with equivalent prior

credits via ABC transfer.

¶ Credit Accumulation and Transfer: All earned credits are stored in the Academic Bank of Credits

(ABC), allowing seamless re -entry, credit transfer across UGC -recognized institu tions, or resumption after breaks, subject to equivalence evaluation.

This MEE framework minimizes dropout stigma, accommodates working professionals and diverse learners, and promotes skill-based progression toward employment or higher education.

Multiple Entry and Exit System are Available in following programs:

Career Enhancement InitiativesMangalayatan University focusses on enhancing abilities of diverse students' groups in terms of skills and career. Career Advancement Cell of the University provides opportunities to students for upgrading skills through various programs organized at University and Department level. The main objective of these programs is to enhance students' capabilities as per the career requirements, to create awareness and upgrade skills of students.Career Advancement Cell puts in efforts throughout the year in this direction to achieve holistic development of personality with right set of attitudes and values. The main areas of focus are: Soft Skills, Language and Communication Skills, Life Skills and Awareness programs on latest developments in discipline specific fields.Soft SkillsWorkshops/training on presentation skills, group discussions, interview skills, digital presentations, and critical thinking are organized to hone students' skills.Subject experts/guest speakers are invited for special sessions to acquaint students with workplace challenges and strategies to deal with them.Mock interviews and weekly interaction programs with faculty experts are conducted.Students receive training in communication at the university level to enhance their professional communication skills.Language and Communication SkillsRegular programs on English communication skills are conducted across all programs for students.Faculty experts organize presentations on professional communication and the etiquettes of professional writing.Emphasis is placed on student presentations in groups to enhance their communication and teamwork skills.Special attention is given to training students for competitive examinations.Life SkillsRegular yoga sessions are organized to help students, faculty, and staff manage potential stress associated with life.Courses on Yoga Education are offered as open electives and vocational courses,providing basic knowledge and techniques of yoga asanas.Various departments of the university conduct workshops, sessions, and seminars on health and yoga, open to both students and staff from time to time.Awareness of Trends in TechnologyWorkshops/ Guest Lectures are organized in collaboration with other institutions and industries.Institutes/Departments has focus on latest trends and development in specific fields to upgrade skills of students through curricular activities.Reports of ActivitiesReport of Events for Academic Year 2022-23

Mangalayatan University focusses on enhancing abilities of diverse students' groups in terms of skills and career. Career Advancement Cell of the University provides opportunities to students for upgrading skills through various programs organized at University and Department level. The main objective of these programs is to enhance students' capabilities as per the career requirements, to create awareness and upgrade skills of students.

Career Advancement Cell puts in efforts throughout the year in this direction to achieve holistic development of personality with right set of attitudes and values. The main areas of

focus are: Soft Skills, Language and Communication Skills, Life Skills and Awareness programs on latest developments in discipline specific fields.

Workshops/training on presentation skills, group discussions, interview skills, digital presentations, and critical thinking are organized to hone students' skills. Subject experts/guest speakers are invited for special sessions to acquaint students with workplace challenges and strategies to deal with them. Mock interviews and weekly interaction programs with faculty experts are conducted. Students receive training in communication at the university level to enhance their professional communication skills.

Workshops/training on presentation skills, group discussions, interview skills, digital presentations, and critical thinking are organized to hone students' skills.

Subject experts/guest speakers are invited for special sessions to acquaint students with workplace challenges and strategies to deal with them.

Mock interviews and weekly interaction programs with faculty experts are conducted.

Students receive training in communication at the university level to enhance their professional communication skills.

Language and Communication Skills

Regular programs on English communication skills are conducted across all programs for students. Faculty experts organize presentations on professional communication and the etiquettes of professional writing. Emphasis is placed on student presentations in groups to enhance their communication and teamwork skills. Special attention is given to training students for competitive examinations.

Regular programs on English communication skills are conducted across all programs for students.

Faculty experts organize presentations on professional communication and the etiquettes of professional writing.

Emphasis is placed on student presentations in groups to enhance their communication and teamwork skills.

Special attention is given to training students for competitive examinations.

Regular yoga sessions are organized to help students, faculty, and staff manage potential stress associated with life. Courses on Yoga Education are offered as open electives and vocational courses, providing basic knowledge and techniques of yoga asanas. Various departments of the university conduct workshops, sessions, and seminars on health and yoga, open to both students and staff from time to time.

Regular yoga sessions are organized to help students, faculty, and staff manage potential stress associated with life.

Courses on Yoga Education are offered as open electives and vocational courses, providing basic knowledge and techniques of yoga asanas.

=====

SUSTAINABLE LIVING PRACTICESThe University places strong emphasis on sustainable living practices as an integral part of its vision and governance framework. Sustainability is not limited to infrastructure alone but is embedded in academic activities, administrative decision-making, campus operations, and community engagement. Through continuous efforts in environmental conservation, efficient resource utilization, and adoption of green technologies, the University aims to develop a self-sustaining, environmentally responsible campus. These initiatives also serve as experiential learning opportunities, sensitizing students and staff to global sustainability challenges and responsible citizenship.

The University places strong emphasis on sustainable living practices as an integral part of its vision and governance framework. Sustainability is not limited to infrastructure alone but is embedded in academic activities, administrative decision-making, campus operations, and community engagement. Through continuous efforts in environmental conservation, efficient resource utilization, and adoption of green technologies, the University aims to develop a self-sustaining, environmentally responsible campus. These initiatives also serve as experiential learning opportunities, sensitizing students and staff to global sustainability challenges and responsible citizenship.

Ban on use of Single-Use Plastics on CampusThe University has adopted a structured and proactive policy framework to significantly reduce and eliminate the use of single-use plastics on campus. This initiative reflects the University's commitment to environmental protection and compliance with national sustainability guidelines. The University has enforced a strict and comprehensive ban on single-use plastic items to minimize environmental pollution and promote sustainable consumption practices. The prohibition covers plastic straws, disposable cutlery, cups, plates, carry bags, packaging materials, and other non-biodegradable plastic products. This policy is uniformly implemented across the entire campus, including academic buildings, hostels, cafeterias, administrative offices, and common areas. The ban is also strictly followed during all official meetings, conferences, cultural programs, and institutional events. Regular monitoring and awareness initiatives are conducted to ensure compliance and

encourage responsible behavior among students, faculty members, staff, and visitors.

Waste ManagementThe University demonstrates a strong commitment to environmental sustainability through the implementation of comprehensive sustainable living practices. A strict ban on single-use plastics, promotion of biodegradable alternatives, and an effective waste segregation system support the development of a plastic-free campus. The institution has established structured mechanisms for the management of solid, liquid, e-waste, biomedical and sewage waste in compliance with environmental regulations. Through recycling, composting, wastewater treatment, and safe disposal practices, the University ensures responsible resource utilization and environmental protection. These initiatives collectively strengthen environmental accountability, promote sustainable consumption, and contribute to a clean, green, and eco-friendly campus environment.

Initiatives to Reduce Carbon FootprintReducing carbon emissions and enhancing energy efficiency are key priorities in the University's sustainability strategy. A combination of infrastructure upgrades, clean energy adoption, and responsible operational practices has been implemented to minimize the institution's carbon footprint.

Energy-Efficient BuildingsThe University has made significant investments in energy-efficient infrastructure to reduce energy consumption and minimize environmental impact. Campus buildings are equipped with LED lighting systems, star-rated electrical appliances, Sensor based energy consumption and energy-optimized designs that maximize efficiency while ensuring comfort. Architectural planning emphasizes the use of natural lighting, cross-ventilation, and passive cooling techniques, which significantly reduce the reliance on artificial lighting and air conditioning. In addition, energy audits are periodically conducted to identify opportunities for further efficiency improvements. These measures not only lower electricity consumption but also enhance indoor environmental quality, creating healthier and more sustainable learning and working spaces for students, faculty, and staff.

Renewable Energy InstallationsTo promote clean and sustainable energy, the University has deployed renewable energy systems across campus, with a primary focus on solar power installations. Solar photovoltaic panels are installed on rooftops and open areas, Solar Street lights and Biogas plant generating a significant portion of the campus electricity requirements. These installations help reduce dependence on fossil fuels, lower greenhouse gas emissions, and contribute to climate action goals. The University continually explores additional renewable energy solutions, including small-scale wind turbines and biogas plants, to further diversify energy sources and strengthen energy sustainability. Educational and awareness programs are also conducted to engage students and staff in responsible energy usage practices.

Sustainable Procurement PracticesThe University follows comprehensive sustainable procurement policies to ensure that all purchases and acquisitions align with environmental sustainability goals. Priority is given to energy-efficient equipment, eco-labelled products, recycled and reusable materials, and suppliers who adhere to environmentally responsible practices. This approach ensures that sustainability is integrated throughout the supply chain, from sourcing to final usage, and supports a culture of green decision-making within the institution. Regular monitoring and evaluation of procurement practices ensure that sustainability objectives are consistently met while promoting accountability and environmental stewardship.

Recycling Infrastructure on CampusThe University has developed a well-organized recycling framework to ensure responsible waste management and promote environmental awareness among campus stakeholders.

Comprehensive Recycling InfrastructureThe University has established a comprehensive recycling system with color-coded waste segregation bins, clear instructional signage, and regular collection mechanisms across academic blocks, hostels, laboratories, and cafeterias. Awareness campaigns, student initiatives, and staff participation actively promote responsible waste disposal. This integrated approach minimizes landfill waste, encourages recycling, and fosters a sustainable, eco-friendly campus culture.

Rainwater Harvesting SystemsWater conservation and sustainable water management are core components of the University's environmental initiatives. Multiple rainwater harvesting systems have been implemented to enhance water security and groundwater recharge.

Rainwater Harvesting Pit SystemThe University has implemented percolation pits at strategically selected locations across the campus to efficiently capture and channel rainwater into the ground. These pits facilitate natural infiltration, helping to recharge the groundwater table and maintain soil moisture levels. By slowing down surface runoff, percolation pits reduce soil erosion, prevent waterlogging, and contribute to the overall sustainability of the campus water resources.

Bore/Open WellsRecharge wells (bore or open wells) have been constructed to directly replenish

underground aquifers, particularly during the monsoon season when rainfall is abundant. These wells help maintain long-term groundwater levels, ensuring the availability of water for future needs. Regular monitoring and maintenance of recharge wells ensure optimal performance and maximum groundwater recharge efficiency.

Storage Tank SystemThe University also uses storage tanks to collect and store harvested rainwater for reuse in non-potable applications. Stored rainwater is utilized for gardening, landscaping, cleaning, and maintenance activities, reducing dependency on municipal water supply. This system not only promotes water conservation but also enhances the resilience of the campus against water scarcity and supports sustainable water management practices.

Renewable and Alternative Energy Sources on CampusThe University actively promotes the adoption of renewable and alternative energy sources as a key component of its commitment to climate action, energy sustainability, and environmentally responsible campus operations. By integrating clean energy solutions into daily operations, the University reduces its reliance on conventional fossil fuels, lowers greenhouse gas emissions, and contributes to sustainable development goals.

Solar EnergyThe University has installed solar photovoltaic (PV) panels at University building and campus with the capacity of more than 200 KW. These solar panels generate a significant portion of the campus electricity requirements, helping to reduce dependence on grid electricity and fossil fuels. The system is designed to optimize energy efficiency and ensure maximum generation throughout the year. Solar energy initiatives also serve as practical learning opportunities for students in renewable energy studies and environmental sciences, reinforcing the University's role as a centre for sustainable innovation.

Biogas PlantsBiogas plants have been established on campus to treat organic waste generated from hostels, cafeterias, and other food service areas. These plants convert biodegradable waste into renewable energy in the form of biogas, which is utilized for cooking and other energy needs on campus. In addition to energy generation, the plants produce nutrient-rich organic manure, which is used for landscaping and gardening, promoting a circular economy model. The integration of biogas plants demonstrates the University's holistic approach to waste-to-energy conversion, resource efficiency, and environmental responsibility.

Approach to Minimizing Food WasteThe University follows a holistic and sustainable approach to minimizing food waste, integrating social responsibility, resource efficiency, and environmental stewardship. These initiatives not only reduce wastage but also promote a culture of mindful consumption and sustainability among students, faculty, and staff.

Awareness Programs on minimizing Food WasteFood Donation ProgramsSurplus edible food generated from hostels, cafeterias, and campus events is systematically collected and redistributed through organized food donation initiatives. These programs ensure that excess food reaches underprivileged communities, thereby contributing to social welfare while significantly reducing food waste on campus. The initiatives are conducted in collaboration with local NGOs and community organizations, ensuring safe handling, hygiene, and timely distribution of food. Through these programs, students and staff are encouraged to actively participate in socially responsible practices, fostering empathy and community engagement.

Composting SystemsThe University has implemented composting systems to manage organic food waste effectively. All biodegradable waste from hostels, cafeterias, and campus kitchens is processed in these composting units, converting it into nutrient-rich organic compost. This compost is then utilized for landscaping, gardens, and green spaces within the campus, creating a closed-loop system that transforms waste into a valuable resource. Regular maintenance and monitoring of composting units ensure efficiency, hygiene, and optimal nutrient recovery. This practice not only reduces the volume of waste sent to landfills but also supports the University's sustainability and green campus goals.

Sustainable Food ProcurementThe University emphasizes sustainable food procurement and meal planning practices to minimize food wastage at the source. Measures include careful estimation of food requirements, prioritizing local and seasonal produce, and selecting vendors who follow environmentally responsible practices. These efforts optimize resource utilization, reduce overproduction, and promote mindful consumption among students, faculty, and staff. Awareness campaigns and training sessions further reinforce the importance of reducing food waste and encourage active participation in sustainable practices.

Ban on use of Single-Use Plastics on CampusThe University has adopted a structured and proactive policy framework to significantly reduce and eliminate the use of single-use plastics on campus. This initiative reflects the University's commitment to environmental protection and compliance with national sustainability guidelines. The University has enforced a strict and

comprehensive ban on single-use plastic items to minimize environmental pollution and promote sustainable consumption practices. The prohibition covers plastic straws, disposable cutlery, cups, plates, carry bags, packaging materials, and other non-biodegradable plastic products. This policy is uniformly implemented across the entire campus, including academic buildings, hostels, cafeterias, administrative offices, and common areas. The ban is also strictly followed during all official meetings, conferences, cultural programs, and institutional events. Regular monitoring and awareness initiatives are conducted to ensure compliance and encourage responsible behavior among students, faculty members, staff, and visitors.

The University has adopted a structured and proactive policy framework to significantly reduce and eliminate the use of single-use plastics on campus. This initiative reflects the University's commitment to environmental protection and compliance with national sustainability guidelines. The University has enforced a strict and comprehensive ban on single-use plastic items to minimize environmental pollution and promote sustainable consumption practices. The prohibition covers plastic straws, disposable cutlery, cups, plates, carry bags, packaging materials, and other non-biodegradable plastic products. This policy is uniformly implemented across the entire campus, including academic buildings, hostels, cafeterias, administrative offices, and common areas. The ban is also strictly followed during all official meetings, conferences, cultural programs, and institutional events. Regular monitoring and awareness initiatives are conducted to ensure compliance and encourage responsible behavior among students, faculty members, staff, and visitors.

The University has adopted a structured and proactive policy framework to significantly reduce and eliminate the use of single-use plastics on campus. This initiative reflects the University's commitment to environmental protection and compliance with national sustainability guidelines.

The University has enforced a strict and comprehensive ban on single-use plastic items to minimize environmental pollution and promote sustainable consumption practices. The prohibition covers plastic straws, disposable cutlery, cups, plates, carry bags, packaging materials, and other non-biodegradable plastic products. This policy is uniformly implemented across the entire campus, including academic buildings, hostels, cafeterias, administrative offices, and common areas. The ban is also strictly followed during all official meetings, conferences, cultural programs, and institutional events. Regular monitoring and awareness initiatives are conducted to ensure compliance and encourage responsible behavior among students, faculty members, staff, and visitors.

Waste ManagementThe University demonstrates a strong commitment to environmental sustainability through the implementation of comprehensive sustainable living practices. A strict ban on single-use plastics, promotion of biodegradable alternatives, and an effective waste segregation system support the development of a plastic-free campus. The institution has established structured mechanisms for the management of solid, liquid, e-waste, biomedical and sewage waste in compliance with environmental regulations. Through recycling, composting, wastewater treatment, and safe disposal practices, the University ensures responsible resource utilization and environmental protection. These initiatives collectively strengthen environmental accountability, promote sustainable consumption, and contribute to a clean, green, and eco-friendly campus environment.

The University demonstrates a strong commitment to environmental sustainability through the implementation of comprehensive sustainable living practices. A strict ban on single-use plastics, promotion of biodegradable alternatives, and an effective waste segregation system support the development of a plastic-free campus. The institution has established structured mechanisms for the management of solid, liquid, e-waste, biomedical and sewage waste in compliance with environmental regulations. Through recycling, composting, wastewater treatment, and safe disposal practices, the University ensures responsible resource utilization and environmental protection. These initiatives collectively strengthen environmental accountability, promote sustainable consumption, and contribute to a clean, green, and eco-friendly campus environment.

Initiatives to Reduce Carbon Footprint Reducing carbon emissions and enhancing energy efficiency are key priorities in the University's sustainability strategy. A combination of infrastructure upgrades, clean energy adoption, and responsible operational practices has been implemented to minimize the institution's carbon footprint.

Energy-Efficient Buildings The University has made significant investments in energy-efficient infrastructure to reduce energy consumption and minimize environmental impact. Campus buildings are equipped with LED lighting systems, star-rated electrical appliances, Sensor based energy consumption and energy-optimized designs that maximize efficiency while ensuring comfort. Architectural planning emphasizes the use of natural lighting, cross-ventilation, and passive cooling techniques, which significantly reduce the reliance on artificial lighting and air conditioning. In addition, energy audits are periodically conducted to identify opportunities for further efficiency improvements. These measures not only lower electricity consumption but also enhance indoor environmental quality, creating healthier and more sustainable learning and working spaces for students, faculty, and staff.

Renewable Energy Installations To promote clean and sustainable energy, the University has deployed renewable energy systems across campus, with a primary focus on solar power installations. Solar photovoltaic panels are installed on rooftops and open areas, Solar Street lights and Biogas plant generating a significant portion of the campus electricity requirements. These installations help reduce dependence on fossil fuels, lower greenhouse gas emissions, and contribute to climate action goals. The University continually explores additional renewable energy solutions, including small-scale wind turbines and biogas plants, to further diversify energy sources and strengthen energy sustainability. Educational and awareness programs are also conducted to engage students and staff in responsible energy usage practices.

Sustainable Procurement Practices The University follows comprehensive sustainable procurement policies to ensure that all purchases and acquisitions align with environmental sustainability goals. Priority is given to energy-efficient equipment, eco-labelled products, recycled and reusable materials, and suppliers who adhere to environmentally responsible practices. This approach ensures that sustainability is integrated throughout the supply chain, from sourcing to final usage, and supports a culture of green decision-making within the institution. Regular monitoring and evaluation of procurement practices ensure that sustainability objectives are consistently met while promoting accountability and environmental stewardship.

Reducing carbon emissions and enhancing energy efficiency are key priorities in the University's sustainability strategy. A combination of infrastructure upgrades, clean energy adoption, and responsible operational practices has been implemented to minimize the institution's carbon footprint.

Energy-Efficient Buildings The University has made significant investments in energy-efficient infrastructure to reduce energy consumption and minimize environmental impact. This approach ensures that sustainability is integrated throughout the supply chain, from sourcing to final usage, and supports a culture of green decision-making within the institution. Regular monitoring and evaluation of procurement practices ensure that sustainability objectives are consistently met while promoting accountability and environmental stewardship.

Reducing carbon emissions and enhancing energy efficiency are key priorities in the University's sustainability strategy. A combination of infrastructure upgrades, clean energy adoption, and responsible operational practices has been implemented to minimize the institution's carbon footprint.

Energy-Efficient Buildings

The University has made significant investments in energy-efficient infrastructure to reduce energy consumption and minimize environmental impact. Campus buildings are equipped with LED lighting systems, star-rated electrical appliances, Sensor based energy consumption and energy-optimized designs that maximize efficiency while ensuring comfort. Architectural planning emphasizes the use of natural lighting, cross-ventilation, and passive cooling techniques, which significantly reduce the reliance on artificial lighting and air conditioning. In addition, energy audits are periodically conducted to identify opportunities for further efficiency improvements. These measures not only lower electricity consumption but also enhance indoor environmental quality, creating healthier and more sustainable learning and working spaces for students, faculty, and staff.

Renewable Energy Installations

To promote clean and sustainable energy, the University has deployed renewable energy systems across campus, with a primary focus on solar power installations. Solar photovoltaic panels are installed on rooftops and open areas, Solar Street lights and Biogas plant generating a significant portion of the campus electricity requirements. These installations help reduce dependence on fossil fuels, lower greenhouse gas emissions, and contribute to climate action goals. The University continually explores additional renewable energy solutions, including small-scale wind turbines and biogas plants, to further diversify energy sources and strengthen energy sustainability. Educational and awareness programs are also conducted to engage students and staff in responsible energy usage practices.

Sustainable Procurement Practices

The University follows comprehensive sustainable procurement policies to ensure that all purchases and acquisitions align with environmental sustainability goals. Priority is given to energy-efficient equipment, eco-labelled products, recycled and reusable materials, and suppliers who adhere to environmentally responsible practices. This approach ensures that sustainability is integrated throughout the supply chain, from sourcing to final usage, and supports a culture of green decision-making within the institution. Regular monitoring and evaluation of procurement practices ensure that sustainability objectives are consistently met while promoting accountability and environmental stewardship.

Recycling Infrastructure on CampusThe University has developed a well-organized recycling framework to ensure responsible waste management and promote environmental awareness among campus stakeholders.
Comprehensive Recycling InfrastructureThe University has established a comprehensive recycling system with color-coded waste segregation bins, clear instructional signage, and regular collection mechanisms across academic blocks, hostels, laboratories, and cafeterias. Awareness campaigns, student initiatives, and staff participation actively promote responsible waste disposal. This integrated approach minimizes landfill waste, encourages recycling, and fosters a sustainable, eco-friendly campus culture.

The University has developed a well-organized recycling framework to ensure responsible waste

management and promote environmental awareness among campus stakeholders. Comprehensive Recycling Infrastructure The University has established a comprehensive recycling system with color-coded waste segregation bins, clear instructional signage, and regular collection mechanisms across academic blocks, hostels, laboratories, and cafeterias. Awareness campaigns, student initiatives, and staff participation actively promote responsible waste disposal. This integrated approach minimizes landfill waste, encourages recycling, and fosters a sustainable, eco-friendly campus culture.

The University has developed a well-organized recycling framework to ensure responsible waste management and promote environmental awareness among campus stakeholders.

Comprehensive Recycling Infrastructure

The University has established a comprehensive recycling system with color-coded waste segregation bins, clear instructional signage, and regular collection mechanisms across academic blocks, hostels, laboratories, and cafeterias. Awareness campaigns, student initiatives, and staff participation actively promote responsible waste disposal. This integrated approach minimizes landfill waste, encourages recycling, and fosters a sustainable, eco-friendly campus culture.

Rainwater Harvesting Systems Water conservation and sustainable water management are core components of the University's environmental initiatives. Multiple rainwater harvesting systems have been implemented to enhance water security and groundwater recharge. Rainwater Harvesting Pit System The University has implemented percolation pits at strategically selected locations across the campus to efficiently capture and channel rainwater into the ground. These pits facilitate natural infiltration, helping to recharge the groundwater table and maintain soil moisture levels. By slowing down surface runoff, percolation pits reduce soil erosion, prevent waterlogging, and contribute to the overall sustainability of the campus water resources. Bore/Open Wells Recharge wells (bore or open wells) have been constructed to directly replenish underground aquifers, particularly during the monsoon season when rainfall is abundant. These wells help maintain long-term groundwater levels, ensuring the availability of water for future needs. Regular monitoring and maintenance of recharge wells ensure optimal performance and maximum groundwater recharge efficiency. Storage Tank System The University also uses storage tanks to collect and store harvested rainwater for reuse in non-potable applications. Stored rainwater is utilized for gardening, landscaping, cleaning, and maintenance activities, reducing dependency on municipal water supply. This system not only promotes water conservation but also enhances the resilience of the campus against water scarcity and supports sustainable water management practices.

Water conservation and sustainable water management are core components of the University's environmental initiatives. Multiple rainwater harvesting systems have been implemented to enhance water security and groundwater recharge. Rainwater Harvesting Pit System The University has implemented percolation pits at strategically selected locations across the campus to efficiently capture and channel rainwater into the ground. Regular monitoring and maintenance of recharge wells ensure optimal performance and maximum groundwater recharge efficiency. Storage Tank System The University also uses storage tanks to collect and store harvested rainwater for reuse in non-potable applications. Stored rainwater is utilized for gardening, landscaping, cleaning, and maintenance activities, reducing dependency on municipal water supply. This system not only promotes water conservation but also enhances the resilience of the campus against water scarcity and supports sustainable water management practices.

Water conservation and sustainable water management are core components of the University's environmental initiatives. Multiple rainwater harvesting systems have been implemented to enhance water security and groundwater recharge.

Rainwater Harvesting Pit System

The University has implemented percolation pits at strategically selected locations across the campus to efficiently capture and channel rainwater into the ground. These pits facilitate natural infiltration, helping to recharge the groundwater table and maintain soil moisture levels. By slowing down surface runoff, percolation pits reduce soil erosion, prevent waterlogging, and contribute to the overall sustainability of the campus water resources.

Bore/Open Wells

Recharge wells (bore or open wells) have been constructed to directly replenish underground aquifers, particularly during the monsoon season when rainfall is abundant. These wells help maintain long-term groundwater levels, ensuring the availability of water for future needs. Regular monitoring and maintenance of recharge wells ensure optimal performance and maximum groundwater recharge efficiency.

Storage Tank System

The University also uses storage tanks to collect and store harvested rainwater for reuse in non-potable applications. Stored rainwater is utilized for gardening, landscaping, cleaning, and maintenance activities, reducing dependency on municipal water supply. This system not only promotes water conservation but also enhances the resilience of the campus against water scarcity and supports sustainable water management practices.

Renewable and Alternative Energy Sources on CampusThe University actively promotes the adoption of renewable and alternative energy sources as a key component of its commitment to climate action, energy sustainability, and environmentally responsible campus operations. By integrating clean energy solutions into daily operations, the University reduces its reliance on conventional fossil fuels, lowers greenhouse gas emissions, and contributes to sustainable development goals.

Solar EnergyThe University has installed solar photovoltaic (PV) panels at University building and campus with the capacity of more than 200 KW. These solar panels generate a significant portion of the campus electricity requirements, helping to reduce dependence on grid electricity and fossil fuels. The system is designed to optimize energy efficiency and ensure maximum generation throughout the year. Solar energy initiatives also serve as practical learning opportunities for students in renewable energy studies and environmental sciences, reinforcing the University's role as a centre for sustainable innovation.

Biogas PlantsBiogas plants have been established on campus to treat organic waste generated from hostels, cafeterias, and other food service areas. These plants convert biodegradable waste into renewable energy in the form of biogas, which is utilized for cooking and other energy needs on campus. In addition to energy generation, the plants produce nutrient-rich organic manure, which is used for landscaping and gardening, promoting a circular economy model. The integration of biogas plants demonstrates the University's holistic approach to waste-to-energy conversion, resource efficiency, and environmental responsibility.

The University actively promotes the adoption of renewable and alternative energy sources as a key component of its commitment to climate action, energy sustainability, and environmentally responsible campus operations. By integrating clean energy solutions into daily operations, the University reduces its reliance on conventional fossil fuels, lowers greenhouse gas emissions, and contributes to sustainable development goals.

Solar EnergyThe University has installed solar photovoltaic (PV) panels at University building and campus with the capacity of more than 200 KW. These solar panels generate a significant portion of the campus electricity requirements, helping to reduce dependence on grid electricity and fossil fuels. The system is designed to optimize energy efficiency and ensure maximum generation throughout the year. Solar energy initiatives also serve as practical learning opportunities for students in renewable energy

studies and environmental sciences, reinforcing the University's role as a centre for sustainable innovation. **Biogas Plants** Biogas plants have been established on campus to treat organic waste generated from hostels, cafeterias, and other food service areas. These plants convert biodegradable waste into renewable energy in the form of biogas, which is utilized for cooking and other energy needs on campus. In addition to energy generation, the plants produce nutrient-rich organic manure, which is used for landscaping and gardening, promoting a circular economy model. The integration of biogas plants demonstrates the University's holistic approach to waste-to-energy conversion, resource efficiency, and environmental responsibility.

The University actively promotes the adoption of renewable and alternative energy sources as a key component of its commitment to climate action, energy sustainability, and environmentally responsible campus operations. By integrating clean energy solutions into daily operations, the University reduces its reliance on conventional fossil fuels, lowers greenhouse gas emissions, and contributes to sustainable development goals.

The University has installed solar photovoltaic (PV) panels at University building and campus with the capacity of more than 200 KW. These solar panels generate a significant portion of the campus electricity requirements, helping to reduce dependence on grid electricity and fossil fuels. The system is designed to optimize energy efficiency and ensure maximum generation throughout the year. The integration of biogas plants demonstrates the University's holistic approach to waste-to-energy conversion, resource efficiency, and environmental responsibility.

Approach to Minimizing Food Waste The University follows a holistic and sustainable approach to minimizing food waste, integrating social responsibility, resource efficiency, and environmental stewardship. These initiatives not only reduce wastage but also promote a culture of mindful consumption and sustainability among students, faculty, and staff. **Awareness Programs** on minimizing Food Waste **Food Donation Programs** Surplus edible food generated from hostels, cafeterias, and campus events is systematically collected and redistributed through organized food donation initiatives. These programs ensure that excess food reaches underprivileged communities, thereby contributing to social welfare while significantly reducing food waste on campus. The initiatives are conducted in collaboration with local NGOs and community organizations, ensuring safe handling, hygiene, and timely distribution of food. Through these programs, students and staff are encouraged to actively participate in socially responsible practices, fostering empathy and community engagement. **Composting Systems** The University has implemented composting systems to manage organic food waste effectively. All biodegradable waste from hostels, cafeterias, and campus kitchens is processed in these composting units, converting it into nutrient-rich organic compost. This compost is then utilized for landscaping, gardens, and green spaces within the campus, creating a closed-loop system that transforms waste into a valuable resource. Regular maintenance and monitoring of composting units ensure efficiency, hygiene, and optimal nutrient recovery. This practice not only reduces the volume of waste sent to landfills but also supports the University's sustainability and green campus goals. **Sustainable Food Procurement** The University emphasizes sustainable food procurement and meal planning practices to minimize food wastage at the source. Measures include careful estimation of food requirements, prioritizing local and seasonal produce, and selecting vendors who follow environmentally responsible practices. These efforts optimize resource utilization, reduce overproduction, and promote mindful consumption among students, faculty, and staff. Awareness campaigns and training sessions further reinforce the importance of reducing food waste and encourage active participation in sustainable practices.

The University follows a holistic and sustainable approach to minimizing food waste, integrating social responsibility, resource efficiency, and environmental stewardship. These initiatives not only reduce wastage but also promote a culture of mindful consumption and sustainability among students, faculty, and staff.

Awareness Programs on minimizing Food Waste

Surplus edible food generated from hostels, cafeterias, and campus events is systematically collected and redistributed through organized food donation initiatives. These programs ensure that excess food reaches underprivileged communities, thereby contributing to social welfare while significantly reducing food waste on campus. The initiatives are conducted in collaboration with local NGOs and community organizations, ensuring safe handling, hygiene, and timely distribution of food. WHY CHOOSE MANGALAYATAN UNIVERSITY ALIGARH
Mangalayatan University is the best University for B.Pharm. Lateral Entry in Aligarh, Uttar Pradesh. Mangalayatan University is renowned for its top-notch instructional strategies, highly qualified teachers, and state-of-the-art facilities. The institution equips students to succeed effectively in business and managerial positions, as well as the pharmaceutical industry, with its extensive course options and strong professional focus. Mangalayatan University, one of the best Bachelor of Pharmacy Lateral Entry schools in the Delhi NCR area, encourages creativity, research, and a dynamic learning atmosphere. This guarantees that graduates are not only well qualified academically but also completely equipped to make valuable contributions in the business and medical fields.
7500+ Students From India And Abroad
350+ Faculties From Top Institutions
30000+ Alumni
Trust Base
72+ Area of Lush Green Campus
70+ Wide Range of Courses
400+ Top Corporate Recruiters

WHY CHOOSE MANGALAYATAN UNIVERSITY ALIGARH Mangalayatan University is the best University for B.Pharm. Lateral Entry in Aligarh, Uttar Pradesh. Pharm D Admission 2026

👥7,500+Students from India and Abroad👥350+Faculties from Top Institutions👥30,000+Alumni Trust Base📍72+Acre of Lush Green CampusPharm.D (Doctor of Pharmacy) Course Admission 2026 - Top College in Aligarh, Uttar PradeshPharm.D (Doctor of Pharmacy) is a professional doctoral degree program in pharmacy offered at Mangalayatan University. The Pharm D course is an integrated program of six years program approved by the Pharmacy Council of India (PCI). During the Pharm.D program, students learn about patient care, clinical Pharmacy and Pharmaceutical practices. At Mangalayatan University, the Pharm.D degree course curriculum consists of Clinical research, Pharmacotherapeutics, Biostatistics & research methodology, hospital pharmacy, Clinical Pharmacy, Patient counselling and healthcare practices etc. With an emphasis on topics including pharmacotherapeutics, clinical toxicology, hospital pharmacy, pharmacovigilance, and clinical research, the program aims to close the gap between medicine and pharmacy. The required hospital internship, which is one of the main components of the Pharm.D. degree program, gives students practical experience managing drug therapy, advising patients, and interacting with physicians and other healthcare professionals. They gain excellent clinical decision-making and problem-solving abilities as a result. Pharm.D. graduates are in great demand in hospitals, healthcare systems, clinical research organizations, and pharmacovigilance because they become clinical pharmacists. Pharm.D. is one of the most internationally recognized pharmacy degrees in India, and the curriculum also opens doors overseas, particularly in nations with established clinical pharmacy. Pharm D Course Eligibility Criteria after 12thThe eligibility criteria for admission to the Pharm D program are as follows: For admission in the Pharm D course, the aspirants must have completed 10+2 with at least 50% marks in PCB or PCM from a reputed State board/ICSE/CBSE/Open School. The aspirants must be 17 years of age on or before 31 December. Admission is purely based on the merit of the candidates and marks obtained in senior secondary school education (Class 10+2). Pharm D Course Duration in IndiaThe Doctor of Pharmacy course (Pharm D) is an integrated course of six (6) years, where students get admission just after 10+2 and get a Doctorate upon completion of the Pharm D course. Career Opportunities After a Doctorate (PhD) Program

A doctorate in philosophy (Ph.D.) is a highly esteemed academic credential that provides access to advanced career pathways in industry, research, academia, policymaking, and other fields. Scholars with a Ph.D. possess research abilities, critical thinking, and in-depth topic knowledge that are highly sought after in a variety of industries.

This professional degree not only equips you with expertise in a specialised area but also establishes you as a potent contender for the job. It is an opportunity for continuous learning and intellectual fulfilment. Ph.D programs can pave the way for various other international fellowships and grants.

BTech Course Admission 2026 - Top Engineering College in Aligarh, Uttar Pradesh

BTech Course is a four-year undergraduate degree program that has been broken up into eight semesters. Btech course offers students with both theoretical and practical knowledge in engineering and technology. This program offers specializations in a wide range of domains such as mechanical, electrical, civil, and computer science engineering. B.Tech admission offers courses in physics, mathematics, and fundamental engineering principles, and its students are prepared for careers in the technology industry. The B.Tech curriculum strikes a great balance between theory, practicals, and projects, enabling graduates can solve real-world problems, create, and make much-needed technological breakthroughs in their respective fields of study and work communities. To take admission to Btech Degree program, you must have completed your 10+2 grade from an accredited board with at least 50% marks with PCM/PCB. Once you complete your B.Tech degree, you will have several great and significant career opportunities in different sectors.

B.Tech Course Duration in India

Bachelor of Technology or (B.Tech) is four year duration course program. During the course program the students learn through theoretical and practical training. The extensive teaching through research and practical based learning ensures better understanding of the concepts and theories.

B.Tech Admission Eligibility Criteria after 12th

For taking admission in B.Tech Courses the students need to fulfill certain criteria as listed below:

- The students should have completed 10+2 or senior secondary school education with minimum 60% of marks from are recognized board
- The student should have studied 10+2 with PCM & CS (Physics, Chemistry, Mathematics & Computer Science)

Top Career Opportunities After BTech Engineering Degree Course

There are several remarkable, well-paying, prestigious, stable, and highly demanded career opportunities awaiting you after getting your B.Tech engineering degree. You can go for a wide range of job profiles that are sought after by B.Tech graduates, and these work profiles help you grow personally and professionally. Here are the Below are best job profiles that B.Tech engineering students graduates can pursue:

- Software Developer
- Data Scientist
- Mechanical Engineer
- Civil Engineer
- Electrical Engineer
- Product Manager
- Artificial Intelligence Engineer
- Cloud Solutions Architect
- Aerospace Engineer
- Cybersecurity Analyst

Our Star AlumniSTUDENT SPEAKMy experience at Mangalayatan University as MBA student has been truly enriching and rewarding. The academic environment of University is excellent, with highly experienced and supportive professors who have guided me throughout my journey. The curriculum is designed to provide hands-on experience in various fields. The practical approach to

teaching provided by the university has helped me to apply theoretical concepts in real-life situations. I'm specially thankful to the Training & Placement team. Thanks to their tireless efforts, I had the chance to sit for multiple company interviews. The placement faculty guided me every step of the way from resume building and interview preparation to skill development sessions and mock interviews. They assist me to secure a job in a reputed company like HDFC Bank. I really feel proud to be the part of this prestigious institute. Bharat Choudhary MBA, 2022-24 Customer Care Executive, HDFC Bank First and foremost, I would like to express my heartfelt thanks to our Placement Officer and the entire Placement Cell team. Your tireless efforts, strategic planning, and unwavering support have made this achievement possible. From training sessions to mock interviews, you have guided us with dedication and patience. We are truly thankful for your commitment to our future. & Through your continue support i successfully placed in Wayspire Ed-Tech Pvt Ltd. To our respected faculty, thank you for being our mentors and role models. Your knowledge, encouragement, and continuous support have laid a strong foundation for our success. A special thanks to the management of Mangalayatan University for fostering an environment that emphasizes both academic excellence and career readiness. Your vision has empowered students to dream big and achieve those dreams. Harsh Pachauri MBA, 2023-25 Sales Officer, Wayspire Ed-Tech Pvt. Ltd. Being a part of Mangalayatan University's BBA program has been a truly transformative experience. I am immensely grateful for the incredible opportunities the university has provided me. But what truly sets Mangalayatan apart is the incredible dedication of the Training and Placement Department. Thanks to their tireless efforts, I had the chance to sit for multiple company interviews and explore diverse job opportunities across industries. The placement faculty guided students every step of the way - from resume building and interview preparation to skill development sessions and mock interviews. Their commitment ensured that many of us not only received multiple interview calls but also successfully secured placements in reputed companies. Proud to call myself a student of Mangalayatan University, and I carry forward the confidence, knowledge, and professionalism that this institution has instilled in us. Pooja Bhardwaj BBA HR Executive, Joobaj.com My journey at Mangalayatan University as a BCA student laid the groundwork for who I am today, both personally and professionally. The curriculum wasn't just about learning programming languages or writing code-it was about understanding the larger ecosystem of technology and developing a mindset oriented toward innovation and continuous improvement. What truly set my experience apart was the exceptional support from the Training and Placement Department. Their approach goes beyond conventional placement support. From live project exposure and domain-specific workshops to mock assessments and interview simulations, every initiative was strategically aligned with industry standards. Thanks to this robust support system, I am now working as a Security Assessment Support Analyst (SASA) at Accenture, where I contribute to key processes in risk assessment and compliance. The transition from a student to a professional in a Fortune Global 500 company was seamless because of the foundation laid at Mangalayatan. Sadhana Sharma BCA Security Assessment Support Analyst, Accenture My experience at Mangalayatan University has been truly rewarding. The academic environment is excellent, with experienced and supportive professors who have guided me at every step. I am especially grateful to the Training and Placement Cell, whose efforts and continuous support played a key role in helping me prepare for job interviews and build industry-ready skills. Thanks to their guidance, I successfully got placed at Ifisys Solution LLP. Mangalayatan University has not only strengthened my academic knowledge but also built my confidence and prepared me well for the professional world. I feel proud to be a part of this institution. Shreya MBA Business Development Trainee, Ifisys Excited to announce that I have accepted my offer with Accenture India as System and Application Service Associate. Success is the product of long journey that started from Mangalayatan University while pursuing my BCA and laid the groundwork for everything that I am embarking today. The education was about more than the academics, it was learning how to think critically, how to stay curious and how to adapt in an industry that continues to evolve. I grew much more visibly curious about Cloud Computing and digital transformation when it became clear such things were relevant. Credit for a huge chunk of this goes to my Training & Placement Cell. Mock interviews, technical workshops and soft skills training, everything was designed to groom us to face the hardships of corporate like pros. Vineet Sharma BCA, 2022-25 System and Application Services Associate, Accenture My experience at Mangalayatan University is great and memorable. The mentors at Mangalayatan University helped us enhancing my academic and interpersonal skills. I am thankful for Training & Placement cell & providing a

platform to enhance my skills and an opportunity to showcase them. Aman Kumar Singh B.Tech (IT) , 2011-2014 Plant Manager M/S Om Sai Industries It was an enriching experience to study at Mangalayatan University. I am really thankful to the faculties at this university who shaped me as a person. They have been really very supportive. Also Merit Scholarship scheme of university is immensely helpful which also motivates us to excel. Customized classes in final year for GATE, CAT, SSB and Personality development had been very much enriching. Seeds for entering into Civil Services the Steel frame of our country were roped in while my time at Mangalayatan University. Gaurav Vaishnav, P.C.S B.Tech (E.C.E) 2011 – 2015 Minority Welfare Officer Government of Bihar I am proud to express my gratitude to the Mangalayatan University, which gave me path to mold my knowledge. For being a Engineering Student, the biggest attainment is to get an opportunities to get start their career in a good reputed organization. I am very grateful to all my professors and mentors, for mentoring me to achieve this goal and where I am presently. I am very thankful for scholarship offers by University for students like me, to complete my education without any obstruction. Pramod Kumar Srivastava, B. Tech CSE 2010–2013, Amazon Advertising Mangalayatan University has been a great contributor to the development of my personality. I have established my leadership, time management and team skills and have also been able to advance these skills to the whole new augment level. The best thing about this University is the cross-culture interaction between students from various parts of the world. The professors here make the university what it is today. Vidyavrat Ruhela B. Tech CSE 2010-2013 Ministry of Electronics and Information Technology It was a great experience studying at Mangalayatan University, a memory to cherish for lifetime. My experience at Mangalayatan was full of learning and grooming. I am thankful to all the faculties, mentors, and entire IET department for providing us with quality education. The relationship between faculties and student is very cordial, which gave me an opportunity to excel in my area of interest. If you want to make a career in IT, I will highly recommend you to join Mangalayatan University. Satendra Rawat, B.Tech(I.T.) 2011-2015, NTT Data I'm incredibly proud to attend Mangalayatan University. Excellent placement, a welcoming atmosphere, and highly supportive faculty in every way. The professors are excellent, with extensive experience in their fields and bringing a wealth of information to the classroom. Other extracurricular activities are available besides academic ones to help us grow and improve our talents. Manan Agrawal, B.Tech(C.S.E.) 2013-2017 Dhanuka Agritech Limited I'm delighted to share my experience during research in Mangalayatan University. My deepest respect to Prof. Jayantilal Jain, who has always inspired and guided me throughout the program and showered his blessings upon me and wishing good for my career. I'm also thankful to the library staff for their immense support during my research. Lastly, I would like to thank Mangalayatan University and their administration who gave me a chance to develop and hone my knowledge through the PhD program providing the right environment to practice the skills that I acquired during my time in the university. Thank you everyone! Dr. Anand Prakash, Phd(Libraray & Info. Sc.) Librarian, Lady Shri Ram College, Delhi It is believed that a person's life is molded at the early 20s and it is very important to be at the right place. My experience at Mangalayatan University as MBA student has been truly enriching and rewarding. The academic environment of University is excellent, with highly experienced and supportive professors who have guided me throughout my journey. The curriculum is designed to provide hands-on experience in various fields. The practical approach to teaching provided by the university has helped me to apply theoretical concepts in real-life situations. I'm specially thankful to the Training & Placement team. Thanks to their tireless efforts, I had the chance to sit for multiple company interviews. The placement faculty guided me every step of the way from resume building and interview preparation to skill development sessions and mock interviews. They assist me to secure a job in a reputed company like HDFC Bank. I really feel proud to be the part of this prestigious institute. Bharat Choudhary MBA , 2022-24 Customer Care Executive, HDFC Bank First and foremost, I would like to express my heartfelt thanks to our Placement Officer and the entire Placement Cell team. Your tireless efforts, strategic planning, and unwavering support have made this achievement possible. From training sessions to mock interviews, you have guided us with dedication and patience. We are truly thankful for your commitment to our future. & Through your continue support i successfully placed in Wayspire Ed-Tech Pvt Ltd. To our respected faculty, thank you for being our mentors and role models. Your knowledge, encouragement, and continuous support have laid a strong foundation for our

success. A special thanks to the management of Mangalayatan University for fostering an environment that emphasizes both academic excellence and career readiness. Your vision has empowered students to dream big and achieve those dreams. Harsh Pachauri MBA, 2023-25 Sales Officer, Wayspire Ed-Tech Pvt. Ltd. Being a part of Mangalayatan University's BBA program has been a truly transformative experience. I am immensely grateful for the incredible opportunities the university has provided me. But what truly sets Mangalayatan apart is the incredible dedication of the Training and Placement Department. Thanks to their tireless efforts, I had the chance to sit for multiple company interviews and explore diverse job opportunities across industries. The placement faculty guided students every step of the way - from resume building and interview preparation to skill development sessions and mock interviews. Their commitment ensured that many of us not only received multiple interview calls but also successfully secured placements in reputed companies. Proud to call myself a student of Mangalayatan University, and I carry forward the confidence, knowledge, and professionalism that this institution has instilled in us. Pooja Bhardwaj BBA HR Executive, Joobaj.com My journey at Mangalayatan University as a BCA student laid the groundwork for who I am today, both personally and professionally. The curriculum wasn't just about learning programming languages or writing code - it was about understanding the larger ecosystem of technology and developing a mindset oriented toward innovation and continuous improvement. What truly set my experience apart was the exceptional support from the Training and Placement Department. Their approach goes beyond conventional placement support. From live project exposure and domain-specific workshops to mock assessments and interview simulations, every initiative was strategically aligned with industry standards. Thanks to this robust support system, I am now working as a Security Assessment Support Analyst (SASA) at Accenture, where I contribute to key processes in risk assessment and compliance. The transition from a student to a professional in a Fortune Global 500 company was seamless because of the foundation laid at Mangalayatan. Sadhana Sharma BCA Security Assessment Support Analyst, Accenture My experience at Mangalayatan University has been truly rewarding. The academic environment is excellent, with experienced and supportive professors who have guided me at every step. I am especially grateful to the Training and Placement Cell, whose efforts and continuous support played a key role in helping me prepare for job interviews and build industry-ready skills. Thanks to their guidance, I successfully got placed at Ifisys Solution LLP. Mangalayatan University has not only strengthened my academic knowledge but also built my confidence and prepared me well for the professional world. I feel proud to be a part of this institution. Shreya MBA Business Development Trainee, Ifisys Excited to announce that I have accepted my offer with Accenture India as System and Application Service Associate. Success is the product of long journey that started from Mangalayatan University while pursuing my BCA and laid the groundwork for everything that I am embarking today. The education was about more than the academics, it was learning how to think critically, how to stay curious and how to adapt in an industry that continues to evolve. I grew much more visibly curious about Cloud Computing and digital transformation when it became clear such things were relevant. Credit for a huge chunk of this goes to my Training & Placement Cell. Mock interviews, technical workshops and soft skills training, everything was designed to groom us to face the hardships of corporate like pros. Vineet Sharma BCA, 2022-25 System and Application Services Associate, Accenture My experience at Mangalayatan University is great and memorable. The mentors at Mangalayatan University helped us enhance my academic and interpersonal skills. I am thankful for Training & Placement cell & providing a platform to enhance my skills and an opportunity to showcase them. Aman Kumar Singh B.Tech (IT), 2011-2014 Plant Manager M/S Om Sai Industries It was an enriching experience to study at Mangalayatan University. I am really thankful to the faculties at this university who shaped me as a person. They have been really very supportive. Also Merit Scholarship scheme of university is immensely helpful which also motivates us to excel. Customized classes in final year for GATE, CAT, SSB and Personality development had been very much enriching. Seeds for entering into Civil Services the Steel frame of our country were roped in while my time at Mangalayatan University. Gaurav Vaishnav, P.C.S B.Tech (E.C.E) 2011 – 2015 Minority Welfare Officer Government of Bihar I am proud to express my gratitude to the Mangalayatan University, which gave me path to mold my knowledge. For being an Engineering Student, the biggest attainment is to get an opportunities to get start their career in a good reputed organization. I am very grateful to all my professors and mentors, for mentoring me to achieve this goal and where I am presently. I am very thankful for scholarship offers by University for students like me, to complete my

education without any obstruction. Pramod Kumar Srivastava, B. Tech CSE 2010–2013, Amazon Advertising
Mangalayatan University has been a great contributor to the development of my personality. I have established my leadership, time management and team skills and have also been able to advance these skills to the whole new augment level. The best thing about this University is the cross-culture interaction between students from various parts of the world. The professors here make the university what it is today. Vidyavrat Ruhela B. Tech CSE 2010-2013 Ministry of Electronics and Information Technology
It was a great experience studying at Mangalayatan University, a memory to cherish for lifetime. My experience at Mangalayatan was full of learning and grooming. I am thankful to all the faculties, mentors, and entire IET department for providing us with quality education. The relationship between faculties and student is very cordial, which gave me an opportunity to excel in my area of interest. If you want to make a career in IT, I will highly recommend you to join Mangalayatan University. Satendra Rawat, B.Tech(I.T.) 2011-2015, NTT Data
I'm incredibly proud to attend Mangalayatan University. Excellent placement, a welcoming atmosphere, and highly supportive faculty in every way. The professors are excellent, with extensive experience in their fields and bringing a wealth of information to the classroom. Other extracurricular activities are available besides academic ones to help us grow and improve our talents. Manan Agrawal, B.Tech(C.S.E.) 2013-2017 Dhanuka Agritech Limited
I'm delighted to share my experience during research in Mangalayatan University. My deepest respect to Prof. Jayantilal Jain, who has always inspired and guided me throughout the program and showered his blessings upon me and wishing good for my career. I'm also thankful to the library staff for their immense support during my research. Lastly, I would like to thank Mangalayatan University and their administration who gave me a chance to develop and hone my knowledge through the PhD program providing the right environment to practice the skills that I acquired during my time in the university. Thank you everyone! Dr. Anand Prakash, Phd(Libraray & Info. Sc.) Librarian, Lady Shri Ram College, Delhi

Excited to announce that I have accepted my offer with Accenture India as System and Application Service Associate. Success is the product of long journey that started from Mangalayatan University while pursuing my BCA and laid the groundwork for everything that I am embarking today. The education was about more than the academics, it was learning how to think critically, how to stay curious and how to adapt in an industry that continues to evolve. I grew much more visibly curious about Cloud Computing and digital transformation when it became clear such things were relevant. Credit for a huge chunk of this goes to my Training & Placement Cell. Mock interviews, technical workshops and soft skills training, everything was designed to groom us to face the hardships of corporate like pros.

It was an enriching experience to study at Mangalayatan University. I am really thankful to the faculties at this university who shaped me as a person. They have been really very supportive. Also Merit Scholarship scheme of university is immensely helpful which also motivates us to excel. Customized classes in final year for GATE, CAT, SSB and Personality development had been very much enriching. Seeds for entering into Civil Services the Steel frame of our country were roped in while my time at Mangalayatan University.

It is believed that a person's life is molded at the early 20s and it is very important to be at the right place. In that case, I am glad that Mangalayatan happened to me. University conducted various activities every month, which strongly built our skills and collected a lot of achievements. Being the president of the MUSC with the huge support of professors and students let me achieve my milestones. Academic excellence along with the overall growth of the person is what the institution aims. Overall it was a wonderful experience and I have a lifetime of good memories.Sukanya RaghuvanshiCorporate Trainer | Life Trainer | POSH Training NTT Data

The University is tightly focused on collaborative approach and this is evident in all aspects of the University – right from administration to the students. All the credit goes to the streamlined approach, follow up of systems, rich fabrication of culture in the air, peace and ample resources like counseling to handle mental pressure of the students. I have spent my youth at this place and I will always respect, love and carry the name of my Alma Mater to the greatest heights in near future. Dr. ANUBHAV SONY 2008

TRANSPORTATIONCatering to a large number of day-scholars, Mangalayatan University runs a fleet

of 25 buses for the convenience of its students, faculty and Staff. Students are charged a subsidized transportation fee for this facility. The buses cover several routes in Aligarh, Agra, Mathura, Hathras and Sasni. Outside students typically tend to stay in the hostel. For campus residents, the university runs weekly buses to the nearby cities of Aligarh and Mathura. People availing of this facility enjoy a day out of town, with a comfortable ride back to campus in the evening. Mangalayatan University places a high premium on the safety, hygiene and punctuality of its transport system. The university takes great pains to ensure these key factors, and has appointed a dedicated Transportation Department to monitor the performance of the service. In addition, Mangalayatan University has a fleet of cars and vans for backup transport.

ACCOMMODATIONHome Away from Home for 1200 StudentsThe beautifully constructed students hostel at Mangalayatan University houses more than 1200 students. It offers single, double and triple-sharing rooms at varying rates, as per choice and availability. Located right next to the university sports facilities, the hostel is a place of action and festivity on most days. There are fully secured, secluded residential areas for boys and girls. The hostel has its own housekeeping staff, with an uninterrupted supply of purified drinking water. It has round-the-clock security, with a team of wardens (both male and female) and the proctor staying within the hostel premises. The hostel has separate gymnasium facilities for girls and boys, as well as a common set of Table Tennis for recreation purposes. It is equipped with a dedicated Television Room and lounge. It is also fully wi-fi enabled. One floor of the hostel consists exclusively of amenities, including a basic grocery shop, a saloon and laundry facilities. A dispensary with doctors is available for the students round the clock. An ambulance catering to the students is also available on campus. One of the most remarkable features of the hostel is its Open-Air Theatre. It is the venue for several formal and informal hostel functions, a key to keeping campus life brimming with energy. The first year boys' hostel came into existence in 2013, with a capacity of nearly 400, with its own warden and security team. Apart from sharing the residential load, this hostel was established with the acclimatization and security of new students in mind. The hostel has all the requisite facilities, apart from the centralized facilities at Sumangalam that are accessible to first year students.

SPORTS AND RECREATION Mangalayatan University's sprawling 70 acre campus is striking for one feature above all else – its abundance of sports facilities. At any time during the day, you are likely to stumble upon a basketball game, a cricket match or a soccer rumble, all at the same time. At night, it is the turn of parallel volleyball matches under lights, with several hostel residents cheering lustily from the perches of their rooms. The Activity Calendar is packed with several Inter-Institute sports tournaments, as well as tournaments between hostel sections and student batches. Both the girls' and the boys' gym in the hostel are equipped with state-of-the-art exercise equipment. The facility is available for day scholars too.

Both the girls' and the boys' gym in the hostel are equipped with state-of-the-art exercise equipment. The facility is available for day scholars too.

MESS FACILITYThe Sumangalam hostel has a spacious mess with high-quality 100% vegetarian food serving 4 times a day with special lunch and dinner timings for Jain students. In addition, a glass of milk is served at 10 pm everyday.Tea and coffee are available at all times during the day, up to midnight. The mess menu is highly varied, and is altered periodically in consultation with the students. Based on a coupon system, day scholars and other campus residents also avail this facility.MESS FACILITYIn addition to the mess and hostel canteen, Mangalayatan University has a central cafeteria, with ample indoor and outdoor seating space. Most of the day, the cafeteria is chock-a-block with patrons looking to grab a delicious snack, a refreshing cup of coffee or a cold drink to beat the heat. A favourite hangout for all students, the cafeteria serves a wide variety of snacks.In the late evenings, the cafeteria transforms into a restaurant, acting as an alternate eating place for those desiring a change from the regular mess food. A variety of sumptuous multi-cuisine dinner items are served, all prepared in the "Vegetarian Snacks". You will find several groups of students and staff engaged in deep conversation, enjoying a tasty, affordable meal under the clear night sky.

Computer Application Specialization Courses Provided by Mangalayatan University, Aligarh

Computer Applications Admission 2026 - Top Computer Applications Colleges in Aligarh, UP
Computer Applications Courses have been developed for those students who desire to begin their professional careers as computer engineers, software engineers, or IT analysts in the IT industry. In the fast-growing world where everything is changing, computers and information technology are playing a major part in the shaping of the world. There is a huge demand for computer scientists all over the world. Due to this demand, most students want to make their careers in the IT sector by becoming software engineers. Computer programs are pursued at three levels: undergraduate level, postgraduate level, and doctorate level, in India and worldwide. For students who are starting to pursue computer application courses at the undergraduate level, then BCA is the best option for them to make their dreams come true by enrolling in the BCA course. The BCA program is a three-year undergraduate degree that has been broken up into six semesters. On the other hand, for those who have already done their bachelor's degree in computer application courses and want to advance their skills, then MCA admission is the best choice for them. It is a two-year postgraduate program, divided into four semesters. In computer application courses, the discipline entails several areas, for instance, Introduction to Computer Systems, Programming Languages, for example, C and C++, Java, Database Management Systems, Web Development, Software Engineering, Operating Systems, Computer Networks, Data Structures and Algorithms, Mobile Application Development, Cloud Computing, Cyber Security, Computer Graphics, Artificial Intelligence Information Systems, and Human-Computer Interfaces (HCI).
Computer Application Admission Eligibility Criteria after 12th
Students who are passionate about taking admission to the computer application courses must meet certain eligibility criteria, which are essential for computer application admission. They are as listed below:
Undergraduate (BCA): Applicants must have completed their 10+2 from a recognized board with at least 50% marks for an undergraduate course in PCM/PCB.
Postgraduate (MCA): Students who are willing to take admission to a postgraduate course must have completed their bachelor's degree in BCA or equivalent from an authorized university with a minimum of 50% marks. These are the fundamental educational requirements for computer application admission.
Computer Applications Course Duration in India
The duration of computer application courses varies depending on the program level, the undergraduate program is three years, divided into six semesters, allowing students to learn progressively. The postgraduate program duration is two years, divided into four semesters and offers advanced training in IT and computer science.
Career Opportunities After Computer Applications Degree Course
In the market, there are numerous career options. Every graduate of computer applications school has aspired to have one of these extremely valuable, exceptional, steady, well-paying, and well-known work profiles. Below is a list of them:
Software Developer
Web Developer
Database Administrator
System Analyst
Network Administrator
Mobile Application Developer
IT Project Manager
Data Scientist
Cybersecurity Analyst
UX/UI Designer
You can pursue any of the aforementioned career options after completing your computer application course. However, remember that to succeed in your career, you must acquire all the necessary knowledge and abilities during your computer application course. This will enable you to obtain any job with ease. After earning a degree in computer applications, the majority of students are unable to find employment due to the lack of necessary skills that employers require. Learning and mastering the skills that will enable you to develop and thrive in life is therefore essential.
Why Choose Mangalayatan University Aligarh
Mangalayatan University is the best Computer Application Admission college in Aligarh, UP that offers good teaching practices, has well-experienced teachers and includes modern teaching infrastructure. Due to the course offerings' richness and professional orientation, the schools equip students for efficiency in business and management. As it is a top-ranking Computer Application institute in Delhi NCR, India, the university facilitates innovation, research, and an interactive learning environment so that the students passing out from the institute are fit to work in the corporate world.

B.Sc. Biotechnology
M.Sc. Biotechnology

Biotechnology Admission 2026 - Top Biotechnology College in Aligarh, UP
The biotechnology courses have been designed for those students who are eager to build their professional careers in the biotechnology industry. Biotechnology courses are pursued at two levels, undergraduate and postgraduate, in India. For students who are willing to do a biotechnology course, then the Biotechnology admission is the best option among them. The biotechnology undergraduate program takes 3 years, while the postgraduate program is a 2 year course. The topics under the Biotechnology course include cell biology, genetics, microbiology, biochemistry, molecular biology, genetic engineering, immunology, bioinformatics, bioprocess technology, environmental biotechnology, and plant and animal biotechnology. On the other hand, candidates who have completed their B.Sc. Biotechnology course and want to advance their skills and knowledge, then the M.Sc. Biotechnology course is a great option. In India and around the world, the demand for biotechnology courses is rising quickly due to developments in bio-manufacturing, healthcare, and agriculture. As a result of this demand in the job market, you have several great opportunities to work in your chosen career field. From the survey conducted that extrapolated by 2026, the biotechnology industry in India is projected to reach \$150 billion due to a strong support system from the government and the global need for vaccines and biopharmaceuticals. Biotechnology is a very attractive area for students because new positions are emerging globally due to advancements, such as CRISPR/Synbio, including fields including gene modification and individualized medicine.

Biotechnology Admission Eligibility Criteria

12th To take admission to the biotechnology course, you must meet certain fundamental educational eligibility criteria, which are necessary for admission. They are listed below:

Undergraduate (B.Sc. Biotechnology): Students must have completed their 10+2 grade from a recognized board. They should have at least 50% marks in PCM/PCB.

Postgraduate (M.Sc. Biotechnology): Candidates must have done their bachelor's degree in B.Sc. Biotechnology Course or equivalent from an accredited university with at least 50% marks. These are the basic educational requirements for biotechnology admission.

Biotechnology Course Duration
The duration of biotechnology courses is different according to the program level. However, at the undergraduate level, the duration is three years, broken up into six semesters, and at the postgraduate level, the duration is two years, divided into four semesters. Every year, the exam is held semester-wise to make it easy and smooth for students.

Career Opportunities after the Biotechnology Degree Course
There are many career opportunities available in the market. These are the highly valuable, remarkable, stable, high-paid, and renowned work profiles that every biotechnology graduate once wanted to get in their lives. They are listed below:

Biotechnologist
Research Scientist
Clinical Research Associate
Bioinformatics

SpecialistMicrobiologistBiomedical EngineerQuality Control AnalystRegulatory Affairs SpecialistEnvironmental BiotechnologistBiomanufacturing SpecialistOnce you finish your biotechnology course, you can go for any of the above-mentioned career opportunities. However, keep in mind that to succeed in your professional life, you need to develop all the required skills and knowledge during your biotechnology course so that you can get any job easily. Most students are unable to get a job after getting a biotechnology degree, not because of their abilities or intelligence, but because of their required skills, which are demanded by employers. That is why it's crucial to learn and master the skills that will help you grow and succeed in your life. Why Choose Mangalayatan University AligarhMangalayatan University is the best Biotechnology college in Aligarh, Uttar Pradesh that offers good teaching practices, has well-experienced teachers and includes modern teaching infrastructure. Due to the course offerings' richness and professional orientation, the schools equip students for efficiency in business and management. As it is a top-ranking Biotechnology institute in Delhi NCR, India, the university facilitates innovation, research, and an interactive learning environment so that the students passing out from the institute are fit to work in the corporate world.

Diploma (Agriculture)

M.Sc.(Agriculture)(Agronomy/ Horticulture)

Agriculture Admission Open 2026 - Top College in Aligarh, UPThe agriculture course has been designed for those students who are eager to shape their future in the agriculture industry. These agriculture courses are primarily done on four levels, such as diploma level, undergraduate level, postgraduate level, and doctorate level in India and across the world. Students who are excited to build a professional career in farming, agribusiness, agriculture research, or fodder production can take admission either at the diploma level or at the undergraduate level course.If we discuss the eligibility criteria for agriculture course admission at diploma and undergraduate, students must have done their 10+2 grade from an authorized board with a minimum of 45%-50% marks with PCM/PCB. In the agriculture programs, a wide range of subjects are taught to students to help them gain significant and essential skills and knowledge, which are the foundation keys to a successful career in the agriculture industry after getting an agriculture degree. Graduates can choose from a wide range of career options in the agriculture sector, which includes numerous fields such as crop production, soil management, pest control, agronomy, and agricultural engineering.Agriculture Admission Eligibility Criteria after 12thTo get admission to agriculture courses, students must meet specific eligibility requirements that vary based on the program level: They are listed below:Undergraduate Level:Candidates must have completed their 10+2 from a recognized board with at least 50% marks in science subjects, typically including biology, chemistry, and mathematics or physics.Postgraduate Level:Applicants for the M.Sc. Agriculture program must

hold a bachelor's degree in agriculture or a related field from an accredited institution with a minimum of 50% marks. Diploma Level: Students must have completed their 10th grade from an accredited board with at least 45% marks. Doctorate Level: Students must have completed their Master's degree with at least 55% marks from an accredited University. Apply Here These are the fundamental educational qualifications for agriculture course admission. Agriculture Course Duration The duration of agriculture courses varies depending on the level of study. Undergraduate Level (B.Sc) - 4 years (divided into eight semesters) Postgraduate Level (M.Sc) - 2 years (divided into four semesters) Diploma Level - 1 year (divided into two semesters) Doctorate Level - Full-Time PhD - Minimum 3 years and Maximum 8 years for male and 10 years for female Doctorate Level - Minimum 3 years and Maximum 8 years for male and 10 years for female With assessments and exams held after each semester, the semester system enables a structured learning approach and guarantees that students are ready for every phase of their education. Career Opportunities After Agriculture Program There are several great, impactful, rewarding, significant, high-paying, stable, and growth-oriented career opportunities after getting an agriculture degree. These job profiles are available in the market for those students who have an agriculture degree; therefore, once you finish your agriculture course, you can go for any of the below-given work profiles. They are as follows: Agricultural Scientist, Farm Manager, Agricultural Engineer, Crop Consultant, Agribusiness Manager, Soil Scientist, Horticulturist, Agricultural Marketing Specialist, Extension Officer, Research Scientist. These career options are the best for agriculture graduates who can start their professional journey after completing their agriculture course. By getting an agriculture degree, you can make a significant contribution to food security and sustainable practices. To excel in these roles, you must acquire relevant and essential skills and knowledge during your coursework. That is why agriculture graduates must be more attentive during their coursework and engage actively in practical learning experiences, internships, and workshops to bridge the gap between theory and practice. Graduates will succeed in their chosen fields if they have a solid understanding of both conventional and cutting-edge agricultural practices. Why Choose Mangalayatan University Aligarh? Mangalayatan University is the best agriculture admission college in Aligarh, UP, offering good teaching practices, well-experienced teachers, and a modern teaching infrastructure. Due to the richness of the course offerings and professional orientation, the school equips students with efficiency in business and management. As it is a top-ranking Agriculture institute in Delhi NCR, India, the university facilitates innovation, research, and an interactive learning environment so that the students passing out from the institute are fit to work in the corporate world.

FAQs - B.Sc Nursing Admission in Mangalayatan University Do I have to appear for NEET for admission in Nursing? No, NEET (the National Eligibility Cum Entrance Test) is not essential for getting admission to the hugely-popular B.Sc. Nursing course, anywhere in India. However, the 12th passed (with PCB with at least 45% marks in aggregate) students may have to qualify the institute-specific entrance exam for admission to this course. The main and ultimate purpose of the NEET is to streamline the admissions to the MBBS and BDS courses in India. Does Mangalayatan University offer any Scholarships for B.Sc Nursing Course? Yes, prestigious and fast-progressing Mangalayatan University (MU) of Aligarh does grant scholarships for its top-notch and prolific B.Sc. Nursing course, to help and encourage the meritorious and other deserving students. The reasonable course fee for this course is thus further curtailed by the availability of relevant scholarship. This rather employment-oriented and prolific course at MU is for 4 years. How to

Contact MU for Admission in B.Sc Nursing?Any interested students can readily and freely contact the university for getting quick and easy admission to its B.Sc. Nursing course after 10+2 with PCB, by means of any of the following pieces of contact information:Direct Call/WhatsApp: +91-9359-555-555Email:admission@mangalayatan.edu.inWhat are the Career Opportunities after Completing B.Sc. Nursing?It is a matter of fact that nurses generally do not remain unemployed. After completing b.sc in nursing, nursing professionals can easily find progressing and well-paying jobs in a rather wide range of employment institutions in the healthcare sector, at levels varying from the entry to assistant. The most prominent employment avenues for them will be the following --- private and government hospitals, primary healthcare centers, nursing schools and medical colleges, community healthcare centers, nursing homes, armed forces, and other medical and healthcare institutions where nurses are required.What are the best course options after B.Sc. in Nursing?After some service-experience at entry-to-assistant levels, the nursing professionals may opt for getting specialization in the desired areas or specialities, or pursue higher-level courses in the profession of nursing. Depending upon their specific choices, they can specialize in psychiatric, community health, medical-surgical, obstetrics, gynecology, and so on. And, if they seek to raise their academic qualifications or professional positions then they may pursue courses like M.Sc. in Nursing, MHA (Master of Health/Hospital Administration), MPH (Master of Public Health), MBA in Hospital Administration, etc.Which are some Top Recruiters of B.Sc Nursing Professionals?Apart from the employment avenues mentioned above, the ambitious and dedicated nursing professionals can also find lavish employments at the following top-level recruiters in India --- the Indian Red Cross Society, The Armed Forces, Indian Nursing Council, State Nursing Councils, and other nursing and medical institutions of renown.

Does Mangalayatan University offer any Scholarships for B.Sc Nursing Course?

Yes, prestigious and fast-progressing Mangalayatan University (MU) of Aligarh does grant scholarships for its top-notch and prolific B.Sc. Nursing course, to help and encourage the meritorious and other deserving students. The reasonable course fee for this course is thus further curtailed by the availability of relevant scholarship. This rather employment-oriented and prolific course at MU is for 4 years.

How to Contact MU for Admission in B.Sc Nursing?

Any interested students can readily and freely contact the university for getting quick and easy admission to its B.Sc. Nursing course after 10+2 with PCB, by means of any of the following pieces of contact information: Direct Call/WhatsApp: +91-9359-555-555 Email: admission@mangalayatan.edu.in

Any interested students can readily and freely contact the university for getting quick and easy admission to its B.Sc. Nursing course after 10+2 with PCB, by means of any of the following pieces of contact information:

What are the Career Opportunities after Completing B.Sc. Nursing?

It is a matter of fact that nurses generally do not remain unemployed. After completing b.sc in nursing, nursing professionals can easily find progressing and well-paying jobs in a rather wide range of employment institutions in the healthcare sector, at levels varying from the entry to assistant. The most prominent employment avenues for them will be the following --- private and government hospitals, primary healthcare centers, nursing schools and medical colleges, community healthcare centers, nursing homes, armed forces, and other medical and healthcare institutions where nurses are required.

What are the best course options after B.Sc. in Nursing?

After some service-experience at entry-to-assistant levels, the nursing professionals may opt for getting specialization in the desired areas or specialties, or pursue higher-level courses in the profession of nursing. Depending upon their specific choices, they can specialize in psychiatric, community health, medical-surgical, obstetrics, gynecology, and so on. And, if they seek to raise their academic qualifications or professional positions then they may pursue courses like M.Sc. in Nursing, MHA (Master of Health/Hospital Administration), MPH (Master of Public Health), MBA in Hospital Administration, etc.

Which are some Top Recruiters of B.Sc Nursing Professionals?

Apart from the employment avenues mentioned above, the ambitious and dedicated nursing professionals can also find lavish employments at the following top-level recruiters in India --- the Indian Red Cross Society, The Armed Forces, Indian Nursing Council, State Nursing Councils, and other nursing and medical institutions of renown.

Law Specialization Courses Provided by Mangalayan University, Aligarh

Law Course Admission 2026 - Top University in Aligarh, Uttar Pradesh Do you have a passion for justice and a strong determination to pursue a rewarding career in the field of law? If yes, then we are here to guide you toward the best career choice that you can go for after completing your 10+2 grade from an authorized board. As we know, law is an evergreen and dynamic field that offers numerous opportunities for individuals who wish to make a difference in society. The law courses offered at Mangalayan University, Aligarh, are meticulously designed to help students gain the essential skills and knowledge required to excel in legal professions. In India, law courses are pursued on three levels: undergraduate level, such as LLB

course and BA. LLB courses; postgraduate level, such as LLM courses, 1-year LLM courses for 2 years; and doctorate level, such as PhD in Law. In law programs, a broad range of subjects is taught to students, such as constitutional law, criminal law, civil law, contract law, family law, administrative law, environmental law, corporate law, intellectual property law, international law, human rights law, taxation law, labor and industrial law, jurisprudence, arbitration and alternative dispute resolution, evidence law, cyber law, property law, banking and insurance law, and legal ethics and professional conduct. No matter whether you're looking to become a skilled lawyer, a corporate legal advisor, or an academic expert in law, Mangalayatan University (MUA) provides a range of law programs catering to undergraduate, postgraduate, and integrated law aspirants.

Law Admission Eligibility Criteria in India To take admission to law courses either on the undergraduate level, postgraduate level, or doctorate level, students must meet certain eligibility criteria that are necessary for admission to law programs. They are listed below:

Undergraduate (BA.LLB.) - 10+2 with a minimum 45% aggregate marks from a recognized board

Undergraduate (LLB) - Graduation Degree with a minimum of 45% aggregate marks from a recognized university

Postgraduate (LLM 1 Yr) - LL.B./B.A.LL.B./B.B.A.LL.B. Degree with a minimum 50% aggregate marks from a recognized university

Postgraduate (LLM 2 Yrs) - LL.B./B.A.LL.B./B.B.A.LL.B. Degree with a minimum 50% aggregate marks from a recognized university

Law Course Duration after 12th

Law courses vary in duration depending on the program level. However, for undergraduate-level programs:

Undergraduate (BA.LLB.): Five years, divided into ten semesters.

Undergraduate (LLB): Three years, divided into six semesters.

Postgraduate (LLM): One to two years, divided into two to four semesters.

For the convenience of the students, the exam is held semester by semester each year at Mangalayatan University, Aligarh.

Career Opportunities After Law Degree

Students with a degree in law from Mangalayatan University have great, significant, stable, demanded, high-paying, and impactful career opportunities: If you are willing to build your professional career in law, such as a criminal lawyer, corporate lawyer, advisor, or judge, you can make your dreams come true by taking admission to law courses because law programs open many crucial doors for you. After completing your degree in law, you can go for a wide range of job profiles that are mentioned below:

Advocate
Corporate Lawyer
Judge
Legal Consultant
Public Prosecutor
Policy Analyst
Academic Professor in Law

Got Questions? People Also Ask
How do I get Admission to Hotel Management Course after 12th grade?
After the 12th grade, you usually need to take entrance exams like the NCHMCT JEE or state-level exams in order to be admitted to a hotel management program. The results of the entrance exam determine admission, which may be followed by a personal interview or guidance. Students who wish to enroll in government-approved colleges and hotel management institutes must pass national entrance examinations. One of the most well-known entrance exams for graduate-level hotel management programs is the National Council for Hotel Management Joint Entrance Examination. However, Mangalayatan University Aligarh offers you the opportunity to take admission without any exam. It's a direct admission process after your 12th grade.
How many years does the Hotel Management Course have?
A bachelor's degree in hotel management usually takes three to four years to complete. At Mangalayatan University, the duration of the course is four years.
What is a Salary in Hotel Management Program?
Hotel management salaries can differ significantly. A starting salary for recent graduates can be expected to range from ₹30,000 to ₹40,000 per month. Experience can make a big difference in this.
What are the Required Qualifications for Hotel Management Course Admission?
You must have completed your 12th grade from an accredited board with at least 50% marks in any stream.
Can I do Hotel Management Course after 12th grade?
Yes, after completing your 12th grade education, you can pursue hotel management courses such as a Bachelor's in Hotel Management (BHM) or diploma courses.
What are the Fees for Hotel Management Admission in India?
The fee for hotel management courses in India

varies depending on the program and the institution. They can vary from ₹1 lakh to ₹4 lakh annually on average.

Arts Specialization Courses Provided by Mangalayatan University, Aligarh B.A.M.A. Apply Now for 2026-27

Arts Specialization Courses Provided by Mangalayatan University, Aligarh

Arts Course Admission 2026 - Top College of Arts in Aligarh, UP Are you a student with a keen passion for learning, history, political science, sociology, economics, or any other subject? If so, then arts courses are the best career choice for you and can help you accomplish your dreams. Arts programs at Mangalayatan University, Aligarh, have been prepared for students excited to shape their future by enrolling in these courses. Arts courses are pursued on three levels: undergraduate level, postgraduate level, and doctorate level at Mangalayatan University. For students who have completed their 10+2 from any stream and want to take admission to the arts courses, then BA admission is the significant career option for such students. This is an undergraduate degree that has been broken up into six semesters at MUA. In this course, broad subjects are taught to students, such as economics, history, psychology, sociology, English, philosophy, political science, and geography, depending on their chosen fields. For students who have done their BA degree and are willing to advance their skills and knowledge in their selected areas of subjects, the MA course is a great choice for such students. This is a two-year postgraduate degree that has been divided into four semesters at MUA. In this program, the advanced level of their chosen specializations is covered, whether they want to become masters in English, history, sociology, economics, political science, or philosophy. Candidates who have got their bachelor's and master's degrees and want to get a doctorate, then the Ph.D. course is the top-notch career choice for them. It can help you to become an expert in your field, be it English, economics, political science, history, or any other subject. The duration of a PhD degree is three years, divided into six semesters.

Arts Course Admission Eligibility Criteria in India To take admission to the arts courses, candidates must fulfill some educational requirements that are necessary for arts course admission. They are as follows:

Undergraduate (Bachelor of Arts) - To gain admission in the BA Course, Students must have completed their 10+2 from an accredited board with at least 45-50% marks.

Postgraduate (Master of Arts): To gain admission to the MA Course, Candidates must have a bachelor's degree from an authorized university with a minimum of 45-50% marks.

Arts Course Duration after 12th The duration of the arts courses varies according to the course level, However, at the undergraduate level, the duration is three years, broken up into six semesters, and at the postgraduate level, the duration is two years, divided into four semesters. Each semester, students are prepared by professors with the required skills and knowledge to become good at their fields. During arts courses, you learn a lot about your selected field, whether you want to gain skills and knowledge in economics, sociology, political science, history, English, or philosophy.

Career Opportunities After Arts Degree Courses There are numerous career opportunities available in the market. Once you finish your art course, you can go for a wide range of significant, high-paying, well-renowned, stable, and great job profiles that have been designed especially for art students who hold a bachelor's or master's degree in their selected areas of specialization. Some best jobs are as follows that you can get after your Arts degree.

Teacher/Lecturer
Content Writer
Public Relations Specialist
Journalist/Reporter
Social Worker
Human Resources Specialist
Event Manager
Copywriter
Museum Curator
Political Analyst

These are the best career options that you can leverage by taking admission to the arts courses. Remember, your success depends on the right choice about your professional career that you make today. To be successful in your desired field after completing your BA, MA, or PhD degree, you must have the required skills and knowledge.

Master of Technology Course Admission 2026 - Top College in Aligarh, Uttar Pradesh M.Tech (Master of Technology) is a postgraduate engineering degree in India that focuses on advanced technical knowledge and specialised skills in various engineering fields. The MTech course is a two-year postgraduate degree program that has especially been designed by seeing the needs, interests, and career objectives of students who want to advance their existing engineering skills and knowledge. It is the most prestigious degree in India that focuses on advanced technical knowledge and specialised skills in a wide range of engineering domains. When you take admission to the M.Tech program at MUA, we ensure that you get credibility and industry

recognition because we are a UGC and AICTE-approved university. The M.Tech course syllabus encourages research, practical learning, and real-world applications while keeping up with current industry trends. Highly qualified faculty with extensive academic and industry experience provide excellent guidance for the emphasis on research projects, case studies, and thesis work. Our dedicated Training & Placement Cell helps with career guidance through industry partnerships for internships and employment placements.

M.Tech Admission Eligibility CriteriaThe following are the eligibility for Mangalayatan University's M.Tech (Master of Technology) program: Candidates must be educated in a relevant field and hold a B.Tech or B.E. degree. They should have at least 50% of the required marks in their graduation. These standards guarantee that students possess the skills and background required for further study in the engineering field of their choice.

M.Tech Course DurationThe duration of an M.Tech (Master of Technology) in Engineering is typically 2 years and divided into 4 semesters.

Top Career Opportunities after M.Tech Engineering Degree CourseThere are numerous career options available to those who complete an M.Tech. Courses:

- Design Engineer**- Works on product design, CAD modelling, and engineering solutions.
- Project Engineer/Manager**- Manages technical projects, schedules, and budgets.
- R&D Engineer (Research & Development)**- Develops new technologies and improves existing ones.
- Manufacturing Engineer**- Specializes in optimising manufacturing processes.
- Automation Engineer**- Works in robotics, AI, and industrial automation.
- Software Developer/Engineer**- Develops applications, software solutions, and systems.
- Data Scientist / Data Engineer**- Works with big data, analytics, and machine learning models.
- Cybersecurity Specialist**- Protects systems and networks from cyber threats.
- Cloud Computing Engineer**- Manages cloud services like AWS, Azure, and Google Cloud.
- AI & Machine Learning Engineer**- Develops artificial intelligence models and automation tools.
- Structural Engineer**- Designs and analyses buildings and infrastructures.
- Power Systems Engineer**- Manages electrical power generation and distribution.
- Automobile Engineer**- Works in vehicle design, safety, and performance.
- HVAC Engineer**- Designs heating, ventilation, and air conditioning systems.

DEPARTMENT OF COMPUTER APPLICATIONS
The Department of Computer Applications was established in July, 2010 with an aim to offer highly industry relevant programs to equip students with the necessary tools to excel in the software field. Since its establishment, ICA has been not only offering quality education but also meeting the needs of time by imparting the updated and latest practical knowledge. Having taken the initiative of setting up the Programmers Club at the university level, ICA is establishing itself as a thought-leading component of Mangalayatan University.

Since its establishment, ICA has been not only offering quality education but also meeting the needs of time by imparting the updated and latest practical knowledge. Having taken the initiative of setting up the Programmers Club at the university level, ICA is establishing itself as a thought-leading component of Mangalayatan University.Course NameDurationEligibilityFeesB.C.A4 Years50 % Marks in 10+2 with MathsINR90,000(per year)MCA2 Years50 % Marks in Graduate in BSc, BCA, BTech/ BEINR95,000(per year)Apply NowUNIVERSITY POLYTECHNICCourse NameDurationEligibilityFeesDiploma in Engineering - CSE3 Years45% Marks in 10thINR50,000(per year)Diploma in Engineering - ME3 Years45% Marks in 10thINR50,000(per

in July, 2010 with an aim to offer highly industry relevant programs to equip students with the necessary tools to excel in the software field. Since its establishment, ICA has been not only offering quality education but also meeting the needs of time by imparting the updated and latest practical knowledge. Having taken the initiative of setting up the Programmers Club at the university level, ICA is establishing itself as a thought-leading component of Mangalayatan University.

The Department of Computer Applications was established in July, 2010 with an aim to offer highly industry relevant programs to equip students with the necessary tools to excel in the software field. Since its establishment, ICA has been not only offering quality education but also meeting the needs of time by imparting the updated and latest practical knowledge. Having taken the initiative of setting up the Programmers Club at the university level, ICA is establishing itself as a thought-leading component of Mangalayatan University.

Diploma in Computer Science Engineering

*For 10+2 with PCM and ITI candidates, lateral entry option (where course duration is 2 years) is available for Mechanical Engg., Civil Engg., Electrical Engg., Computer Science Engg. Please check eligibility section for the eligibility of respective options.

B.Tech Programs intake at Mangalayatan University

Diploma of Engineering Admission 2026 - Top College in Aligarh, UP The Diploma of Engineering course has been designed for those students who are willing to build a strong foundation in the engineering field. The Diploma of Engineering course lasts for three years. In this course, a wide range of topics, depending on the specialization chosen, such as mechanics, thermodynamics, electrical circuits, programming languages, and materials science, among others, are taught to students to help them gain both theoretical and practical skills and knowledge needed to succeed in various engineering disciplines. The Diploma of Engineering admission is the best career option for students who are interested in making their careers in diploma mechanical, diploma civil, diploma electrical, diploma electronic and diploma computer engineering course. Diploma in Engineering admission is available at various polytechnic colleges and technical institutes across India and abroad. Upon completing the diploma, graduates can either pursue a higher degree in engineering or directly enter the workforce in their chosen engineering discipline. Eligibility Criteria for Diploma of Engineering Courses To secure admission to a Diploma of Engineering course, candidates must meet the following eligibility criteria: Candidates must have completed their 10th grade from a recognized board with at least 45% to 50% marks. The subjects should include mathematics, science, and English. These are the fundamental educational qualifications that are needed for admission to the Diploma of Engineering courses. Diploma of Engineering Course Duration The duration of the Diploma of Engineering course lasts for three years and has been divided into six semesters. Each semester includes a mix of theoretical studies, practical laboratory work, and industrial training. Top Career Opportunities After a Diploma in Engineering Students can go for a wide range of significant, remarkable, stable, high-paying, and well-known career options after getting a diploma of engineering degree from an accredited university. They have many sectors to get a suitable job, such as finding employment in a variety of sectors, including manufacturing, IT, electronics, construction, and the automotive industry. Some well-renowned job profiles are below: Junior Engineer Mechanical Engineer Civil Engineer Electrical

EngineerProduction EngineerAutomobile EngineerDesign EngineerMaintenance EngineerConstruction SupervisorProject CoordinatorMoreover, graduates can work as quality control inspectors, field engineers, and technical assistants. Apart from this, students who want to study further can go for higher education in their desired specializations, as they can take admission to the B.Tech. B.E. degree for undergraduates and for postgraduates.

Career Opportunity or Scope after an Agriculture Course in India

The sector of agriculture still finds a highly significant place in the Indian economy, in respect of its size, revenues, export earnings, and employment. Hence, the discipline of agricultural sciences is one of the richest and hugely popular professional disciplines for building lavish careers in India or abroad. This concise blog offers very useful and constructive information about the various job opportunities after agricultural courses available to students or professionals, and admissions to agriculture courses at diverse academic levels in India.

Overview: What Does an Agriculture Course Offer?

Agricultural courses provide creative education and necessary training in the broad agricultural science and its allied areas. The multidisciplinary agricultural science teaches the students/professionals about making applications of the scientific and technical concepts to boost and better the agricultural efficiency & productivity and the overall quality of agricultural products/produce concerned. Here, it may also be just stated that agriculture is the method and science of cultivation and farming of various plants and flowers (including the medicinal ones), fungi, animals, and other useful things, to meet various requirements of human life.

Major Areas Covered in Agricultural Science

The broad field of Agricultural Science includes several specialisations, such as?

Horticulture & Floriculture

Agricultural Economics & Farm Management

Agriculture Genetics

Agriculture Entomology

Agriculture Microbiology

Genetic Plant Breeding

Animal Husbandry

Agriculture and Food Business

Fisheries, Plant Physiology

Plant Biotechnology

Seed Science & Technology

Plant Pathology

Hence, the magnificent field of agriculture and Agri-based industries offers a rather wide range of career opportunities in the governmental and private sectors; self-employment

opportunities are also available.

Career Opportunities After Agriculture Degree Courses

Core Agriculture & Farming

Agri Industries

Estates and Tea Gardens

Services Sector

Agricultural Engineering & Research

Agricultural Consultancies

Poultry Farming

Handicrafts & Rural Enterprises?

Government Agriculture Departments?

Popular Job Titles in the Agriculture Sector

Plant Geneticists

Chartered Surveyors

Agricultural Scientists

Estates Managers

Food Researchers,

Agricultural Consultants,

Food Microbiologists /Researchers

Why Choose Mangalayatan University for Agriculture Courses?

In India, admissions to agriculture courses at undergraduate and postgraduate levels are generally made through the entrance examination organised at the national, State, and university levels. The minimum educational qualification for participating in such agriculture entrance exams is 10+2 or a bachelor's degree in any agricultural area/segment. The career scope after agriculture courses selected, will be as mentioned above.

Prestigious and fast-growing Mangalayatan University (MU) of Aligarh has been one of the hugely popular and leading universities in northern India for top-notch and prolific courses in agriculture. The categories of agriculture courses of Mangalayatan University are described separately under the section below, along with highlighting specific specialties of these courses. Considering all the above-specified great importance and bumper career prospects in the sector of agriculture, well-resourced and innovative MU conducts ace-quality agriculture courses at diverse levels through expert and dedicated support of well-learned and experienced teaching faculties, lavish academic infrastructure, hi-tech and well-equipped laboratories, industrial training facilities, cell for development of professional skills and careers, and the proactive training & placement cell. So far, thousands of its highly talented and ambitious students have been well-placed in numerous companies engaged in India's agricultural sector.

Boost your Future Career with the Agriculture Program

Agriculture Program

Why Choose Mangalayatan University Aligarh for Agriculture Course Admission

Mangalayatan University, Aligarh, efficiently conducts the following courses in agriculture: 3-year Diploma in Agriculture, 4-year B.Sc. in Agriculture, and 2-year M.Sc. in Agriculture. Soon in the near future, the doctoral courses (M.Phil. and Ph.D.) in agriculture will also be started, to help the ambitious professionals.

The diploma in agriculture is the first and foremost course for entering into the vast sphere of agriculture at entry to assistant levels. This course offers an overall knowledge of the agricultural sector along with the necessary practical/industrial training. The course of BSc in Agriculture reproduces well-informed and innovative professionals for serving at various posts mentioned above, particularly at mid-to-assistant level positions. The designations will differ depending on the chosen areas. While the MSc in agriculture course prepares professionals for working in assistant to high-level positions in the selected segments of the broad sector of agriculture. For getting relevant information about admission to its diploma in agriculture, as well as the MSc Agriculture and BSc agriculture admissions, Contact in below number and email ID below for agriculture courses admission in Mangalayatan University, India.

Top Reasons Why Agriculture Courses Are Trending Right Now

The Agriculture Industry in India is a very important factor in the economic development of India. It has become an integral part of the national economy. Agriculture also supports all other economic sectors in India. Agriculture is the first industry that we had in India and this industry is one of the main supports of Indian Industrial production.

To successfully address the growing international need just after the second half of 2020, India was capable of stepping in as the economic expansion progressed. For instance, India's agriculture industry was one of the few sectors that continued to be strong despite the pandemic hardships. Experts currently predict that India's agricultural growth rate would be close to 3.9% in FY 2022–23, above the growth rate of at least 3.6 % in 2021–22.

In this blog, we are going to have a better understanding of the importance of Agriculture course and the top reasons why agricultural courses are trending.

Why is Agriculture Important in Everyday Life?

Agriculture is crucial to human existence since it provides us with food and other necessities for a healthy lifestyle. In every stage of an economy's development, agriculture is essential. Agriculture not only supplies raw materials and food, but it also offers a very substantial portion of the population employment opportunities. Additionally, agriculture contributes significantly to our daily lives and offers a host of advantages.

As a result, agriculture becomes more significant in our lives. Particularly in nations like India where the agricultural industry employs more than 60% of the population.

Here, we'll provide a few crucial points that will help you comprehend the significance of agriculture to make this clear.

The following are some reasons why agriculture is significant:

Primary Source of Income

National Revenue Contribution

Contribution to International Trade

Major Raw Material Source

Numerous Employment Possibilities

Relevance to Transportation

Resources for Foreign Exchange

Boosting Economic Development

Strengthening the Supply Chain

Top Reasons Why Agriculture Courses Are Trending

You can think about studying agriculture in college if you want to work in the food supply, become an expert in agricultural development, or take over the family farm. The field has garnered attention in recent years as a result of rising enrolment in agriculture courses and a global demand for fresh talent to reinvigorate the industry from within.

Agriculture-related bachelor's and master's degrees have become incredibly popular in recent years. A growing number of students, particularly younger ones, are becoming aware of two things: first, the agriculture sector may be highly lucrative and have a significant global effect. And second, that the method we have been producing our food is unsustainable and that a change is required.

With these aspects in mind, let us find the top reasons to understand why Agriculture courses are trending-

High Demand -Over the coming decades, there will be an increasing variety of positions that need to be fulfilled, with the possibility of lucrative pay for young individuals with aspirations. To replenish a wave of talent who are just a few years away from retirement, the agriculture sector is in dire need of new workers. So, whether you want to work in agriculture, horticulture, landscape architecture, or fisheries management, you're fortunate. Wherever you intend to settle, your knowledge is in high demand because it is essential to contemporary farming.

Eco-friendly Farming Practice -There is a global need for additional knowledge and research on empathetic eco-friendly farming techniques and solutions due to environmental pressures and the suffering of farm animals.

Here are a few most promising eco-friendly farming practices-

Organic Farming

Natural Farming

Precision Farming

Conservation Agriculture

Polyculture and more.

Agriculture courses will teach you to the principles and innovative strategies that are employed to sustain production. If you're eager to discover more about animal care, food production, and the sustainability of the countryside, then a degree in agriculture is the most ideal course for you!

Various Agriculture Specialization

There has been much discussion of specialization on the agriculture board lately. Depending on the institution, different topics may be taught in different combinations. Some Bsc agriculture course put a strong emphasis on educating students for work on a worldwide scale, encompassing subjects like bio-based economies, global sustainability, and food production systems.

Overall, you'll learn a variety of technical skills and information as well as the ethical, scientific, and business foundations of the agricultural industry.

Agriculture Course Specializations one can opt for are-

Livestock Production

Woodland Management

Pasture Management

Animal Sciences

Sustainable Agriculture

Rewarding Salary for Agriculture Jobs

Agriculture is a sector of the economy that continues to provide a steady income stream to individuals who can secure higher-paying jobs within this sector. There are a variety of Agriculture jobs available to individuals including positions in agricultural fields, such as forestry or crop production, to positions in government, business, and administration. The agriculture sector has a range of jobs that are suitable for people at all skill levels. It is anticipated that employment of agricultural and food scientists will increase overall by 8% between 2021 and 2031, which is faster than the average for all occupations.

On average, over the next ten years, there will be about 4,100 opportunities for agricultural and food scientists. Career opportunities are-

Food Scientist - 606782

Horticulturist - 400000

Agricultural Scientist - 20,36,980

Agricultural Inspector - 360000

Farm Manager - 482478

Therefore, it is not unexpected that those who operate in this field have the chance to earn substantial salaries that adequately compensate for the importance of their work.

Hi-Tech Innovations in Agri Sectors

In an era when people have become dependent on technology to manage their businesses more effectively, a lot of innovative new technological advances are taking place in the agricultural and food industry. Today the focus is on the application of the latest high-tech developments in such sectors as crop production, food processing, and livestock production. New technologies are used to improve and extend traditional techniques, thereby creating better quality products and services at affordable prices.

High-tech innovations in the agricultural sector have become more and more important as the world's population continues to increase and it is expected that the growing demand for high-quality food will be met only if agriculture is equipped with the right technology and methods. The latest high-tech innovations in agriculture, food processing, and livestock production are considered potential breakthroughs that will revolutionize the way the world produces food, protects food from unwanted contamination, and treats livestock so that animals do not suffer as they are raised in large crowded livestock pens, and more.

Some of the hi-tech innovations are-

Mobile Agriculture Services

Instructive Farming Apps

Urban Farming Innovations

Crop Mapping Zones

Touchscreen Controlled Trucks

Water Purifying Pads

Wireless Irrigation Tools

Solar Powered Portable Greenhouses

Smart Modular Micro-farms, etc.

Additionally, these technological developments have contributed to the general improvement of agriculture's environmental sustainability.

Work with Cutting Edge Technology

When you study agriculture in college, you'll learn about some of the issues that current and future generations will face, whether your interests are in the water, soil, or land. A degree in agriculture today will educate you about current environmental problems, supply disruptions, and the influx of cutting-edge technologies being invented and implemented.

Agriculture in the modern era has improved dramatically. The days of manually ploughs are long gone.

Working with the most cutting-edge technology available today will include:

Self-driving tractors

Agricultural robots

Horizontal farming

Contemporary greenhouses

High Salary Courses After 12th in India

Salary is a critical factor for deciding upon the course. While salary depends on skills and experience, some courses generally offer better salary potential.

Students completing Engineering (B.Tech.) in specializations like Computer Science, Artificial Intelligence, and Data Science fetch better salary packages. Similarly, careers in the medical stream, e.g., doctors and surgeons) earn better.

Bachelor of Business Administration (BBA) is also a high-salary-fetching career with job opportunities in Investment banking and Financial analysis.

Recently, courses in Digital Marketing, Data Analytics, and Software Development have also shown commendable growth in terms of salaries. Other courses such as Law, aviation (pilot training) and hotel management have also shown promising rewards and excellent salary packages.

Career Options After 12th for All Streams

Students have a wide range of career options to choose from based on their stream in Class 12th. Government jobs and competitive exams are also popular options.

Vocational programs and diplomas are short-term skill-based courses for getting into jobs in less time. Polytechnic and ITI courses are offered in either Mechanical, Civil, Electrical, Computer Science, Electronics Engineering streams and make students eligible for working as junior engineers, technicians or supervisors in both the private and government sectors.

Top Courses After 12th: Stream-Wise List (Science, Commerce & Arts)

A few of the top courses after 12th based upon streams such as Science, Commerce and Arts are enumerated below:

Course Name	Duration	Science	Engineering	4 Years	Architecture (B.Arch)	5 Years	B.Sc. (Physics, Chemistry, Biology, Mathematics)	3 Years	Biotechnology (B.Sc/B.Tech)	3-4 Years	MBBS	4 Years	BDS	4 years	B.Sc Nursing	4 Years	B.Pharm	4 Years	BCA (Computer Applications)	3 Years	Microbiology (B.Sc.)	3 Years
Arts:BA in various streams	3 Years	B.Ed (After UG)	2 Years	after graduation	BA Foreign Languages	3 Years	Commerce:B.Com (General/Honours)	3 Years	CA (Chartered Accountancy) / CS (Company Secretary)/ CMA (Cost Management Accounting)	3-5 Years	BBA (Bachelor of Business Administration)	3 Years	Others:Hotel Management (BHM), Culinary Arts / Diploma in Cooking	1-4 Years	Animation & Multimedia	3 Years	Interior Design (Diploma/B.Des), Graphic Design, Fashion Designing	1-4 Years	Journalism and Mass Communication	3 Years		

Architecture (B.Arch)

B.Sc. (Physics, Chemistry, Biology, Mathematics)

Biotechnology (B.Sc/B.Tech)

BCA (Computer Applications)

Microbiology (B.Sc.)

BA in various streams

B.Ed (After UG)

2 Years after graduation

BA Foreign Languages

B.Com (General/Honours)

CA (Chartered Accountancy) / CS (Company Secretary)/ CMA (Cost Management Accounting)

Hotel Management (BHM), Culinary Arts / Diploma in Cooking

Animation & Multimedia

Interior Design (Diploma/B.Des), Graphic Design, Fashion Designing

Top 10 Medical Courses After 12th Without NEET (with Career Path, Scope & Salary)

Once the senior secondary school examination (10+2) is over the biggest question that must be answered is where to be admitted in case one wants to pursue a career in the medical field. In 2026, you will have a secure job in the healthcare industry because the medical education in India has grown much bigger than MBBS, with a great number of courses, meeting various interests, time periods, and career ambitions.

Even though MBBS is among the most sought-after medical courses and achieving it demands passing a very competitive NEET test with a limited number of vacancies, students now have a variety of other opportunities. Numerous medical and paramedical courses are offered without NEET and offer great career prospects in fields including nursing, pharmacy, physiotherapy, medical lab technology and radiology.

Course	Duration	Career Paths	Scope / Demand	Average Salary (India)
B.Sc Nursing	4 years	Staff Nurse, ICU Nurse, Nursing Officer, Hospital Administrator	Very high demand in hospitals in India and abroad with strong job security	INR 2.5–6 LPA
B.Pharm (Bachelor of Pharmacy)	4 years	Pharmacist, Drug Inspector, Medical Representative, Pharma Executive	Growing pharmaceutical industry with research and corporate opportunities	INR 3–6 LPA
D.Pharm (Diploma in Pharmacy)	2 years	Pharmacist, Medical Store Owner	Quick entry into healthcare sector with business opportunities	INR 2–4.5 LPA
BPT (Bachelor of Physiotherapy)	4.5 years	Physiotherapist, Sports Therapist, Rehabilitation Specialist	High demand in hospitals, sports, and fitness industries	INR 4–6 LPA
B.Sc Medical Lab Technology (MLT)	3–4 years	Lab Technician, Pathology Technician, Lab Manager	Consistent demand in diagnostics labs and hospitals	INR 3–5 LPA
B.Sc Radiology / Imaging Technology	3–4 years	Radiology Technician, MRI Technician, CT Scan Specialist	High demand due to increasing use of diagnostic imaging	INR 4–6 LPA
B.Sc Biotechnology	3 years	Biotech Analyst, Research Scientist, Lab Technician	Expanding biotech and research industry with future growth	INR 3–5 LPA
B.Sc Microbiology	3 years	Microbiologist, Lab Analyst, Research Assistant	Good scope in healthcare, pharmaceuticals, and research	INR 3–5 LPA
B.Sc Nutrition & Dietetics	3 years	Dietician, Nutritionist, Health Consultant	Growing demand due to health and lifestyle awareness	INR 3–6.5 LPA
B.Sc Psychology (Clinical)	3 years	Clinical Psychologist, Counselor, Therapist	Increasing demand in mental health and counseling services	INR 3–6 LPA

Staff Nurse, ICU Nurse, Nursing Officer, Hospital Administrator

Very high demand in hospitals in India and abroad with strong job security

B.Pharm (Bachelor of Pharmacy)

Pharmacist, Drug Inspector, Medical Representative, Pharma Executive

Growing pharmaceutical industry with research and corporate opportunities

D.Pharm (Diploma in Pharmacy)

Pharmacist, Medical Store Owner

Quick entry into healthcare sector with business opportunities

BPT (Bachelor of Physiotherapy)

Physiotherapist, Sports Therapist, Rehabilitation Specialist

High demand in hospitals, sports, and fitness industries

B.Sc Medical Lab Technology (MLT)

Lab Technician, Pathology Technician, Lab Manager

Consistent demand in diagnostics labs and hospitals

B.Sc Radiology / Imaging Technology

Radiology Technician, MRI Technician, CT Scan Specialist

High demand due to increasing use of diagnostic imaging

B.Sc Biotechnology

Biotech Analyst, Research Scientist, Lab Technician

Expanding biotech and research industry with future growth

B.Sc Microbiology

Microbiologist, Lab Analyst, Research Assistant

Good scope in healthcare, pharmaceuticals, and research

B.Sc Nutrition & Dietetics

Dietician, Nutritionist, Health Consultant

Growing demand due to health and lifestyle awareness

B.Sc Psychology (Clinical)

Clinical Psychologist, Counselor, Therapist

Increasing demand in mental health and counseling services

Top Professional Courses After 12th with High Demand

Out of the above courses, a few Professional courses are better suited for employability based on the market demand. A few professional courses are detailed below:

Course	Duration	Expected Career Role	CA (Chartered Accountancy)	4–5 years	Chartered Accountant roles
CS (Company Secretary)	3–4 years	Company Secretary roles for corporates	CMA (Cost Management Accounting)	3–4 years	Cost Accountant
B.Tech	4 years	Engineering	MBBS	4 years	Doctor in hospitals, clinics
B.Arch	5 years	Architecture in infrastructure projects	BCA	3 Years	IT engineer in corporates

CA (Chartered Accountancy)

Chartered Accountant roles

CS (Company Secretary)

Company Secretary roles for corporates

CMA (Cost Management Accounting)

Cost Accountant

Doctor in hospitals, clinics

Architecture in infrastructure projects

IT engineer in corporates

These professional courses provide specialized training and strong career stability with high earning potential.

Highest Paying Courses After 10+2 in India (Stream-Wise)

In India, numerous high-salary course options across different streams are available for students to choose from. Choosing the right one can significantly impact students' financial future. Some of the better-paying courses are detailed below:

Course	Industry	Salary Potential	Growth Level	Career roles
Engineering (Computer Science/ Artificial Intelligence)	IT/ Various industries	Very High	Excellent	Software Developer, AI Engineer, Data Engineer, Machine Learning Engineer
MBBS + Further Specialization	Medical	Very High	Excellent	Doctor, Dentist, Surgeon, Specialist (Cardiologist, Neurologist, etc.)
CA (Chartered Accountancy) / CS (Company Secretary)/ CMA (Cost Management Accounting)	Finance	Very High	High	Chartered Accountant, Auditor, Tax Consultant, Company Secretary
Data Science	IT	Very High	Excellent	Data Scientist, Data Analyst, Business Analyst, AI Specialist
BBA (Top Colleges)	Management	High	Excellent	Business Manager, Marketing Manager, HR Manager, Operations Manager
Law (Corporate)	Legal	High	High	Corporate Lawyer, Legal Advisor, Legal Consultant, Compliance Officer

Engineering (Computer Science/ Artificial Intelligence)

IT/ Various industries

Software Developer, AI Engineer, Data Engineer, Machine Learning Engineer

MBBS + Further Specialization

Doctor, Dentist, Surgeon, Specialist (Cardiologist, Neurologist, etc.)

Chartered Accountant, Auditor, Tax Consultant, Company Secretary

Data Scientist, Data Analyst, Business Analyst, AI Specialist

BBA (Top Colleges)

Business Manager, Marketing Manager, HR Manager, Operations Manager

Law (Corporate)

Corporate Lawyer, Legal Advisor, Legal Consultant, Compliance Officer

Why Choose Mangalayatan University Aligarh After 12th?

Students must understand their interests, future career profile and long-term career vision of the chosen course beforehand, jumping on the ship. Every stream, e.g. science, commerce or arts, offers excellent opportunities based upon dedication.

Pursuing courses from Mangalayatan University is the top university in Uttar Pradesh gives you leverage in your career graph, thereby ensuring a stable and progressive career.

While salaries are the outcome of the skills, experience, and industry demand, which shall vary based on the institution's reputation and practical skills, a well-chosen course can open doors to a successful and fulfilling career.

List of Top 12 Diploma Courses after 12th Pass Students in India 2026-27

Introduction: Why Choose a Diploma Course After 12th?

In the current competitive era, it can be very challenging to select the correct academic and professional direction after passing the 12th standard. Though most students go for undergraduate degrees, engineering diploma courses and other vocational courses are becoming very popular because of their job-oriented nature and short duration. These courses not only imbue students with hands-on skills but also lead to lucrative careers without investing 3 to 4 years in conventional degrees.

Whether you're from a science, commerce, or arts background, the right diploma course can shape your career positively. Let's explore the most in-demand options.

List of Top 12 Diploma Courses (1-Year & 2-Year) After 10+2 for a Bright Career in India

Here is a carefully curated list of the top 12 diploma courses ideal for 12th-pass students seeking a professional boost:

Top 12 Diploma Courses After 12th	Course Name	Course Duration	Eligibility Criteria
Diploma in Computer Science Engineering	3 Years	10+2 pass with PCM	
Diploma in Civil Engineering	3 Years	10+2 pass with PCM	
Diploma in Mechanical Engineering	3 Years	10+2 pass with PCM	
Diploma in Electrical and Electronics Engineering	3 Years	10+2 pass with PCM	
Diploma in Agriculture	1 Year	10+2 pass in any stream	
Diploma in Medical Lab Technology (DMLT)	2 Years	50% Marks in PCB/PCM in 10+2	
Diploma in			

Hotel Management1 to 2 Years10+2 pass in any stream from recognized boardDiploma in Business Management Advanced1 Year10+2 pass in any stream from recognized boardDiploma in Radiology and Medical Imaging Technology2 Years50% Marks in PCB/PCM in 10+2Diploma in Journalism and Mass Communication1-2 Years10+2 pass in any stream from a recognized boardDiploma in Pharmacy2 Years50% Marks in PCB/PCM in 10+2Diploma in Computer Applications (DCA)2 years50 % Marks in 10+2 with Maths

10+2 pass with PCM

Diploma in Electrical and Electronics Engineering

10+2 pass in any stream

Diploma in Medical Lab Technology (DMLT)

Diploma in Hotel Management

10+2 pass in any stream from recognized board

Diploma in Business Management Advanced

Diploma in Radiology and Medical Imaging Technology

Diploma in Journalism and Mass Communication

10+2 pass in any stream from a recognized board

Diploma in Pharmacy

Diploma in Computer Applications (DCA)

These technical diploma courses are best suited for students who wish to join the workforce quickly or intend to gain industry-specific insights for higher education.

Best 5 Technical Diploma Courses after 12th Science (PCM Stream)

For PCM students who have passed their 12th, several diploma courses in engineering provide a solid foundation for technical disciplines. These are generally 3-year courses that include topics like mechanical, civil, electrical, computer, and electronics engineering.

The following are the most sought-after diploma engineering courses for PCM students:

Diploma in Computer Engineering

Diploma in Electronics and Communication Engineering

These courses are well-structured and are in high demand across the country, especially in manufacturing, construction, and IT sectors. If you're looking to enter the technical world, these are excellent stepping stones.

Top 5 Diploma Courses in Healthcare and Paramedical Fields after 10+2

Healthcare is among the fastest-growing industries, and diploma courses in this field are very rewarding. If you have a science background (PCB), then these courses may guide you towards a stable and honourable career.

Diploma in Medical Lab Technology(DMLT)

Diploma in Radiology

Diploma in X-Ray Technology

Diploma in Nursing

Diploma in Optometry

Diploma in Physiotherapy

These courses are not only career-focused but also open pathways for advanced studies and specialisations. Also, they are provided by several well-known institutions, such as the best engineering college of Uttar Pradesh, which also offers paramedical education.

Top 5 Creative and Design-Based 12th Diploma Courses for Arts Students

For those who are interested in creativity and innovation, several design-based diploma courses provide skill-building as well as entrepreneurship opportunities. These programs are ideal for launching careers in media, fashion, interior design, and animation.

The best Creative and Design Based diploma courses for arts students are

Diploma in Fashion Design

Diploma in Graphic Design

Diploma in Interior Design

Diploma in Animation and Multimedia

These courses typically range from 1–2 years long and can create lucrative careers in imaginative fields such as media, advertising, and fashion. These diploma courses are also offered even in the best private colleges in Uttar Pradesh, such as Mangalayatan University, Aligarh, with state-of-the-art labs and exposure.

Job-Oriented after 12th Diploma Courses in Business, IT, and Management

Students of commerce and general streams tend to seek job-oriented diploma courses that can help them get immediate jobs or entrepreneurial opportunities. These programs focus on practical business and IT skills.

Diploma in Business Management

Diploma in Digital Marketing

Diploma in E-Commerce

Diploma in Financial Accounting

Diploma in Hotel and Hospitality Management

Diploma in Office Automation

These diploma courses are profession-oriented and very sought after, particularly in the corporate world and the technology industry. Even institutes such as the best engineering

college in Uttar Pradesh are adding management diplomas and IT diplomas to their academic offerings, along with their engineering diplomas.

How to Choose the Right Diploma Course After 12th: Expert Tips

Selecting the appropriate diploma course can be a life-altering choice. Here are some professional tips to assist you in selecting the best one:

Know Your Interests and Strengths: Recognize whether you are more interested in the technical, creative, or healthcare sectors.

Check Industry Demand: Select courses with high employability and demand in the job market.

Look for Internship/Practical Exposure: A good diploma course should have hands-on training or an internship.

Compare Duration and Fee Structure: Compare the course duration and fees provided by various institutions.

Accreditation and Recognition: Verify that the institute is accredited by the appropriate educational authorities.

Job Placement Support: Choose colleges with good industry linkages and placement support.

Further Study Opportunities: Ensure the diploma provides scope for further studies or lateral entry into degree courses.

Diploma Program

Why Mangalayatan University Aligarh is the Best Choice for Diploma Courses after 12th

Mangalayatan University, Aligarh, is one of the top-ranked private universities in Uttar Pradesh for diploma and technical education. It provides a wide array of job-ready diploma programs across engineering, healthcare, management, and creative fields.

Top 7 Reasons to opt for Mangalayatan University:

Diverse Diploma Programs—From technical and creative to healthcare, the university has more than 20 diploma programs.

Experienced Faculty—Learn from well-qualified and industry-experienced teachers.

Techno Ambience—Highly designed high-tech laboratories, workshops, studios, and libraries to facilitate hands-on training.

Strong Industry Tie-ups—Strong industry connections guarantee placements, guest lectures, and internships.

Scholarships and Financial Aid—Several scholarship schemes to sponsor meritorious and economically disadvantaged students.

UGC Recognised and Accredited—Accredited by UGC and regulatory authorities, assuring quality education.

Career Support—Specific career development cell for resume building, soft skills, and placements.

Whether you're aiming for a technical diploma, creative arts course, or healthcare program, Mangalayatan University provides the perfect blend of academic excellence and industry exposure.

A diploma after 12th is not merely an alternative anymore—it's a mainstream career option that provides hands-on skills, industry applicability, and faster induction into the job market. With options from diploma engineering courses to healthcare, business, IT, and design, there is something for everyone. Players such as Mangalayatan University, the top private college in Uttar Pradesh, have a vital role in providing high-quality diploma education supported by hands-on training and placement assistance.

Take the next step in your career journey—explore diploma courses at Mangalayatan University, Aligarh and secure your future today!

SOURCE (WEB): <https://www.mangalayatan.in/blog/regular-degree-vs-online-degree.html>

=====

The way people learn is changing with the advent of technology. Some students like to go to a school and sit in a classroom, while some don't. Therefore, Online education is becoming very popular too. It is an option for people who want to learn at their own pace. Thanks to technology, online education is helping people get the education they need to achieve their goals.

Choosing between a school and an online school is not easy. Each one has its good points. It depends on what you want to do with your life, how much money you have, and what kind of learner you are.

Top 10 Key Differences for Regular Degree vs Online Degree

1. Learning Flexibility

Regular courses require you to go to classes at a certain time. You have to be on campus. This can be hard for people who work or have families.

Online school lets you learn whenever you want and from anywhere. You can watch classes using digital books and take tests online. This means you can learn at your own pace.

2. Classroom Experience

Regular school is good because you get to meet your teachers and classmates in person. You can talk to them. Learn from them. You can also go to seminars and workshops.

Online school is different. You can talk to people online. It is not the same as being in a classroom. You can use video to talk to people. It is still not the same.

3. Cost of Education

Regular school can be expensive. You have to pay for tuition a place to live, food and other things.

Online school is usually cheaper. You do not have to pay for a place to live or food. You can save money on travel and other things.

Read Also-Top Courses After 12th in India 2026 -27 | Best Career Options, Salary & Scope

4. Time Management

Regular school requires you to go to classes at a time. This can be hard for people who work or have families.

Online school lets you learn when you want. You can make a schedule that works for you. This is good for people who work, have businesses or have kids.

5. Learning Resources

Regular school has libraries, labs and other resources that you can use.

Online school has books, recorded classes and other online resources. Both are good. They are different.

6. Career Opportunities

Today, employers care about what you can do, not where you went to school.

Regular school is good for people who want to go to school during the day.

Online school is good for people who want to keep working while they learn. You can get work experience while you are in school which makes you a stronger candidate.

7. Networking Opportunities

school is good because you get to meet people in person. You can go to events join clubs and meet people who work in your field.

Online school is different. You can meet people online. It is not the same. You can use groups and platforms to meet people but it is still not the same.

8. Technology Exposure

Regular school uses technology to help you learn.

Online school requires you to use technology all the time. You have to be good at using computers, video and other digital tools. This is a skill to have in today's workplace.

9. Work-Study Balance

Regular school can be hard for people who work time.

Online school is designed for people who want to keep working while they learn. You can apply what you learn to your job away.

Read Also-Top 15 High-Demand Courses After 12th for Future & High Salary (2026-2027)

10. Return on Investment (ROI)

School can be expensive. You have to pay a lot of money to go to school.

Online school is usually cheaper. You can keep working while you learn, which means you can earn money while you are in school. This is a way to get a return on your investment.

Online education and regular school are. Good options. Online education is a choice for people

who want to learn at their own pace and who want to save money. Regular school is a choice for people who want to meet people in person and who want to have a traditional school experience. Online education is becoming more popular because it is flexible and affordable. Many people are choosing education because it lets them learn at their own pace and it saves them money. Online education is an option, for people who want to get an education without having to go to a traditional school.

Regular Degree vs Online Degree: Quick Comparison Table

Parameter	Regular Degree	Online Degree	Learning Flexibility	Low	High	Classroom Interaction
Excellent	Good	Overall	Cost	Higher	Lower	Time Flexibility
Limited	Excellent	Learning Resources	Excellent	Career Growth	Strong	Strong (Recognized Universities)
Networking	Excellent	Good	Digital Skills	Moderate	High	Work While Studying
Difficult	Easy	Return on Investment	Moderate	High

Practical Exposure

Labs and workshops

Limited practical sessions

Strong campus experience

No campus experience

Campus placements

Career support available

Fresh school graduates

Working professionals

Campus exposure, networking, and practical learning

Flexibility, affordability, work-life balance

Which Learning format (Regular or Online) Should You Choose?

The right choice depends on your goals and circumstances. You need to think about what you want to achieve. A regular degree is a choice for students who have just finished school and want to experience campus life. They can participate in activities and learn from teachers in person.

Anonline degree is an option for people who are already working, have their own businesses, or take care of their homes. It is also good for people who need to learn at their own pace. Online degrees allow you to keep working and learn things at the same time.

You can get an education and improve your skills without having to stop working. Many universities now offer programs that are well structured. These programs have experienced teachers and good learning platforms.

These Universities have a well-developed administration and counselling department that helps students to sort out any problem they have while taking admission in a regular or online course. So online education is becoming a way to advance your career.

People do not argue about which type of degree is better anymore. Now it is about choosing the type of learning that fits your lifestyle and career goals. Eventually, Mangalayatan University stands out as a reputed top university in Uttar Pradesh offering both regular and Online courses to foster multifarious learning along with other commitments. If you like being on campus and learning in person, a regular degree is a choice. On the hand if you need flexibility and a good balance between work and life an online degree is a good option. It is also good if you want to keep learning and developing your skills without spending much money.

What matters most is not how you learn rather How you use what you learn?

You need to develop skills and keep learning throughout your career. Choosing the type of degree can be the first step to having a successful career. Online degrees and regular degrees are both options and you should choose the one that is right for you. You should think about what you want to achieve with your degree or regular degree. This will help you make the choice and have a successful career, with your online degree or regular degree.

Top 12 Best Paramedical Diploma Courses after 10+2

Paramedical professionals and staff are essential ancillary service-force in the healthcare industry. Hence, all various entities engaged in the healthcare sector imperatively require

paramedical professionals & staff in sufficient numbers, in order to run the concerned entity smoothly and dependably. Giving due weightage to above facts, today most of the well-resourced and innovative universities conduct high-quality and vocational courses in the paramedical sciences at diploma and undergraduate levels.

One such highly prestigious university for such paramedical courses in the northern India, is the mangalayatan university of Aligarh. The lower section offers exclusive information about the variousparamedical courseoffered by mangalayatan university, to help the interested students after 10+2 standard.

The paramedical technicians and staff are the integral and substantial part of the allied healthcare sector. Affluent and job-oriented paramedical courses educate and train the students for all allied roles in the healthcare sector. Today, duly qualified and skilled paramedical professionals and technicians are in huge demand in India and abroad.

The following are some of thebest options in paramedical courses after 10+2in India and abroad: ---- physiotherapy, operation theater technology (OTT), dialysis technology, medical lab technology (MLT), radiography, x-ray technology, medical imaging technology, nursing, occupational therapy, community healthcare, etc.

Below Top 12 Paramedical Courses After 12th Without NEET

Diploma in Medical Laboratory Technology (DMLT)

Diploma in Radiography and Imaging Technology

Diploma in Pharmacy (D.Pharm)

Diploma in Physiotherapy (DPT)

Diploma in Operation Theatre Technology (DOTT)

Diploma in Medical Imaging Technology

Diploma in Dental Mechanics

Diploma in Dialysis Techniques

Diploma in Emergency Medical Technician (EMT)

Diploma in Medical Records Technology

Diploma in Nursing (GNM - General Nursing and Midwifery)

Enhance Your Career Growth with aParamedical Program

Paramedical Program

Paramedical Diploma Courses Offered by Mangalayatan University Aligarh

Mangalayatan University (MU) is a widely famous university of Uttar Pradesh located near Aligarh city. Set up in 2006 and duly recognized by UGC, this MU has been offering diplomas and degrees in almost all very popular professional disciplines at all academic levels. Its dedicated membership to AIU and promising rapport with many Indian and foreign universities, enable it to conduct ace and professional courses of international standards.

Today, MU is one of the highly renowned and popular universities in the northern India, with ever-expanding fame nationwide and internationally. At present, in the sector of paramedical

sciences, well-resourced and updated MU conducts the following paramedical courses at the diploma level: ---

2-year diploma in medical lab technology (dmlt)

2-year diploma in X-ray technology

2-year diploma in operation theater technology (DOTT)

Mangalayatan University offer admission in paramedical diploma courses you can apply through online or visit university campus.

The curriculum of each of above paramedical diploma courses is rather comprehensive and updated. Moreover, MU also offers proper practical and industrial training to the undergoing students, in order to make them duly trained and skilled. Again, the training & placement Cell (T&P Cell) of the university places them in diverse entities of the healthcare sector (including the allied healthcare segment) depending on their respective skills and competence.

Apart from excellent theoretical education and teaching in the paramedical sciences by veteran professors, practical and industrial training are provided by expert paramedical technicians and industry experts. The 70-acre campus of MU offers them all necessary amenities and facilities for spending a creative and wholesome life during the selected paramedical course.

These all niceties of MU make it a hugely popular and reliable university in Uttar Pradesh and the northern India, and this ambitious university seeks to become a highly trusted and best paramedical institute in India in near future.

Top Courses After 12th for Science Students: High Salary, Career Options & Scope 2026-27

What Should I Do After 12th Science in India?

Choosing the right path after Class 12th Science is a crucial milestone that shapes a student's academic and professional future. The science stream provides entry to a vast range of fields, allowing students to shift into technical, medical, research, or analytical pathways. From old-school jobs such as engineering and medicine to new areas such as data science and biotechnology, options are vast and wide. With proper guidance and transparency, science students can secure high-paying and rewarding jobs.

This article discusses the best science courses after 12th, career prospects and future scope, and Mangalayatan University, Aligarh, as one of the best science colleges in Uttar Pradesh that provides state-of-the-art education in the same.

Why Choosing the Right Course After 12th Science Matters

Choosing the appropriate science course after 12th is critical as it sets the tone for your career and growth. The science stream, being very flexible, gives students the choice to pursue different disciplines. But if not planned well, students might get stuck in areas that are not suited to their skills or interests, and they may become dissatisfied and put their efforts to waste.

Students have to keep in mind their talent, professional interest, career prospects, and salary potential while choosing a science course. Be it a professional course such as BTech or BSc. in a basic science subject, making the right choice guarantees not just academic achievement but also professional happiness and career advancement in the long run.

List of Top 10 Courses After 12th for Science Students with High Salary in 2026

Here is a list of the most popular science courses after Class 12th, including duration, eligibility, and average salary range:

List of Top 10 Courses After 12th for Science with High Salary				
Course Name	Duration	Eligibility	Salary Range (Per Annum)	
B.Tech (Engineering)	4 Years	12th with PCM with 50% marks	3 – 12 LPA	MBBS (Medical)
	5.5 Years	12th with PCB with 50% marks	5 – 15 LPA	B.Sc. in Computer Science
	3 Years	12th with PCM with 50% marks	2.5 – 8 LPA	B.Sc. in Biotechnology
	3 Years	12th with PCB/PCM with 50% marks	3 – 10 LPA	B.Sc. in Physics/Chemistry/Maths
	3 Years	12th with PCM with 50% marks	2 – 6 LPA	B.Pharma
	4 Years	12th with PCB/PCM with 50% marks	3 – 10 LPA	B.Sc. in Agriculture
	4 Years	12th with PCB/PCM with 50% marks	2.5 – 8 LPA	BCA
	3 Years	12th with Mathematics with 50% marks	2.5 – 7 LPA	B.Sc. Nursing
	4 Years	12th with PCB with 50% marks	3 – 9 LPA	BDS (Dental Surgery)
	5 Years	12th with PCB with 50% marks	4 – 10 LPA	

B.Tech (Engineering)

12th with PCM with 50% marks

12th with PCB with 50% marks

B.Sc. in Computer Science

B.Sc. in Biotechnology

12th with PCB/PCM with 50% marks

B.Sc. in Physics/Chemistry/Maths

B.Sc. in Agriculture

12th with Mathematics with 50% marks

BDS (Dental Surgery)

These courses offer strong foundational knowledge and open doors to further studies and research. Most of these science courses are in high demand and align with current industry needs.

High-Paying Top 5 Career Options after 12th Science Students (PCM)

Science students are entitled to some of the best-paying jobs in India and the world. Below are some of the top-paying occupations based on science-based education:

Doctors and Surgeons– With degrees like MBBS or MD, doctors command high salaries based on specialization and experience.

Engineers–particularly in IT, software, petroleum, and mechanical fields–can earn between ₹5 and 20 LPA.

Data Scientists—Among the fastest-rising professions, with a B.Sc. in Computer Science or a B.Tech in AI/Data Science, data scientists earn handsome pay packages.

Pharmacists and Biotechnologists— Highly sought after in research institutes, drug companies, and biotech industries.

Software Developers—With a BCA or B.Sc. in CS, experts earn handsomely in software developer jobs in startups as well as MNCs.

Joining a well-known science program makes graduates industry-savvy and boosts their earning power during the early years in their profession.

Top 8 Professional Courses After 12th Science for a Successful Career

Apart from conventional degrees, students can also opt for professional and vocational science courses that are industry-focused and skill-based.

B.Sc. Radiology and Imaging

B.Sc. Environmental Science

Bachelor of Optometry

Diploma in Engineering (Polytechnic)

Diploma in Nutrition & Dietetics

These professional courses are usually coupled with a shorter span and include quicker placements to work in hospitals, research centres, diagnostic laboratories, and industrial corporations.

Government Job Opportunities After 12th Science

Science students also have a good edge in building a career in competitive government exams. Some of the best government career options are

Scientist jobs at DRDO, ISRO, and BARC—after B.Sc or B.Tech.

Medical Officer or Staff Nurse—After MBBS or B.Sc. Nursing.

Indian Army, Navy, and Air Force—through NDA exams.

Civil Services (IAS, IPS, IFS)—Through UPSC after graduation.

SSC Scientific Assistant, Railways, and State PSC Jobs.

Most government organisations provide recruitment to science graduates, and thus admission to science courses is a viable measure towards job security and status.

Best 6 Creative & Design-Oriented Courses for Science Stream Students

Science restricts nothing for those with creative minds. There are a number of creative courses that fit science students:

B.Des. in Product Design or Industrial Design

B.Sc. in Animation & Multimedia

Bachelor's in Architecture (B.Arch)

B.Sc. in Game Designing

B.Sc. in Fashion Technology

B.Sc. in Interior Design

Such courses integrate logic with creativity and are apt for science students to pursue alternative but rewarding careers.

Why Science Is a Smart Choice: Scope and Future Growth

Choosing the science stream after 10th provides students with insurance against the future and multidisciplinary opportunities. The technological growth and progress in healthcare have boosted the demand for skilled science professionals in India as well as foreign countries.

Key benefits of studying science:

Postgraduate and doctorate-level science education options.

Global Career Opportunities—Science degrees enjoy global recognition.

Research & Innovation—Working opportunities in the world's best labs and companies.

Entrepreneurship—Biotech, health tech, agritech, and IT startups are flourishing.

With the rapid growth in areas such as AI, robotics, biotechnology, and nanotechnology, the trends of science course admissions are increasing manifold, particularly at institutions such as Mangalayatan University.

SOURCE (WEB): <https://www.mangalayatan.in/blog/pharmacy-vs-nursing-which-career-is-better.html>

=====

Healthcare is one of the growing industries in the world. It is a field that gives you a chance to help people and have a career at the same time. After Class 12, many students want to pursue

a Career in Nursing or Pharmacy. Both professional fields are very important for taking care of patients and the healthcare system. They are quite different in terms of what you do and how you work.

If you are not sure whether to choose Nursing or Pharmacy, this guide will help you understand the differences between the two. This will help you decide which one is better for you based on what you like and what you want to achieve.

What is Nursing?

Nursing is a field that focuses on taking care of people, families and communities. Nurses work closely with patients, doctors and other healthcare professionals. They check patients' health, administer medications, assist in treatment procedures, give them medicine and provide support.

Nurses are usually the first people patients meet when they go to hospitals, clinics or other healthcare places. To become a successful nurse, you need to be kind, able to communicate well and want to help people.

Some Popular Nursing Courses are:

ANM (Auxiliary Nursing Midwifery)

GNM (General Nursing and Midwifery)

Post Basic B.Sc. Nursing

Read Also-B Pharmacy Course Details: Subjects, Eligibility, Admission, Career Scope, Job Opportunities & Salary (2026)

What is Pharmacy?

Pharmacy is the study of medicines. Pharmacists specialize in giving out and researching medicines. They make sure that medicines are safe and work well.

Unlike nurses, pharmacists do not work directly with patients much. They are more focused on medicines, how they work and how to use them safely.

Some Popular Pharmacy Courses are:

Diploma in Pharmacy (D.Pharm)

Bachelor of Pharmacy (B.Pharm)

Master of Pharmacy (M.Pharm)

Pharm.D (Doctor of Pharmacy)

Nursing vs Pharmacy: Key Differences

Nursing Pharmacy Nursing is about taking care of patients A pharmacy is about medicines and drug therapy Nurses work with patients every day Pharmacists are experts on medicines. How to use them safely Nursing requires kindness and good communication skills A pharmacy requires knowledge and analytical skills Nursing gives you opportunities to work abroad Pharmacy gives you options in research and industry Choose Nursing if you like helping people Choose Pharmacy if you like science and medicines

Nursing is about taking care of patients

A pharmacy is about medicines and drug therapy

Nurses work with patients every day

Pharmacists are experts on medicines. How to use them safely

Nursing requires kindness and good communication skills

A pharmacy requires knowledge and analytical skills

Nursing gives you opportunities to work abroad

Pharmacy gives you options in research and industry

Choose Nursing if you like helping people

Choose Pharmacy if you like science and medicines

Why Choose Nursing?

You should choose Nursing if:

You like helping people and taking care of them.

You should also choose Nursing if you like talking to patients and working with doctors.

You are good at communicating with people and can handle situations. Nursing might be for you.

You are great for people who like making a difference in patients' lives every day.

Nursing is the perfect career for those with a passion for patient care and seeking a job with a high level of job satisfaction as well as one that has worldwide opportunities.

Why Choose Pharmacy?

You should choose Pharmacy if you like science and biology.

You should also choose Pharmacy if you are interested in medicines and how they are made.

You like working in laboratories and doing research. Pharmacy might be for you.

You are great for students who like science and want to help people by being experts in medicine.

Pharmacy is a good career for students interested in taking part in healthcare by managing medicines and making advancements in the field of medicine and science.

Future Scope of Nursing and Pharmacy

Both Nursing and Pharmacy have job opportunities. The healthcare industry is. People are living longer. This means that there is a demand for nurses and pharmacists.

Nursing is in demand all over the world especially in countries that do not have enough healthcare workers. Pharmacy gives you career options in healthcare, research, manufacturing and marketing.

Begin your Healthcare Journey with a Nursing and Pharmacy Program

Nursing and Pharmacy Program

Why Choose Mangalayatan University Aligarh for Nursing and Pharmacy Programs?

Making the right choice of university is as vital as selecting the right career. Industry-oriented Nursing and Pharmacy courses to equip students with practical knowledge, clinical exposure, research opportunities and professional skills that are required in the healthcare industry today are offered at Mangalayatan University, Aligarh.

The university provides students with up-to-date laboratories, well-qualified faculty members, a state-of-the-art learning environment and good placement assistance to foster a successful healthcare career. In either case, Mangalayatan University Aligarh offers the educational framework and experiential learning to help you reach your career objectives, whether you opt for Nursing or Pharmacy.

Nursing and Pharmacy are respected health care professions with good job security and career opportunities, as well as interacting with people and helping to improve their lives. It is important to consider the following when deciding which ones to choose: your interests, your strengths and your long-term career goals.

Nursing is a career for people who like direct patient care, communication, and assistance with recovery. Aspirants take up Pharmacy if they have inclination towards learning medicine and love for Pharmacy may trigger you to take science and healthcare innovation. Regardless of your option, studying at Mangalayatan University Aligarh can help you acquire the expertise, abilities, and self-assurance to carve out a fulfilling and thriving career in healthcare.

Why Choose BCA After Class 12?

In today's world, technology is very important for every business. From banks and hospitals to schools and online shopping companies are using software and digital solutions to grow. This has created a need for people who are good at technology.

For students who have just finished Class 12 and want a career in technology, the BCA course is

one of the most popular undergraduate programs.

What is BCA (Bachelor of Computer Applications)?

BCA is a three-year undergraduate degree course that teaches students about computer applications, software development, programming languages, database management, networking, and modern technologies.

This course gives students the knowledge and skills they need to succeed in the technology industry.

Why Should You Consider BCA After Class 12?

1. High Demand for IT and Technology Professionals

The technology industry in India is growing fast. Many companies are using technologies, which means they need people who can develop software analyze data and do other technology-related jobs.

The Bachelor of Computer Application? degree gives students the skills they need to get these jobs.

2. You Can Start Working in the IT Industry Early

Unlike many four-year programs, the BCA only takes three years to complete.

This means students can start working in the technology industry and gain valuable experience.

Read Also-What is BCA Degree: Course Details, Full Form, Salary, Scope, Fees, Benefits, Career

3. You Have Many Career Opportunities After BCA

The BCA opens doors to different careers in the technology industry. You can work as a:

Cloud Computing Associate

IT Support Specialist

You can choose a career that you're interested in and have the skills for.

4. You Will Learn About New Technologies

The BCA course is designed to teach students about the technologies. You will learn about:

Artificial Intelligence (AI)

Machine Learning (ML)

Internet of Things (IoT)

Full Stack Development

These technologies are changing the world and can give you a career.

5. You Can Pursue Higher Education After BCA

After completing the Bachelor of Computer Applications, you can pursue education like:

M.Sc. in Computer Science

Certifications in AI, Data Science, Cyber Security, and Cloud Computing

This can help you grow in your career. Earn more money.

How the BCA Can Lead to High-Paying Jobs

One of the reasons students choose BCA is that it can lead to well-paying jobs.

You Can Get a Good Starting Salary

When you finish the BCA, you can get a starting salary. The salary you get will depend on your skills and the company you work for.

On average, you can expect to earn between INR 3 lakh and INR 6 lakh per year. As you gain experience and skills your salary can increase. The technology industry pays well for people who're skilled and experienced.

Note:Salaries may vary based on location, company, technical expertise, and industry demand.

Read Also-BBA vs BCA Which Course is Best: Eligibility Criteria, Career, Fees, Duration, and Salary

Career Opportunities Across Industries

The BCA is not just limited to the technology industry. You can work in:

Telecommunications Companies

This means you have options and can choose a career that you enjoy.

Skills Developed During a BCA Program

The BCA helps you develop valuable skills, including:

Programming and Coding Skills

Database Management

Software Development Skills

Analytical Thinking

Problem-Solving Ability

Critical Thinking

Technical Documentation Skills

These skills make you a great candidate for many jobs and help you succeed in your career.

Top 10 BCA Colleges in Uttar Pradesh for Placements and High Salary Jobs (2026)

Uttar Pradesh has hundreds of BCA colleges, with admissions primarily based on Class 12 merit and, in some cases, CUET scores. Several universities also offer specializations in AI, Cyber Security, and Data Analytics.

Why Choose Uttar Pradesh for BCA Studies?

Over the years, Mangalayatan University has been recognised as one of the best university in Uttar Pradesh offering UGC-recognized degree, and its excellence in education has earned it NAAC A+ accreditation. The state of the art infrastructural facilities and well-equipped laboratories for performing experiments and computer Labs are of much importance and a scope of experiential learning for the students. Mangalayatan University fosters holistic and quality learning that shape student's future.

It's an excellent choice for students seeking to make their career representative in the field of technology and want to take up BCA. Clicking on this, it is evident that BCA stands out as one of the finest undergraduate courses for those seeking a career in the IT industry, thanks to its exposure to emerging technologies, work opportunities and lucrative salary packages.

Choosing an institute that offers a difference in your career future is very significant. Top BCA colleges in Uttar Pradesh, like Mangalayatan University Aligarh, offer placement support, industry-ready curriculum and hands-on experience by having an industry-oriented faculty team with extensive IT Industry knowledge.

It is possible to have a bright future, even a good salary package in the technology business, but if you can choose the right BCA college in Uttar Pradesh, or any other state for that matter, from the many that are available, you will be able to have great success all the time.

=====

The Bachelor of Laws (LLB) is considered one of the most prestigious career options to pursue after completing an undergraduate degree in India.

Law studies equip students with a legal understanding of the subjects and their implications. It prepares them for a career in the profession. It also opens doors to a lot of opportunities in different areas like corporate, government, judicial and academic sectors.

The law is very important these days because companies and governments need to follow the rules. They need people to help them solve disputes. So, law graduates are in high demand.

If you want to get an LLB degree, or you have just got one, you should know what kind of jobs you can get. This will help you make a decision. Here are some of the jobs you can get after completing an LLB in India.

Why Should You Choose LLB After Graduation?

Getting an LLB degree after you finish college is an idea for your career. An LLB degree is not something that helps you become a lawyer. It opens doors to different and exciting jobs in law, business, schools, media and government.

If you want to be a lawyer, a judge, work in a company or help make laws, an LLB degree gives you the knowledge and skills you need to do your job for a long time.

For people who finish college and want a job that people respect, a stable career, and chances to move up, getting an LLB degree can be one of the decisions you make. An LLB law degree is really useful for people who want to work in law and other fields. An LLB degree helps you learn things that can help you in your career.

Top 10 Career Opportunities to Pursue After an LLB Degree in India

1. Advocate or Litigation Lawyer

After finishing LLB, a lot of people want to become an advocate. To do this, they need to register with the State Bar Council and pass the All India Bar Examination. Once they do that, they can work in district courts, High Courts and the Supreme Court.

Litigation lawyers like this deal with lots of types of cases, such as civil, criminal, constitutional, and corporate matters, and they give legal advice to clients.

2. Judicial Services

People who want to be judges can take the Judicial Services Examinations, which are given by states. If they do well, they can become Judges or Judicial Magistrates.

This profession is really good because it is respected. It is safe, and people get to help make the justice system better.

3. Corporate Lawyer

Corporate lawyers work with companies. They help with things like mergers and contracts, and making sure companies follow the rules.

Because the corporate sector in India is getting bigger, being a lawyer is now one of the highest-paying jobs in law.

4. Legal Advisor

The government and private companies, NGOs and big companies all hire advisors to help them with legal issues.

Legal advisors help these organizations avoid problems and make sure they are following the law.

5. Public Prosecutor

Public prosecutors work for the government. They deal with criminal cases. They have to present evidence, question witnesses and make sure justice is served.

This job is great for people who like the law and who want to serve the public.

6. Civil Services

If you have an LLB degree, it can really help you when you are taking exams like the UPSC Civil Services exam.

The things you learn in law school help you understand issues, like how the government works and how the country is run.

7. Legal Process Outsourcing (LPO)

Some companies provide support services to clients in India and in other countries. People who finish LLB can work in these companies. Do things like research and manage contracts.

This field is really good because you get to work with people from around the world and you can move up in your career.

Read Also-What is the Difference Between LLB and LLM : Course Details, Duration & Full Form

8. Company Secretary (CS)

A lot of law graduates also get a Company Secretary qualification, so they can specialize in how companies are run and how they follow the rules.

If you have an LLB degree and a CS qualification, you are more likely to get a good job in a big company.

9. Academician and Legal Researcher

Some people love teaching and researching. They want to pursue higher education, like an LL.M. or a PhD. They can then become law professors or researchers.

These people help make education better, and they help create new laws and policies.

10. Legal Journalist

Nowadays, there is a career option for law graduates, which is legal journalism. Legal journalists write about what's happening in the courts and about new laws and big court decisions.

There are a lot of opportunities in this field because people want to know more about the law, and they want to stay up-to-date with what's happening.

Why Choose Mangalayatan University Aligarh for LLB?

Mangalayatan University Aligarh, is a UGC-recognised university with a NAAC A+ accreditation and is regarded as atop university in Uttar Pradesh, offering LLB programmes designed to provide quality legal education. The university offers a curriculum geared toward the needs of industry, excellent faculty and learning opportunities that are geared to help students reach their goals in the legal profession.

The LLB course at Mangalayatan University is a theoretical as well as practical oriented course. Students learn by practical application by visiting the courts, moot court exercises, legal aid programme and internships, giving them the necessary skills for the legal profession. The University also provides placement support, career guidance and skill development assistance for retaining the employability.

Overall, Mangalayatan University Aligarh has an excellent academic program, a modern learning environment and an approach to student success that makes it a great choice for a rewarding career in law. You could pursue a career as an advocate, corporate lawyer, legal advisor or judicial officer, but the university equips you to get where you want to go.

Introduction: Why MBA Remains a Top Career Choice in 2026

A Master of Business Administration (MBA) degree is one of the most valuable professional degrees in India because it opens doors to leadership and management careers. In today's changing business environment, companies are not only looking for technical expertise but also for professionals who can manage teams and solve business problems. This is where MBA graduates gain an advantage.

MBA Admission 2026 is expected to fulfil the growing demand for management professionals across industries such as banking, finance, information technology, healthcare, and consulting. Top recruiters include companies like Tata Consultancy Services (TCS), Accenture, Amazon, and

Deloitte.

According to industry reports, MBA programs are designed to provide holistic learning and practical exposure, helping graduates secure exciting salary packages ranging from INR 12 LPA to INR 40 LPA. Experienced professionals can earn significantly higher compensation packages based on their expertise and leadership roles.

MBA Eligibility and Course Duration

MBA Eligibility Criteria

For MBA Admission 2026, candidates must hold a bachelor's degree in any discipline from a recognized university. Final-year graduation students are also eligible to apply.

MBA Course Duration

The MBA course duration is 2 years, divided into four semesters. The program includes assignments, semester examinations, industry projects, and internship training to provide practical business exposure.

List of Top 10 Career Options After MBA in India 2026-27

1. Management Consultant

Average Salary:INR 40 LPA

Management consulting is among the highest-paying career options after an MBA. Consultants help organizations improve business performance, reduce costs, optimize operations, and develop growth strategies.

Future Scope:The demand for management consultants is expected to grow due to digital transformation, artificial intelligence adoption, sustainability initiatives, and global business expansion.

Read Also-Top 10 Benefits of Pursuing an Online MBA Degree in India 2026-27

2. Investment Banker

Average Salary:INR 18–45 LPA

Investment banking is one of the most prestigious and rewarding MBA career options. Professionals work on mergers and acquisitions, capital raising, corporate finance, and advisory services.

Future Scope:India's expanding economy, startup ecosystem, IPO market, and increasing foreign investments will continue to create opportunities for investment bankers.

3. Product Manager

Average Salary:INR 15–35 LPA

Product managers oversee product development, customer strategy, market research, innovation, and revenue growth. This role is particularly popular in technology companies and startups.

Future Scope:Product management roles are expected to grow significantly in sectors such as AI, SaaS, fintech, and e-commerce.

4. Marketing Manager

Average Salary:INR 6–20 LPA

Marketing managers are responsible for branding, advertising, digital marketing, market research, sales strategy, and customer engagement.

Future Scope:The rise of digital marketing, influencer marketing, and data-driven consumer insights is creating strong demand for marketing professionals.

5. Financial Manager

Average Salary:INR 10–25 LPA

Financial managers oversee budgeting, financial planning, investment strategies, risk management, and corporate financial operations.

Future Scope:Growth in banking, insurance, fintech, and corporate finance sectors ensures strong long-term opportunities for finance professionals.

6. Business Analyst

Average Salary:INR 7–18 LPA

Business analysts leverage data, research, and business intelligence tools to improve organizational performance and support decision-making.

Future Scope:Increasing adoption of data analytics, AI, and business intelligence platforms is making business analytics a future-ready MBA career path.

7. Human Resource Manager

Average Salary:INR 6–15 LPA

HR managers handle recruitment, employee engagement, talent development, performance management, and workplace culture initiatives.

Future Scope:Organizations are increasingly focusing on employee wellbeing, workforce planning, remote work management, and leadership development.

Read Also-Future Scope of MBA Degree: Demand, Career Opportunities & Salary in 2026

8. Operations and Supply Chain Manager

Average Salary:INR 8–20 LPA

Operations and supply chain professionals manage production systems, logistics, procurement, inventory management, and operational efficiency.

Future Scope:The growth of e-commerce, global trade, and manufacturing initiatives like "Make in India" continues to increase demand for supply chain experts.

9. Entrepreneur and Startup Founder

Many MBA graduates choose entrepreneurship over traditional corporate careers. An MBA provides knowledge of finance, marketing, operations, and business strategy that helps entrepreneurs build successful startups.

Future Scope:India's startup ecosystem continues to grow with support from investors,

incubators, accelerators, and government initiatives.

10. Data Analytics and Artificial Intelligence Strategy Roles

Average Salary: INR 12–30 LPA

Modern MBA programs increasingly integrate business management with analytics and AI. Professionals in these roles help organizations make technology-driven strategic decisions.

Future Scope: Artificial intelligence, machine learning, automation, and digital transformation are driving demand for MBA graduates with analytical and technological expertise.

Industries Hiring MBA Graduates in 2026

Digital Marketing Agencies

Fintech Companies

Manufacturing and Logistics

AI and Data Analytics Firms

MBA Salary in India: What Can You Expect?

MBA salaries vary depending on several factors:

College Reputation

Internship Experience

Industry Demand

Fresh MBA graduates may earn between INR 6 LPA and INR 15 LPA, while experienced professionals can earn INR 20 LPA to INR 40+ LPA depending on their industry and role.

SOURCE (WEB): <https://www.mangalayatan.in/blog/agriculture-vs-biotechnology-future-scope.html>

=====

Choosing a career path after higher secondary education is a big decision for students.

Among the emerging and traditional fields, Agriculture and Biotechnology have gained significant attention due to their growing importance in the global economy.

Both fields offer career opportunities, research scope and contribution to society.

However, students often get confused while comparing Agriculture and Biotechnology because both streams are science-oriented and connected to systems.

Understanding the differences and prospects of these fields can help students make an informed career decision about Agriculture and Biotechnology.

Understanding Agriculture

Agriculture focuses on crop production, farming practices, soil science and sustainable agricultural development. Agriculture, being one of the most essential sectors of any economy, always demands strong agricultural concepts and practices to enable farmers with new agricultural goals and new techniques of production.

A graduate in Agriculture may have the capability to bring about revolution in agriculture through the way of learning and implementing new agricultural practices.

Understanding Biotechnology

Biotechnology combines biology with technology. Elements like cells, biological systems and living organisms are used to develop products and technologies for Agriculture, healthcare, pharmaceuticals and environmental protection.

Graduates in Biotechnology have expertise in microbiology, biology, and genetic engineering.

The field emphasises laboratory work, research, innovation and scientific advancements in Biotechnology.

Agriculture Vs Biotechnology – Major Differences

1. Nature of the Field

Agriculture is more application-oriented and field-based, focusing on farming solutions and crop management in Agriculture.

Biotechnology, on the other hand, is research-oriented and laboratory-based, involving scientific experiments and technological innovations in Biotechnology.

Students who enjoy field activities, outdoor work, and rural development initiatives may prefer Agriculture.

Those interested in laboratory research, genetics and scientific innovation may find Biotechnology more suitable for their interests in Biotechnology.

2. Course Curriculum

Agriculture courses include training in farming techniques, soil testing and crop production.

Biotechnology courses focus more on biology, genetic engineering and laboratory techniques.

The curriculum difference is important because it determines the type of skills students will develop during their journey in Agriculture or Biotechnology.

3. Career Opportunities

Both Agriculture and Biotechnology has potential to offer varied career prospects where job roles differ significantly.

Career Options After B.Sc Agriculture

Soil Scientists

Horticulture Officers

Agribusiness Managers

Agricultural Researchers

Food Production Experts

Career Options After B.Sc Biotechnology

Research Scientists

Clinical Researchers

Bioinformatics Analysts

Genetic Engineers

Pharmaceutical Executives

Laboratory Specialists

Agriculture careers are often connected with government sectors, farming industries and rural development programs.

Biotechnology careers are largely associated with companies, research laboratories, healthcare industries and biotech firms.

Agriculture Vs Biotechnology - Future Scope Comparison

Future Scope of Agriculture in 2026

The future of Agriculture is becoming highly technology-driven.

With increasing population growth and food security challenges, the demand for agricultural professionals is continuously rising.

Modern Agriculture now includes precision farming, drone technology and sustainable agricultural practices.

Governments across the world are investing heavily in development and rural infrastructure.

This creates employment opportunities for Agriculture graduates.

The rise of organic farming and sustainable Agriculture has further increased the importance of trained agricultural professionals in Agriculture.

Future Scope of Biotechnology in 2026

Biotechnology is considered one of the fastest-growing scientific sectors globally.

The field has future potential in healthcare, pharmaceuticals and environmental science.

Advancements in genetic engineering and vaccine development are creating new opportunities every year in Biotechnology.

The Biotechnology industry is expected to grow due to increasing demand for medical innovations and biological research.

Biotechnology professionals are also playing a role in developing disease-resistant crops and improving food quality.

Artificial intelligence and data science integration with Biotechnology are creating specialized career paths.

Students with research and technical skills can achieve excellent career growth and international opportunities in the field of Biotechnology.

Agriculture vs Biotechnology: Which is Better for Your Career?

Both Agriculture and Biotechnology have prospects, but the better option depends on a student's interests, skills and career goals related to Agriculture and Biotechnology.

Agriculture may be a choice for students interested in food production, environmental sustainability and rural development in Agriculture.

Biotechnology may open doors for students who have a knack for research, laboratory innovation and technology in agriculture and healthcare.

Biotechnology also has the potential to offer good remuneration to graduate students in govt and private institutions as well as in global research organizations.

Whether one selects Agriculture or Biotechnology, both disciplines provide opportunities for growth and a successful future career.

Why Choose B.Sc Biotechnology or B.Sc. Agriculture at Mangalayatan University, Aligarh?

Pursuing any of the courses with a B.Sc. Agriculture or B.Sc. Biotechnology from Mangalayatan University is a matter of great career leap.

The university is technically recognized by UGC and approved by AICTE. It also holds the NAAC A+ accreditation.

The campus is well-equipped with modern infrastructure and well-established laboratories for experiments by students.

The university also provides career counselling, industry exposure, and placement assistance for students.

Students taking admission in 2026 can benefit from quality education, experienced faculty members, and career-oriented learning opportunities at the university.

The decision of which of the two, Agriculture or Biotechnology, to choose is dependent on the students' interests, career aims, and skill sets.

For students who like farming technologies, food production, sustainability and rural development, Agriculture is the best option.

However, Biotechnology could also be an ideal choice for students who enjoy working in a laboratory, learning about genetics, advancing healthcare, and scientific discovery.

The two fields provide excellent career, higher education, and industry opportunities for 2026 and beyond.

With the rapid growth of technology and research, Agriculture and Biotechnology are becoming important sectors for global development.

Individuals seeking quality education, practical learning and guidance for their careers may want to look into B.Sc Agriculture or B.Sc Biotechnology at Mangalayatan University.

Grasp the concept of Science with a vision of a strong and future-ready career in the field of Science with B.Sc Biotechnology and B.Sc Agriculture at Mangalayatan University.

Computer Science Engineering is one of the best career choices in 2026. It is a field that's always in demand, and it is going to be like that for a long time. With new technologies like Artificial Intelligence (AI), Machine Learning (ML), Cybersecurity, Cloud Computing, data science and software development coming up every day, companies are looking for people who are skilled in Computer Science Engineering.

Many students want to build a career that's stable and has a lot of opportunities to grow. Computer Science Engineering is perfect for these students. The course teaches students how to code, solve problems and work with technology. It also gives students the chance to work on projects and gain practical industry experience in the field. Whether students want to be software developers, AI engineers, data scientists, or entrepreneurs, Computer Science Engineering is an excellent starting point.

ParticularsDetailsB.Tech CSE CourseBachelor of Technology in Computer Science Engineering is a

professional undergraduate engineering program focused on computer programming, software development, AI, networking, databases, and emerging technologies. Admission is generally based on entrance exams like JEE Main, state-level engineering exams, or direct admission based on 12th board marks, depending on the college/university. The course includes subjects such as Programming Languages, Data Structures, Artificial Intelligence, Machine Learning, Cloud Computing, Cybersecurity, Operating Systems, and Software Engineering, along with practical labs and projects. Eligibility: Candidates must have completed 10+2 with Physics, Chemistry, and Mathematics (PCM) from a recognized board with qualifying marks as per university norms. Course Duration: The duration of the B.Tech CSE course is 4 years divided into 8 semesters. B.Tech CSE Course Fees: The average course fee ranges from INR 1 Lack to INR 5 Lack per year, depending on the college, infrastructure, and facilities offered. B.Tech CSE Degree: After successful completion, students are awarded a Bachelor of Technology (B.Tech) Degree in Computer Science Engineering. Top B.Tech CSE College in India: Popular colleges include Mangalayatan University Aligarh, Indian Institutes of Technology (IITs), National Institutes of Technology (NITs), Birla Institute of Technology and Science (BITS Pilani), Vellore Institute of Technology (VIT), and SRM Institute of Science and Technology.

B.Tech CSE Course

Bachelor of Technology in Computer Science Engineering is a professional undergraduate engineering program focused on computer programming, software development, AI, networking, databases, and emerging technologies.

Admission is generally based on entrance exams like JEE Main, state-level engineering exams, or direct admission based on 12th board marks, depending on the college/university.

The course includes subjects such as Programming Languages, Data Structures, Artificial Intelligence, Machine Learning, Cloud Computing, Cybersecurity, Operating Systems, and Software Engineering, along with practical labs and projects.

Candidates must have completed 10+2 with Physics, Chemistry, and Mathematics (PCM) from a recognized board with qualifying marks as per university norms.

The duration of the B.Tech CSE course is 4 years divided into 8 semesters.

B.Tech CSE Course Fees

The average course fee ranges from INR 1 Lack to INR 5 Lack per year, depending on the college, infrastructure, and facilities offered.

B.Tech CSE Degree

After successful completion, students are awarded a Bachelor of Technology (B.Tech) Degree in Computer Science Engineering.

Top B.Tech CSE College in India

Popular colleges include Mangalayatan University Aligarh, Indian Institutes of Technology (IITs), National Institutes of Technology (NITs), Birla Institute of Technology and Science (BITS Pilani), Vellore Institute of Technology (VIT), and SRM Institute of Science and Technology.

Why Studying B.Tech CSE in 2026 Is a Great Choice

1. Many companies need Computer Science Engineering graduates.

Technology is used in every industry, including healthcare, banking and education. As companies use technology, they need more people who are skilled in Computer Science Engineering.

Read Also-B.Tech CSE Course Details: Full Form, Admission, Eligibility, Duration, Fees, Colleges, Jobs

2. Computer Science Engineering graduates receive high salary packages.

Specialisation in Computer Science Engineering, such as Cloud Computing, Artificial Intelligence, Machine Learning, Cybersecurity and Software Development, etc., hence there is a greater chance for skilled professionals in almost every specialized expertise and with highly paid remuneration.

3. Artificial Intelligence is a rapidly growing field.

Computer Science Engineering students learn about AI tools, automation technologies and robotics. This gives them the chance to work in future-focused and innovative careers.

4. Computer Science Engineering graduates can work from anywhere.

Many tech companies hire people from all over the world, so Computer Science Engineering graduates can work from anywhere and get paid well.

5. Computer Science Engineering encourages innovation.

Computer Science Engineering fosters innovation and learning in many technologies, such as software products and development apps to solve real-world problems.

6. Technology is always changing.

Computer Science Engineering Technology is dynamic in nature, and thus it continues to change from one sphere to another.

2026 is one of the best times to study Computer Science Engineering. As the world is shifting towards technology and innovation. There is no sphere or industry where Computer science is not involved. From agriculture to the defence and security sectors, all of them are heavily dependent on technology and computing solutions. Moreover, Artificial Intelligence (AI) is making its presence more powerful and transformative across industries.

Eventually, computer science-enabled technologies have compelled the government and private institutions to adopt and invest in computer-based technology. Mangalayatan University, Aligarh, promotes Computer Science Engineering to serve the good cause of the nation and to build the future of many Computer Science graduates.

Career Options After B.Tech CSE

Program	Average Salary Range (India)	Future Scope
Software Developer	INR 4 LPA – INR 12 LPA	High demand in IT companies, startups, and the software industries, with continuous career growth.
Data Scientist	INR 6 LPA – INR 18 LPA	Excellent future scope due to the growing use of data analytics, AI, and business intelligence.
Artificial Intelligence Engineer	INR 8 LPA – INR 20 LPA	Rapidly growing field with opportunities in automation, robotics, and smart technologies.
Cybersecurity Specialist	INR 5 LPA – INR 15 LPA	Increasing demand as organizations focus on protecting digital data and networks.
Web Developer	INR 3 LPA – INR 10 LPA	Strong opportunities in website development, e-commerce, and digital businesses.
Mobile App Developer	INR 4 LPA – INR 12 LPA	Growing demand with the expansion of Android, iOS, and app-based services worldwide.
Cloud Computing Engineer	INR 6 LPA – INR 18 LPA	Excellent scope as businesses shift towards cloud platforms and remote infrastructure.
DevOps Engineer	INR 7 LPA – INR 20 LPA	High-paying career with the increasing adoption of automation and software deployment tools.
Blockchain Developer	INR 6 LPA – INR 22 LPA	Emerging field with opportunities in finance, cryptocurrency, and secure digital systems.
Network Engineer	INR 4 LPA – INR 10 LPA	Consistent

demand in the IT infrastructure, telecom, and enterprise networking sectors. Game Developer INR 4 LPA – INR 15 LPA Expanding career opportunities in gaming, AR/VR, and the entertainment industries. IT Consultant INR 5 LPA – INR 16 LPA Strong future scope in business technology solutions and digital transformation projects.

INR 4 LPA – INR 12 LPA

High demand in IT companies, startups, and the software industries, with continuous career growth.

INR 6 LPA – INR 18 LPA

Excellent future scope due to the growing use of data analytics, AI, and business intelligence.

INR 8 LPA – INR 20 LPA

Rapidly growing field with opportunities in automation, robotics, and smart technologies.

Cybersecurity Specialist

INR 5 LPA – INR 15 LPA

Increasing demand as organizations focus on protecting digital data and networks.

INR 3 LPA – INR 10 LPA

Strong opportunities in website development, e-commerce, and digital businesses.

Mobile App Developer

Growing demand with the expansion of Android, iOS, and app-based services worldwide.

Cloud Computing Engineer

Excellent scope as businesses shift towards cloud platforms and remote infrastructure.

DevOps Engineer

INR 7 LPA – INR 20 LPA

High-paying career with the increasing adoption of automation and software deployment tools.

INR 6 LPA – INR 22 LPA

Emerging field with opportunities in finance, cryptocurrency, and secure digital systems.

INR 4 LPA – INR 10 LPA

Consistent demand in the IT infrastructure, telecom, and enterprise networking sectors.

INR 4 LPA – INR 15 LPA

Expanding career opportunities in gaming, AR/VR, and the entertainment industries.

INR 5 LPA – INR 16 LPA

Strong future scope in business technology solutions and digital transformation projects.

After graduating from Computer Science Engineering, students can get different jobs. These jobs include

Software Engineer

Systems Engineer

DevOps Engineer or IT Consultant

Students can also go on to study more and get a master's degree or a certification in an area.

Why Choose Mangalayatan University for the B.Tech CSE Program?

Mangalayatan University Aligarh, one of thebest universities in Uttar Pradesh, has industry-oriented courses such as

B.Artificial Intelligence & Machine Learning, B.Tech CSE in Cyber Security, and B.Tech CSE in Data Science to equip students with the knowledge and skills needed for pursuing careers in the technology sector that are in high demand.

The university offers state-of-the-art computer labs, dedicated and qualified teaching staff, hands-on training, and comprehensive placement assistance to equip students with industry-relevant skills. Career-oriented education, specialization in emerging technologies are making it a preferred choice for students looking out for the best B.Future Ready specializations at Tech CSE college in India.

In conclusion, Computer Science Engineering is one of the most promising career choices in 2026. It is a field that's always in demand and offers many opportunities for growth and innovation. Computer Science Engineering graduates get paid well can work from anywhere. Have many career options. The field is always changing, which makes it exciting and dynamic.

Students who are interested in technology, coding and problem-solving should consider studying Computer Science Engineering. It is one of the most preferred programs that fosters successful and future-driven careers in this digital world. Computer Science Engineering is a choice for students who want to shape the future through technology.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/bsc-agriculture-vs-bsc-zbc-scope-salary-and-future-opportunities.html>

=====

There is the greatest dilemma after passing 12th grade /senior secondary education is choosing the right career path that offers the best future opportunities. Among the most popular courses in the Science stream are B.Sc Agriculture and B.Sc ZBC (Zoology, Botany and Chemistry) are regarded as the most popular graduate courses in the Science stream and are known to offer excellent academic and professional opportunities.

As a matter of fact, both courses can lead to different career opportunities, learned with different curriculum offers, valued future growth and different salary ranges.

B.Sc Agriculture vs B.Sc ZBC: Which is Better?

AB.Sc Agriculture degreefocuses on crop production, farming technologies, agricultural economics, soil science, plant breeding, and agribusiness management. It is a professional and application-oriented course program that directly connects with the agriculture industry and

food production sector.

Students gain practical exposure through fieldwork, research farms, and agricultural laboratories. The course prepares graduates for roles in modern farming, agritech companies, government agricultural departments, food industries, and rural development sectors. Since agriculture remains one of the most essential sectors in India, the demand for agricultural professionals continues to grow steadily.

However, B.Sc ZBC course is a composite of three important science subjects, Zoology, Botany and Chemistry that gives a solid base to the three scientific disciplines.

Zoology deals with the scientific study of animals, wildlife, physiology, ecology, biodiversity and genetics.

Botany deals with the study of plants, plant physiology, taxonomy, ecology, genetics, forestry, algae, fungi, and medicinal plants. The course emphasizes plant biology and environmental sustainability. Botany graduates find opportunities in plant research organizations, forestry departments, seed companies, herbal industries, environmental consultancies, and teaching professions. Students with interest in plant science and environmental conservation usually prefer this course.

Chemistry is centred on chemical reactions, organic chemistry, inorganic chemistry, analytical chemistry, biochemistry, and industrial applications of chemicals. It is highly laboratory-based and provides strong scientific and analytical knowledge. Chemistry graduates can work in pharmaceutical companies, chemical manufacturing industries, research labs, forensic science departments, quality control units, and petrochemical industries. The subject is considered versatile because it opens doors to multiple industrial sectors.

B.Sc (ZBC) is more research-oriented and theoretical compared to B.Sc Agriculture. Graduates can work in research laboratories, wildlife organizations, zoos, environmental agencies, and educational institutions. Zoology is suitable for students passionate about biological sciences and animal life.

Read Also-BSc Agriculture Course Details: Subjects, Scope, Career, Jobs Opportunities, Eligibility, Admission, Salary and More

Scope of Study: B.Sc Agriculture vs B.Sc ZBC

When we look at what you can study B.Sc Agriculture is a subject that includes many things like biology and technology and science and economics and management. Students get to learn how to do things on farms and also learn about the science behind it.

Zoology and Botany are specific areas of biology

Chemistry is all about chemicals and how they are used in industry.

Students who want a degree that will help them get a job, like B.Sc Agriculture course, while people who like science and want to discover new things might prefer Zoology, Botany or Chemistry.

Salary Structure of B.Sc Agriculture and B.Sc ZBC

The salary for these courses is really different.

B.Sc Agriculture Salary

Graduates in agricultural Science usually get paid jobs when they start working. This is because the government is investing money in this area and there are new companies starting up.

When they first start working, they can earn between INR 3 lakh and INR 6 lakh every year. This depends on what they can do, where they studied and who they work for. Agricultural officers, agribusiness managers, seed technologists and food inspectors can get paid more as they get experience. If students pass government exams for jobs they can get stable and well-paying jobs.

B.Sc ZBC Salary

Graduates in Zoology, Botany, and Chemistry usually start with lower salaries.

They can earn between INR 2 lakh to INR 4 lakh every year when they first start working in jobs like research support, laboratory work or environmental projects. They can get paid more if they study further or get qualifications. Jobs, like wildlife biology, marine sciences and environmental conservation, can be very rewarding. There are a lot of people who want these jobs, so it is harder to get them.

Career Opportunities After B.Sc Agriculture and B.Sc ZBC

Future opportunities are something that really matters when we are choosing a course.

Career Opportunities After B.Sc Agriculture

The future of Agricultural Science is getting bigger and bigger because of advancements in:

Climate-resilient agriculture

Precision agriculture

Agritech innovations

India is really focusing on agriculture and food production, so now we need more:

Extension Officers

Agri-Entrepreneurs

People who finish their graduation can also go for studies like:

M.Sc Agriculture

MBA in Agribusiness

Agricultural Research Programs

Starting your business in organic farming, dairy farming, or poultry farming is also a great idea.

Career Opportunities After B.Sc ZBC

The future of Botany is connected to:

Environmental sustainability

Forestry management

Herbal medicine industries

Because people are getting more aware of climate change and herbal medicine, we will need plant scientists and environmental experts.

Read Also-BSc Course Details, Full Form, Admission, Fees, Syllabus, Top Colleges, Career

Chemistry offers excellent opportunities in:

Industrial chemistry

Petrochemical industries

Healthcare research

As healthcare and pharmaceutical sectors continue to expand, Chemistry graduates enjoy strong career prospects both in India and abroad.

Zoology graduates can explore careers in:

Wildlife biology

Marine sciences

Biodiversity conservation

Environmental research

Competition may be high, but this is a very rewarding field for those with a passion for wildlife and animal sciences.

Comparison Table: B.Sc Agriculture vs B.Sc ZBC

Basis of Comparison	B.Sc Agriculture	B.Sc Zoology	B.Sc Botany	B.Sc Chemistry	Entry-Level Salary
– INR 6 LPA	INR 2 – INR 4 LPA	INR 2 – INR 4.5 LPA	INR 3 – INR 5 LPA	Government Job	INR 3
Opportunities	Agricultural Officer, Food Inspector, NABARD jobs, Rural Development Officer	Forest Department, Wildlife Department, Research Assistant	Forestry Officer, Botanical Survey jobs, Environmental Departments	Chemical Analyst, Drug Inspector, Forensic Labs	Private Sector
Opportunities	Agri-tech companies, fertilizer industries, food processing companies, dairy sector	Zoos, wildlife NGOs, biotech firms, laboratories	Seed companies, herbal industries, environmental consultancies	Pharmaceutical companies, chemical industries, cosmetics, petrochemicals	Research Opportunities
Scope	Organic farming, poultry farming, dairy farming, agribusiness startups	Pet care, wildlife tourism, animal breeding centers	Herbal product business, nursery management	Chemical manufacturing, cosmetics, laboratory startups	Higher Education Options
Scope	M.Sc Agriculture, MBA Agribusiness, Agricultural Research	M.Sc Zoology, Biotechnology, Environmental Science	M.Sc Botany, Forestry, Biotechnology	M.Sc Chemistry, Industrial Chemistry, Pharmaceutical Chemistry	Industry Demand
Industry Demand	Very high due to food security and agricultural development	Moderate and research-focused	Moderate growth in environmental sectors	High in the pharma and chemical industries	Future Scope
Future Scope	Strong growth in agri-tech, sustainable farming, food technology and rural development	Growing opportunities in conservation and biotechnology	Expanding scope in herbal, forestry and environmental sectors	Excellent opportunities in healthcare, pharmaceuticals and industrial research	Best Suitable For Students Interested In
Best Suitable For Students Interested In	Agriculture, farming innovation, agribusiness and rural development	Animal science, wildlife and biology	Plant science, environment and forestry	Chemical sciences, laboratory work and industrial applications	Overall Career Stability
Overall Career Stability	High due to government and industry demand	Moderate, often requires higher studies	Moderate to high with specialization	High in industrial and pharmaceutical sectors	

Entry-Level Salary

INR 3 – INR 6 LPA

INR 2 – INR 4 LPA

INR 2 – INR 4.5 LPA

INR 3 – INR 5 LPA

Government Job Opportunities

Agricultural Officer, Food Inspector, NABARD jobs, Rural Development Officer

Forest Department, Wildlife Department, Research Assistant

Forestry Officer, Botanical Survey jobs, Environmental Departments

Chemical Analyst, Drug Inspector, Forensic Labs

Private Sector Opportunities

Agri-tech companies, fertilizer industries, food processing companies, dairy sector

Zoos, wildlife NGOs, biotech firms, laboratories

Seed companies, herbal industries, environmental consultancies

Pharmaceutical companies, chemical industries, cosmetics, petrochemicals

Agricultural research institutes, crop development research

Wildlife biology, marine biology, genetics research

Plant biotechnology, ecology, medicinal plant research

Chemical research, pharmaceutical R&D, nanotechnology

Entrepreneurship Scope

Organic farming, poultry farming, dairy farming, agribusiness startups

Pet care, wildlife tourism, animal breeding centers

Herbal product business, nursery management

Chemical manufacturing, cosmetics, laboratory startups

Higher Education Options

M.Sc Agriculture, MBA Agribusiness, Agricultural Research

M.Sc Zoology, Biotechnology, Environmental Science

M.Sc Botany, Forestry, Biotechnology

M.Sc Chemistry, Industrial Chemistry, Pharmaceutical Chemistry

Very high due to food security and agricultural development

Moderate and research-focused

Moderate growth in environmental sectors

High in the pharma and chemical industries

Strong growth in agritech, sustainable farming, food technology and rural development

Growing opportunities in conservation and biotechnology

Expanding scope in herbal, forestry and environmental sectors

Excellent opportunities in healthcare, pharmaceuticals and industrial research

Best Suitable For Students Interested In

Agriculture, farming innovation, agribusiness and rural development

Animal science, wildlife and biology

Plant science, environment and forestry

Chemical sciences, laboratory work and industrial applications

Overall Career Stability

High due to government and industry demand

Moderate, often requires higher studies

Moderate to high with specialization

High in industrial and pharmaceutical sectors

Why Choose Mangalayatan University Aligarh, for B.Sc Agriculture and B.Sc ZBC?

Mangalayatan University Aligarh, is the top university in Uttar Pradesh and provides high-quality education with pedagogical emphasis on practical education, industry-oriented curriculum and career development. The University offers students an environment with modern laboratories, experienced faculty, a research facility and placement assistance in the field of B.Sc Agriculture and B.Sc ZBC programs. Students acquire a theoretical understanding and practical skills that enable them to embark on successful careers in agriculture, research, biotechnology, environment and industrial fields.

In conclusion, both the courses B.Sc Agriculture and B.Sc ZBC (Zoology, Botany, and Chemistry) offer excellent career opportunities, but they are designed for different interests and career goals.

B.Sc Agriculture is a course because it is connected to industries, and it helps you get a job, and many government and private companies want people with this degree.

Zoology and Botany are perfect for students who love biology and want to work on making the earth a better place.

Chemistry is a choice because it can lead to many different kinds of jobs in science and industry.

The best course for you is the one that matches what you like to do, what you want to achieve in your career and where you want to work.

SOURCE (WEB): <https://www.mangalayatan.in/blog/bsc-nursing-vs-bpharm-comparison.html>

=====

Choosing the right career after 12th is one of the big decision for students in India. There are good options, but two popular ones are B.Sc Nursing and B.Pharm are considered the best courses after 12th, with a subject combination of Physics, Chemistry, and Biology.

These two courses are very different, even though they attract a large number of aspirants who are keen to take up paramedical career options to build their future scope.

Overview of B.Sc Nursing Vs B.Pharm

B.Sc. Nursing is a 4-year undergraduate program focuses on caring for patients, performing procedures, and providing healthcare services. It helps students become nurses in hospitals and other healthcare settings.

B.Pharm (Bachelor of Pharmacy) is also a 4-year undergraduate course that focuses on pharmaceutical sciences, including drug development, manufacturing, and distribution.

In simply terms:

Nursing= Taking care of patients and working in hospitals

Pharmacy= Medicines, research & industry

Course Comparison: Key Differences

Aspect	B.Sc Nursing	B.Pharm
Duration	4 years including internship	4 years
Focus Area	Taking care of patients doing medical procedures	Making medicines, pharmaceuticals
Eligibility	You need to have PCB, with Biology as a must	You need PCB or PCM
Nature of Work	You will be working with your hands in hospitals	You will be working in labs in companies
Governing Body	Indian Nursing Council	Pharmacy Council of India

4 years including internship

Taking care of patients doing medical procedures

Making medicines, pharmaceuticals

You need to have PCB, with Biology as a must

You need PCB or PCM

You will be working with your hands in hospitals

You will be working in labs in companies

Indian Nursing Council

The biggest difference is in the kind of work you do. Nursing is about helping patients, while pharmacy is about making medicines and doing research.

Read Also-BSc Nursing Course Salary, Scope, Career Opportunities, Skills and More

Criteria	B.Sc Nursing	B.Pharm	Subjects	PCB (Biology mandatory)	PCB or PC	Minimum
Marks	45–50%	45–50%	Age Limit	Minimum 17 years	No specific age limit (varies)	

PCB (Biology mandatory)

Minimum 17 years

No specific age limit (varies)

Course	Entrance Exams	B.Sc Nursing	NEET (some colleges), State-level exams	B.Pharm	CUET, State-level entrance exams
--------	----------------	--------------	---	---------	----------------------------------

CUET, State-level entrance exams

Subjects & Curriculum

B.Sc Nursing Subjects	B.Pharm Subjects	Anatomy and Physiology	Pharmacology	Nutrition	Pharmaceutical Chemistry	Community Health Nursing	Pharmaceutics	Medical-Surgical Nursing	Pharmacognosy	Psychology	Drug Analysis
-----------------------	------------------	------------------------	--------------	-----------	--------------------------	--------------------------	---------------	--------------------------	---------------	------------	---------------

Anatomy and Physiology

Pharmaceutical Chemistry

Community Health Nursing

Medical-Surgical Nursing

Job Opportunities in India

Both the courses whether it be B.Sc Nursing or B.Pharm both have varied career options for the aspirants. The table listed below gives you a glimpse of career opportunities:

B.Sc. Nursing Jobs	B.Pharm Jobs	Government and private hospitals	Research labs	Community health centres	Pharmaceutical companies	Clinics and nursing homes	Places that make medicines	ICU Nurse	Hospitals as a pharmacist	Staff Nurse	Sales and Marketing	Nursing Supervisor	Pharmacist	Military nursing services	Medical Representative	Community Health Officer	Drug Inspector	Clinical Research Associate
--------------------	--------------	----------------------------------	---------------	--------------------------	--------------------------	---------------------------	----------------------------	-----------	---------------------------	-------------	---------------------	--------------------	------------	---------------------------	------------------------	--------------------------	----------------	-----------------------------

Government and private hospitals

Community health centres

Pharmaceutical companies

Clinics and nursing homes

Places that make medicines

Hospitals as a pharmacist

Sales and Marketing

Nursing Supervisor

Military nursing services

Community Health Officer

Read Also-B Pharmacy Course Details: Subjects, Eligibility, Admission, Career Scope, Job Opportunities & Salary

Salary Comparison in India

Your salary will depend on your skills, experience and the sector you work in.

B.Sc Nursing Salary: INR 2.4 LPA to INR 7.5 LPA

B.Pharm Salary: INR 2 LPA to INR 5 LPA (entry-level)

From the data we can see that:

Nurses get a stable and steady income, which grows slowly

Pharmacy graduates may start with a lower salary but can earn more in corporate jobs especially after doing MBA or M.Pharm

Pharmacy has options for further studies especially in research and corporate sectors.

Your personality plays a big role in choosing between these two. If you like helping patients nursing is better. If you like science, research and corporate work pharmacy is better.

Why Choose Mangalayatan University, Aligarh?

Mangalayatan University Aligarh is atop University in Uttar Pradesh that provides quality education with state-of-the-art laboratories, well-trained faculty and industry oriented training of both B.Sc Nursing and B.Pharm students.

The university offers high-quality clinical and practical exposure and placement assistance in the healthcare and pharmaceutical industries. Its approved programs and a student-friendly campus make it a sure option when it comes to a successful career building.

Which Course Should You Choose?

Choose B.Sc Nursing if you:

Want a job in healthcare

Like taking care of patients and working in hospitals

Plan to work abroad

Prefer job security over corporate risk

Choose B.Pharm if you:

Are interested in medicines, chemistry and research

Want to work in corporate or industry roles

Plan to do higher studies, like MBA or M.Pharm

Prefer less physically demanding work

BSc Nursing vs Pharmacy: Which is Better?

Both B.Sc Nursing and B.Pharm are career options, in India but they are suited for different interests and career goals.

Nursing - offers stability, job security and global demand while pharmacy - provides career paths, industry exposure and higher earning potential in the long run.

Ultimately the better course depends on your passion. If you like taking care of patients and serving others go for nursing. If your interest lies in science, medicines and research pharmacy is the choice.

Need Help with Admission?

=====

B.Sc Forensic Science vs B.Sc Biotechnology: Course, Scope, Salary & Career Guide 2026-27

Choosing the right course after completing class 12th decides the future career path, which is why it becomes a very crucial turning point in one's career. For Science students, B.Sc. Forensic Science and B.Sc. Biotechnology are two popular choices made by the students. Both courses offer exciting and diverse career opportunities but differ in the field of work, course structure, career scope, and salary prospects.

This guide will help you understand both courses and choose the right one based on your interests.

B.Sc. Forensic Science vs B.Sc. Biotechnology: Overview

B.Sc. Forensic Science course is related to scientific methods to solve crimes/ mystery. It involves analyzing physical evidence such as DNA, fingerprints, blood samples and toxic substances to conclude. Simply - Forensic Science = Crime investigation + Lab analysis.

B.Sc. Biotechnology course is a multidisciplinary field that combines biology & technology for using living organisms or biological systems in medicine, agriculture, pharmaceuticals and genetic engineering. Simply - Biotechnology = Research + Innovation in life sciences.

Course Structure and Subjects

B.Sc Forensic Science

B.Sc. Forensic Science course is a 3-year undergraduate program and includes the following subjects include:

Criminal law and forensic psychology

DNA profiling and forensic biology

Cyber forensics

Crime scene investigation

Students also gain practical exposure through internships in crime laboratories and law enforcement agencies.

Read Also-BSc Forensic Science Course Details: Full Form, Eligibility, Duration, Fees, Colleges, Jobs

While B.Sc.Biotechnology Course is also a 3-year undergraduate program and includes the following subjects:

Cell Biology and Genetics

Genetic Engineering

This course is more research-focused and involves extensive lab work and experiments

Forensic Science vs Biotechnology: Which is Better?

Which option is better can only be decided based on interests and the career field chosen by the students. The following pointers would help students decide between the best courses after 12th Science PCB/PCM.

Choose Forensic Science if you:

Are interested in crime investigation and legal systems

Enjoy analytical and evidence-based work

Want to work with law enforcement agencies

Choose Biotechnology if you:

Are interested in biology, research, and innovation

Want a career in healthcare, pharma, or agriculture

Plan to pursue higher studies (M.Sc, PhD)

Key Insight:Biotechnology offers broader career options globally, while forensic science is more specialized and niche.

but may not grow as fast initially.

Completing Higher education (M.Sc. or Ph.D.) boosts salary, especially in research and international roles

Stable in government roles

Stable with strong growth in private and global sectors

Job Market Insights

Forensic Science in India:

Limited but growing opportunities, mainly in government labs and investigative agencies. Private sector demand is increasing due to cybercrime and digital forensics.

A rapidly expanding field with opportunities in India and abroad, especially in pharmaceuticals, vaccines, and genetic research.

Read Also-Top 10 Private Universities in Uttar Pradesh, India 2026-27

Both Forensic Science and Biotechnology are options after 12th science. You should choose one based on what you interest, what you're good at and what you want to do in the run. Not just the salary or what's trendy.

If you love solving crimes, laws and investigations, Forensic Science might be for you.

If you want a career in the long run with more opportunities abroad, in research, choose Biotechnology.

Biotechnology has a range of options, and you can earn more money, especially if you study further. Forensic Science is really interesting, though it can be tough to find a job.

Why choose Mangalayatan University?

To excel and build a career either in Forensic Science or in Biotechnology, Mangalayatan University is one of the mosttop University in Uttar Pradesh to opt for the course. Though recognised by the University Grants Commission (UGC), the University is also accredited by the NAAC A+ and continues to maintain the good rankings all through.

The course curriculum taught is well as per the guidelines on NEP 2020 that help the students to learn with more modernized and value-added practical learning.

For admission-related any queries, call us now to get expert guidance and start your career journey Today.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/ai-vs-ml-key-differences-highlighted.html>

=====

In the world we live in today, technology is everywhere. People often use the terms Artificial Intelligence and Machine Learning interchangeably but they are not the same thing. It is really important to understand the difference between Artificial Intelligence and Machine Learning. This is true for students, professionals and anyone who is interested in technologies.

This blog will explain the key differences between Artificial Intelligence and Machine Learning in a clear and easy-to-understand way, especially for students exploring BTech admission in AI and Machine Learning.

What is Artificial Intelligence?

AI is a field of computer science that focuses on creating machines that can do things that normally require human intelligence. These things include thinking, solving problems, making decisions, understanding language and even seeing things.

Artificial Intelligence aims to make machines think and act like humans. Examples include virtual assistants like Siri and Alexa, self-driving cars, chatbots and systems that recommend things to you.

Artificial Intelligence can be divided into two categories:

Narrow AI: This is designed for tasks like voice assistants.

General AI: This is a concept where machines can do anything that a human can do.

What is Machine Learning?

Machine Learning is a subset of Artificial Intelligence that focuses on making machines learn from data without being programmed.

By following strict rules, ML algorithms get better by looking at patterns in data. These systems use statistics methods to make predictions or decisions.

Examples include email spam filters, Netflix recommendations and systems that detect fraud all use Machine Learning.

Machine Learning is divided into three types :

Supervised Learning: This is learning from data that is labelled.

Unsupervised Learning: This is finding patterns in data that is not labelled.

Reinforcement Learning: This is learning by trial and error.

Read Also-B.Tech in AI vs B.Tech in Machine Learning: Which Is Better?

Key Differences Between Artificial Intelligence and Machine Learning

1. Scope and Definition

The biggest difference is in what they cover.

Artificial Intelligence is a broad concept that includes technologies enabling machines to mimic human intelligence.

Machine Learning is a part of AI that focuses on making machines learn from data.

In Terms- AI is the goal, and ML is one way to achieve that goal.

The goal of AI is to create systems that can think and act like humans.

The goal of ML is to develop algorithms that can learn from data and get better over time.

In Terms? - Artificial Intelligence focuses on making machines intelligent, while Machine Learning focuses on making machines learn from data.

AI can use rules, logic and even Machine Learning to solve problems.

ML systems rely entirely on data and algorithms to find patterns and make predictions.

In Terms -Artificial Intelligence. May not involve learning from data, but Machine Learning always depends on data.

4. Dependency on Data

AI can work with programmed rules and may not always need a lot of data.

ML needs a lot of data to train models effectively.

In Terms -Without data, Machine Learning cannot work. Artificial Intelligence can still operate using predefined rules.

Artificial Intelligence systems can be more complex because they use approaches, including Machine Learning and natural language processing.

Machine Learning systems are more focused and only deal with learning from data.

In Terms -Artificial Intelligence is a more complex field compared to Machine Learning.

Examples of Artificial Intelligence include:

Autonomous vehicles

Examples of Machine Learning include:

Spam email detection

Recommendation systems

Image recognition

Predictive analytics

All ML applications are AI, but not all AI use ML.

7. Human Intervention

AI systems may need a lot of input to define rules and logic.

ML systems reduce human intervention because they learn and improve automatically from data.

8. Learning Capability

AI may or may not have the ability to learn on its own.

ML is specifically designed for learning and improvement.

In Terms -Learning is optional in Artificial Intelligence. It is essential in Machine Learning.

Read Also-B.Tech ECE vs CSE: Scope, Salary & Future Opportunities

Relationship Between Artificial Intelligence and Machine Learning

To understand the relationship, think of Artificial Intelligence as an umbrella and Machine Learning as one of the tools under that umbrella. Other subsets of Artificial Intelligence include Deep Learning, Natural Language Processing and Computer Vision.

AI = ML + Deep Learning + Other Technologies

Why Understanding the Difference Matters

It is really important to understand the difference between Artificial Intelligence and Machine Learning for the following reasons:

It helps students and professionals choose the right specialization.

It helps businesses adopt suitable technology for their needs.

It improves communication. Avoids confusion when discussing technology.

Artificial Intelligence (AI) vs Machine Learning (ML): Key Differences Table

Basis of Comparison	Artificial Intelligence (AI)	Machine Learning (ML)
Definition	A broad field that enables machines to simulate human intelligence	A subset of AI that enables machines to learn from data
Scope	Wide scope (includes ML, Deep Learning, NLP, etc.)	Narrow scope (part of AI)
Objective	To create intelligent systems that can think and act like humans	To develop systems that can learn from data and improve automatically
Approach	Uses rules, logic, decision trees, and learning methods	Primarily data-driven and algorithm-based
Dependency on Data	May or may not require large datasets	Requires large amounts of data for training
Learning Capability	Learning is optional	Learning is mandatory and a core feature
Human Intervention	High (rule-based systems need programming)	Less (systems learn automatically from data)
Complexity	More complex (combines multiple technologies)	Less complex compared to AI
Examples	Chatbots, robotics, virtual assistants and self-driving cars	Spam detection, recommendation systems, image recognition
Goal	To mimic human intelligence	To enable machines to learn from experience (data)
Applications	Healthcare, robotics, automation, gaming, finance	Predictive analytics, fraud detection, personalization systems
Relationship	Parent field	Subset of AI

A broad field that enables machines to simulate human intelligence

A subset of AI that enables machines to learn from data

Wide scope (includes ML, Deep Learning, NLP, etc.)

Narrow scope (part of AI)

To create intelligent systems that can think and act like humans

To develop systems that can learn from data and improve automatically

Uses rules, logic, decision trees, and learning methods

Primarily data-driven and algorithm-based

Dependency on Data

May or may not require large datasets

Requires large amounts of data for training

Learning Capability

Learning is optional

Learning is mandatory and a core feature

Human Intervention

High (rule-based systems need programming)

Less (systems learn automatically from data)

More complex (combines multiple technologies)

Less complex compared to AI

Chatbots, robotics, virtual assistants and self-driving cars

Spam detection, recommendation systems, image recognition

To mimic human intelligence

To enable machines to learn from experience (data)

Healthcare, robotics, automation, gaming, finance

Predictive analytics, fraud detection, personalization systems

Enhance Your Career Growth with aBTech AI & ML Programs

BTech AI & ML Programs

Why Choose Mangalayatan University Aligarh for BTech AI & ML Admission?

Over the years, Mangalayatan University (MU) stands tall and continues to nurture talent. The University is recognized by various statutory bodies, viz.UGC, AICTE and NAAC A+ accreditation continues to produce potential talents for the world economy.

It is considered one of the top colleges in Uttar Pradesh for higher education. The university focuses on skill building and enhancing technical know-how to remain market relevant for a long time

Artificial Intelligence and Machine Learning are transforming industries and shaping the future of technology. While they are connected, they serve purposes.

AI is the concept of creating intelligent systems, while ML is a specific approach that enables machines to learn from data.

In terms: Artificial Intelligence (AI) is the brain, and Machine Learning (ML) is the learning process behind it

Understanding their differences not only helps you understand them better but also prepares you for opportunities in this rapidly growing field.

As technology continues to advance, both Artificial Intelligence and Machine Learning will play a role in innovation, making it essential to understand how they differ and how they work together.

=====

Online BBA Admission in India: Complete Guide (Eligibility, Fees, Process & Career Scope)

Students today are increasingly opting flexible, affordable and widely accepted courses to enhance their employability. Fresh 12th-pass students or employed professionals aspiring for roles in business administration opt for online BBA courses.

Anonline BBA course is a 3-year undergraduate degree program in business management delivered online with the flexibility to study from anywhere. The course opens career avenues in management, business, marketing, finance or entrepreneurship. Online BBA programs are suitable for students who cannot attend regular college due to time, financial, or location issues.

The online BBA degree in India deals with business acumen, data analysis, critical thinking, decision making and problem-solving abilities for leadership roles.

Online BBA courses are also structured to meet the requirements of employed professionals having issues in attending regular classes due to either professional or personal commitments.

Online BBA Course Duration & Details:

Students looking for BBA online admission should understand that the BBA course duration is three years, which is divided into six semesters.

Core Subjects Covered:

Operations Management

The above business subjects taught with a practical and industry-oriented approach, increasing the employability of the students in management/ strategic/ leadership roles.

Read Also-BBA vs. BTech – Which Is the Better Career Option After 12th?

Online BBA Specializations

Students can choose from various specializations based on their career goals:

Specialization	Key Subjects
Marketing	Digital marketing, sales, market research, Consumer behaviour and branding
Finance	Financial Statements, Financial accounting, corporate finance and taxation, etc.
Human Resource	Job Description, Recruitment, Training & Development, Labour laws and their management, Manpower planning, etc.
Operations	Project operations, Supply chain, logistics and quality management.
Business Analytics	Statistics and tools for Data analysis, business intelligence, etc.
Entrepreneurship	New venture planning, small business management

Digital marketing, sales, market research, Consumer behaviour and branding

Financial Statements, Financial accounting, corporate finance and taxation, etc.

Job Description, Recruitment, Training & Development, Labour laws and their management, Manpower planning, etc.

Project operations, Supply chain, logistics and quality management.

Business Analytics

Statistics and tools for Data analysis, business intelligence, etc.?

New venture planning, small business management

Career Opportunities After Online BBA

After completion of the online BBA course, many roles across multiple industries are available, such as corporate offices, banks, retail business and multinational corporations. The management skills taught in the course enable students to take on their business-related assignment heads on in real life.

After completion of an online BBA course from a reputed university, e.g., Mangalayatan University, students may choose any of the following career roles:

Role Examples of expected job profiles
Marketing Executive Marketing or sales assignments, promotional strategies, market research and other marketing roles.
Business Development Executive Business growth through sales and customer acquisition.
Financial Analyst / Executive Budgeting, financial statements, accounting, taxation and other financial roles.
Human Resources Executive Recruitment, Training & Development, Labour laws and their management, Manpower planning and other HR roles.
Operations Manager Supply chain, production processes, logistics and other Project operations roles.
Entrepreneur Many students opt for starting their own business.

Marketing or sales assignments, promotional strategies, market research and other marketing roles.

Business growth through sales and customer acquisition.

Financial Analyst / Executive

Budgeting, financial statements, accounting, taxation and other financial roles.

Human Resources Executive

Recruitment, Training & Development, Labour laws and their management, Manpower planning and other HR roles.

Supply chain, production processes, logistics and other Project operations roles.

Many students opt for starting their own business.

Online BBA Admission 2026: Eligibility & Admission Process

For BBA Admission in 2026, admissions are usually taken based on marks obtained in Class 12th. Most universities do not require entrance exams, making BBA distance education admission easier compared to traditional programs. Admission processes are usually online, making the entire process—form submission, document upload and fee payment digital and convenient.

Read Also-BA vs BBA: Key Differences & How to Choose After 12th

Eligibility Criteria:

Completion of Class 12th from any stream (Arts/ Commerce/ Science).

Minimum 45% marks.

Admission Process:

Online application form submission

Document upload

Admissions for the online BBA admission 2026 session have already started in many universities and are usually taken twice in a year. Students may visit their websites for the detailed admission process and deadlines.

Online BBA Course Fees in India:

The fees of online BBA degree in India vary and depend upon the reputation of the college, placement records, course content and tie-up with industries. Usually, the fees vary from INR 100,000 to INR 3,00,000 annually.

Online programs are more affordable than a regular bba course as the online mode of delivery saves costs on daily travel, accommodation, and other expenses.

How to Choose the Best Online BBA University

Choosing the right BBA University in India is critical for students. The following factors need to be considered before enrolling in an online BBA course:

UGC-approved universities

Verify accreditation (NAAC, AICTE if applicable)

Placement support and quality of the online learning tool (Learning Management System)

Learning Management System (LMS) quality

Fees and specialization offered

Internship opportunities

Specializations offered

Why Choose Mangalayatan University for Online BBA?

Students planning to pursue an online BBA degree in India may opt for Mangalayatan University, Aligarh, which is one of the best university in Uttar Pradesh for online BBA admission 2026. We provides excellent academic content with great placement records for the students and also accreditation as A+ by NAAC and its long-standing reputation add value to the degree.

It is considered one of the top choices for Online BBA Admission 2026.

=====

Among the many engineering streams available to students these days, B.Tech in Electronics and Communication Engineering (ECE) and B.Tech in Computer Science Engineering (CSE) are top contenders. Both streams offer an excellent choice for career growth opportunities with high salaries, although they differ in their curriculum, subjects and career profiles.

Computer Science Engineering covers emerging software technologies such as programming, AI, and data science, while Electronics and Communication Engineering focuses on emerging hardware technologies, including electronics, communication systems, and embedded systems. Students can choose between the two depending on their interests and work experience, if any.

B.Tech ECE and B.Tech CSE Courses:

B.Tech in Electronics and Communication Engineering (ECE) is a four-year undergraduate engineering degree that covers subjects like electronic devices, circuits, communication systems, signal processing and embedded technologies. This course provides skills in electronics, telecommunications and communication systems such as satellite communication, wireless networks, IoT and robotics.

Students enrolled in B.Tech ECE learn how to design, develop and test electronic equipment used in communication systems like mobile phones, radios, satellites and IoT devices. The course also covers practical lab sessions, projects and internships to help students gain industry experience. The Increasing demand for 5G technology, IoT devices and smart electronics has led to a surge in demand for ECE professionals.

B.Tech in Computer Science Engineering (CSE) is also an undergraduate engineering degree which deals with the software side of technology, such as Programming, Artificial Intelligence, Machine Learning & Data Science, and software development.

B.Tech ECE and B.Tech CSE Admission:

The admission process for B.Tech ECE is the same as for other undergraduate engineering degrees and is based on entrance exams such as:

State-level engineering entrance exams

University-specific entrance tests

Similarly, the admission process for the B.Tech CSE course is also identical. Some private universities also offer admission based on Class 12 marks.

Typically, the process of admission includes appearing for the entrance exam, counselling or seat allocation, selecting preferred colleges and branches and document verification and fee payment.

Read Also-B.Tech Course Details, Full Form, Eligibility, Duration, and Career

B.Tech ECE and B.Tech CSE Course Details:

The details of course coverage in ECE and CSE can be compared below:

Computer Science Engineering	Electronics and Communication Engineering
Programming Languages and Software Development	Wireless Communication, Antenna and Wave Propagation
Data Structures & Algorithms	Basic Electronics, Digital Electronics
Cloud Computing, Big Data	Signals and Systems, Analogue Communication, Digital Communication
Cybersecurity impacts and remedial measures	Microprocessors and Microcontrollers, VLSI Design, Embedded Systems
AI, ML, NLP	Emerging technologies such as IoT and Robotics

Programming Languages and Software Development

Wireless Communication, Antenna and Wave Propagation

Data Structures & Algorithms

Basic Electronics, Digital Electronics

Cloud Computing, Big Data

Signals and Systems, Analogue Communication, Digital Communication

Cybersecurity impacts and remedial measures

Microprocessors and Microcontrollers, VLSI Design, Embedded Systems

Emerging technologies such as IoT and Robotics

Students also get to do laboratory experiments, mini projects and a final year industry-oriented project.

B.Tech ECE and B.Tech CSE Eligibility:

The eligibility criteria for both generally include:

Completion of 10+2 with Physics, Chemistry, and Mathematics (PCM)

Minimum 50% aggregate marks (may vary by college)

Qualifying entrance exam score

Students who have strong mathematical foundations and logical reasoning skills will perform well in both programs.

B.Tech ECE and B.Tech CSE Course Duration in India:

Both courses are same 4-year duration, divided into 8 semesters. Each semester focuses on different aspects of the course, starting from the first year covering basic engineering subjects, while later semesters focus on specialized topics.

The course structure generally includes classroom lectures, laboratory sessions, workshops, industrial training, internships & final year project.

B.Tech ECE and B.Tech CSE Course Fees:

Both courses have a similar fee structure, which varies with the institution and its reputation, advanced lab infrastructure and specialized faculty.

Government Colleges: INR 50,000 – INR 2,00,000 (total course)

Private Universities: INR 3,00,000 – INR 12,00,000

Additional costs may include hostel fees, lab charges, exam fees and study materials. Students must also weigh out the placement records, Industry partnerships, Internship opportunities, and research facilities.

Career Prospects after B.Tech ECE and B.Tech CSE Degree:

Students get wider career prospects after BTech ECE as compared to BTech CSE. A B.Tech ECE degree catapults students for careers in both core electronics industries and software sectors. But CSE graduates may find it slightly difficult to transition into ECE domains without additional skill sets.

After B.Tech ECE, students can work as:

Communication Engineer

After B.Tech CSE, students can work as:

Both streams offer average salary packages ranging from INR 4 LPA to INR 10+ LPA based on skills, experience and specialization.

Top B.Tech ECE and B.Tech CSE Colleges in India:

A few reputed institutions offering ECE or CSE related programs include:

Birla Institute of Technology and Science (BITS Pilani)

Vellore Institute of Technology (VIT)

SRM Institute of Science and Technology

Mangalayatan University Aligarh

These institutions provide excellent academic facilities and reputed industry placement opportunities. Students must consider faculty, placements, industry exposure, and internships support before deciding upon an institution.

Read Also-B.Tech. ECE Course Details, Admission, Eligibility, Duration, Fees, Colleges, Jobs

Enhance Your Career Growth with aBTech Course

Why Choose Mangalayatan University Aligarh for BTech Program?

Mangalayatan University has established itself as one of the finest educational institutions in India, offering aB.Tech course that focuses on quality education, industry-relevant skills, and excellent career opportunities.?

B.Tech CSE will continue growing due to a surge in demand for Artificial Intelligence, Cloud Computing, Big Data and Software Development

B.Tech ECE will grow due to an increase in demand for 5G Technology, Semiconductor Industry, IoT, Smart Devices, Robotics and Automation

The choice between B.Tech ECE and CSE would depend on a student's interest and career goals.

Students who enjoy programming and software development may prefer CSE while those interested in electronics, circuits and communication technologies may find ECE more suitable.

Both degrees are ready for the future, showing high growth and are demanding strong salary potential. Students must decide based on their passions and interests.

If still confused, ECE may offer slightly more flexibility—but only if you are willing to upskill in software as well.

SOURCE (WEB): <https://www.mangalayatan.in/blog/bpharm-vs-dpharm-vs-mpharm-eligibility-fees-scope-salary.html>

The healthcare industry in India is growing rapidly and has become a stable and lucrative career option with multiple courses to suit individuals at various levels of their careers. The pharmacy course covers the knowledge of medicines, such as their preparation, dispensing methods and their appropriate usage. The course is suitable for students with an interest in medicine, chemistry and healthcare.

The Pharmacy Council of India (PCI) and the All India Council for Technical Education (AICTE) are the regulatory bodies regulating pharmacy education in India.

The three most common pharmacy courses, i.e. D.Pharm (Diploma in Pharmacy), B.Pharm (Bachelor of Pharmacy), and M.Pharm (Master of Pharmacy) differs in terms of eligibility, duration, career opportunities and salary prospects.

D.Pharm course is a basic diploma-level pharmacy course for students aspiring to start a career in the pharmaceutical sector quickly.

The B.Pharm Course (Bachelor of Pharmacy) is an undergraduate degree program for those seeking comprehensive knowledge of pharmaceutical science and is one of the most popular pharmacy degrees in India.

At the same time, M. Pharm is a postgraduate degree for students who wish to specialize in a particular field of pharmaceutical science.

Students can select a course based on whether they want early employment or opt for further higher studies or research.

Eligibility for Pharmacy Courses in India:

The eligible students for the Diploma in Pharmacy must have passed 10+2 (science stream with mandatory Physics and Chemistry subjects & either of Maths/ Biology) with a minimum 45% marks.

Similar eligibility criteria exist for Bachelor's in Pharmacy; however, in many states the admission is based on entrance exams.

To pursue M.Pharm, students must hold a Bachelor's in Pharmacy degree from a recognized university with at least 50–60% marks and qualify in national or state-level entrance exams.

Quick Comparison: B.Pharm vs D.Pharm vs M.Pharm

Feature	D.Pharm	B.Pharm	M.Pharm
Course Level	Diploma	Undergraduate	Postgraduate
Duration	2 Years	4 Years	2 Years
Eligibility	10+2 (Science)	10+2 (Science)	B.Pharm
Career Start	Fast (after 2 years)	Strong career foundation	Advanced-level roles
Best For	Quick job entry	Maximum career opportunities	Research & teaching
Salary Range	INR 2 – 3.5 LPA	INR 3 – 6 LPA	INR 4 – 10+ LPA
Study Options	B.Pharm	M.Pharm, MBA	PhD, Research

Fast (after 2 years)

Strong career foundation

Advanced-level roles

Quick job entry

Maximum career opportunities

Research & teaching

INR 2 – 3.5 LPA

INR 4 – 10+ LPA

Higher Study Options

Read Also-B.Pharmacy Course Details: Subjects, Eligibility, Admission, Scope, Career, Jobs Opportunities, Salary and More

Course Duration and Fees Structure for Pharmacy Program:

One of the critical factors for students is the course's duration and fees structure. A general idea of the same is reproduced below to help students plan their education effectively.

Course	Duration	Fees
*Diploma in Pharmacy	2 years (plus internship/training)	INR 80,000 – INR 1,00,000 per year
Bachelor's in Pharmacy	4 years divided into 8 semesters	INR 90,000 – INR 1,60,000 per year
Master of Pharmacy	2 years divided into 4 semesters	INR 90,000 – INR 1,60,000 per year

2 years (plus internship/training)

INR 80,000 – INR 1,00,000 per year

Bachelor's in Pharmacy

4 years divided into 8 semesters

INR 90,000 – INR 1,60,000 per year

Master of Pharmacy

2 years divided into 4 semesters

*It is further mentioned that fees vary based on government or private institutions, location and facilities offered.

Career opportunities and salary prospects after Pharmacy Courses:

There is a bright scope for pharmacy students in India owing to the rapid growth and expansion in healthcare, pharmacy manufacturing, biotechnology and clinical research. All the pharmacy courses, be it Diploma in Pharmacy, Bachelor's in Pharmacy and Master's in Pharmacy builds fundamental pharmaceutical concepts, permit to work as registered pharmacists and impart medicine dispensing skills.

A Diploma in Pharmacy course makes students employment-ready in the pharmaceutical sector earlier than other options, making this course suitable for students looking for a cheaper and quicker entry into the pharmacy profession. After completion of the course, students can register with the State Pharmacy Council and start working in medical stores, hospitals and clinics as pharmacists.

The B.Pharm course is a four-year undergraduate degree program for in-depth knowledge of pharmacy. After completing the B. Pharmacy course, the students get wider career opportunities. This option is preferable to students who aspire for richer roles/ positions or further research opportunities. This option is more suitable for students aspiring for further

education eg. Masters in Pharmacy.

M.Pharm is a postgraduate degree course leading to more specialized career opportunities in research, drug development and academia.

Production Executive

Regulatory Affairs Officer

Further the students can also open their own medical store or pharmacy business

Read Also-Pharm D Course Details: Full Form, Eligibility, Fees, Admission, Top Colleges and Scope

Pharmacy is a good and high-paying profession in India. Since India is regarded as producing some of the most generic medicines in the world, the country will always need trained pharmacy professionals.

Due to several options of the pharmacy courses, the students are able to make a choice based on their interests, financial opportunities, and their professional objectives. The comparison provided above assists the students make a wise choice of a successful career in the pharmaceutical and healthcare industry.

Enhance Your Career Growth with aPharmacy Program

Pharmacy Program

Why Choose Mangalayatan University Aligarh for the Pharmacy Program?

Mangalayatan University Aligarh, has been largely involved in developing the careers of both Indian and foreign students. The university is accredited with UGC approval and NAAC A+, and therefore is considered to be trusted and of high quality in education.

This institution has D.Pharm, B.Pharm, and M.Pharm degrees that are aimed at satisfying industry requirements. Experienced faculty, modern infrastructure, and career-oriented learning allow the students to achieve a successful career in the pharmacy and healthcare industry.

Apply Now for D.Pharm, B.Pharm & M.Pharm at Mangalayatan University

=====

B.Tech Data Science vs Computer Science Engineering: Scope, Salary & Career Comparison

For students, the choice between B.Tech Data Science and B.Tech Computer Science (CSE) is a critical decision that affects their long-term career prospects. Both streams are equally promising and offer good salary packages, but they differ in terms of skills and long-term career prospects.

While B.Tech CSE is a broader engineering stream that covers many aspects, Data Science is a specialised branch of Computer Science that deals with data analytics, AI, and ML.

B.Tech Data Science Course:

B.Tech in Data Science is a 4-year undergraduate engineering degree that focuses on understanding and processing structured and unstructured data for various outcomes. The course covers programming, statistics, mathematics, and machine learning. Students learn how to analyse large databases to build predictive models by using ML algorithms & AI tools for the desired outcome.

B.Tech Data Science Admission:

Admission to B.Tech Data Science usually requires qualifying for national or state-level engineering entrance exams, such as JEE Main, JEE Advanced, State-level CET exams, and University-specific entrance tests.

B.Tech Data Science Course Details:

The curriculum of B.Tech Data Science provides both theoretical and practical knowledge on Data Structures & their algorithms, Probability & Statistics, Programming with Python, Machine Learning & Artificial Intelligence applications, DBMS and lab work on their programming as well as core subjects. The course emphasises the use of programming software such as Python, R, SQL, Hadoop, and TensorFlow for data analysis. A Comparison to B.Tech Computer Science is summarised below:

Factor	B.Tech Computer Science	B.Tech Data Science	Core Strength	Software development	Data & AI applications
Programming/ Coding skills taught in the classes	Very High	High	Application of high level Mathematics	Application of Statistics knowledge	Introductory level
Application of high level Mathematics	Advanced level				

Software development

Data & AI applications

Programming/ Coding skills taught in the classes

Application of high level Mathematics

Application of Statistics knowledge

Introductory level

Read Also-A Guide to Make Career in BTech CSE in Data Science

B.Tech Data Science Eligibility:

To apply for B.Tech Data Science, candidates must meet the following eligibility criteria:

Criteria	Requirement	Qualification
10+2 with Physics, Chemistry and Mathematics subjects	Minimum Marks	50%–75% marks in 10+2
Selection Process	Score in the Entrance examination and subsequent counselling	

10+2 with Physics, Chemistry and Mathematics subjects

50%–75% marks in 10+2

Selection Process

Score in the Entrance examination and subsequent counselling

B.Tech Data Science Course Duration:

The B.Tech course in Data Science course duration is similar to that of a B.Tech. Computer Science is a 4-year program with 8 semesters and requires an Industry internship in the 3rd/4th year, along with a project typically in Data Science. Some universities also have integrated B.Tech + M.Tech courses, extending the duration to 5 years.

B.Tech Data Science Course Fees:

The annual fees of the B.Tech Data Science course vary from ₹1 to ₹2.5 Lakhs in government colleges, ₹2 to ₹6 Lakhs in a few private colleges or deemed universities, depending on the type of institution, its reputation, and the placement opportunities provided. Government institutions are usually more affordable, while private universities, on the other hand, have better infrastructure and industry tie-ups.

B.Tech Data Science and B.Tech Computer Science Career Prospects:

Upon successful completion, students receive a Bachelor of Technology (B.Tech) degree in Data Science. A few roles after completing the B.Tech Data Science degree are enumerated below to help the students:

Job Role	Expected Job Description
Data Scientist	Building predictive models
Data Analyst	Analyzing business data
Machine Learning Engineer	Designing ML systems
Business Intelligence Analyst	Providing data-driven insights and analysis
AI Engineer	Developing self learning intelligent applications

Expected Job Description

Building predictive models

Analyzing business data

Designing ML systems

Business Intelligence Analyst

Providing data-driven insights and analysis

Developing self learning intelligent applications

Graduates can also pursue higher education, such as an M.Tech in Data Science, an MBA in Analytics, or an MS abroad.

The career prospects between B.Tech Data Science and B.Tech Computer Science are detailed below:

Read Also-BTech CSE or B Tech IT: Which is the Better Course to Pursue in Future

Aspect	Computer Science	Data Science
Demand in the industry	Stable	Rapidly Growing
Versatility in career	High	Moderate
Startup roles	High	Growing
Scope in further research	Very Strong due to new development	Growing
Global Placement	Very Strong due to new development	Strong

Salary Comparison:

Experience Level	Computer Science	Data Science
Freshers	INR 4–10 LPA	INR 5–12 LPA
Mid-Level	INR 10–20 LPA	INR 12–25 LPA
Senior Level	INR 20+ LPA	INR 30+ LPA

Experience Level

Top B.Tech Data Science College in India:

- The Indian Institute of Technology Hyderabad
- Indian Institute of Technology Bombay
- National Institute of Technology Tiruchirappalli
- Vellore Institute of Technology

The above universities are recognised for their strong placement support and industry exposure.

Enhance Your Career Growth with aBTech Data Science or CSE Program

BTech Data Science or CSE Program

Why Choose Mangalayatan University Aligarh for B.Tech Data Science or B.Tech CSE Program?

Mangalayatan University Aligarh, offers an industry-oriented B.Tech degree course that emphasises a lot on practical studies and the acquisition of skills. The university offers

modern infrastructure, skilled faculty and practical exposure to the students through projects and internships. Students also enjoy special placement counselling and career advice. It is a good option to achieve a successful career in Data Science or Computer Science because of its low costs and additional industry ties.

Both B.Tech Data Science and B.Tech Computer Science get good career opportunities, high salaries and strong demand.

Students can opt for Computer Science for its versatility, strong programming foundations, and flexibility to explore various IT roles. While students can pursue Data Science if they enjoy mathematics, analytics, machine learning, and working with large datasets.

Course Selection Based on Your Career Goals:

The following recommendations are provided based on the interests/preferences of the students:

Preference	Recommended Course
Broad IT Career	Computer Science
Higher Salary Growth	Data Science
Flexibility to Switch Field	Computer Science
Strong Math & Analytics Career	Data Science
Software Development Roles	Computer Science

Recommended Course

Broad IT Career

Higher Salary Growth

Flexibility to Switch Field

Strong Math & Analytics Career

Software Development Roles

Students must also remember that success depends not only on the degree but also on their skills, efforts, and the institution they choose.

SOURCE (WEB): <https://www.mangalayatan.in/blog/bsc-mlt-vs-bsc-radiology-which-course-is-better-for-your-career.html>

=====

Deciding between B.Sc MLT (Bachelor of Science in Medical Laboratory Technology) and B.Sc Radiology (Bachelor of Science in Radiology and Imaging Technology) is a tough decision for healthcare aspirants. Both paramedical courses have good career opportunities in hospitals, diagnostic labs and research centres. However, the nature of work, skills required and career paths in these two streams are entirely different.

B.Sc MLT and B.Sc Radiology Course Overview

B.Sc MLT (Bachelor of Science in Medical Laboratory Technology)

B.Sc MLT course is a 3-year undergraduate paramedical program which deals with laboratory diagnostics. This program trains students to perform laboratory tests on blood, urine, tissue and other body fluids to assist doctors in diagnosing diseases.

Students gain both theoretical knowledge and practical lab training for laboratory technologies. Students should have an interest in laboratory work and analytical processes.

Although MLT professionals usually work behind the scenes, they play a crucial role in patient diagnosis and treatment planning.

Key focus areas include:

Laboratory diagnostics

Clinical laboratory techniques

Disease detection through lab testing

Lab management and quality control

Most institutions also require a mandatory internship in the final year, allowing students to gain practical hospital experience.

B.Sc Radiology (B.Sc Radiology and Imaging Technology)

B.Sc Radiology course is a 3–4 year undergraduate program which deals with medical imaging technology used to diagnose diseases.

Learners are also trained to use modern imaging machines like X-ray, MRI, CT Scan and ultrasound machines. The graduates help radiologists capture and interpret the medical images after undertaking the course.

The course will be indicated to students who are interested in medical technologies, imaging systems, and engagement with patients..

Read Also-B.Sc. Nursing or B.Sc. Radiology: Which Course is Better after 12th in India?

Subjects in B.Sc MLT vs B.Sc Radiology

B.Sc MLT Subjects B.Sc Radiology Subjects Human Anatomy & Physiology X-ray Technology Biochemistry MRI (Magnetic Resonance Imaging) Microbiology CT Scan Pathology Ultrasound Hematology Radiation Physics Immunology Imaging Technologies Clinical Biochemistry

Human Anatomy & Physiology

X-ray Technology

MRI (Magnetic Resonance Imaging)

Radiation Physics

Imaging Technologies

Clinical Biochemistry

B.Sc MLT and B.Sc Radiology Eligibility for Admission

For admission to B.Sc MLT and B.Sc Radiology:

Students must have secured at least 45%-50% marks

Completion of 10+2 with Physics, Chemistry and Biology

Some institutions also accept students from the Physics, Chemistry and Maths streams.

A few universities or state boards might take additional entrance exams, such as:

Christian Medical College (CMC)

University-level entrance tests

B.Sc MLT and B.Sc Radiology Course Duration after 12th

B.Sc MLT Course Duration

3 years academic study

6–12 months internship (in many colleges)

B.Sc Radiology Course Duration

3 years of academic study

1-year internship in most institutions

Some universities offer 4-year programs, including an internship.

Read Also-BSc Medical Radiology & Imaging Technology- An Excellent Course to Make a Promising Career in Paramedical

B.Sc MLT and B.Sc Radiology Course Fees

The fee structure varies depending on the institution.

Government colleges: INR 20,000 – INR 80,000 per year

Private colleges: INR 1,00,000 – INR 3,00,000 per year

B.Sc Radiology Fees

Government colleges: INR 30,000 – INR 1,00,000 per year

Private colleges: INR 1,50,000 – INR 4,00,000 per year

Radiology courses are often slightly more expensive due to the high-cost imaging equipment training. Government institutions are generally more affordable.

B.Sc MLT and B.Sc Radiology Career Prospects

Career Options After B.Sc MLT

Medical Lab Technologist

Pathology Technician

Research Assistant

Blood Bank Technician

Employment sectors:

Diagnostic laboratories

Career Options After B.Sc Radiology

CT Scan Technician

Imaging Technologist

Multi-speciality hospitals

Diagnostic imaging centres

Cancer treatment hospitals

After completing the B.Sc Radiology course, students receive higher starting salaries compared to MLT due to the technical nature of the field.

With experience, students can also opt for higher studies such as M.Sc MLT, M.Sc Radiology, MBA in Hospital Management or other specialized certifications.

Top B.Sc MLT and B.Sc Radiology Colleges in India

Some reputed institutions offering these programs with strong clinical exposure and placement opportunities are:

All India Institute of Medical Sciences

Christian Medical College

Manipal Academy of Higher Education

Key Differences Between B.Sc MLT and B.Sc Radiology

To summarize the key differences between the courses are: Nevertheless, both courses are offered at Mangalayatan University, where student can build their stable and yielding career.

Aspects	B.Sc MLT	B.Sc Radiology
Work	Lab-based	Imaging-based
Patient Interaction	Minimal	Moderate
Equipment	Lab instruments	MRI, CT, X-ray machines
Salary	INR 2–4 LPA	INR 3–6 LPA
Risk	Low	Radiation exposure (controlled)
Skill	Testing & analysis	Imaging & technology

Patient Interaction

Lab instruments

MRI, CT, X-ray machines

Radiation exposure (controlled)

Testing & analysis

Imaging & technology

Why Choose Mangalayatan University, Aligarh for B.Sc MLT and B.Sc Radiology?

Mangalayatan University Aligarh, is the top university in Uttar Pradesh to get paramedical education with a good emphasis on practical knowledge and exposure to the industry. The

university offers state-of-the-art laboratories, well-seasoned faculty, and practical training to enable the students to acquire professional skills.

Clinical exposure, internships and good academic support are also available to the students. The university assists students in pursuing successful careers in the healthcare industry with the help of modern infrastructure and placement services.

Choosing between B.Sc MLT and B.Sc Radiology depends largely on a student's interests, skills, and career goals.

Students can opt for B.Sc MLT if they enjoy laboratory work, prefer minimal patient interaction and like analytical and detail-oriented tasks and are looking for stable demand in pathology labs.

While students can opt for B.Sc Radiology if they are interested in medical imaging technology, prefer working with machines and are comfortable interacting with patients and looking for better salary packages.

There is no universally “better” course between B.Sc MLT and B.Sc Radiology. Both are excellent career options in the paramedical and healthcare sector in India with India’s growing healthcare infrastructure, both professions have strong long-term demand.

If you prefer working behind the scenes in laboratories, a B.Sc MLT is ideal. If you are fascinated by medical imaging technology and want a more technical and higher-paying career, B.Sc Radiology may be a better choice for your career.

=====

Artificial Intelligence (AI) and Machine Learning (ML) are two fields which have become immensely popular in the technology domain these days. Rapid growth in automation, data science, robotics and deep learning has confused the aspirants between B.Tech in Artificial Intelligence or a B.Tech in Machine Learning while choosing the right B.Tech course.

Even though both streams are excellent choices for career growth however, they differ in terms of curriculum coverage, skill requirements and job profiles.

BTech AI and BTech ML Courses:

The BTech AI course is an undergraduate B.Tech engineering course which deals with building systems that can resemble human intelligence. Artificial Intelligence or AI is a broad field that includes, but is not limited to, machine learning, natural language processing, robotics, computer vision and neural networks domains.

BTech in Machine Learning (ML) is also an undergraduate BTech degree which deals with specialized subject under AI, i.e., developing algorithms for machines to understand data and self-improve over time without being explicitly programmed.

Artificial IntelligenceMachine LearningAI is a broader subject which includes MLML is a subset of AICovers multiple domainsFocuses mainly on data-driven learningExposure to multiple subfields.Predictive modelling, data science, and algorithm optimization.Suitable for robotics, automation, chatbots or self-driving technologyStresses on statistical modelling and data-driven learning.

AI is a broader subject which includes ML

ML is a subset of AI

Covers multiple domains

Focuses mainly on data-driven learning

Exposure to multiple subfields.

Predictive modelling, data science, and algorithm optimization.

Suitable for robotics, automation, chatbots or self-driving technology

Stresses on statistical modelling and data-driven learning.

Read More-BTech CSE with AI and ML Course Details: Full Form, Admission, Eligibility, Entrance Exam, Fees & Colleges

BTech CSE in AI and BTech ML Admission Process:

The admission process for B.Tech CSE in AI and ML program is the same as for other undergraduate BTech engineering courses and is based on entrance exams such as:

Some private universities also offer direct admission based on 12th-grade merit for the B.Tech AI and ML course.

Similarly admission process for BTech in Machine Learning courses is also identical however, being a specialization under B Tech Computer Science Engineering, students will need to first enrol in BTech CSE course and later choose Machine Learning as specialization.

BTech AI and BTech ML Course Details:

The course structure of B Tech Artificial Intelligence and Machine Learning programs can be compared below:

Artificial IntelligenceMachine LearningProgramming Languages (Python, Java, C++)Probability and StatisticsData Structures & AlgorithmsLinear AlgebraArtificial Intelligence FundamentalsSupervised & Unsupervised LearningMachine LearningReinforcement LearningDeep LearningData Science TechniquesNatural Language ProcessingPredictive AnalyticsComputer VisionModel DeploymentRoboticsStatistical ModelingBig Data AnalyticsCloud ComputingNeural NetworksAI Ethics

Programming Languages (Python, Java, C++)

Probability and Statistics

Artificial Intelligence Fundamentals

Supervised & Unsupervised Learning

Machine Learning

Reinforcement Learning

Data Science Techniques

Computer Vision

Model Deployment

Statistical Modeling

Neural Networks

As can be seen from above, the scope of B.Tech AI is broad with wider applications, while B. Tech ML is focused on predictive modelling and data science-based.

BTech AI and BTech ML Eligibility after 12th:

The eligibility criteria for both B.Tech degree programs generally include:

Minimum 50% aggregate marks (varies by institution)

Students who have strong mathematical and logical reasoning skills perform well in B Tech AI and ML course programs. However, ML requires in depth understanding of mathematics and statistics.

BTech AI and BTech ML Course Duration:

Both BTech CSE programs in AI & ML have a 4-year duration, divided into 8 semesters. The variation lies mainly in the curriculum and subjects. This duration includes:

Core subjects (First 2 years)

Specialization subjects (3rd & 4th year)

Internships or Industry training

BTech AI and BTech ML Course Fees:

Both courses have a similar fee structure, which varies with the institution and its reputation, advanced lab infrastructure and specialised faculty offering BTech programs.

Typical fee range:

Government Colleges: INR 1,00,000 – INR 4,00,000

Private Universities: INR 6,00,000 – INR 15,00,000

Students must also weigh out the placement records, Industry partnerships, Internship opportunities, and research facilities before choosing a college.

Read Also- Scope and Career Opportunities After Artificial Intelligence and Machine Learning Degree

Career Prospects after BTech AI and BTech ML Degree:

Students get wider career prospects after a B.Tech in Artificial Intelligence as compared to a BTech in ML. AI graduates can also get into ML roles, but ML graduates may find it slightly difficult to transition into robotics or other AI domains without additional skill sets.

Job Roles After B.Tech AI

Computer Vision Specialist

Job Roles After B.Tech ML

Predictive Modeler

AI Algorithm Developer

Both streams offer similar salary packages, ranging from INR 6 LPA to INR 40 LPA or more, based on experience.

Top BTech AI and ML College in India:

A few reputed institutions offering Artificial Intelligence BTech or B Tech Artificial Intelligence and Machine Learning include:

Students must consider faculty expertise, placement records, industry tie-ups and internship support before deciding upon an institution.

Enhance Your Career Growth with aBTech AI & ML Program

BTech AI & ML Program

Both B.Tech in AI and B.Tech in Machine Learning require strong mathematical and logical reasoning skills. However, BTech in ML requires a deeper statistical understanding of maths, and students can decide based on their performance.

Both degrees are ready computer science engineering degrees, showing high growth and are demanding good salaries. Students must decide based upon their passion, interests and career goals.

In simple terms:

AI = Broad and versatile

ML = Focused and specialised

In case doubt is still there, go for AI as it offers more flexibility and includes Machine Learning as a core component.

Why Choose Mangalayatan University Aligarh for the B.Tech AI & ML Program

Mangalayatan University Aligarh, provides a B.Tech in Artificial Intelligence and Machine Learning program, which is industry-oriented to address the demands of modern technology. The university offers qualified faculty, state-of-the-art labs, and practical learning options to enable students acquire good technical skills in the B.Tech AI and ML course programs.

Internships, industry exposure, and placement assistance are also enjoyed by the students through the training and placement cell of the university. It is a preferred option for students whose future career is in AI and ML due to its emphasis on innovation and career growth.

=====

Choosing the right undergraduate course is one of the most important decisions in a student's life. If you are from a science background and interested in healthcare, medicine, and research, pursuing aB.Pharm coursecan be a smart and future-oriented choice.

Pharmacy is not just about dispensing medicines; it is a dynamic and rapidly growing field that connects healthcare, science, research, and patient care. A B.Pharm degree opens doors to diverse career opportunities, offering both professional stability and long-term financial growth in India and abroad.

What is B.Pharm?

The B Pharm Course (Bachelor of Pharmacy) is a four-year undergraduate degree that focuses on

Medicinal Chemistry

Pharmaceutical Analysis

Clinical Pharmacy

Drug Formulation & Development

The Bachelor of Pharmacy course trains students in understanding how medicines are developed, tested, manufactured, and distributed. It also provides knowledge about the safe and effective use of drugs in patient care. B Pharm Course details are vast and varied and involves learning about various chemical compounds and effect of salts on administering drugs/medicine on patients.

In India, B.Pharm is regulated by the Pharmacy Council of India (PCI), which ensures quality education and professional standards for pharmacists.

B.Pharm Eligibility Criteria

B Pharm eligibility requires 10+2 with majors in science subject like Physics, Chemistry and Biology with Mathematics.

Why Should You Choose B.Pharm?

1. Growing Pharmaceutical Industry in India

India's pharmaceutical sector is one of the fastest-growing industries in the world. It is often referred to as the "Pharmacy of the World" because of its large-scale production and export of medicines. With increasing health awareness, chronic diseases, and demand for better healthcare services, the need for qualified pharmacists is consistently rising. This ensures job security and long-term career stability.

2. Diverse Career Options After B.Pharm

Unlike many traditional courses, B.Pharm course does not limit you to one job role. You can choose from multiple career paths based on your interests—

Clinical Practice

Pharmaceutical Research & Development

Pharmaceutical Marketing

Drug Regulatory Affairs

Government Sector Jobs

This flexibility allows you to build a career aligned with your strengths and passions.

3. Opportunity to Serve Society

Pharmacists play a crucial role in patient care. They ensure the right medicine is given at the right dose and at the right time. In hospitals and community pharmacies, pharmacists guide patients on medication usage, side effects, and drug interactions. Choosing the B.Pharm course means contributing to society by improving public health and patient safety.

4. Scope for Higher Education After B.Pharm

After completing a B.Pharm degree, you can pursue higher studies such as

M.Pharm (Master of Pharmacy)

MBA in Pharmaceutical Management

Institutes such as the National Institute of Pharmaceutical Education and Research (NIPER) are well-known for advanced pharmaceutical studies in India.

Higher education enhances specialisation and increases salary prospects and leadership opportunities.

5. Strong Salary and Growth Potential

The pharmaceutical industry offers competitive salary packages. Fresh graduates can start with decent entry-level salaries, and with experience and specialization, earnings increase significantly. Roles in multinational companies, research organizations, and regulatory agencies provide excellent growth opportunities.

Top 10 Future Career Opportunities After B.Pharm in India

Let's explore the major career paths that a B.Pharm degree can provide:

1. Clinical Pharmacist

Clinical pharmacists work in hospitals and healthcare institutions. They collaborate with doctors and nurses to ensure optimal drug therapy for patients. This role requires strong knowledge of pharmacology and patient care. With the growth of multispecialty hospitals, demand for clinical pharmacists is increasing.

2. Drug Inspector

Drug inspectors ensure that pharmaceutical products meet safety and quality standards. They monitor drug manufacturing units and check compliance with regulations. This is a prestigious government job that offers stability and respect.

3. Pharmaceutical Research Scientist

If you are interested in research and innovation, you can work in Research & Development (R&D). Research scientists develop new drugs, improve existing formulations, and conduct clinical trials. Organizations like the Indian Council of Medical Research (ICMR) and pharmaceutical companies actively recruit skilled professionals in this field.

4. Quality Control and Quality Assurance Officer

Quality control (QC) and quality assurance (QA) professionals ensure that medicines are manufactured according to prescribed standards. This role is critical in maintaining the safety and effectiveness of pharmaceutical products.

5. Medical Representative / Pharmaceutical Marketing

Medical representatives promote pharmaceutical products to doctors and healthcare providers. This career offers good incentives, travel opportunities, and rapid growth. With experience, you can move into managerial and marketing leadership roles.

6. Community Pharmacist

You can open your own pharmacy after registering as a licensed pharmacist. This provides an opportunity for self-employment and entrepreneurship. Running a pharmacy store can be financially stable and socially respected.

7. Regulatory Affairs Specialist

Regulatory professionals handle documentation and approvals required for launching pharmaceutical products in different countries. As global markets expand, regulatory affairs has become a high-demand and well-paid field.

8. Pharmacovigilance Officer

Pharmacovigilance involves monitoring and reporting adverse drug reactions. With strict global safety standards, this field is rapidly growing and offers opportunities in both India and abroad.

9. Government Sector Jobs

B.Pharm graduates can apply for government jobs in public health departments, railways, defence services, and regulatory authorities. Organizations like the Central Drugs Standard Control Organization (CDSCO) offer roles related to drug regulation and safety.

10 Pharmaceutical Production Officer

The Pharmaceutical Production Officers are employed in drug manufacturing firms, and they control the production of drugs, as well as the quality and safety laws. They guarantee that products are produced in accordance with GMP and regulatory standards.

They are also likely to advance with experience into the Production Manager or Head of Plant positions, which have good earnings and career security in the pharmaceutical industry.

Stability and Long-Term Growth in B.Pharm Career

One of the biggest advantages of pursuing B.Pharm is career stability. Medicines are an essential part of healthcare, and the demand for pharmaceutical professionals does not decline easily—even during economic slowdowns. The industry continues to grow due to new diseases, technological advancements, and global healthcare demands.

With experience, pharmacists can move into managerial, research, or consultancy roles. Some even establish their own pharmaceutical manufacturing units or distribution businesses.

Global Opportunities after B.Pharm

Indian pharmacy graduates also have opportunities abroad after clearing the required licensing exams. Countries like the

These countries offer attractive salaries for qualified pharmacists. A B.Pharm degree can therefore serve as a gateway to international career prospects.

Enhance Your Career Growth with aB Pharm Program

B Pharm Program

Is B.Pharm the Right Choice for You?

You have an interest in chemistry, biology, and healthcare.

You want a stable and respected profession.

You are looking for diverse career options.

You wish to contribute to society by improving public health.

You aim for long-term financial security and growth.

Top B Pharm college in Uttar Pradesh, India

Eventually, India is known as one of the best countries for medical tourism, and so is the case with pursuing medical courses. B.Pharm courses are offered by many Government Colleges and Universities in India, approved by the Pharmacy Council of India. Mangalayatan University Aligarh is also one of thebest university in Uttar Pradeshthat strives to offer a quality B.Pharm course to national and International students.

Pursuing a B.Pharm course can be a wise decision for students seeking a stable, respected, and rewarding career in the healthcare sector. The course offers a perfect blend of science, research, and patient care.

With expanding pharmaceutical industries, government opportunities, research prospects, and global demand, a B.Pharm degree provides both job security and career growth.

If you are passionate about medicines and want to build a future in healthcare, B.Pharm can be your stepping stone toward a successful and fulfilling professional journey.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/10-best-courses-after-btech-for-high-salary-and-placement.html>

=====

Deciding the best course afterB.Techamongst several available options could be a daunting task for many students. It is one of the most important decisions for engineering graduates who are aspiring for growth, global exposure and high salary packages.

Recently, after evolution and integration of digital transformations such as AI, fueled by the need for automation, there are several dynamic and rewarding career options after B.Tech 2026.

For those searching for high-salary courses after B.Tech, strong industry demand and excellent courses after B.Tech with placement opportunities,

Below are Top 10 Courses after BTech Engineering in 2026-27 are discussed below.

1. Master of Business Administration (MBA):

MBAcan be considered as one of the best courses after B.Tech for management leadership roles with higher salaried managerial profile.

Top Specializations:

Product Management

After completing the course, recruitment can be expected from consulting firms, investment banks, technology companies and startups.

Approximate average salary in India:INR 8–25 LPA

Global salary:\$90,000+ per year

An MBA course can be a good choice considering strong campus placements, leadership & strategic roles, and faster career progression. The course is ideal for engineering graduates who aspire to transition into management or leadership roles.

Read Also-What is MBA Degree: Course, Admission, Salary, Scope, Fees, Benefits, Career Syllabus, Eligibility and More

2. M.Tech / MS (Technical Specialization):

M.Tech or MS can be considered by the engineering graduate who is passionate about core engineering and is one of the professional courses after B.Tech, which provides an opportunity for getting into R&D and senior technical roles.

Trending Specializations in 2026:

Renewable Energy

Average salary in India:INR 6–20 LPA (higher for AI & advanced domains)

The advantage of the course is that it builds upon the foundation taught during the B.Tech. course and is considered to be the most reliable courses after B.Tech with placement opportunities if pursued from reputed institutes.

3. Data Science & Artificial Intelligence:

Data Science and AI are presently amongst the most demanded and high-paying jobs after B.Tech globally.

Required Skills:

Data Visualization

Average salary in India:INR 10–30 LPA

Global salary:\$100,000+ per year

The boom and increased trend in 2026 for these courses are due to the integration of AI in every industry, massive demand, lack of skilled talent and the course offers excellent placement rates. It can be considered one of the best Short-term courses after B.Tech, as several certification courses on Data Science and Artificial Intelligence can be completed in approximately 6–12 months.

4. Cybersecurity & Ethical Hacking:

With the spread of digitalization across industries, cyber threats are often perceived and are on a rising trend. With the rising cyber threats, cybersecurity professionals are in high demand.

Top Certifications:

CEH (Certified Ethical Hacker)

CompTIA Security+

Average salary in India:INR 8–25 LPA

The certifications in Cybersecurityafter B.Tech have a good chances of placement and remote work opportunities for global companies. Being digital world, it is and would remain one of the most stable high-salary courses after B.Tech in 2026.

5. Product Management:

Recently, Product management has become an exciting career option after B.Tech 2026. Engineering graduates who are into or interested in business + technology, love to solve problems and have leadership qualities could opt for the option.

Average salary in India:INR 12–35 LPA

Global salary:\$110,000+ per year

This option is among the top courses after engineering, driven by the rise in startups and technology innovations.

6. Cloud Computing and Development & Operations:

Cloud engineers and Development &Operations professionals are in huge demand as companies are slowly migrating to cloud platforms.

Key Certifications:

AWS Solutions Architect

Microsoft Azure

Average salary in India:INR 10–28 LPA

This option is one of the best professional courses after B.Tech with fast-track growth and global placement opportunities.

7. Blockchain Technology:

Blockchain is currently expanding into finance, healthcare, logistics etc and is not limited to cryptocurrency anymore.

Smart Contracts

Average salary in India:INR 8–30 LPA

Global salary:\$120,000+ per year

This profile has emerged as one of the highest-paying jobs after B.Tech, and the blockchain developers and professionals command premium salary packages.

8. Digital Marketing & Growth Hacking:

For creative engineers, digital marketing is a strong career path.

Specializations:

Performance Marketing

Social Media Marketing

Marketing Analytics

Average salary in India:INR 5–15 LPA

This course is one of the easily accessible short-term courses after B.Tech, which can be completed within 3–6 months.

9. Financial Engineering / CFA:

Engineering graduates interested in finance and analytics can also opt for CFA or Financial Engineering, which also leads to high-salary courses after B.Tech.

Portfolio Manager

Average salary in India:INR 10–40 LPA

This course is one of the most respected high-salary courses after B.Tech.

Also Read-MTech Course Details, Full Form, Admission, Eligibility, Entrance Exam, Fees, and Colleges

10. UPSC / Government Services:

Even though not a corporate, still civil services remain a prestigious and stable career option after B.Tech 2026-27

Authority & Influence

This career option after B.Tech 2026 is a strong contender for those inclined toward public service.

Short-Term vs Long-Term Courses After B.Tech

Short-Term Courses (3–12 Months)

Data Science Certification

Cybersecurity Certifications

Best for quick employment entry.

Long-Term Courses (1–2 Years)

Financial Engineering

Best for specialization and leadership career growth.

Enhance Your Career Growth with aB.Tech Program

In 2026, Mangalayatan University is anbest university in Uttar Pradeshthat sets trends for various courses after Bachelors degree viz., after B.Tech:

AI & Automation integration

Remote global job opportunity

Sustainable & green technology

Fields like AI, Cloud Computing, Cybersecurity, and Product Management will dominate the highest-paying jobs after B.Tech market.

Choosing wisely among these professional courses after B.Tech and other professional courses after B.Tech can significantly impact the salary package, future growth and global opportunities. Success after engineering depends not only on the degree but on specialization, adaptability and a continuous learning approach.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/top-15-high-demand-courses-for-the-future-with-high-salaries.html>

=====

In today's rapidly evolving job market, selecting the right field of study is crucial to achieving long-term career success. With technology transforming industries at an unprecedented pace, several programs have emerged as high-demand courses for the future. These courses not only ensure strong career growth but also offer high salary potential.

Whether you are planning your career after 12th or looking to upskill through the best career courses for future growth, this comprehensive guide highlights the top 15 high-demand courses across Arts, Science, Commerce, and Engineering program after 12th that are expected to offer excellent remuneration and growth opportunities in the coming years.

Top 15 Best Courses after 12th Students in India

1. Artificial Intelligence & Machine Learning (Engineering/Science)

Why it's in demand: AI and ML are transforming industries such as healthcare, finance, automation, and robotics.

What you'll learn: Algorithms, neural networks, data analysis, NLP, and AI ethics.

Career roles: AI Engineer, Machine Learning Engineer, Data Scientist, Robotics Programmer.

Salary potential: Among the highest-paying technology domains with rapid growth.

2. Data Science & Analytics (Science/Commerce)

Why it's in demand: Businesses rely heavily on data-driven decision-making.

What you'll learn: Statistics, Big Data tools, Python/R, data visualization.

Career roles: Data Analyst, Data Engineer, Business Intelligence Expert, Data Scientist.

Salary potential: High demand for skilled professionals with strong technical expertise.

3. Cybersecurity (Engineering/Science)

Why it's in demand: Rising cyber threats increase the need for security professionals.

What you'll learn:Network security, cryptography, ethical hacking, threat analysis.

Career roles:Cybersecurity Analyst, Ethical Hacker, Security Architect.

Salary potential:Very high, especially with certifications like CEH, CISSP, OSCP.

4. Cloud Computing (Engineering/Science)

Why it's in demand:Cloud platforms power modern IT infrastructure.

What you'll learn:Cloud services, virtualization, cloud security, deployment models.

Career roles:Cloud Engineer, DevOps Engineer, Cloud Security Specialist.

Salary potential:Excellent across industries.

5. Digital Marketing (Arts/Commerce)

Why it's in demand:Digital platforms dominate branding and customer engagement.

What you'll learn:SEO, SEM, content marketing, social media strategy, analytics.

Career roles:Digital Marketing Manager, SEO Specialist, Social Media Strategist.

Salary potential:High for strategic and analytics-focused roles.

6. Finance & Investment Banking (Commerce)

Why it's in demand:Growing global financial markets and fintech expansion.

What you'll learn:Financial analysis, portfolio management, risk assessment.

Career roles:Investment Banker, Financial Analyst, Wealth Manager.

Salary potential:Very high with certifications like CFA and FRM.

7. Chartered Accountancy (Commerce)

Why it's in demand:Essential for taxation, auditing, and corporate compliance.

What you'll learn:Accounting, auditing, taxation, corporate law.

Career roles:Chartered Accountant, Tax Consultant, Auditor.

Salary potential:Among the highest in commerce.

8. Psychology (Arts/Science)

Why it's in demand:Increasing focus on mental health and workplace wellness.

What you'll learn:Human behavior, counseling techniques, therapy methods.

Career roles:Clinical Psychologist, Counselor, Organizational Psychologist.

Salary potential:Growing with specialization and experience.

9. UX/UI Design (Arts/Technology)

Why it's in demand: Digital products require seamless user experiences.

What you'll learn: Visual design, prototyping, user research, HCI.

Career roles: UX Designer, UI Designer, Product Designer.

Salary potential: High demand in tech companies and startups.

10. Biotechnology & Genetic Engineering (Science)

Why it's in demand: Innovations in healthcare and pharmaceuticals.

What you'll learn: Molecular biology, genetics, bioinformatics.

Career roles: Biotechnologist, Research Scientist, Genetic Engineer.

Salary potential: Strong in research and biotech firms.

11. Renewable Energy Engineering (Engineering/Science)

Why it's in demand: Global push toward sustainable energy solutions.

What you'll learn: Solar and wind systems, energy storage, sustainable design.

Career roles: Renewable Energy Engineer, Project Manager.

Salary potential: High with expanding green initiatives.

12. Actuarial Science (Commerce/Maths)

Why it's in demand: Risk management and insurance sectors are expanding.

What you'll learn: Probability, statistics, financial mathematics.

Career roles: Actuary, Risk Analyst.

Salary potential: Extremely high with certification.

13. Foreign Languages & International Relations (Arts)

Why it's in demand: Globalization increases cross-border communication.

What you'll learn: Language skills, diplomacy, global politics.

Career roles: Translator, Diplomat, International Consultant.

Salary potential: Strong in multinational organizations.

14. Supply Chain & Logistics Management (Commerce/Engineering)

Why it's in demand: Efficient supply chains are vital for global trade.

What you'll learn: Logistics planning, inventory management, SCM software.

Career roles: Supply Chain Manager, Logistics Analyst.

Salary potential: High across retail, manufacturing, and e-commerce sectors.

15. Robotics & Automation (Engineering)

Why it's in demand:Automation and smart manufacturing are shaping the future.

What you'll learn:Robotics systems, control engineering, mechatronics.

Career roles:Robotics Engineer, Automation Specialist.

Salary potential:High in advanced manufacturing and tech industries.

Choosing the Right Path after 10+2

Align courses with your interests and strengths.

Analyze future industry trends like AI and sustainability.

Focus on practical skill development.

Gain professional certifications.

Complete internships and live projects.

Enhance Your Career Growth with aUG, PG & Diploma Program

UG, PG & Diploma Program

Why Choose Mangalayatan University, Aligarh after 12th Class?

Mangalayatan University, Aligarh,one of the leading universities in Uttar Pradesh, offers industry-oriented UG, PG, and Diploma programs designed to prepare students for future-ready careers. The university provides experienced faculty, modern infrastructure, and strong placement support.

With a focus on practical learning, certifications, and industry-relevant competencies, students gain access to high-paying career opportunities after graduation or postgraduation.

The future belongs to professionals who continuously learn, adapt, and innovate. While traditional degrees remain important, combining them with emerging technologies and practical skills makes you career-ready and future-proof. Explore these top 15 high-demand courses and choose a path that ensures both professional growth and high salary potentials.

=====

MLIS Course Details: Full Form, Admission, Eligibility, Duration, Fees, Colleges & Jobs

The Master of Library and Information Science (MLIS) is a postgraduate professional program that aims to provide students with information, skills and abilities to handle, organize and preserve data in a variety of formats.

Both modern digital information management and traditional library methodology are covered in theMLIS course. Students enrolled in the MLIS program get an opportunity to learn how to gather, arrange, store and distribute information in both digital and physical modes efficiently.

Library science, information management (storage and retrieval), including the use of modern digital technologies, cataloging, classification, digital libraries, research methodology and knowledge management are the main topics taught in the Master's degree library science program. Additionally, the course incorporates integration of IT applications, database administration and digital archiving to traditional library operations.

The MLIS master's degree bridges the gap between traditional library science and modern information technology and is suitable for students interested in managing information resources in academic, corporate, and digital environments.

Skills Required for MLIS Students

Master's of library sciences students must possess both soft and hard abilities to excel in their chosen field. Among these abilities are:

Analytical & Investigative Skills

Quantitative Skills

Ability to operate despite the stress

Interpersonal Communication Skills

MLIS full form is Master of Library and Information Science. It is a 1 year postgraduate professional degree program focused on managing, organizing, and disseminating information in both traditional libraries and digital environments, blending library science with modern technology and data skills.

Also Read-BLIS Course Details: Full Form. Admission, Eligibility, Duration, Fees, Colleges, Jobs

Master's of Library Sciences Course and Subject Details:

The Master of Library and Information Science (MLIS) course aims to develop effective information management (organizing and dissemination) skills in the students, i.e. to increase knowledge about information management within both physical and digital platforms. The course also encourages ethical and legal awareness in the use of information.

The masters of library and information science integrate:

Library Science

Information Management

Digital Tools & Technologies

Artificial Intelligence Applications

Data Analytics in Libraries

Major subjects included in the MLIS curriculum are:

Cataloging and Classification

Reference and Information Services

Information Storage and Retrieval Systems

Digital Libraries and Knowledge Management

Library Management and Administration

Database Management and Metadata Creation

Application of Information Technology in Libraries

Ethical and Legal Aspects of Information Management

AI Applications in Libraries and Information Centres

MLIS Course Duration and Semester Pattern:

The MLIS Course Duration is a one-year postgraduate degree split into two semesters.

(Some universities may offer a two-year format depending on their academic structure.)

Read Also-MSc Course Details, Full Form, Admission, Eligibility, Entrance Exam, Fees, and Colleges

MLIS Fees Structure

The MLIS Fees will differ according to the university (government or private). The tuition fees in government universities are usually low as compared to the fee in the private schools. MLIS fees are usually affordable to average, so the MLIS course is available to the students who need a professional postgraduate degree in library and information science.

The official university site is recommended where students should verify the latest MLIS fees information.

Job Opportunities & Career Prospects After MLIS Degree

Jobs after completion of the Master of Library and Information Science (MLIS) degree are diverse and available in multiple industries, including

Research Institutes

Corporate organizations

Universities and colleges

Digital libraries

The course provides skills to students to work as librarians and knowledge managers in environments where controlling and facilitating access to information is crucial, such as

Assistant Librarian

Digital Library Manager

The demand for MLIS course students is continuously growing in the media, education and IT industries due to the advent of digital information management. The course structure is also suitable for roles in teaching and research positions in information science.

MLIS graduates have a variety of job options in information science, academic, public and special libraries. Students who complete the course are well equipped to work as librarians, knowledge managers, data curators, information analysts and archivists.

Top 10 Best Private & Government MLIS Colleges in Uttar Pradesh, India

The Master of Library and Information Science (MLIS) program is offered at several reputable government and private universities in Uttar Pradesh. Many of these colleges offering MLIS courses have come up over the past few years.

Top MLIS Colleges in Uttar Pradesh:

Banaras Hindu University (BHU), Varanasi

Aligarh Muslim University (AMU), Aligarh

Mahatma Gandhi Kashi Vidyapith (MGKVP), Varanasi

Babasaheb Bhimrao Ambedkar University (BBAU), Lucknow

Bundelkhand University, Jhansi

Mangalayatan University, Aligarh

Amity University, Noida

Integral University, Lucknow

Swami Vivekanand Subharti University (SVSU), Meerut

MLIS Admission & Eligibility Criteria:

To be eligible for MLIS admission, candidates must:

Candidates are required to hold a graduate degree from a recognized university

Have a minimum aggregate score of 50-60% marks.

Candidates in their final graduation year can also apply, provided they meet eligibility requirements upon degree completion.

MLIS Admission Process (Online)

The MLIS Admission process generally includes:

Step 1: Registering on our website

Step 2: Fill Online Application Form

Step 3: Pay Application Fee

Further details are available on the website:<https://www.mangalayatan.in/blis-mlis-library-information-science-course-admission/mlis-course.php>

Career Prospects after pursuing the Master of Library and Information Science

Pursuing a Master's in Library and Information Science (MLIS) offers diverse career opportunities in the fields of knowledge management and book and information keeping. MLIS is a knowledge management course

Where graduates can work as Information Officers, Librarians, in Digital Archives, Cataloguing Specialists and Managers and Research Associates, as well to various capacities in schools, Universities, Colleges as well as in educational institutions, etc.

With the rapid growth of digital data, online data curation and keeping it in the cloud for research and support services have led to the formation of many digital libraries. MLIS holders can also work in publishing houses, museums, media centres, and IT firms. The degree builds strong analytical, technical, and management skills, ensuring stable career growth and long-term professional prospects.

Admission in MLIS Course at Mangalayatan University

Admission to the MLIS Course at Mangalayatan University offers holistic learning and all-around development with an advanced curriculum from a well-accredited University.

Top MLIS College in Uttar Pradesh – Mangalayatan University

Choosing Mangalayatan University, Aligarh, for Master of Library and Information Science (MLIS) admission offers a student-centric, flexible and recognized postgraduate experience.

The university is UGC-recognised and NAAC-accredited, giving your MLIS degree national acceptance for careers and further studies. Its Library & Information Science department combines traditional library principles with modern IT and digital resource management, preparing students for evolving information careers.

The program emphasizes research, digital libraries, cataloguing, and professional ethics, guided by experienced faculty. The campus boasts a central library with quite several books and digital resources, supporting academic growth.

Mangalayatan University also offers placement support, flexible learning options (including online/distance mode) and access to a supportive learning community, making it ideal for both fresh graduates and working professionals aiming to advance in library science, digital libraries, knowledge management, and related fields.

The Master of Library and Information Science (MLIS Course) at Mangalayatan University is a 1-year postgraduate program (2 semesters) designed to equip students with advanced skills in library and information management, digital resources, research methods, and information technology.

The course covers subjects like Knowledge, Information & Communication, Research Methodology, Print and Electronic Sources, Information Storage & Retrieval, and IT applications. Eligibility typically requires a Bachelor's degree in BLIS or equivalent from a recognized university.

The program blends live and recorded lectures, career-focused curriculum and placement support. With rising demand for information professionals, graduates can pursue roles such as Academic Librarian, Digital Librarian, Information Manager, Archivist, and Knowledge Specialist. The course fee is affordable compared to many universities, making it a promising choice for a library and information science career.

SOURCE (WEB): <https://www.mangalayatan.in/blog/career-options-after-fine-arts-degree-jobs-salary-india.html>

=====

Fine Arts has long been considered a career requiring creative expression and a real feel of culture. But recently, the field has emerged as a game-changer, opening all kinds of job doors in areas like education, media, design, entertainment, and even the digital industries. Students, after completing a fine arts qualification, are offered roles beyond traditional artistic roles, such as in creative and commercial industries. expanding the scope of Fine Arts in India and increasing career options after a Fine Arts degree.

Understanding Fine Arts Education: BFA and MFA Course:

Students can initiate learning about fine arts, usually beginning with a BFA and MFA course offered at reputed institutions such as Mangalayatan University Aligarh

Bachelor of Fine Arts (BFA) is an undergraduate course that introduces students to foundational and specialised artistic disciplines such as painting, sculpture, applied arts, animation, photography, and art history etc.

Master of Fine Arts (MFA) is a postgraduate program focused on advanced topics of the above disciplines, including artistic practice, research and conceptual development.

These programs help students develop proficiency and aesthetic sensitivity. Students, after completing BFA and MFA programs, are geared to pursue careers that combine creativity with professional expertise and explore various Fine Arts degree jobs.

Career Options After a Fine Arts Degree:

There exist broad career options after a Fine Arts degree, which are ever-expanding due to the growing demand for creative professionals and rising Fine Arts career opportunities. Fine arts graduates can work as independent artists or pursue structured roles in industries. Few career paths include, but are not limited to, visual arts, applied arts, digital media, education, etc.

Unlike conventional career pathways, a career in the fine arts offers flexibility and self-expression, along with financial stability. With the advent of digital technologies, fine arts students have better career prospects, visibility and market reach in creative industries, strengthening the scope of Fine Arts in India

Jobs After a Fine Arts Degree in Visual and Applied Arts:

Jobs after a Fine Arts degree include artists, painters, sculptors, illustrators, freelancing, exhibiting their work in galleries or taking up commissioned projects. Applied arts roles are in advertising agencies, publishing houses, and branding firms.

Graphic/ Visual designers or illustrators are required in marketing and media sectors.

Engagement of such professionals are required for creating visual concepts for marketing campaigns, digital media and print publications. These fine arts jobs mix art and business and are considered as some of the best jobs after fine arts.

Fine Arts Career Opportunities in Media and Entertainment:

The media and entertainment industry offers countless Fine arts career opportunities and attractive jobs after a fine arts degree. Students get to work as

Storyboard artists

Concept artists

These positions are available in films, television, gaming and animation studios. The opportunities have risen manifold after the rise of OTT platforms, a spurt in gaming companies that require digital content creation, leading to increased demand for skilled fine arts professionals.

Photography and cinematography are also promising avenues for fine arts students who are usually offered diverse roles in advertising, fashion, and journalism. Such intensive pathways require artistic vision and expertise in the latest technologies, which are taught during formal fine arts education and structured MFA and BFA course at institutions like Mangalayatan University Aligarh.

Teaching and Academic Career Opportunity After a Fine Arts Degree:

Teaching is a respectable career choice for fine arts graduates, which usually requires completion of an MFA or doctoral studies.

Schools, colleges, universities and art institutions offer roles such as

Assistant professor

These roles involve imparting practical skills and art theories to the students. The academic pathway gives an opportunity of developing future artists while continuing their own creative practice. Teaching is the most preferred job after a fine arts qualification and is considered among the best jobs after Fine Arts due to job security and intellectual fulfilment.

Career in Design, Fashion, and Creative Industries:

Design-focused roles form a significant portion of fine arts career opportunities. Graduates can work as:

Fashion designers

Textile designers

Interior designers

Exhibition designers

Artistic training and aesthetic understanding are core requirements of the fashion and lifestyle industry. Interior and Set design roles for Fine Arts students require conceptualising and executing a visual theme for residential, commercial or entertainment areas, creating promising Fine Arts degree jobs in India

Fine Arts Jobs in Digital and Emerging Fields:

Digital technology has significantly increased opportunities for fine arts jobs, and roles include

Digital illustrator

Motion graphic designer

Content creator

Visual designer

These roles have now become an integral part to technology and media industries. Fine arts students go well with these roles due to their visual sensibility and creative abilities, leading to strong career options after a Fine Arts degree.

Art therapy is one more role where expertise in fine arts, along with psychology, is utilised in healthcare, rehabilitation center and educational institutions to support mental and emotional well-being.

Read Also-Master of Fine Arts Course Details, Salary, Scope, Fees, Benefits, Career, Jobs, Syllabus, Eligibility & More

Fine Arts Salary in India:

The expected fine arts salary in India varies depending on specialization, experience, location, and industry.

Entry-level professionals such as junior designers or art teachers may earn between INR 2.5 to 4 lakh per annum.

Mid-level professionals in design, animation or advertising can earn INR 6 to 10 lakh per annum.

Experienced professionals and art directors: Higher earning potential

Independent artists, freelancers and consultants may have variable income; however, once earned a reputation can earn significantly through exhibitions, commissions and international projects. Academic roles also enjoy steady income and growth.

The professional landscape for fine arts graduates has grown tremendously, now offering diverse and rewarding career paths due to increased awareness about career options after a fine arts degree. As creativity becomes a key component of branding, communication and innovation, fine arts graduates are increasingly valued across sectors.

Pharmacy Courses After 12th in India: Eligibility, Duration, Scope & Career Opportunities

The healthcare industry in India is displaying rapid growth and has emerged as a stable and lucrative career option after the 12th standard. Pharmacy courses after 12 in India combine healthcare skills with their scientific expertise.

Below is a detailed overview of pharmacy courses after 12th in India, detailing eligibility criteria, popular course options, course duration, fees, career scope & opportunities for jobs.

Pharmacy Courses After 12th in India:

The pharmacy course covers the know-how of medicines such as their preparation, dispensing methods and their appropriate usage. The course is suitable for students with an interest in medicine, chemistry and healthcare.

The Pharmacy Council of India (PCI) and the All India Council for Technical Education (AICTE) are the regulatory bodies that govern pharmacy courses in India. After completing 12th standard, students can opt for a diploma, undergraduate, or integrated pharmacy course based on their career goals and academic background.

Popular Pharmacy Courses After 12th Include:

Diploma in Pharmacy (D. Pharma)

Bachelor of Pharmacy (B. Pharma)

Pharm D (Doctor of Pharmacy, which is an integrated course)

Pharmacy Courses After 12th: Overview

Multiple pharmacy courses available to the students after 12th standard vary in duration, academic depth and career opportunities. The popular options are diploma courses which enable quick entry into the professional world of pharmacy, while undergraduate degree courses offer wider career opportunities. Integrated professional courses are suitable for clinical and hospital-based roles.

Read Also-Which Pharmacy Course is Best after 12th Science for a Successful Career

Eligibility for Pharmacy Courses After 12th

The eligibility criteria for diploma, undergraduate or integrated pharmacy courses option after 12th standard is generally similar. Students must have passed 10+2 (science stream with mandatory Physics and Chemistry subjects & either of Maths/ Biology) with a minimum 45% marks (relaxation applicable for reserved categories as per norms).

Diploma in Pharmacy After 12th (D. Pharma):

A diploma in Pharmacy program after 12th is one of the most popular short-term pharmacy courses in India. It provides the students opportunity for being employment ready in the pharmaceutical sector earlier than other options.

Key highlights of the D.Pharm course are:

Builds fundamental pharmaceutical concepts;

Students can work as registered pharmacists.

Practical training oriented and imparts medicine dispensing skills

After completion of the course, students can register with the State Pharmacy Council and legally work in medical stores, hospitals and clinics.

This course is especially suitable for students who aspire to a cheaper and quicker entry into the pharmacy profession.

B. Pharmacy Course After 12th

The B. Pharmacy course after 12th is a four-year undergraduate degree program that provides in-depth theoretical and practical knowledge of pharmacy. This option is preferable to students who aspire for richer roles/ positions or further research opportunities.

Key attributes of the B.Pharm course are:

Disseminates in-depth knowledge for subjects like pharmaceuticals, pharmacology, pharmaceutical chemistry and pharmacognosy

Also includes industrial training and practical laboratory work

Suitable for students aspiring for further education, e.g., M. Pharmacy, MBA or Pharm D.

After completing the B. Pharmacy course, the students get wide career opportunities in the pharmaceutical industry, research labs, regulatory institutions and healthcare bodies.

Pharmacy Course Duration and Fees:

One of the critical factors required by a student for choosing amongst various courses are its duration and fees. A general idea of the same is reproduced below to help students plan their education effectively.

B.Sc Course	Course Duration	Course Fees
D. Pharma	2 years	INR 40,000 – 1,00,000 Per Year
B. Pharma	4 years	INR 80,000 – 2,50,000 Per Year
Pharm D	6 years (5 years academic + 1 year internship)	INR 1,50,000 – 3,00,000 Per Year

INR 40,000 – 1,00,000 Per Year

INR 80,000 – 2,50,000 Per Year

6 years (5 years academic + 1 year internship)

INR 1,50,000 – 3,00,000 Per Year

It is further mentioned that the above fees vary from institution to institution based on government or private institutions, location and facilities offered.

Career Scope in Pharmacy in India:

There is a bright career scope for pharmacy students in India owing to the rapid growth and expansion in healthcare, pharmacy manufacturing, biotechnology and clinical research.

The above growth is further sustained as India is one of the largest producers of generic medicines in the world, which leads to a constant need for skilled pharmacy professionals. There are numerous jobs after pharmacy courses.

After completing the course, the career opportunities extend beyond medical shops to extremely technical roles such as drug development, quality control and also extend to patient care.

Pharmacy Graduates Can Work in:

Pharmaceutical companies;

Hospitals and healthcare centers;

R & D laboratories of the pharmacy industries;

Government health departments;

Regulatory authorities.

With increased experience and completion of further education, the pharmacy professionals get opportunity for managerial and leadership roles as well..

Popular Job Roles After Pharmacy Courses:

Further, the students can also open their own medical store or pharmacy, pursue higher studies (M. Pharma, MBA, PhD.), and work abroad after meeting licensing requirements. Initially, a student can expect to get a remuneration/ salary of INR 2.5 to INR 5 LPA, which increases with further experience, specialization, and industry exposure.

Pharmacy is a growing and respected career choice for science students after 12th standard, and Mangalayatan University is one of thebest University in Uttar Pradeshthat caters to the requirements of students who want to pursue pharmacy courses after completing senior secondary education with science stream.

With multiple pharmacy courses after 12th in India, students get lots of options to decide based on their interests and financial capacity. With the above details, students can make informed decisions and build a successful career in the pharmacy and healthcare sector.

=====

Students who wish to establish a firm scientific base for their future professional advancement must select an appropriate B.Sc programme after completing their 12th grade. B.Sc courses in India have gained greater reach because of technological progress in healthcare, data science and environmental studies.

Students today have the option to select between traditional science programs and specialized industry programs, which provide them with valuable B.Sc career pathways that lead to high-paying employment opportunities after B.Sc.

Why Choose B.Sc Courses After 12th?

The selection of B.Sc programs after completing 12th grade proves to be the best choice for students who seek to develop deep subject understanding, analytical reasoning, and research abilities. The BSc program establishes a comprehensive scientific basis which develops students' logical reasoning abilities and problem-solving competencies.

The programs which suit Science stream students from both PCM and PCB tracks lead to various career paths, including research work, corporate employment, government positions, advanced studies, and business development. The top B.Sc programs, which students can choose after 12th grade, now provide interdisciplinary studies together with hands-on experience and industry-focused educational programs to meet changing workplace requirements.

Top 15 Bachelor of Science Courses After 12th in 2026-27

The following list includes the best B.Sc courses which students can pursue after completing their 12th grade because these programs provide excellent career opportunities, high market demand and future industry growth.

B.Sc Course	Career Opportunities
B.Sc Computer Science	Software Developer, Data Analyst, IT Consultant
B.Sc Information Technology	System Analyst, Network Administrator
B.Sc Data Science	Data Scientist, Business Analyst
B.Sc Artificial Intelligence	AI Engineer, ML Engineer

Best B.Sc Courses After 12th Based on Career Scope

B.Sc program selection matters because it builds essential skills for your future career development. The particular programs which students should consider demonstrate both high

industry demand and lucrative salary potential, along with opportunities for professional advancement throughout their careers in India and international markets.

B.Sc Course	Career Scope	Job Opportunities
B.Sc Computer Science & IT	High demand in IT and software industry	Software Developer, System Analyst, IT Consultant
B.Sc Data Science & AI	Rapid growth in analytics and automation	Data Scientist, AI Engineer, Business Analyst
B.Sc Nursing	Stable and respected healthcare profession	Registered Nurse, Healthcare Supervisor
B.Sc Biotechnology	Expanding research and pharma sector	Research Scientist, Biotech Analyst
B.Sc Agriculture	Strong government and private sector demand	Agricultural Officer, Agribusiness Manager

B.Sc Computer Science & IT

High demand in IT and software industry

Software Developer, System Analyst, IT Consultant

B.Sc Data Science & AI

Rapid growth in analytics and automation

Data Scientist, AI Engineer, Business Analyst

Stable and respected healthcare profession

Expanding research and pharma sector

Strong government and private sector demand

Scope of B.Sc Courses in India

The scope of B.Sc courses in India remains wide because science-based industries have experienced rapid growth. The graduates will find career opportunities in IT and Technology companies as well as healthcare facilities, research laboratories, research and development centres, government organisations, public sector undertakings, academic institutions, and environmental and sustainability fields.

The B.Sc program offers students multiple career pathways, which they can boost by pursuing advanced degrees through M.Sc, MBA, and MCA programs, and industry certifications, which will lead to higher-paying positions after B.Sc.

Jobs After a Bachelor of Science Degree Program

After completing a BSc course, graduates can explore diverse jobs after B.Sc based on their specialisation and skills. The common job positions include Data Analyst/Scientist, Research Assistant, Lab Technician, Software Developer, Healthcare Professional, and Government Officer who enters through competitive examinations.

The continuous development of skills together with practical work experience enables B.Sc graduates to achieve financially successful jobs which bring them professional fulfilment and lead to permanent growth opportunities across different fields.

How to Choose the Right B.Sc Course After 12th

The correct B.Sc course selection after 12th grade establishes your academic and professional pathways through assessment of your personal interests and abilities and current job market needs.

When selecting from the best B.Sc courses after 12th, students should consider:

A long-term commitment is ensured by motivating interest and ability.

Conviction in career goals and foreseeable balance in salary depend largely on the chosen field.

Industry demand and future scope for better employability.

Availability of top universities and facilities to gain quality education.

A single choice made properly in the early stages can have a massive impact on eventual career outcomes.

Enhance Your Career Growth with aBSc Program

Why Choose Mangalayatan University, Aligarh for B.Sc Programs

The Mangalayatan University, Aligarh, provides high qualifications in B.Sc that are aimed at equipping students towards effective careers in science, research and industry. Here's why it stands out:

Industry-Oriented Curriculum:The B.Sc programs are structured in a way that they offer both theory and practical skills, and this keeps up with the present requirements of the industry.

Qualified Faculty:Students are taught by qualified and experienced faculty who offer guidance, mentoring and research assistance.

State-of-the-Art Labs and Facilities:State of the art laboratories, computer labs and research facilities allow students to learn and experiment.

Career Support and Placement Services:The university provides career counselling, internships and placement services, which can help students find employment in India as well as overseas in

the pursuit of their B.Sc.

Interdisciplinary Approach:Students are able to take advantage of an interdisciplinary learning model, such as an introduction to new fields, such as Data Science, Biotechnology, and Environmental Science.

Bright Campus Living:Mangalayatan University offers an interactive and supportive campus atmosphere, which has led to self-improvement as well as academic progress.

By selecting Mangalayatan University, Aligarh, graduates of B.Sc can make sure that they have well-grounded academic backgrounds, working experience, and career-driven competencies to be able to master the competitive labour market today.

The top 15 B.Sc. Programs after Grade 12 provide pertinent directions for academic and professional career avenues. The programs maintain multiple industry opportunities through their diverse B.Sc courses list, expanding B.Sc career tracks and increasing adoption of B.Sc programs throughout India.

Students have the choice to follow research paths, enter corporate fields or work in healthcare and education or government positions. BSc course selection enables students to develop comprehensive subject knowledge together with practical abilities which produce permanent successful employment opportunities after their B.Sc degree.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/why-pursue-a-phd-in-agriculture-career-opportunities-scope-and-growth.html>

=====

In today's prevalence of wild mash-up of tech gadgets, money and biotech wizardry, we are forgetting agriculture, which has been holding us, humans up since forever and is literally the spine of civilizations. With increasing challenges such as climate change, food security, sustainable farming, shortage of fertile land, and ever increasing population, advanced research and innovation in agriculture are now more badly needed than ever.

Pursuing aPhD in Agriculture courseis now a highly valuable academic and professional choice for students who aspire to contribute to this vital aspect and land a career that actually matters.

Understanding the PhD Agriculture Program:

A PhD in Agriculture Program is the highest academic qualification in agricultural sciences. The course is highly academic researchintensive and deals with developing advanced expertise, analytical thinking, and problem-solving skills. The course is completed in 3 to 6 years, depending on the nature of research, mode of study ie. full-time PhD in Agriculture or part-time PhD in Agriculture and constrained by institutional guidelines.

The course curriculum focuses on research, publication of scholarly papers and submission of a thesis. Students are under the guidance of experienced supervisors and contribute to finding solutions for real-world agricultural problems. An example could be researching drought-resistant rice, testing in muddy fields, and solving problems farmers actually face. The course is suitable for candidates who are into research, teaching, policy decisions or other roles in agriculture and associated sectors.

PhD Agriculture Admission: Eligibility and Selection:

Students holding a postgraduate degree (MSc/ MTech) in Agriculture or a related discipline with a minimum percentage as specified by the university are eligible for PhD Agriculture Admission.

Students are considered for the course based on national-level entrance examinations ie ICAR-NET, CSIR-NET or university-specific entrance tests, followed by an interview.

The admission process evaluates past academic performance, research aptitude, agriculture knowledge and prior research papers, if any. Getting admitted in a reputed institution significantly fuels career prospects.

Read Also-PhD Admission Course Details, Full Form, Online form, Course Eligibility, Duration, Fees, Syllabus, Career

PhD Agriculture in India: Growing Importance:

India is an agrarian country, and a agriculturePhD programis very significant due to the vast agricultural diversity in India. Students get to know about diverse challenges across the country, e.g., small land pockets, variable climate, water scarcity and work on devising the best agriculture practices. Research in these unique areas plays a crucial role.

Institutes offer PhD programs in a diverse range of specializations. The vastness of the agrarian India, increasing government initiatives and funding for agricultural research have catapulted the importance of the course. Agriculture Graduates from India are highly regarded nationally and globally.

Full-Time PhD in Agriculture vs Part-Time PhD in Agriculture:

Students can choose between a Full-Time PhD in Agriculture and a Part-Time PhD in Agriculture, depending on their career progress and other professional and personal commitments.

A full-time PhD is ideal for fresh postgraduates and provides them opportunities to use campus facilities, laboratories, fieldwork, academic networking and is supported by fellowships or scholarships.

For working professionals, a part-time PhD in Agriculture lets them juggle academic and professional commitment thereby providing a unique opportunity for future growth without the need for career breaks.

PhD Agriculture Research Areas:

Institutes offer a PhD in Agriculture Research in several areas, which are endless, and students can opt amongst them aligned with their interests and societal needs:

Agronomy and Crop Science

Plant Breeding and Genetics

Soil Science and Agricultural Chemistry

Agricultural Biotechnology

Entomology and Plant Pathology

Horticulture and Forestry

Agricultural Economics and Agribusiness Management

Climate-Smart and Sustainable Agriculture

Precision Farming and Agricultural Engineering

Career Opportunities After a PhD in Agriculture:

There are several prestigious career paths after completing a PhD in Agriculture beyond teaching. After completing the course, students can not only work as professors, lecturers, researchers in institutions, but also in the government sector, e.g. in agricultural departments, policy-making bodies, and international organizations. They are absorbed in key roles for formulating agricultural policies, implementing development programs and advising governments.

Students also get opportunities in the private sector, such as agribusiness companies, biotechnology firms, seed companies, food processing industries, and agritech startups. These sectors absorb the students for R&D, consultancy and strategic roles. Moreover, opportunity exists for working with international organizations such as FAO, World Bank and CGIAR.

Scope and Growth of PhD in Agriculture:

The scope of a PhD in agriculture is massive and growing due to technology and concurrent agricultural challenges. Latest integration of technologies such as artificial intelligence in farming, genetic engineering & climate predictions is fuelling the demand for highly qualified researchers.

With increasing focus on food security, fighting increasing demand with depleting resources, sustainable solutions are the need of the day, which requires doctoral-level expertise essentially.

Best University for a PhD in Agriculture:

Choosing an appropriate institution for pursuing a PhD in Agriculture is a crucial factor that influences research quality and career outcomes.

In India, several reputed institutions offer great doctoral programs considering the faculty expertise, research infrastructure, funding opportunities, industry linkages and publication support. Selecting the right institution ensures academic knowledge and professional growth.

Enhance Your Career Growth with a PhD in Agriculture Program

PhD in Agriculture Program

Why Choose Mangalayatan University Aligarh for a PhD in Agriculture Admission

The selection of a PhD institution in Agriculture is a very important process that determines the success of research and career opportunities. Mangalayatan University, Aligarh, is distinguished by its high faculty competence, research facilities, financial assistance, good industry connections and publications guidance. By choosing this university, you can be assured of receiving both academic and professional development in the sphere of agriculture in future.

Pursuing a PhD in Agriculture is not just an academic qualification but a pledge to boost the world's food engine. Whether pursued full-time or part-time, the course strengthens students to take on the challenges of becoming innovators, educators, policy-makers and leaders in the field of agriculture.

With diverse research areas, strong career prospects and increasing relevance, a PhD in agriculture qualification is the need of the hour for long-term growth. For those students who care about science, sustainability and planet saving societal impact, the course is worth pursuing.

SOURCE (WEB): <https://www.mangalayatan.in/blog/how-to-become-a-lawyer-after-12th-in-india-complete-step-by-step-guide.html>

=====

After completing standard 12th, it is one such important juncture of life where students need to take the right decision to pursue their career in the desired direction. This blog will give you an insight on a career in Law after 12th in India. Lawyers in India is a respectable career choice for students who want to pursue a career in the field of Law, legal studies, governance, justice, corporate law, company law, and legal practice etc. There are many integrated law programmes after 12th available in various Indian colleges and universities where the courses are approved by the Bar Council of India (BCI) that ensures a structured legal education and professional pathway for the future.

This complete step-by-step guide explains eligibility for law after 12th, law entrance exams in India, law courses, skills required to become a lawyer, career options in law, and future prospects for aspiring lawyers in India.

Step 1: Complete Class 12 from a Recognized Board

The aspirant of law should have completed standard 10+2 from a recognized board such as State Board, ICSE, or CBSE from any stream—Arts, Science, or Commerce are eligible to apply for law programmes after 12th with a minimum aggregate requirement of 45% marks.

Step 2: Choose the Right Law Course After 12th

After Class 12, students must enroll in a 5-year Integrated Law Degree, which combines an undergraduate degree with a Bachelor of Laws (LL.B.).

Popular integrated law courses after 12th in India include:

BA LL.B. (Arts + Law)

BBA LL.B. (Management + Law)

BCom LL.B. (Commerce + Law)

BSc LL.B. (Science + Law)

These BCI-approved law courses are offered by National Law Universities (NLUs), private law colleges, and government law colleges in India.

Read Also—How to Choose the Right Law Program After 12th: A Beginner's Guide

Step 3: Appear for Law Entrance Exams

Admission to reputed law colleges in India after 12th is primarily through entrance examinations. Major law entrance exams in India include:

CLAT (Common Law Admission Test): For admission to NLUs across India

AILET exam: Conducted by National Law University, Delhi

SLAT exam: For Symbiosis Law Schools

LSAT—India exam: Accepted by several private universities

University-level law entrance exams: Conducted by individual institutions

Preparation usually starts in Class 11 or Class 12 and focuses on subjects such as English, Logical Reasoning, Legal Aptitude, General Knowledge, Current Affairs, and Quantitative Techniques.

Step 4: Complete the 5-Year Integrated Law Degree

The 5-year integrated law course typically spans 10 semesters and includes both academic and practical legal training. Core subjects studied during the course include:

Constitutional Law

Criminal Law (IPC, CrPC)

Along with classroom learning, students must complete mandatory law internships with advocates, law firms, courts, NGOs, and corporate legal departments to gain practical exposure in legal practice.

Step 5: Develop Essential Skills During Law School

To succeed as a lawyer, students must develop essential skills required to become a lawyer alongside academic learning. These include:

Strong communication and advocacy skills

Legal research and drafting

Analytical and critical thinking

Negotiation and client-handling skills

Time management and ethical judgment

Participating in moot court competitions, debates, legal aid clinics, and law internships greatly enhances practical competence.

Step 6: Enroll with the State Bar Council

After completing the LL.B. degree, it is mandatory for graduates to enroll with the State Bar Council to practice law legally and to be recognized as a lawyer in India.

Read Also-BA LLB Course Details: Full Form, Admission, Eligibility, Duration, Fees, Colleges, Jobs

Step 7: Clear the All India Bar Examination (AIBE)

The All India Bar Examination (AIBE) is conducted by the Bar Council of India. Clearing this exam is compulsory to obtain the Certificate of Practice, which legally authorizes a candidate to practice as an advocate in Indian courts.

The AIBE tests basic legal knowledge and is qualifying in nature, not ranking-based.

Step 8: Start Legal Practice or Choose a Career Path

Once licensed, lawyers can choose from diverse career options after law in India such as:

Litigation Lawyer: Practice in District Courts, High Courts, or the Supreme Court

Corporate Lawyer: Work with law firms or corporate legal teams

Judicial Services: Prepare for judiciary exams to become a judge

Legal Advisor: Work with companies, NGOs, or government bodies

Academics: Pursue LL.M. and become a law professor or researcher

Civil Services & Public Policy: Law graduates have an advantage in UPSC and state services

Step 9: Higher Studies and Specialization (Optional)

After LL.B., students may pursue LL.M. after law to specialize in areas like Constitutional Law, Corporate Law, Criminal Law, International Law, and Intellectual Property Rights (IPR). Further options include Ph.D. in Law or diploma certifications.

Step 10: Career Growth and Long-Term Prospects

Law is a profession where experience in legal practice matters. Initial years may be challenging, especially in litigation, but with persistence, reputation, and specialization, lawyers can achieve career growth in law, financial stability, and social respect.

Why Choose Mangalayatan University Aligarh for LAW Degree Program

Completing law from Mangalayatan University Aligarh has always offered an edge over other universities in terms of law curriculum, infrastructure, moot court facilities, and experienced law faculty. The recognition and accreditation received by Mangalayatan University is an added advantage of the institute being premier.

In India, becoming a lawyer after the 12th grade takes hard work, academic dedication, and real-world experience. Students can pursue a successful and satisfying legal career in India by selecting the appropriate law course, passing law entrance exams, obtaining practical experience, and fulfilling Bar Council of India requirements. Law remains one of the most promising career pathways in India due to the increasing demand for legal professionals, advocates, and corporate lawyers.

=====

BA and BBA are three-year undergraduate degrees that offer different career progressions having fundamentally different objectives after Class 12. BA course focuses on humanities and social sciences. On the other side BBA stresses on business, management and corporate careers.

BA vs BBA: Subject Focus

BA (Bachelor of Arts) deals with humanities and social sciences like Economics, English, Political Science, Psychology, Sociology, etc. BBA course deals with business management subjects such as marketing, finance, human resources, operations and entrepreneurship with a more practical and industry-oriented approach. Both degrees are 3-year Undergraduate programs and if pursued from recognized universities can be used as a foundation for higher studies like MA, MBA and professional or competitive exams.

Eligibility Criteria for BA and BBA

Eligibility criteria for both streams are typically similar, and BA and BBA accepts students from any stream (Arts/ Commerce/ Science) who have passed Class 12 from a recognized board with 45-50% marks. Some institutions can conduct entrance tests and interview for BBA aspirants. While deciding between the two, preference and knack for particular course as well as future roles can be a consideration.

BA Course Structure and Teaching Methodology

Bachelor of Arts course focuses on subjects in humanities/ social sciences with flexibility to choose majors and electives such as Economics, English, History, Political Science, Psychology or Sociology. The teaching methodology for BA courses is conceptual and theoretical, leading to critical thinking, reading, writing and research skills rather than hands-on corporate exposure.

BBA Programs Structure and Teaching Methodology

While BBA programs focus on business subjects such as Fundamentals, Marketing, Finance, Business Economics, HR, Business Law, Business Analytics and Operations. In the BBA course, the teaching methodology is practical, with case studies, projects, internships, presentations and simulations to prepare students for corporate roles from the undergraduate level itself. Choosing BBA is ideal for aspirants looking to advance their careers in management or strategic responsibilities or aspire for leadership roles making them versatile professionals. The BBA program develops data analysis, critical thinking, decision-making, and problem-solving abilities..

Having the latest facilities, good academic support and career counseling, Mangalayatan University, Aligarh assists students in establishing a good base towards success in higher education and future career achievement.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/what-are-the-best-colleges-for-an-online-bba-degree-in-india.html>

=====

Recently, selection of educational degrees has shown a paradigm shift towards flexible, affordable, and widely accepted courses. Fresh students or working professionals who are looking for roles in a business portfolio select online BBA options, including a BBA online course, which are adapted for learning at their own speed and time. Various leading institutions offer anonline BBA degree, which provides education opportunities even to remotely located students and enables learners to earn a bachelor's degree business administration qualification without attending regular campus classes. The flexibility of these online BBA programs is a great advantage for working professionals, entrepreneurs, and students preparing for other competitive exams.

Students must have full comprehension of the benefits, admission process, and future career opportunities of online BBA programs, distance BBA, and distance BBA degree options so as to select the right college for online BBA in India.

Why Choose Distance Learning BBA Programs?

The course curriculum of online BBA courses by recognized universities is on par with the regular BBA programs and does not compromise on quality. These programs offered through distance learning BBA and online modes also provide a foundation for entry to higher education, such as MBA and PGDM programs.

Open and Distance Learning (ODL) online BBA courses are structured to cater to the requirements of students who are unable to attend regular classes due to professional, personal, or other commitments and geographical constraints. Students can access BBA online classes from any location and at convenient timings, making a distance BBA course suitable for learners across India.

These online courses for BBA students have a lower cost due to savings on tuition fees, accommodation, travel, physical materials, etc., with respect to regular full-time programs and can be pursued by students from diverse economic backgrounds while earning a recognized distance BBA degree.

How to Choose the Best College for Online BBA Programs?

Accreditation and Recognition

In order to ensure that the qualification earned after completion of the online BBA degree is officially recognized and accepted for employment or further studies, the college or university must be approved by UGC-DEB and preferably hold a NAAC rating.

Curriculum and Specialization

Students must cross-check whether the curriculum of the selected BBA online course encompasses relevant skills required for industry environments. Moreover, several institutions offer specializations such as marketing, finance, human resources, entrepreneurship, and business analytics, which may be advantageous if aligned with the desired career roles of students or working professionals.

Flexibility and Student Support

Students must check beforehand the method of delivery of the course by the institutions, such as live and recorded BBA online classes, student support services, interactive learning platforms, career guidance, and internship options required as per their needs.

Career Services

Students may also research the placement assistance, internship opportunities, and industry connections of an institution. For fresh students, internship opportunities and part-time jobs allow learners pursuing a distance BBA to acquire practical exposure and develop an edge when entering the job market.

Cost and Value for Money

Students must understand the costs, payment structure, and return on investment involved in acquiring an online BBA degree to ensure alignment with their financial expectations.

Admission and Eligibility Requirements

Admissions for BBA distance education courses in India require a pass in 10+2 or an equivalent qualification from a recognized board. Many universities offer a fully online admission process for distance learning BBA programs, making form submission, document upload, and fee payment digital and convenient.

Some institutions offering BBA Open and Distance Learning admit students twice a year, providing additional flexibility to join a distance BBA course.

Additionally, students who complete the online BBA have a strong foundation to pursue an online MBA course, further enhancing their career prospects?

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/top-12-reasons-why-you-should-enroll-in-an-online-bca-degree-course.html>

=====

World reeling in the Twenty-First century, where everything is becoming digital right for ordering food, to book online medical consultation, offering puja online at respective shines and temples, or even travel .Eventually ,computer education has become the strategic move for career growth.

The Bachelor of Computer Applications (BCA) is a popular undergraduate curriculum for students who wish to pursue careers in digital technologies, software, and information technology. Pursuing an online BCA degree is a wise, adaptable, and career-focused decision due to the quick growth of online education in India. Online BCA programs, which are widely accepted by companies and acknowledged by UGC, provide high-quality education without sacrificing personal or professional obligations.

Below Top 12 Reasons to Enrol in an Online BCA Degree Course in India

1. Online BCA can be Pursued with Flexibility, Access from Anywhere in the World

One of the prominent advantages of an online BCA or distance BCA course is location independence. Students can access BCA classes online from anywhere in India or even outside, students have the facility to access study materials, online BCA classes, and turn in homework. For working professionals, stay-at-home moms, and students from rural areas who are unable to move to cities for school, this flexibility is perfect.

2. UGC-Recognized and Industry Accepted

One should pursue Online BCA programs through only those Universities in India that are

recognized by the University Grants Commission(UGC) and All India Council for Technical Education(AICTE).For instance Mangalayatan University,Aligarh is recognized by UGC and AICTE as well.

This approval from statutoy bodies guarantees that the degree (online BCA)has the same academic worth as a standard BCA. Online BCA graduates are equally competitive in the job market since employers now place a greater emphasis on abilities and project experience

3. Cost-Effective Compared to Regular BCA

Compared to on-campus schools, an online BCA degree is far less expensive. Students save money on things like moving, transportation, and hostel fees. The BCA online course fees in India cost between INR 60,000 to INR 80,000 for the full course, making it an affordable choice without sacrificing quality.

4. Perfect Choice for Working Professionals

Online BCA is a perfect choice for working professional who want escalate their education qualification .The objective of pursuing BCA classes online is to increase in job responsibility and remunerations while performing higher job roles in the organization.Flexible schedules, recorded lectures, and weekend live sessions allow professionals to balance work and studies effectively.

5. Industry-Relevant and Updated Curriculum

Most online BCA courses in India, industry experts are consulted during the construction of online BCA programs. Programming languages, data structures, database administration, web development, cloud computing, and cybersecurity fundamentals are all covered in the curriculum. In order to keep up with the most recent advancements in IT, several colleges update their curricula on a regular basis.

6. Strong Foundation for Higher Education

An online BCA degree creates opportunity for higher education while after completion of the graduate level program students or working professionals can either opt foronline MCAorOnline MBAto have a strong hold over the computer technology industry.There are certain course like M.Sc in Computer Science, or specialized certifications in data science, AI, and full-stack development. Since the degree is recognized, students face no barriers while applying for postgraduate programs in India or abroad.

7. Access to Digital Learning Resources

Students enrolled in Online BCA programs gain access to LMS platforms, e-books, recorded lectures, coding labs, discussion forums, and virtual classrooms..LMS platforms, e-books, recorded lectures, coding labs, discussion forums, and virtual classrooms are a source of digital learning that enable students for self-paced learning and enable students revise complex topics multiple times, improving overall understanding.

8. Skill-Based Learning with Practical Exposure

Through coding assignments, mini-projects, case studies, and virtual labs, online BCA programs place a strong emphasis on experiential learning. In order to help students develop practical skills and portfolios that are ready for the workforce, several colleges also provide internship support, industry initiatives, and hackathons.

9. Wide Career Opportunities in the IT Sector

Career opportunities for students and working professionals are numerous after online BCA

degree viz. system analyst, database administrators, IT support engineers ,software developer, data analyst etc. Over the years India has emerged as the IT hub for the world that has not only led to the mushrooming of various govt., and private universities but also has provided stable and promising learning options to many students who want to secure their future in IT field.

Read Also-Top 10 Benefits of Studying a BCA Degree Course

10. Equal Opportunities in Government and Private Jobs

An online BCA degree allows you to grab jobs in both government as well as in private sectors. Students are eligible for government jobs, competitive exams, and public sector recruitment wherever graduation is required. Graduates can also appear for exams like banking, SSC, and other state-level recruitment tests, ensuring career stability and diverse opportunities.

11. Time Management and Self-Discipline Skills

Students who learn online are encouraged to improve their time management, self-control, and autonomous problem-solving abilities. Employers place a high value on these attributes, particularly in the increasingly prevalent remote and hybrid work arrangements in the IT sector.

12. Ideal for Career Switchers and Fresh Learners

For people from non-technical backgrounds who wish to enter the IT industry, an online BCA course is a great choice. Even without prior computer science education, students can progressively develop programming knowledge and technical expertise with beginner-friendly modules and structured learning routes.

Enhance Your Career Growth with aOnline BCA Program

Online BCA Program

Why Choose an Online BCA Degree at Mangalayatan University Online

AtMangalayatan University Online, we believe that online BCA courses play a vital role in shaping the future of students who wish to learn at their own pace, where the learning is flexible and can be pursued by working professionals along with their employability. The online BCA degree offers affordable BCA online course fees, and the curriculum is vast and well-explained by the faculty in online BCA classes.

Online BCA programs provide the ideal balance of convenience and education. Online BCA blend practical skills with theoretical learning and enhances your technical know-how. It also gives you the facility for self-assessment through learning and preparation for various jobs in private as well as in government sectors.

SOURCE (WEB): <https://www.mangalayatan.in/blog/gate-eligibility-criteria-age-limit-attempts-and-qualifications-explained-simply.html>

=====

GATE (Graduate Aptitude Test in Engineering) is a highly competitive Indian national level examination that measures all-round knowledge in the fields of engineering, technology, science, architecture and humanity and is a prerequisite in Master/Doctoral admissions to the best institutes (IISc/IITs) as well as recruitment in Public Sector Undertakings (PSUs).

GATE Syllabus 2026

The aspirants can have a look at the detailed curriculum mentioned below for the exam preparation of GATE 2026.

[View Full GATE 2026 Syllabus](#)

Why is GATE Important?

The Graduate Aptitude Test in Engineering (GATE) is a national-level examination, conducted jointly by the Indian Institute of Science (IISc) and seven Indian Institutes of Technology (IITs) to adjudge students comprehension of knowledge in engineering, technology, architecture, science, and humanities. GATE serves as a qualifying examination for admission in higher education and also for employment in professional careers by several organizations mostly Public Sectors.

Every year, several students and working professionals appear for the GATE exam to secure admission into master's programs in engineering, doctoral programs in engineering, and institutions such as IITs, NITs, IIITs, IISc, and other top research universities. Qualifying GATE enables students to apply for Junior Research Fellowships (JRF), pursue research roles in ISRO/ DRDO labs, and receive stipends through MHRD scholarships during postgraduate studies. GATE scores are also used for admission to master's and doctoral programs at some foreign universities, such as in Singapore and Germany.

Beyond higher education qualifying examination, GATE scores are also widely used by various Public Sector Undertakings (PSUs)—including BHEL, ONGC, NTPC, IOCL, and HPCL for job opportunities at executive level. GATE tests understanding of conceptual clarity, analytical thinking, and problem-solving abilities. Its specialization options now include interdisciplinary subjects, offering opportunities to a wider class of students.

Eligibility Criteria for GATE Exam after 12th

Educational Qualification & Eligible Degrees

To be eligible for GATE examination, authorities have widened the variety of eligible disciplines beyond just engineering and technology. Candidates must be Holding (or currently enrolled in) an undergraduate degree in Engineering / Technology / Architecture / Pharmacy / Science / Commerce / Arts / Humanities from a recognized institute (eg. B.E. / B.Tech / B.Arch / B.Pharm/ B.Sc (Research) / B.S / Post-Diploma-based B.Sc programs);

Or holding (or enrolled in) a postgraduate degree (e.g. M.Sc / M.A / MCA) in a relevant subject (for certain GATE papers);

Or enrolled in / have completed integrated or dual-degree programs (e.g. integrated B.Tech + M.Tech, or similar (including professional-society-certified degrees recognized by MoE/ AICTE/ UPSC).

Final and Pre-Final year students can also write GATE examination which provides flexibility to appear in GATE early and potentially secure admission or plan for future higher studies even before graduation.

Announcement of results

Number of Attempts

Subject to fulfillment of other requirements, GATE allows unlimited attempts and there is no limit on how many times you can write GATE examination. This unlimited-attempt policy gives a better chance to improve performance and get better ranks or keep options open for higher studies or PSU recruitment.

Year of Qualification

Students must ensure that they are in the eligible year required to take GATE examination ie, typically 3rd year or above for bachelor's degrees, or final year.

Read Also-MBA vs MTech: Key Differences & How to Choose the Right Path

Documents Required During Application

GATE application requires scanned copies of following documents in prescribed formats (e.g., JPG/JPEG for photo/ signature at 20-200 KB and PDF for certificates):

Photograph: Recent color photo (face covering 60-70% of frame), JPG/JPEG, 20-200;

Clear scanned image on white background of signature (JPG/ JPEG, 5-200 KB);

Scanned copy of valid Photo ID such as Aadhaar (preferred), Passport, PAN Card, Voter ID, or Driving License in which the name and DOB of the applicant matches. These are required to be carried in original to exam center;

Category Certificate (SC/ ST/ OBC-NCL/ EWS, as applicable) issued by competent authority in PDF format;

PwD/ UDID Certificate (as applicable) in PDF format issued by authorized medical authority;

Dyslexia Certificate (as applicable) in PDF format.?

While submitting the application, personal details like name (matching with the Photo ID), DOB, mobile/ email, address, eligibility degree information shall be required. Foreign candidates require Passport as Photo ID proof. Students are advised to visit official GATE 2026 site for exact details if any update.?

International Students

GATE isn't restricted to Indian nationals alone. International candidates (from recognized countries) are eligible if they meet the educational requirements.

Key Features of GATE Examination

Second Chances & Lifelong Learning

Since there's no limit on number of attempts or on age, it provides students chances to crack in several chances even after few years, change in career path, or additional education. The format of the examination also permits improvement of the score.

Freedom for Non-Engineering Backgrounds

Students from science, arts, commerce – or those with three-year degrees are also eligible for GATE examination to secure admissions in higher studies in technical/ interdisciplinary

courses.

Work + Study Friendly

Working professionals who took a break, or who want to study alongside work, can appear for GATE and is very useful for mid-career ambitions or research aspirations.

Equal Opportunity

Whether you're a fresh graduate or an experienced engineer, you get the equal chances for appearing and scoring in the examinations.

Read Also-MBA vs PGDM: Which Course is Better for Your Career?

Career Options After GATE

GATE scores are used for securing admissions in masters/ doctorate programs in engineering in several institutions such as IITs, NITs, IIITs, IISc and other top research universities. Students after qualifying GATE can also apply for Junior Research Fellowships (JRF) wherein they can pursue research roles in ISRO/ DRDO labs at the same time earning stipends. GATE scores are used for admission for pursuing higher studies for master's and doctoral admissions in some foreign universities like in Singapore and Germany.

Beyond higher education, GATE scores are also used by various A grade Public Sector Undertakings (eg BHEL, ONGC, NTPC, IOCL, and HPCL) for recruitment at entry executive level.

Tips for Students Preparing for GATE

Students need to understand the eligibility criteria of GATE as a first step for planning a clear, focused preparation. GATE remains one of the most accessible examination in India for advanced education and PSU recruitment, owing to its inclusive approach with little limitations.

GATE offers a viable career path for fresh engineering graduate, a science or commerce student looking for technical postgraduate programs or working professional looking to upgrade or change career paths. What matters is your preparation, understanding of concepts, and strategy.

In Mangalayatan University, the students are able to obtain the experience, practical skills, and confidence to work in competitive engineering areas. Mangalayatan University has a concentration in innovation, research and holistic development, which means that all students are now ready to meet the national and international engineering demands.?

Mangalayatan University Aligarh – Top Choice for Engineering Aspirants

Mangalayatan University Aligarh is one of the leading universities in Uttar Pradesh, where engineering hopefuls in the whole of India prefer to study. The university is known to have a well-developed infrastructure and a curriculum in line with the modern industry sector hence offering students a good platform to succeed in their technical careers.

Although you may not be eligible to enter into national level entrance exams such as GATE, an opportunity to study engineering programs exists under Mangalayatan University in its own admission program. The university strongly feels that talent cannot be determined by just one exam score.

In Mangalayatan University, the students are able to obtain the experience, practical skills, and confidence to work in competitive engineering areas. Mangalayatan University has a concentration in innovation, research and holistic development, which means that all students are now ready to meet the national and international engineering demands.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/how-to-crack-jee-main-in-the-first-attempt-smart-preparation-tips-and-strategy.html>

=====

The JEE Main entrance exam is one of the toughest undergraduate engineering entrance tests worldwide, with thousands of students competing for limited seats. Cracking JEE Main on the first attempt, even though daunting, can be achieved with the right planning, steady effort, and smart strategy.

Know Your Exam inside out:

Before jumping into preparation mode, it's important to strategize by understanding the structure of the JEE Main examination. The exam tests three core subjects: Physics, Chemistry, and Mathematics. Questions are objective – including single correct options and numerical-based problems. While attempting the examination, what matters most is clarity of concepts, speed of solving problems, and accuracy under defined timelines.

Clarity over Exam Pattern

Knowing the exam pattern and syllabus right from the start gives you a more effective preparation strategy – rather than just random studying. For example, there are usually around 75 questions total–25 from each subject–split between multiple-choice and numerical value questions you have to solve precisely. Getting comfortable with this format early on saves you from surprises later.

Read Also-Top 10 Engineering Colleges Offering Admission Without JEE Mains

Start with a Realistic, Well-Structured Study Plan:

The preparation of achievable study plan is the primary stepping stone for successful preparation for acing JEE Main. We would suggest breaking down entire syllabus of each subject in smaller portions/ key concepts and allocate specific time for such portion of each subject. For example, devote 6 to 8 hours daily to focused study. Students must focus on tough topics upfront rather than pushing them off until later.

Revision is the Key

Keep some time in weekend for revising and consolidating the progress throughout the week. Consistency matters more than intense but irregular study sprints. Disciplined schedule with small, achievable goals helps maintain momentum and avoids burnout. If you're also attempting board exams alongside preparation for Joint Entrance Exam mainssplitting study time between board syllabus (especially overlapping chapters) and JEE mains preparation shall be required.

Master the Basics Fundamentals and choose right study materials:

Many students does mistake in going for advanced books too early and confusing the conepts. We would suggest to initially stick with NCERT textbooks for Physics, Chemistry, and Mathematics for building core fundamental concepts. It might be worthwhile to add that many of JEE questions are prepared from NCERT text book concepts. Once you have completed NCERT text book and are confident, students can move to other advanced reference books like H. C. Verma for Physics, D. Sharma for Maths, and P. Tandon for Chemistry. Students can also access videos available on different platforms for fresh oversight on the concepts and to deepen their understanding. Students can also use exams practice platforms for large numbers of practice problems to keep your skills sharp.

Read Also-List of Best Engineering Colleges after 12th in Aligarh, Uttar Pradesh

Understand the concepts, Don't Just Memorize:

JEE exams does not test memory skills of the students but rather "why" and "how" behind formulas and theories. Students must instead focus on really understanding the "why" and "how" behind everything. For instance, in Physics, don't just memorize equations—understand their derivations, key assumptions and how they apply to real scenarios. In Math, practice variety of problems to develop alternate thinking skills. Chemistry is easier when you grasp reaction mechanisms instead of just memorizing reaction lists.

Practice Makes Perfect- Mock Tests, Previous-Year Papers & Problem Solving:

After learning fundamental concepts practice becomes necessary to ace the JEE main exams. Aspirants must past years JEE question papers, full length mock exams to get a feel for the real thing. Take mock tests regularly eg 2 to 3 a week and analyze the questions where you went wrong which will help you build upon the conceptual understanding. While taking these tests, simulate real world limitations like the actual exam with no distractions under time limit. This builds your speed and confidence (and beats exam anxiety too).

Manage Time Smartly:

Time management is critical both during your preparation and on exam day and requires discipline. During preparation, divide your time among subjects, spending extra time on weaker areas. Don't overwhelm your time schedule and take small breaks to stay fresh.

On exam day, start with your strengths or easiest questions to get dose of momentum and confidence. Don't get stuck on any question and move on keeping it for later when coming back as and when time allows. Focus on accuracy for sure marks rather than chasing every tough question.

Don't Neglect Revision:

Revision is critical tool for preparation and students must revisit topics multiple times through mock tests to deep dive in fundamentals and reduce mistakes. Keep handy short notes or formula sheets for quick revision during the last stretch just before the exam.

Take Care of Yourself physically and mentally:

Physical and mental stress and fatigue are as critical as the preparation students have done. Long hours of study lose their effectiveness if your brain is fatigued or stressed. Students are advised to get 6-7 hours of sleep every night, eat nutritious meals, and stay hydrated. Students must also be fit physically can go for short walks or meditation.

Avoid common mistakes& Stay Consistent:

Many students could not crack JEE on the first shot because of simple mistakes, like jumping straight to advanced books without basics, ignoring revision, mock tests, right strategy. Students must plan to study steadily, practice smartly and revise regularly.

Read Also-Top Reasons Why You Choose Mangalayatan University Aligarh for a Successful Career

Keep Your Spirits High:

JEE mains preparation can be stressful for students, so keep your motivation alive. Set small achievable targets, like finishing a chapter or acing a mock test, and reward yourself when you achieve them. Socialize with similar aspirants who are encouraging or mentors. Stay calm on exam day and proceed to solve questions on your strength topics and if a question is tough—flag

and move on.

Sample Prep Timeline:

Students can draw upon their schedule as per the sample timelines provided below for guidance:

Phase	Duration	Key Activities
Initial foundation Phase	1–3 months	Study NCERT books for Class 11 & 12 topics and build thorough conceptual clarity. Start short practice sessions daily for each subject. Prepare short notes / formula sheets.
Building Strength Phase	4–6 Months	Start solving medium-level problems from reference books. Take 1 mock test every 2–3 weeks. Analyze mistakes and revise weak areas.
Revision + Practice Phase	7–9 Months	Increase practice intensity with full-length mock tests and previous-year papers. Identify and strengthen weak topics.
Final Phase	Last 2–3 Months	Take 2–3 full mock tests per week in real exam conditions. Revise and keep working on weak areas. Focus on speed, accuracy, and time-management practice. Maintain physical & mental well-being.

Initial foundation Phase

Study NCERT books for Class 11 & 12 topics and build thorough conceptual clarity. Start short practice sessions daily for each subject. Prepare short notes / formula sheets.

Mangalayatan University Aligarh Your Pathway to a Successful Engineering Career

Mangalayatan University, Aligarh, is the top tech engineering college in Aligarh, Uttar Pradesh of engineering students who require good education and good career development. Students can also obtain the B.Tech via direct admission in the university without JEE Main. Having practical experience in AI, ML, Robotics, and other new technologies allows students to acquire practical skills. A curriculum that is industry-centered and expert faculty provide great technical and professional exposure. The Training and Placement Cell offers 100 percentage placement services with further skill growth. The MU is a good place to be in future engineers because of modern laboratories, intelligent classes, hostels and a dynamic campus.

Cracking JEE mains in the first attempt can be achieved with right planning, time management and disciplined and consistent routine!

=====

Choosing between an MBA and a PGDM is a common issue for management students as both courses are related to developing business knowledge, inculcating leadership skills, and making students ready for jobs. The difference between the two lies in the structure, curriculum, approving agencies and approach of delivering the outcome. Students need to understand these subtle differences to analyze and choose the best career decision aligned with their goals, interests, and future plans.

Understanding MBA and PGDM

An MBA (Master of Business Administration) is a degree program offered by universities or colleges affiliated with universities. The approving and regulatory agency for the MBA course is the University Grants Commission (UGC).

PGDM (Post Graduate Diploma in Management) is a diploma course offered by autonomous colleges. The approving and regulatory agency for the PGDM course is the All India Council for Technical Education (AICTE). Many top management institutes like IIMs, XLRI, SPJIMR, MDI etc offer PGDM programs.

Though completion of the MBA course leads to degree while the PGDM course leads to a diploma, they both hold similar recognition and value in the industry, depending upon the reputation of the institution.

Key Differences Between MBA and PGDM Program

Curriculum Structure:

MBA courses are more oriented towards theory and designed & imparted by Universities. The course may be outdated and less dynamic in a few cases, as any change in the curriculum requires regulatory approvals.

At the same time PGDBM courses are designed to be flexible, practical, agile and based on real-life industry situations. Being imparted by autonomous colleges, the course content is more agile and can be adapted quickly to fast changes in market, technology and industry requirements.

PGDM course scores over this point being quickly adaptable and relevant for modern business roles. Winner - PGDM in terms of curriculum relevance.

Teaching Style & Learning Experience:

The MBA course being more oriented towards theory the course content delivery tends to be more

academic stressing on theoretical management concepts.

While PGDM course being more industry oriented, the course content delivery focuses on practical teaching including case studies, group projects, live simulations, real life industry projects, field work, internships, and corporate interactions.

Winner - PGDM in terms of industry exposure while learning.

Program Regulation:

The MBA course is regulated and approved by University Grants Commission (UGC).

At the same time, the PGDM course is regulated and approved by All India Council for Technical Education (AICTE).

Both are recognized and holds equal value, but the regulatory agency are different. The regulatory bodies only influence the curriculum freedom to the institutes but are equal in terms recognition and value in industry. Winner - Both MBA and PGDM courses hold equal value and recognition.

Value in India and Abroad:

In India, both MBA and PGDM courses holds equal value and recognition and are widely accepted. Employers focus more on reputation of the institute reputation, the skills acquired by the students and performance records rather than whether the qualification is a degree or diploma.

While in abroad, an MBA degree is frequently more recognized for higher education ie, PhD admissions by foreign universities. Some PGDM programs may require conversion to an MBA or equivalent before being recognized in abroad. Winner - MBA for higher studies abroad.

MBA vs PGDM Course Duration:

Both MBA and PGDM courses are generally 2-year courses however, some institutes may offer executive or accelerated 1-year course for working professionals. Winner - Both MBA and PGDM are usually of same duration.

MBA vs PGDM Admission Fee Structure:

The MBA courses being offered by universities or colleges affiliated from universities are lower in cost and affordable as universities receive government support in various funding. The course fees are very nominal in MBA programs in government colleges and public universities thereby having better ROI.

While the PGDM courses are more expensive due to greater autonomy, cost of industry collaborations and infrastructure cost. Premier institutes offering PGDM courses charge significantly higher fees based upon their recognition in employability. Winner - MBA in terms of cost and affordability.

Industry Acceptance & Job Opportunities:

After completion of both MBA and PGDM courses, students get equally excellent job opportunities. However, the job profile and outcomes depend heavily on various factors such as:

Institution Reputation;

Specialization;

Industry relevant skills acquired by the student during the course; and

Industry trends

Industries does not distinguish much between MBA and PGDM courses while employing however, based on institute reputation, PGDM from a top institute shall outperform an MBA from an average college. Winner - PGDM scores higher based on the institute reputation.

Specialization Options:

Both MBA and PGDM usually offer similar specializations eg, Marketing, Finance, Human Resource Management, Operations, Business Analytics, International Business, Supply Chain Management.

However, PGDM institutes being more flexible and agile are able to introduce new specialization to meet rapidly changing requirements in the industries, may offer new-age specializations eg, Digital Marketing, AI & Data Science, Financial Technology, Product Management, Entrepreneurship & Innovation. Winner - PGDM due to wider specialization offering including modern and trending specializations.

Read Also-PGDM Course Details: Full Form, Admission, Eligibility, Entrance Exam, Fees, and Colleges

Placement Support:

Universities offering MBA courses with strong alumni networks and industry relationships provide good placements, but the results varies widely among different colleges/ universities.

At the same time, autonomous institutes offering PGDM courses outperform placement results of MBA especially by reputable institutes. The top-tier institutes often have better placement performance, stronger corporate ties and structured internship programs due to industry collaboration. Winner - PGDM, especially from well-established and reputed institutes.

Which One Should You Choose?

In reference to above discussions, students can easily understand that there is no absolute winner between the two MBA and PGDM. Students must weigh each consideration based upon their desired career goals, budget, learning outcome expectation and future plans.

Students may choose MBA if:

Prefer a degree program with wider recognized academic status including abroad;

Based on future plans for higher studies, pursuing PhD or academic research in India or abroad;

Affordability considering the expenditure required for completing the course;

Prefer theory-based learning approach;

Preference for public universities or government institutions with strong reputations.

Students may choose PGDM if:

Prefer more relevant, industry trend aligned courses with real life scenarios;

Prefer a agile and dynamic curriculum aligned with the latest industry requirements;

Aiming for versatile roles in corporate leadership, consulting, analytics, or entrepreneurship;

Afford courses from top PGDM institutes like IIMs, XLRI, MDI, or private institution with

excellent placement records;

Require exposure to real life case studies, industry readiness by internships, corporate tie-ups.

Enhance Your Career Growth with aMBA vs PGDM Program

MBA vs PGDM Program

MBA vs PGDM: Which is Better Overall?

In India, both MBA and PGDM are equally recognized and employable qualifications. Rather than the degree or diploma, what matters is the reputation and quality of the institute and their faculty, placement records and industry exposure. To summarize,

PGDM from a top institution provides more value than an MBA from an average college. At the same time, MBA from a reputed university is better than a PGDM from a lesser-known private institution.

Hence, instead of asking "Which is better: MBA vs PGDM?", focus should rather be on "Which college or institute will provide me the strongest platform for my career?"

Future opportunities shall depend on the choices of institution, efforts during the course, selected specialization and effective application of the learning.

SOURCE (WEB): <https://www.mangalayatan.in/blog/mp Pharm-course-details-full-form-admission-eligibility-duration-fees-colleges-jobs.html>

=====

M. Pharm Course Details: Full Form. Admission, Eligibility, Duration, Fees, Colleges, Jobs

The M. Pharm. is a 2-year postgraduate program which forays into detailed knowledge and research skills in pharmaceutical science. The course delves into the field of Pharmaceutics, Pharmacology, Pharmaceutical Chemistry, Pharmacognosy etc. Not only students get to know about designing, formulation and analysis of drugs but also regulatory guidelines governing those drugs. M. Pharm pharmaceutical course is taught through theoretical and practical classes including laboratory work, research projects. After successful completion of course by students, opportunities exist in R&D, QC, clinical trials, teaching as well as governance. The course acts as a vital bridge between basic science and advanced pharmaceutical innovation.

M. Pharma Full Form

M. Pharm. Stands for Master of Pharmacy. It is a two-year postgraduate degree program in the field of pharmaceutical sciences. This course focuses on the study of medicines and their safe usage. The course equips students to know how drugs are developed, manufactured, tested, and how compliance with statutory regulations is obtained before selling them in the market. After completing the course, job opportunities exist in hospitals, drug manufacturing companies, etc.

M. Pharma. Course Details

A Post graduate M. Pharm. pharmacy course being universally in demand provides students with rock solid base in pharmaceuticals industry. The course covers a wide range of topics such as Pharmaceutics, Pharmacology, Pharmaceutical Chemistry, Pharmacognosy etc both theoretically and practically, making it one of the top choices for students seeking career in pharmaceuticals industry. Key aspects and their details are summarized below for easy reference:

Roles in R&D, QA/QC, governance, manufacturing, clinical research, hospital, and teaching.

M. Pharma. Course Duration in India

A Postgraduate M. Pharm. (Master in Pharmacy) course is a 2 Years split into 4 semesters course based on the university requirements.

M. Pharm. Admission & Eligibility Criteria

M. Pharm is one of the most sought course with deep understanding of pharmaceutical sciences. The course spanning two (2) years can be pursued after B.Pharm. being a post-graduate degree.

Eligibility criteria for admission to the M.Pharm. (Master in Pharmacy) course are is a

graduate in B.Pharm. (Bachelor of Pharmacy) from a reputed College or University with at least 55% marks. Typically entrance-based via GPAT or institute/ state-level tests, plus counseling as applicable are required for admissions. The admissions are purely based on merit of the candidates and marks obtained in B.Pharm course.

M. Pharm. Subjects & Syllabus

The M. Pharm. course is full of important topics related to pharmaceutical industries as referenced below:

SemSubjectsIModern Pharmaceutical Analytical Techniques, Advanced Organic Chemistry, Advanced Pharmacology.IIAdvanced/ elective topics such as Molecular Pharmaceutics, Computer-Aided Drug Design, Quality Control & Quality Assurance with Modern Bio-analytics.IIIResearch methodology components with Dissertation initiation.IVCompletion of dissertation/thesis and viva-voce.

Modern Pharmaceutical Analytical Techniques, Advanced Organic Chemistry, Advanced Pharmacology.

Advanced/ elective topics such as Molecular Pharmaceutics, Computer-Aided Drug Design, Quality Control & Quality Assurance with Modern Bio-analytics.

Research methodology components with Dissertation initiation.

Completion of dissertation/thesis and viva-voce.

Specialisation in M. Pharm. Course

Following typical specialization are offered in M. Pharm. course:

Pharmaceutics- The specialization deals with Drug Delivery Systems; Molecular Pharmaceutics;; Advanced Biopharmaceutics & Pharmacokinetics, Cosmetics and Cosmeceuticals.

Industrial Pharmacy- The specialization deals with Advanced Industrial Pharmacy; Pharmaceutical Production and Process Technology, Regulatory interfaces for manufacturing.

Pharmaceutical Chemistry- The specialisation deals with advanced organic and medicinal chemistry, spectroscopic and Computer-Aided Drug Design, and Process Chemistry.

Pharmaceutical Analysis- The specialization deals with Advanced Instrumental Analysis, Modern Bio-Analytical Techniques, Quality Control & Quality Assurance, Herbal/Cosmetic Analysis.

Quality Assurance- The specialization deals with Quality Systems and GMP, Validation and Qualification, Regulatory Compliance and Audits.

Regulatory Affairs- The specialization deals with Drug, Device, and Dossier Requirements; Global submissions, Food & Nutraceuticals regulations.

Pharmaceutical Biotechnology- The specialization deals with Bioprocess Engineering, Biopharmaceutics and Fermentation Technology, Genetic Engineering applications.

Pharmacy Practice- The specialization deals with Clinical Pharmacy and Therapeutics, Pharma covigilance, Hospital and Community Pharmacy practice.

Pharmacology- The specialization deals with Advanced Pharmacology and Toxicology, Preclinical screening and Evaluation Methods, Pharmacokinetics.

Pharmacognosy- The specialization deals with Phytochemistry and Natural Products, Herbal Drug Technology, Nutraceuticals and marine/ novel sources.

M. Pharm. Course Fees

The Course fees for M. Pharm. is typically Rs. 90,000/- per year I.e. a total tuition fees of Rs. 1,80,000/- for entire 2 year duration with a small amount for registration charges, examination fees and security deposit etc.

Read Also -B.Pharmacy Course Details: Subjects, Eligibility, Admission, Scope, Career, Jobs Opportunities, Salary and More

Career Scope after M. Pharm. Degree Program

Pharm. (Master in Pharmacy) degree program is approved by Pharmacy Council of India (PCI). The curriculum is detailed and prepares students for the Pharmaceutical industry, with emphasis on both theoretical and practical training. The course taught detailed know how about development, manufacturing, testing and statutory regulations for the drugs industry. After completing the course, job opportunities exists in hospitals, drug manufacturing companies, drug research organizations, or pursue teaching careers. Some of the job profiles, students can expect after completing the courses are Research Scientist, Clinical Research Associate (CRA), Regulatory Affairs Specialist, Pharmacovigilance Associate, Formulation Development Scientist, Quality Assurance (QA) Manager, Production/Manufacturing Manager, Medical Writer, Academician/Professor, Hospital/Clinical Pharmacist, Drug Inspector.

Why Choose Mangalayatan University Aligarh for M.Pharm. (Master of Pharmacy) Admission

By selecting Mangalayatan University in Aligarh for your M.Pharm. (Master of Pharmacy), Pharm D, B.Pharm and D.Pharm courses you are choosing an education institution that is both well-rekknowned and progressive. With its approval form the Pharmacy Council of India (PCI), the University guarantees a high-quality education.

The Pharmacy Council of India (PCI) approved M.Pharm. (Master of Pharmacy) program complies with all statutory requirements. The University is considered among the top M Pharm colleges in India, offering M.Pharm. (Master of Pharmacy) courses known for their affordable cost, practical curriculum, excellent instructors, modern infrastructure, and extensive placement support.

Through industry partnerships, progressive learning, and wide elective subjects, the university promotes research and entrepreneurship. The course through the University encourages holistic development and is revised frequently to incorporate latest industry development throughout the semesters.

=====

SOURCE (WEB): <https://www.mangalayatan.in/blog/ultimate-guide-to-online-mba-programs.html>

=====

Online MBA (Master of Business Administration) is now one of the most requested programs that workers want to take to enhance their careers without quitting their work. Here are some of the things that you will get to know about online MBA programs in India in this guide: types and costs, the best universities and advice on admission.

What is an Online MBA for Working Professionals in India?

An online MBA for working professionals is a flexible, typically 2 years, postgraduate degree program delivered virtually, allowing individuals to gain management expertise without halting

their careers.

Definition and Overview

An online MBA enables students to secure a business degree without straining their other commitments in life. In an Online MBA program, students study the same topics as a regular on campus MBA program such as – finance, marketing, HR, operations which can be studied from anywhere.

In an Online MBA program, students gets a combination of live virtual sessions, recorded lectures, and interactive discussions. Students are also engaged in projects, work across team, networking across industries and geographic zones.

Why Students Choose Online MBA for Working Professionals Program in India

The accredited Online MBA program are designed for working professionals letting them study while balancing work, home commitments with smart time management and, if available, employer support. For working professionals, combining the theory and practical learning of Online MBA program with work experience turns the program into an skill building investment leading to long-term career growth.

Difference Between Online MBA and Distance MBA:

An Online MBA program involves a live, digital classroom where students join video classes, discuss and get feedback with plenty of interactive content. While a Distance MBA program is a Do It Yourself course where you get the course material or pre-recorded lectures, study on their own and take exams at a test centre.

An online MBA program should be preferred which provides higher interaction and flexibility of learning from anywhere. Distance MBA program can be opted for in case the student is comfortable to study on their own with no requirement for live classes and self-paced study.

Benefits of Pursuing an Online MBA

Flexibility for Working Professionals:

An online MBA offers flexibility to study around work and family, without pausing your career. Balancing work, home, and academics can be challenging, but it's achievable with smart time management and, if available, employer support. Many organizations encourage further education through sponsoring, better job profiles, and higher remuneration.

Career Advancement and Global Exposure:

Career growth happens by acquiring new skills, sharpening leadership acumen and act strategically. Students gets return of their hard work by promotions, salary hike and advancing the career into strategic roles.

Brainstorming with classmates crossing geographical boundaries widens your perspective and gets you access to great faculty and tackling real cross-border cases.

Networking Opportunities in Online Learning:

Online learning makes it convenient to meet people across geographical boundaries. Use of online tools such as video discussions, webinars, live Q&As makes trading ideas, building camaraderie, learning from other experienced members quite easy thereby opening doors to a global network broadening perspective and moving career forward.

Affordable Types of Online MBA Programs in India

One Year Online MBA:

One Year Online MBA could be general or specialized. The general MBA focuses on core MBA course works while specialized MBA focuses on a particular electives such as finance, human resources or marketing. These programs prepares graduates for leadership roles within their chosen sector. Online MBA is for 2 years

Executive MBA Programs Online:

Executive MBA Online programs are tailored for senior professionals and executives, and focuses on specialized electives complementing their management experience. The course comprises of real-world cases and executive coaching improving decision-making and organizational impact.

Distance Learning MBA and Hybrid Options:

Distance Learning MBA is a Do It Yourself course where you get a course material or pre-recorded lectures, study on your own and take exams at your convenience. Whereas Hybrid Options are a mix of best features of Distance MBA with Online MBA. Both modes cater to working individuals seeking career advancement without leaving their jobs.

Top Low Cost Best Online MBA Programs in 2025 - 2026

Best Online MBA Programs in the World:

MBA programs can be ranked on various parameters such as diversity, faculty, digital learning methods, and salary growth etc. Following table lists some of the top online MBA course in the world:

Rank	Business School	Country
1	IE Business School (Global Online MBA)	Spain
2	Imperial College Business School (Online MBA)	United Kingdom

Affordable and Cheapest Online MBA Programs

Most Affordable Online MBA Options:

Top 5 affordable Online MBA options in India is as follows:

Institution	Approx. Fee
Indira Gandhi National Open University (IGNOU)	INR 62,000
Uttaranchal University – Online MBA	INR 80,000
Magalayaan University – Online MBA	INR 67,000
Amity University Online – Online MBA	INR 1,80,000
Dr D.Y. Patil Vidyapeeth – Online MBA	INR 1,90,000

Indira Gandhi National Open University (IGNOU)

Uttaranchal University – Online MBA

Magalayaan University – Online MBA

Amity University Online – Online MBA

Dr D.Y. Patil Vidyapeeth – Online MBA

Cheapest Online MBA Degrees Without Compromising Quality:

If you are searching for cheap online MBA degree without compromising quality, Mangalayatan University could be a great choice. The total fee is around INR 67,000 for the full two-year online MBA. It is approved by the University Grants Commission (UGC) and the All India Council for Technical Education (AICTE) for the online MBA mode.

Tips to Find Budget-Friendly Online MBA Programs:

Check that the programme is approved by University Grants Commission or All India Council for Technical Education (AICTE) for online mode as well as accreditation from NAAC.

Ensure the duration, delivery and specialisations meet your career goals.

Consider support services (career services, placement assistance, alumni network).

Even if budget friendly, factor in your time commitment and how it fits your work/life schedule.

Cost and Duration of Online MBA Courses

Average Online MBA Cost in India and Abroad:

The average cost for an online MBA in India ranges from approximately INR 1.5 lakh to 10 lakh, while the cost abroad is significantly higher. Factors like the university's reputation, program structure, and specializations influence the costs.

1-Year vs 2-Year Online MBA: Which One is Better?

One-year online MBA is a focused course that consists of essential course content squeezed into 12 months which is ideal for working professional. At the same time, a two-year online MBA moves at a steadier pace, with more options for electives and deeper content. The right choice depends on your goals, schedule, and learning style.

Factors Affecting Online MBA Fees:

Major Factors like the university's reputation, program structure, specializations and industry response influences the Fees of an Online MBA course.

Online MBA for Working Professionals

How Online MBA Fits into a Busy Work Schedule:

An online MBA is built for professionals who need courses to adjust around work and life. It's a mix of live classes, flexible on-your-own-time assignments. The learning can be managed while keeping your career moving forward.

Executive MBA vs Regular Online MBA:

Aspect	Executive online MBA	Regular online MBA	Target profile	Mid- to senior-level managers	Early- to mid-career professionals, including career switchers
Typical experience	Generally 5–10+ years	Often 0–5+ years	Curriculum focus	Advanced management, strategy, change leadership	General management core with electives/ specializations
Format & schedule	Structured on evenings/ weekends; often hybrid	High flexibility with asynchronous plus live online sessions	Cost & funding	Higher cost with employer sponsorship more common	Lower cost with more often self-funded while working

Mid- to senior-level managers

Early- to mid-career professionals, including career switchers

Typical experience

Generally 5–10+ years

Often 0–5+ years?

Curriculum focus

Advanced management, strategy, change leadership

General management core with electives/ specializations

Format & schedule

Structured on evenings/weekends; often hybrid

High flexibility with asynchronous plus live online sessions

Higher cost with employer sponsorship more common

Lower cost with more often self-funded while working

Career Growth Opportunities After Online MBA:

An online MBA can significantly enhance career prospects by upgrading managerial, leadership, and strategic skills. After completing the course, professionals often move into mid- to senior-level roles in diverse verticals such as finance, marketing, consulting, or human resources. The online MBA also supports career switching, enabling professionals to move into management roles from technical or non-business backgrounds.

Admission Process and Eligibility

Online MBA Admission Steps:

The admission steps consists of online form submission, counselor guidance, fee payment, and email confirmation. For further details please visit our website.

Eligibility Criteria and Required Documents:

Eligibility for online MBA is a bachelor's degree with at least 45% aggregate marks. For further details please visit our website.

Application Deadlines and Entrance Requirements:

For further details please visit our website.

Best Online MBA Specializations

Brief comparison amongst various MBA specialization can be accessed below helping students opt for best Online MBA specialization according to their needs:

Category	Marketing	Finance	HR	Data Analytics & IT	International Business	Core focus

BLIS Course Details: Full Form, Admission, Eligibility, Duration, Fees, Colleges, Jobs

The Bachelor of Library and Information Science (BLIS) - A one-year undergraduate professional degree program called the Bachelor of Library and Information Science (BLIS) prepares students for jobs in knowledge organization, information handling, and library management. The course gives students the tools they need to effectively gather, organize, catalog, and handle a variety of information resources, both digital and analog. Students have hands-on experience with information retrieval methods, library software, and contemporary digital technologies that provide online information services and e-libraries.

Graduates of the BLIS degree might find employment in corporate information centers, archives, public libraries, university libraries, and the field of digital knowledge management thanks to its emphasis on research technique, communication skills, and user-centered services. For those who have a strong interest in literature, knowledge systems, and information technology, this curriculum is perfect because it gives them access to chances in both government.

BLIS stands for Bachelor of Library and Information Science. It is a professional one year undergraduate degree program that emphasizes on how to manage libraries, organize information, and handle digital resources. The future of BLIS seems bright given the increasing significance of knowledge management and the move to digital libraries.

Graduates can work at educational institutions, research organizations, government agencies, corporations, digital platforms, and as librarians, information officers, archivists, documentation specialists, and knowledge managers. Because of the increased opportunities brought about by the growth of e-libraries, online databases, and digital information systems, BLIS experts are crucial to the efficient management, preservation, and distribution of information. BLIS graduates can also pursue research-focused programs or further degrees like MLIS (Master of Library and Information Science), which will further their academic and professional development.

BLIS Course Details

A BLIS course is a Bachelor of Library and Information Sciences which is a bachelors degree that provides knowledge on the basics of administration and arrangement of libraries, information centers, and archives. The one-year program majorly concentrates on the cataloging, classification, management of resources and information services and graduate students are

prepared to work as librarians, library assistants and archivists.

BLIS Course Highlights

It is a one-year program

The students can take up this course who so ever has completed graduation with 45% marks

Students graduated in any stream can apply

It is a short-term course that enables you to land in a job quickly

Mangalayatan University offers UGC and other statutory body approved degree.

Eligibility Criteria for Bachelor of Library and Information Science (BLIS)

Candidate should have completed a Bachelor's degree (in any discipline) from a recognized university.

For admission in BLIS course, the minimum required marks is 45%.

Students from any stream – Arts, Science, or Commerce – are eligible.

There is no specific age limit; both fresh graduates and working professionals can apply.

Admission is generally merit-based (marks in graduation), though some institutions may conduct entrance tests or interviews.

Career Prospects after pursuing Bachelor of Library and Information Science

Librarian: Manage resources and services at public libraries, colleges, institutions, and schools.

Information Officer/Specialist: Manage databases, digital content, and information systems in government and business institutions.

Archivist: Maintain historical records, manuscripts, and digital archives in research institutions, museums, and archives.

Documentation Officer: Oversee research publications, reports, and technical documentation in companies and R&D facilities.

Digital Librarian/E-Librarian: Utilize contemporary software technologies to manage digital libraries, e-books, and online resources.

Corporate Knowledge Manager: Organize and oversee knowledge systems in enterprises and global corporations.

Teaching and Research: Pursue advanced degrees such as MLIS, M.Phil., or Ph.D. for positions in academia and research.

Government Jobs: Opportunities at public service commissions, universities, government libraries, and ministries.

Global Scope: Work in universities, international organizations, and digital information centers overseas.

Entrepreneurship: Startups in digital information consultancy, library setup services, or knowledge management firms.

Admission in BLIS Course at Mangalayatan University

Bachelor of Library and Information Science (BLIS) course offered at Mangalayatan University is unique in nature as it is a one-year course and can be pursued after an undergraduate degree. The estimated cost of the course program is INR 30,000/- per semester. This course is especially designed as a short-term or crash course to enable students to become job-ready in the relevant field, for instance in libraries of schools, educational institutions, colleges, universities, or national/state libraries.

Enhance Your Career Growth with a B.L.I.S Program

B.L.I.S Program

Top Bachelor of Library and Information Science (BLIS) College in Aligarh, Uttar Pradesh

One of the top options for students in Uttar Pradesh looking for a BLIS and MLIS degree is Mangalayatan University in Aligarh. Among its notable attributes are:

Its outstanding academic standards, facilities, and teaching quality have been confirmed by its NAAC A+ accreditation.

The university markets itself as a "Top BLIS college in Aligarh, UP," highlighting its state-of-the-art teaching facilities, knowledgeable professors, and curriculum combining classical library science with information management in digital contexts.

It has a competitive overall ranking among private universities; for instance, the India Today 2024 rankings placed it at number 38 among Indian private universities.

Students express satisfaction with the campus infrastructure, library resources, smart classrooms, and emphasis on connecting academia and industry.

Thus we can conclude that the Bachelor of Library and Information Science (BLIS) course from Mangalayatan University is a prestigious and time-saving course that will help you land various jobs in the Library Science field. The course is of one year, gives immense flexibility, and allows completion in a short stipulated time. Any undergraduate can pursue this course to become skilled and job-ready for personal and professional growth.

SOURCE (WEB): <https://www.mangalayatan.in/blog/mba-vs-mtech-key-differences-and-how-to-choose-the-right-path.html>

=====

MBA and M.Tech courses offer different career progressions having fundamentally different objectives. MBA stresses on business management, leadership, strategy, finance to prepare graduates for managerial and C-suite roles in variety of industries, such as consulting, HR, marketing and finance. On the other side, the M.Tech course prepares graduates for specialization in technical and development roles by enhancing their technical and engineering expertise in specific areas such as core engineering discipline eg. electrical, mechanical

systems, Information systems, emerging technologies such as AI.

Eligibility criteria for both streams differs, while MBA course accepts graduates from any field on the other hand M.Tech requires a graduate in core engineering branches background. Similarly, the career pathways vary while MBA graduates can expect them to be in managerial or strategic roles, whereas M. Tech graduates can be absorbed in technical roles requiring deep insight into the specific domain areas.?

While deciding between the two, preference and knack for particular course as well as future roles can be a consideration. MTech provides advanced technical expertise and opportunities in R&D, product development, or academia. M.Tech can be chosen to further engineering knowledge and looking for careers in academics, technical innovation, or research. While MBA can be pursued if the student wishes to go for management or strategic responsibilities, or aspire for leadership roles. Choosing an MBA is ideal for individuals aiming to advance their careers in management making them versatile professionals. The MBA program develops data analysis, critical thinking, decision-making, and problem-solving abilities.

A Master in Business Administration Course is a two-year postgraduate qualification designed to equip students with advanced business skills and comprehensive knowledge, data analysis, critical thinking, decision-making, and problem-solving abilities.

Read Also-What is MBA Degree: Course, Admission, Salary, Scope, Fees, Benefits, Career Syllabus, Eligibility and More?

The course covers fundamental subjects including finance, marketing, operations, human resources, and business analytics, giving students a strong background in management principles. In the case of specializations in MBA courses, students can deep dive into certain core areas such as finance, marketing, HR or healthcare management. The specialization in a MBA program offer students opportunity to align their skill set with their career aspirations thereby increasing their expertise and industry readiness in their chosen field. Finally, after completion of MBA degree with a relevant specialization, student are ready to thrive in competitive business environments. Details of various specialization and their career prospects are summarized in the table below:

MBA Specialization and Career Prospects

MBA Specialization	Core Focus / Subjects	Career Prospects / Job Roles

M.Tech. Admission

To be eligible for M.Tech admission students must be holding a engineering graduation degree in relevant field with at least 50% of the required marks. These standards guarantee that students possess the skills and background required for further study in the engineering field of their choice.

The University offers M.Tech. in different specialization in all core branches I.e. Computer Science Engineering, Civil Engineering, Mechanical Engineering, Electrical Engineering, Electronics Engineering. The duration of an M.Tech (Master of Technology) in Engineering is 2 years which is divided into 4 semesters.

M.Tech Course Details

The M.Tech in Computer Science Engineering (CSE) typically covers specialization in advanced computing concepts, algorithms, data structures, machine learning, artificial intelligence, cyber security, cloud computing, big data analytics, and software development. Students may specialize in areas like AI, data science, or networking.

The M.Tech in Civil Engineering (CE) typically covers specialization in structural engineering, geotechnical engineering, transportation engineering, construction management, environmental engineering, water resources, and sustainable infrastructure.

The M.Tech in Mechanical Engineering (ME) typically covers specialization in thermodynamics, fluid mechanics, manufacturing processes, CAD/CAM, materials science, and energy systems. Students upgrade their skill set in designing, production, and maintenance of mechanical systems.

The M.Tech in Electrical Engineering (EE) typically covers specialization in power systems, control systems, electrical machines, renewable energy, high-voltage engineering. Students upgrade their skill set in designing, operating, maintaining, and optimizing electrical systems.

The M.Tech in Electronics Engineering (EnC) typically covers specialization in VLSI design, embedded systems, communication systems, signal processing, microelectronics, and instrumentation. Students upgrade their skill set in designing and developing electronic devices and communication technologies. To summarize, the specialization offered for M.Tech. and their career prospects are indicated in the table below:

Why Choose Mangalayatan University, Aligarh for MBA and MTech Admission?

Mangalayatan University Aligarh is one of the top university in India that is known to build careers for many MBA professionals as well as Technical professional. The University encompasses all the statutory requirements laid by the education system body in India for master programs. More over, the university continues to bring about changes in education industry along with providing industry savy professionals with required skill set to flourish economy and self.

At Mangalayatan, mba course admission and mtech course admission will enable you to take up profesional courses with much zeal and vigour.

MSc Biotechnology Course Details: Full Form. Admission, Eligibility, Duration, Fees, Colleges, Jobs

Over the years M.Sc. Biotechnology degree has gained immense popularity in India. It being a multidisciplinary course has always attracted a large number of aspiring candidates with a science background who wish to make a mark for themselves in the field of Bio-Technology. MSc Biotechnology course not only holds promising career prospects but also prepares professionals who are extensively involved in research and innovation of new drugs and vaccines.

Biotechnology is a multidisciplinary stream that combines subjects like chemistry, biology, genetics and technology for continuous improvement and provide solution in healthcare, pharmaceuticals and the agriculture industry. Other important sectors where biotechnology plays a decisive role is food technology, environmental science and it's sustainability.

MSc Biotechnology Full Form

M.Sc. Biotechnology stands for Master of Science in Biotechnology. It is a 2-year postgraduation degree program that focuses on advanced learning in biotechnology and provides excellent opportunities for professional growth and higher studies.

MSc Biotechnology Course Details

M.Sc. Biotechnology is a comprehensive multidisciplinary course where students learn about biotechnological processes and it's usage in drug manufacturing and to minimize or curb various diseases. The course has a duration of two years, where biotechnology implies to various sectors vis healthcare, agriculture, environment sustainability etc. Key concepts like genetic engineering, molecular biology, immunology has reach a new level of development and innovation with the study of biotechnology and has offered various job roles in the field of science and technology. This programme can be pursued by students who hold a bachelor's degree in Biotechnology (B.Sc. Biotechnology) with a minimum aggregate percentage, and admissions are confirmed through merit-based or through entrance examinations.

Full FormMaster of Science in BiotechnologyCourse LevelPostgraduateCourse Duration2 YearsM.Sc. Biotechnology Eligibility50% Marks in B.Sc. or EquivalentCourse FeeVaries by university (e.g., approx. Master of Science in Biotechnology

M.Sc. Biotechnology Eligibility

Varies by university (e.g., approx. INR 50,000 - 1,50,000 per year)

Merit or Entrance-based

INR 4 to 6 LPA (depending on role and experience)

Recruiting Companies

Biocon, Dr. Reddy's, Cipla, Serum Institute, Wockhardt, CSIR, ICMR, DRDO, etc.

MSc Biotechnology Career Objective

- Apply cutting-edge biotechnology expertise to research and development for pharmaceutical, agricultural, and healthcare advancements.
- to seek a demanding profession in the biotechnology sector and help with quality assurance, product development, and bio-based solutions.
- to become proficient in molecular biology, bioinformatics, and genetic engineering in order to solve practical issues.
- to use biotechnology to provide long-term solutions for environmental preservation, food security, and renewable energy.

to pursue further education, such as a Ph.D. in biotechnology or a similar topic, in order to progress in academic and research sectors.

to acquire the technical and leadership abilities necessary to launch a profitable career in biotechnology startups or other business endeavors.

to combine cutting-edge technologies like data science and artificial intelligence with biotechnology to create meaningful answers.

Read Also-List of Top Biotechnology Colleges in Aligarh, UP

MSc Biotechnology Course Highlights

The M.Sc. Biotechnology focuses on providing in-depth knowledge and practical training in the field of biological sciences and technology.

An interdisciplinary course, where students get to learn subjects like biology, chemistry, genetic engineering, bioprocess technology, microbiology, bioinformatics, and immunology in one go.

Extensive theoretical and practical training is involved in M.Sc.biotechnology

Lays major emphasis on research and innovation and provides solutions in many sectors, viz, healthcare, agriculture, pharmaceuticals and many more.

Numerous Indian colleges that offer this degree also give students exposure through workshops, seminars, biotech parks, and industrial partnerships, all of which improve their employability and hands-on learning.

The M.Scbiotechnology courseis a stepping stone to both professional achievement and further education, offering robust job options in research institutes, pharmaceutical corporations, academic institutions, and biotechnology sectors.

MSc Biotechnology Admission Process

At Mangalayatan University, which is considered one of the top MSc Biotechnology colleges in Aligarh, Uttar Pradesh, admission is purely based on merit basis and the aspiring candidate must have attained somewhere between 50% to 60% marks in B.Sc Biotechnology.

MSc Biotechnology Course Duration

M.Sc. Biotechnology has a course duration of 2 years at Mangalayatan University, where student learns through practical as well as theoretical training.

MSc Biotechnology Admission Eligibility Criteria after B.Sc .Biotechnology

The candidate should have completed a B.Sc. Biotechnology from a recognized university or College

Must have a score within 50% to 60% in B.Sc. Biotechnology graduation degree.

MSc Biotechnology Subject/Curriculum

During the course duration of 2 years, the aspiring students get to learn about vast theories and concepts in Biotechnology that help him/her to understand the field and it's usage in various sectors like pharmaceutical, bioengineering, healthcare, genetics research and innovation and many more.

Genetics and Genetic Engineering

Biostatistics and Research Methodology

Specialized Areas

Pharmaceutical Biotechnology

Practical & Research Components

Laboratory Techniques in Biotechnology

Research Project / Dissertation

Industrial Training / Internship

Job Opportunities and Future Scope after MSc Biotechnology

As one of the industries with the fastest rate of growth in the world, biotechnology offers a wide range of employment options and a bright future. Graduates might work in the food processing, pharmaceutical, healthcare, and environmental sectors. Biotechnologist, research scientist, clinical researcher, bioinformatics specialist, and quality control officer are among the most common job titles. Additionally, they can work for government research agencies like CSIR, ICMR, and DRDO, as well as biotech businesses and diagnostic labs. The need for qualified workers is growing steadily due to the advancement of genetic engineering, vaccines, and bioinformatics. Career possibilities are further improved by options in academia, higher education, including Ph.D. programs, and even entrepreneurship in biotech businesses. Therefore, an M.Sc. in Biotechnology offers a solid professional path with growth driven by innovation.

The need for qualified workers in the biotechnology industry has been steadily increasing as India has become a global center for biotechnology research and development. The M.Sc. Biotechnology program prepares students to contribute to cutting-edge innovations like genetic therapies, vaccine development, and agricultural biotechnology by providing them with advanced knowledge in molecular biology, genetic engineering, bioinformatics, microbiology, and bioprocessing.

The M.Sc. Biotechnology degree is a desirable option for aspirational students since it can be used as a springboard for further education, including Ph.D. programs and research opportunities overseas. Thus, its blend of intellectual challenge, research possibilities, great job prospects, and contribution to real-world problem-solving has made M.Sc. Biotechnology is one of the most sought-after postgraduate degrees in India today.

MSc Biotechnology Program

Why choose Mangalayatan University for pursuing M.Sc. Biotechnology?

Mangalayatan University is an excellent choice for pursuing an M.Sc. andB.Sc. Biotechnology courseoffers a strong academic foundation, promotes research-oriented learning. Students get to learn from experienced faculty and counsellors who also help them with placement assistance..

The course program is well supported by research and project work, and laboratory training, which foster innovation and scientific inquiry

The curriculum is at par with other Universities of India, which gives an equal opportunity for learning and to meet the industry demands and is also a competitive and comprehensive way of connecting to the global markets.

Additionally, by encouraging multidisciplinary education and industry cooperation, Mangalayatan University enables students to investigate the connections between biotechnology and the fields of genetics, bioinformatics, and environmental sciences. The committed faculty members help students enhance their analytical, technical, and research skills by fusing academic brilliance with real-world experience.

The university is also a great place for prospective biotechnologists because of its encouraging academic atmosphere, emphasis on moral research, and dedication to professional advancement. Mangalayatan University graduates are qualified for a variety of jobs in the global biotechnology, pharmaceutical, healthcare, and research sectors.

MJMC Course Details: Full Form. Admission, Eligibility, Duration, Fees, Colleges, Jobs

A Master of Journalism and Mass Communication (MJMC) is a postgraduate degree developed for individuals who want to pursue a successful career in media, communication, or allied sectors. This study typically lasts two years and focuses on both academic understanding and practical skills required in today's rapidly changing media industry. Students study news reporting, media ethics, public relations, advertising, digital journalism, and broadcast media.

One of the most notable aspects of a MJMC curriculum is the emphasis on critical thinking,

research, and communication skills. With the rise of digital platforms, the course now teaches students multimodal storytelling, content creation, and the use of current communication technologies. Workshops, internships, and live projects all provide additional real-world experience and increase employability.

After finishing the MJMC course, there are numerous and diverse career choices available. Graduates can pursue careers as journalists, editors, news anchors, public relations officers, content writers, media planners, advertising experts, or communication specialists in both public and commercial sectors. In addition, they can pursue academic or research positions in media studies.

Overall, a MJMC program is great for students who are passionate about media and communication, as it provides a platform for them to influence public opinion, successfully communicate knowledge, and make meaningful contributions to society.

MJMC stands for Master of Journalism and Mass Communication. It is a 2-year postgraduate degree program that fosters advanced learning in Mass Media, print media, public relation, digital communication, and journalism.

MJMC Course Details

MJMC is a two-year postgraduate program that focuses on advanced knowledge and skills in media, journalism, and communications. The course is aimed at graduates who desire to work in print, broadcast, or digital media, as well as advertising, public relations, and corporate communication.

The MJMC Journalism and Mass Communication course curriculum covers a wide range of topics, including media law and ethics, reporting and editing, development communication, new media technologies, advertising techniques, and public relations management. With the expanding importance of digital platforms, students are also taught multimedia content development, social media management, and online journalism. Along with classroom instruction, the course emphasizes practical training through internships, workshops, field visits, and live projects, allowing students to gain industry experience.

Pharm D Course Details: Full Form, Eligibility, Fees, Admission, Top Colleges and Scope

The Pharm.D (Doctor of Pharmacy)? programme at Mangalayatan University has a course duration of six years, and in return, students earn a doctorate in Pharmacy. The program is designed to educate students about the pharmaceutical industry and its application in pharmacy and drug administration. With an emphasis on patient care, clinical practice, and medication management, this course gives graduates the skills they need to play a crucial role in healthcare teams.

Pharm D course can be pursued by students who have completed school education, i.e 10+2 with physics, chemistry, Biology and Mathematics. The curriculum ensures that students acquire practical skills in addition to academic achievement by combining theoretical knowledge with practical experience in hospitals, community pharmacies, and research labs.

A Pharm D Degree opens numerous job options are available in clinical research, hospital pharmacies, the pharmaceutical industry, and patient counselling are made possible by pursuing

a PharmD degree. Selecting the best Pharm D institutions in Uttar Pradesh guarantees access to high-quality instruction, hands-on training, and industry exposure for students who are passionate about enhancing healthcare outcomes. This equips graduates to succeed in the quickly expanding pharmacy and healthcare sectors.

Pharm. D Full Form

Pharm D stands for Doctor of Pharmacy. It is a six-year professional doctoral degree that focuses on students enrolled in this professional and prepares them for clinical positions within the healthcare industry. Pharm D has a strong emphasis on clinical practice and patient engagement, in contrast to B.Pharm, which is more industry- and production-focused. Regarding medication, consider it a link between the patient and the physician.

Pharm D Course Details

Pharm.D. (Doctor of Pharmacy) is a six-year professional doctoral degree, which consists of five years of university work and one year of hospital internship. The curriculum is based on clinical pharmacy, patient care and medication management training graduates to work in healthcare teams. The qualification usually includes the completion of 12th grade by encompassing Physics, Chemistry and either Biology or Math.

Clinical Pharmacist, CRA, Medical Writer

History and Global Recognition

Pharm D, which was first offered in India by the Pharmacy Council of India (PCI) in 2008, is based on the American model of pharmacy education and is regarded as the prerequisite degree for obtaining a pharmacy license. A PharmD is regarded as a clinical doctorate worldwide, particularly in the USA, Australia, and some regions of Europe, and its holders are permitted to work as patient-care pharmacists.

Pharm D: Course Structure

Pharm D's dual-entry pathway—a full 6-year program for new students and a shortened 3-year version for those with a B.Pharm—is one of its distinctive features.

Dissection of the Programs

1. 6 years of Pharm D (Regular)

Five years of coursework

One year of required hospital internship or clinical rotation

2. Three years of study plus a one-year clinical internship make up the Pharm D (Post Baccalaureate) program, which is intended for students who already have a Bachelor of Pharmacy (B.Pharm) degree.

Learning Methodology and Subjects

Among the many topics covered in the course are pharmacy and clinical pharmacy.

Hospital pharmacy; community pharmacy; pharmacotherapeutics; biostatistics and research methodology; patient safety and counseling

Working in multidisciplinary teams in hospital settings, presenting cases, and providing real-time patient care are all major components of the final year.

Students are important contributors to contemporary healthcare systems because they receive training in clinical decision-making, pharmacovigilance, and theoretical knowledge.

Pharm D Eligibility Criteria after 12th

Eligibility for admission in Pharm D. Prior to pursuing your career as a clinical pharmacist, you must fulfill a few prerequisites. They're fairly simple, so don't worry.

Eligibility for Education

In order to enroll in the six-year Pharm D program, you must have completed Physics, Chemistry, and Biology/Mathematics as required topics in your 10+2 or equivalent.

Alternatively, you need to have earned a Pharmacy Diploma from an accredited institution.

Minimum Marks and Age

The minimum age is 17.

Minimum grades: In PCB/PCM, the minimum is typically 50% aggregate, though each college may have a slightly different cutoff point.

Pharm D Admission Process in India

A combination of entrance tests, merit-based shortlisting, and in-person interviews (at certain colleges) are required to get into a Pharm D program in India. Although it's not as ruthless as MBBS, competition is growing over time.

Exams for Entrance

State-level or university-specific entrance tests are the basis for admission to the majority of colleges.

NEET (accepted sometimes)

BITSAT, KEAM (Kerala), EAMCET (Andhra Pradesh and Telangana), and PUCET (Panjab University)

JSSU Admission Exam

On the other hand, a few of private universities also provide direct admission based on Class 12 results.

Selection Based on Merit

At Mangalayatan University the Admission is granted on a first-come, first-served basis or through merit lists created using Class 12 board scores in many public and private colleges. In general, those with a solid scientific background and high scores in biology/mathematics, chemistry, and physics stand a greater chance.

Documents Required

Class 10 and 12 mark sheets

Transfer certificate (TC)

Migration certificate (if required)

Entrance exam scorecard (if applicable)

Passport-size photographs

Identity proof (Aadhaar, PAN, etc.)

Caste certificate (if applicable)

Domicile certificate (for state quota seats)

Pharm D Fees Structure in India

Different Colleges and Universities have different fee structures for pursuing Pharm D courses. It is recommended to refer to the University websites for detailed fee structures.

Career Opportunities After PharmD Degree Program

There are variety of career options available after pursuing Pharm D courses and it is not just limited to pharmaceutical industry rather the scope is infinite in Hospital and Clinical pharmacy, in academia and Research.

Hospital and Clinical Pharmacy

Pharm D grads are often employed as:

Clinical Pharmacists

Pharmacovigilance Officers

Therapeutic Drug Monitoring Specialists

Patient Counselors

Medication Safety Officers

In hospitals, they collaborate closely with physicians to guarantee proper dosing, identify drug interactions, and provide patient counseling.

Pharm D holders can work in:

Regulatory Affairs

Medical Writing

Quality Assurance

Clinical Trials and Research

Pharmacovigilance

Pharm D graduates are frequently sought after by multinational pharmaceutical companies for positions requiring a thorough understanding of drug research and utilization.

Research and Academia

Pharm D also offers career opportunities in Academia and Research.

Lecturer in Pharmacy Colleges

Pharma Research Analyst

Or pursue a PhD and move into drug innovation and toxicology studies

Since early 2000, Pharmaceutical industry has registered growth in leaps and bounds that has led to the emergence of Pharm D course with course duration of 6 six years and students can enroll in the program just after their 10+2 school education and pass out while being holding a doctorate degree.

PhD in Pharmacy or Clinical Sciences

Postdoctoral Fellowships

MBA in Healthcare Management

MPH (Master of Public Health)

All these are viable options for career growth with increased salaries, global exposure and leadership roles in the organizations.

Average Salary After Pharm D Program

After pursuing Pharm D course earning options are escalated but it depends on certain factors like experience, job roles, geographical location of the job etc.

India: LPA (Lakhs Per Annum): INR 3.5 to 5.5 LPA

Positions: Hospital Pharmacist, Clinical Pharmacist, and Drug Safety Associate

New hires in small clinics or private hospitals may begin at the lower end of the spectrum.

Positions with the government, such as assistant drug inspector, may pay a little more.

Senior and Mid-Level Pay

Salary increases dramatically after three to five years of experience:

INR 6 to 12 LPA for positions such as regulatory officer and pharmacovigilance specialist

INR 10 to 20 LPA in international research firms or corporate pharmaceutical

Your earning potential can go above INR 25 LPA if you move into management, consultancy, or entrepreneurship.

No, NEET is not required for Pharm D.

Top Colleges for Pharm D in India

Jamia Hamdard, New Delhi

National Institute of Pharmaceutical Education and Research (NIPER), Hyderabad

Birla Institute of Technology and Science (BITS), Pilani

JSS College of Pharmacy, Ooty

Institute of Chemical Technology (ICT), Mumbai

JSS College of Pharmacy, Mysore

Boost your Future Career with the Pharm D Program

Pharm D Program

Why Choose Mangalayatan University Aligarh for Pharm. D Admission?

Mangalayatan University (MU) offers a multidisciplinary course for 6 years in the name of Pharm D, where students can enroll after 10+2 with PCB or PCM and can earn a Doctorate degree in Pharmacy.

Cutting-Edge Curriculum: The Pharm D program at MU is meant to expose you to the most recent developments in pharmaceutical sciences and keep you at the forefront of pharmacy practice.

Reasonably priced tuition: MU offers its Pharm D programs at an affordable cost, enabling a wider spectrum of students to attend high-quality education.

Clinical Experience: An essential component of the program is practical exposure, which guarantees that you obtain first-hand knowledge.

Skilled Faculty: Gain expertise from seasoned instructors and experts.

MU is recognized as an NAAC 'A+' approved university, guaranteeing high-quality instruction.

Placement Support: MU asserts that it provides 100% placement support.

Facilities: MU has a drug information center and well-equipped labs to aid in your research.

Visit MU's official website for additional details.

A Pharm D is more than just a degree; it's a starting point for a rewarding, patient-centered healthcare profession. It provides you with the breadth of a doctoral program and the practical knowledge needed in contemporary medical environments.

It may not yet have the same level of recognition as MBBS or B.Pharm, but it is rapidly catching up. If you have a strong interest in medicine, healthcare, and changing people's lives, a Pharm D degree might be your calling.

Just make sure you choose the correct college, remain dedicated during the demanding academic path, and make the most of the practical experience this program offers.

PCS Facilities: Facilities of physically challenged students

1. Do your institution buildings have Lifts/Ramps? Yes, more than 80% of the buildings

2. Do your institution have provision for walking aids, including wheelchairs and transportation from one building to another for

handicapped students?

3. Do your institution buildings have specially designed toilets for handicapped students? Yes, more than 80% of the buildings

NAAC Accreditation

1. Does your institute have a valid NAAC Accreditation? YES

Valid from Valid upto CGPA

30-03-2023 29-03-2028 3.34

Multiple Entry/Exit and Indian Knowledge System

1. Has your institution implemented multiple entry/exit in your institution? YES

2. Has your institution been teaching courses in Indian Languages? YES

3. Has your institution introduced courses on Indian Knowledge System? YES

4. Has your institution established the Grievance Redressal Cell? YES

5. Is your institution admitting students through National and State Level entrance exam? YES

1. What specific programs does the institution/university have in place to reduce or eliminate single-use plastics on campus?

- Ban on single-use plastic items (e.g., straws, cutlery, plates)

2. What actions has the institution/university taken to reduce its carbon footprint? (Select all that apply)

- Energy-efficient buildings
- Renewable energy installations
- Offsetting emissions
- Sustainable procurement

3. What is the level of recycling infrastructure available on your campus?

- Comprehensive infrastructure (bins, awareness, collection systems)

4. What type of rainwater harvesting system has been implemented at your institution/university?

- Rooftop Rainwater Harvesting System
- Surface Runoff Harvesting System
- Percolation Pit System
- Recharge Wells
- Storage Tank System

5.Which renewable energy sources are installed on your institution/ university campus ? (Please select all that apply)

6. What is the institution's approach to minimizing food waste?

- Food donation programs
- Composting systems
- Sustainable food procurement

(57) Abstract :

A bio-composite material and method for its preparation are disclosed. The material consists of coconut coir fibers treated with epoxy

resin and hardener, then mixed with an epoxy resin matrix to form a composite. This composite exhibits improved mechanical

properties, including hardness and load-weight ratio, surpassing those of aluminum alloys. The preparation involves a hand layup

technique, and adjustments in the fiber length allow for tailored mechanical properties. The material is eco-friendly and biodegradable.

“GYM PULL DOWN MACHINE FOR ELECTRICITY GENERATION” The present invention relates to a gym pull-down machine

that converts human mechanical energy into electrical energy. The gym-based power generation system, includes a gym pull-down

machine with a frame structure and a pull-down bar for users to perform exercises, a first shaft (Shaft-A) and a second shaft (Shaft-B)

mounted at the top of the frame structure in a parallel arrangement, a freewheel sprocket and chain drive system connecting the pull -

down bar to the first shaft (Shaft-A), a heavy-duty rickshaw pipe rim mounted on the first shaft (Shaft-A) to act as a flywheel, storing

and regulating the rotational energy, a DC dynamo connected to the flywheel by a cotton rope drive, wherein the rotational energy

from the flywheel is converted into electrical energy by the DC dynamo, and a charging circuit, including an IC, a capacitor, and

diodes, to charge a battery using the electrical energy generated by the DC dynamo.

In-House Seminar on "Golden Ratio: Mathematics, Art and Nature"

Date: 29 June 2023

Venue: Shipra Block, Room Number 002

Timings: 10:00 am to 11:00 am

No. of Faculty and Students: 63

Speaker: Dr. Swati Agarwal, Assistant Professor (Mathematics)

About the Speaker:

Dr. Swati Agarwal earned her Ph.D. in Mathematics from Dayalbagh Educational Institute (Deemed University),
Agra and has accumulated more than four years of teaching experience in the field. Her primary research interest lies
in Operations Research. She has published about 9 research articles in various international journals of repute and
holds 4 books to her credit. Dr. Agarwal has presented her research papers at over 10 national and international
conferences and has attended more than 15 workshops and FDPs. Furthermore, she has reviewed few research
articles for renowned journals such as Opsearch (Springer -Nature), Annals of Operations Research (Springer-Nature),
and International Journal of Systems Science (Taylor & Francis) . She is also a life member of several professional
bodies, including the Indian Science Congress, MathTech Thinking Foundation, International Association of
Engineers, etc.

About the Topic:

"The Golden Ratio," often represented by the Greek letter Phi (Φ), is a mathematical constant that has fascinated
mathematicians, artists, and scientists for centuries. It is a unique number that appears in various aspects of nature,
art, and architecture. This seminar delved into the mathematical properties of the Golden Ratio, its historical
significance, and its profound influence on aesthetics and design across different cultures and time periods.

Graphical representation of Golden Ratio and its application in Architecture

At its mathematical core, the Golden Ratio is defined as a number approximately equal to 1.6180339887. It emerges
from the solution to a simple algebraic equation, making it a key player in the world of mathematics. Understanding
its properties, such as the fact that $\Phi + 1 = \Phi^2$ (Phi squared), unveils its unique allure.
This seminar delved into the artistic realm, where the Golden Ratio has left an indelible mark. From ancient
civilizations to contemporary artists, the ratio's presence in art is undeniable. Attendees explored how this ratio had
been used to create visually pleasing compositions, balanced and harmonious designs, and captivating artistic

Application of Golden Ratio in Art

The Golden Ratio isn't confined to human creations; it is deeply intertwined with the natural world. Participants

uncovered its prevalence in the spirals of seashells, the arrangements of sunflower seeds, and the proportions of

branches on trees. The seminar showcased how the Golden Ratio appears as a fundamental pattern in the DNA of

nature, adding to the awe-inspiring beauty and structure found in our environment.

This seminar on "Golden Ratio: Mathematics, Art, and Nature" successfully unlock the mysteries of this

mathematical constant and its multifaceted influence. Attendees were taken on an interdisciplinary journey that

blended historical insights, mathematical exploration, and captivating visual representations. As a result, participants

left the event with a deeper appreciation for the elegance and universality of the Golden Ratio. This seminar

effectively connected the dots between mathematics, art, and the natural world, demonstrating that the Golden Ratio

is more than just a number –it serves as a key to revealing the hidden symmetries and harmonies that grace our

Seminar Details:

The In-house Seminar on "The Golden Ratio: Mathematics, Art, and Nature" took place on 29th of August 2023, at

Shipra Block, Room Number 002, from 10:00 am to 11:00 am. The seminar was organized by the Institute of Applied

Sciences and was attracted a diverse audience, including 57 students from various academic disciplines such as B.Sc.,

B.Sc. B.Ed., and BCA and 06 faculty members.

The seminar commenced with the introduction on the concept of Golden Ratio and its mathematical definition.

Attendees were taken on a journey through history, exploring how this mathematical constant had been employed by

artists and architects to create visually pleasing compositions. The seminar also examined the presence of the Golden

Ratio in the natural world, highlighting its prevalence in biological and physical phenomena.

Throughout the presentation, Dr. Agarwal provided numerous examples that showcased the practical applications of

the Golden Ratio in art and design, ranging from classical works of art to contemporary architectural masterpieces.

Attendees gained a deeper understanding of the aesthetic harmony and balance that the Golden Ratio can bring to

various forms of creative expression.

The seminar concluded with an engaging Q&A session, during which attendees had the opportunity to further explore

the topic and seek clarification on any aspects of the Golden Ratio that piqued their interest.

Seminar Lecture on "Golden Ratio: Mathematics, Art and Nature"

The In -House Seminar on "The Golden Ratio: Mathematics, Art, and Nature" proved to be an enlightening and

intellectually stimulating event. Dr. Agarwal 's expertise and passion for the subject left attendees with a profound

appreciation for the significance of the Golden Ratio in mathematics, art, and the natural world.

We extend our sin cere thanks to all the participants, including the students and faculty members for making this

seminar a valuable educational experience for all. We hope that the exploration of such interdisciplinary topics will

continue to enrich our institution's academic offerings, fostering a deeper understanding of the connections between

mathematics, art, and the natural world.

Yoga Event Report

"International Yoga Day 2023" Celebration

Date: 21.06.2023

Venue:University Auditorium

Time: 8:40 to 9:40 AM

No. of Faculties & Students:145

Yoga Instructor: Ms Bhawana Raj

About the Yoga Instructor:

Ms. Bhawana Raj is currently working as an assistant professor at the

Mangalayatan Ayurveda media college and research center, Mangalayatan University, Aligarh. She has completed her master degree in Yoga Science and developed her expertise in Yoga. She has five years' experience in yoga teaching and organized several yoga programs at University level.

Guests: Vice Chancellor Prof. P.K. Dashora, PVC, Prof. Siddi Veeresham. Prof. J.L. Jain, Dean, Faculty of Humanities, Prof. Rajeev Sharma

About the Chief Guest:

Prof. P.K. Dashora is Vice chancellor of Mangalayatan University. He completed his postgraduation in Statistics from Rajasthan University. In his professional career, he served as additional Vice Chancellor of Kota University, Maharana Pratap University of Agriculture & Technology, and Udaipur Agriculture University. In addition, Professor PK Dashora served six years as the member of Rajasthan Public Service Commission. In his academic journey, he guided 450 students for Ph.D. and his research work published on various national and international journals. Due to stellar work in the sphere of academia Professor P.K Dashora received award at national and international

About the Campaign:

The International Yoga Day 2023" has been organized by Radio Narad 90.4 FM under the aegis of Commonwealth Educational Media Centre for Asia (CEMCA), the regional centre of Commonwealth of Learning (COL) at Mangalayatan University Auditorium. The project has been sponsored by Ministry of Ayush, Govt. of India. " IEC Campaign to celebrate the International Yoga Day 2023" has being carried out and broadcast as per guidelines given by CEMCA.

About the event:

International Yoga Day 2023 was jointly organized by Radio Narad 90.4 FM and Commonwealth Educational Media Centre for Asia (CEMCA), the regional centre of Commonwealth of Learning (COL). The theme of the program has been kept as Yoga Vasudev Kutumbakam. Chief guest of the program was Vice Chancellor Prof. P.K. Dashora, Pro -Vice Chancellor, Prof. Siddi

Veeresham, Dean, Faculties of Humanities Prof. JL Jain, Prof. Rajeev Sharma.

On the occasion of International Yoga Day at Mangalayatan University, a yoga camp was organized by Radio Narada and CEMCA. The Program was inaugurated by the Vice Chancellor Prof. PK Dashora. Radio Narad and CEMCA and Ayurveda College cooperated in the event.

Yoga teacher Bhavna Raj conducted yoga program for all higher authorities, teachers, students, employees etc. He told that yoga is very important to bust immunity power and prevent body from several diseases. Yoga -Pranayama is the only method by which people can remain physically and mentally healthy. By makin g yoga an integral part of life , we can remain healthy

for life long. Pranayama like Bhramari, Vrikshasana, Anulom -Vilom were done during yoga practice. Dr. Ashok Upadhyay expressed gratitude. Program coordinator Dr. Siddharth Jain was the program coordinator of the National Service Scheme. On this occasion Pro Vice Chancellor Prof. Siddi Veeresham, Dean Faculty of Humanities, Prof. Jayantilal Jain, Dr. Haider Ali, Dr. Vikas Sharma, Dr. Santosh Gautam, Manisha Upadhyay, Dr. Poonam Rani, Dr. Swati Agarwal etc participated in the program.

In the “International Yoga Day 2023” program, 145 participants attended yoga promotion program. They have also completed yoga training and a Google form link has also been shared with participants. They registered themselves via Google form link generated by the Ministry of Ayush, govt. of India to confirm their participation in celebrating International Yoga Day 2023.

Report of the Event

Event:Workshop on“Introduction of Data Analytics”

Category of the event: Skill Enhancement

Key note speaker/Resource person: - Mr. Rohit Pahwa (Machine Learning Expert)

Mr. Rohit Pahwa Highly experienced trainer of machine learning having more the 8 years experience in the field of training & workshops. He works as a Machine Learning Expert (Ducat India Pvt Ltd Noida). Ducat envisages strengthening its training base on industry scenario and technology development issues, develop ing its training capabilities. I t further acts as an interface

with software companies to promote exchange of innovations, training methodologies, design on

training curriculum and monitoring the software industry trends, country wide.

Date of the event: - 16/06/2023

Organizer: -Department of Mechanical Engineering, F.E.T., Mangalayatan University, Aligarh

Number of Attendees/Participants:- 145 Students

Venue of the Event: University Auditorium, Mangalayatan University, Aligarh

Faculty Coordinators:

1. Mr. Avatar Singh Kuntal (Assistant Professor, DME)
2. Mrs. ShwetaBhardwaj (Assistant Professor, DME)
3. Mr. Nasim Khan (Assistant Professor, DCE)

Students Volunteer:

1. Mr. Manu Upadhyay (B.Tech.-Final Yr , ME)
2. Mr. AnanyaVarshney(B.Tech.-Final Yr ,CSE)
3. Mr. Sajal Sharma (B.C.A.-FirstYr)

Event Description:

This workshop has been organized on 16/06/2023 for the mechanical /civil/ computer science & electrical engineering students. This workshop was delivered by Mr. Rohit PahwaMachine Learning Expert from Ducat India Pvt limited Noida . The main objective of this program is to update the latest technological developments in the field of machine learning & data analysis. The speaker working in the area of data analytics since last 8 years .Dr. Kishan Pal Singh (HoD-ME) elaborate the benefit of machine learning & data analytics for the students also explain the use of data in present scenario, Mr. Mohan Maheshwari (Principal- University P olytechnic) concluded the workshop and described how engineering, polytechnic and other field students and professionals make their career in data science. DUCAT Corporate provides corporate education and custom -content training solutions to some of India largest private, publi c and Government organizations. Ducat India PvtLtd, serves clients in Various sectors such as information technology, financial services, pharmaceuticals, telecommunications, education, professional services. Ducat corporate is proud ly assessing learning needs and develops and delivers training

solutions to support and enhances return on learners training investments. In the workshop, the

following topics were discussed in details:

1. Principles of Data analysis
2. Need and advantages of Data analytics.
3. Machine learning
4. Cloud Computing
5. Worked on Robotics Model by using AI Applications.
7. Applications of Data analytics and so on.

Benefits to the students:

1. Understand the types of Data.
2. Determination of methods used for data analysis
3. Determination of methods used machine learning.
4. Development of skill regarding Data Science & Machine Learning.

Painting Demonstration and Lecture

"Mental-Consciousness and Expression in Painting".

Date: 14-06-2023

Time: 2PM -4PM

Venue: Shipra Block(Room no.506)

Speaker: Dr. Shivendra Singh

(Retd. Professor- Drawing & Painting)

Prof. Shivendra Singh is one of the leading Art Painter in India. He has served DEI, Agra as a faculty many years. He

has an illustrated career as an academician, demonstrator and research supervisor during his tenure as professor.

He is awarded by Out Standing Merit Sketching Award by Banaras Hindu University in 1972,

Honoured for creative

work by Sanskar Bharti, Agra 1980,

A live demonstration-based guest lecture session on painting was held at M.U. smart classroom (Room no.506/

Shipra block) from 2 P.M. on 14-06-2023.

The primary objective to organize this lecture was to allow the participant students to become familiar with the

principles of painting and its various technical aspects and how to apply those theories on canvas in a practical

Eminent artist and academician Dr. Shivendra Singh was invited to conduct the Lecture - Demonstration session on

the topic " Mental-Consciousness and Expression in Painting".

In the beginning, Mr. Ajay Singh Rathore, Assistant Professor (visual art), welcomed and introduced the guest artist

with the students and teachers of DVPA.

Around 30 students and teachers attended this informative session which was ended through a question –answer

dialogue between artist and the students.

The guest artist and presenter was felicitated by Dr.Poonam Rani, HOD, DVPA with anAngVastra and memento.

Dr.Poonam Rani said that this type of workshop is very helpful for all the students. It develops confidence and

creativity. Pt. DebasisChakroborty, Sri Vilas Palkhe, Dr.RamkrishnaGhosh, Dr.Premlata, Mr. Ajay Singh and Mr.Uday

Kumar were also present.

At the beginning of the demonstration, Prof. Singh explained the various aspects of painting with live demonstration

and examples. He also advised the student that the need for concentrating your subject matter is very much

required. Mental- Consciousness or self-observation is prime factor in a painting . He also emphasised that this

session is aimed at orienting one towards a

deeper outlook of the characteristics and detailing of the subject. Overall, the main focus should be to appreciate

the beauty of expression through the painting.

Conclusion: We sincerely acknowledge the expertise and the unique presentation style of Prof.

Shivendra Singh and

hope that this session has marked a deep-rooted thought process among students.

We are looking forward to organise more such interactive sessions under in-house initiatives.

Glimpses of the Event

List of Participants:

HOD, DVPA

Event Coordinator

Date: 14th and 15th June, 2023

Event: Workshop on Story Telling

No. of Participants: 24

About the Event: Story Telling is an interesting way to present content to the students. This helps

to engage students effectively. It is really helpful to create participative classroom in language and

social studies. The same can be used in Science teaching to create interest in learning. With the

objective to develop this consciousness among students two day workshop was organized for teacher trainees in the department.

On the first day in first session Dr. Deepshikha Saxena apprised the students about objectives and

methodology of Story Telling. In the second session on first day, Dr. Yatendra Pal, Dr. Kavita Sharma, Dr. Anuradha Yadav and Dr. Sanjay Pal explained the use of Story telling in different subjects. Dr. Anuradha Yadav explained how to integrate story telling in Language teaching. Dr. Kavita Sharma illustrated the use of Story Telling in Social Studies subject. Dr. Yatendra Pal demonstrated the use of Story Telling in Science and Dr. Sanjay Pal explained how story Telling can be used in specific topics of Biology.

The sessions were interactive. On the second day, students prepared illustrations and narrated stories. Teacher trainees enjoyed this activity and asserted that this shall help them to engage

In the end, teachers appreciated the hard work put in by students and applauded them for giving nice presentations.

IEC Campaign to celebrate the "International Yoga Day 2023"

Date: 13.06.2023

Venue: Yoga Hall, Shipra Block

Time: 3 PM to 4 PM

No. of Faculties & Students: 42

“ IEC Campaign to celebrate the International Yoga Day 2023” has been organized by Radio Narad 90.4 FM under the aegis of Commonwealth Educational Media Centre for Asia (CEMCA), the regional centre of Commonwealth of Learning (COL) . The project was sponsored by Ministry of Ayush, Govt. of India. “ IEC Campaign to celebrate the International Yoga Day 2023” has being carried out and broadcast as per guidelines given by CEMCA.

IECcampaign “celebrating World Yoga Day 2023” was jointly organized by Radio Narad 90.4 FM and Commonwealth Educational Media Centre for Asia (CEMCA), the regional centre of Commonwealth of Learning (COL). The theme of the program has been kept as Yoga Vasudev Kutumbakam. This is first yoga program under IECcampaign “celebrating World Yoga Day 2023” and will conclude on June 21 on World Yoga Day. Program was held under the director of Dr. Santosh Kumar Gautam, Department of Journalism and Mass Communication.

Yoga teacher Bhavna Raj threw light on the importance of yoga in the yoga training program organized at Shipra Auditorium. She taught different types of pranayama, yoga aasanand mudras. She told that yoga is an important part of our life. Yoga needs to be adopted in daily life. In the

current environment, there is a great need to increase immunity. Yoga keeps us away from diseases while developing our potential. Chief Guest, Prof. Siddharth Jain, the Director of Student

welfare said that through such programs we motivate the society to adopt Yoga. Head of Department Dr. Santosh Gautam appreciated the programme. RJ Veer Pratap Singh and RJ Yashika Gupta organized the program. On this occasion Dr. Shagufta Parveen, Manisha Upadhyay, Coach Sartaj Khan, Yogesh Kaushik as well as students Gyanendra, Deepshikha, Deepika, Shivani, Khushbu, Satakshi supported.

In first program of IEC Campaign to celebrate the “International Yoga Day 2023”, 42 participants

attended yoga promotion program. They have also completed yoga training and a Google form link has also been shared with participants. They registered themselves via Google form link

generated by the Ministry of Ayush, govt. of India to confirm their participation in celebrating

International Yoga Day 2023.

Activity Report on

“Plastic Pollution and its impact on Environment”

Date: 05th June, 2023

Venue: University Auditorium

11:00 AM Onwards

CONVENER: Dr. Harit Priyadarshi, (Head)

Department of Civil Engineering,

Mangalayatan University, Aligarh.

ACTIVITY COORDINATOR: Mr. Waseem Ahmad Khan,

Assistant Professor Civil Engineering,

NO. OF PARTICIPANTS: 286

about World Environment Day-2023

People all over the world are tapping into their concern for the planet to make lifestyle changes that lessen their

dependence on plastics. One result of this widespread ecological awareness is that more people than ever

before are asking for products and services that are safer and healthier for humanity and nature. Many companies

are responding with new marketing and ways of doing business, such as changing how their products and services

are produced, packaged, and offered. But are all of businesses' new plastic pollution solutions really as “green” as

During the June 05th, 2023 Guest Lecture we focused on the issue of “greenwashing” in the plastics industry –the

epidemic of businesses falsely advertising products and initiatives as environmentally safe and friendly when they

are not, masking real harm caused to the planet and people. We discussed how to avoid the plastic industry's

greenwashing traps to make better, more informed choices from our panel of experts who provided practical tips

on how to identify genuinely sustainable products and companies, and how to spot the most common deceptive

tactics used by major corporate polluters to greenwash their products.

The objective of the Guest Lecture is to provide a forum to professionals, scientists, environmentalists, academia

and other groups of the society to share Knowledge and experience on various aspects of environment. Under this

programme to create mass environment awareness for organization of workshops on identified thrust areas

related to environment awareness for organization of workshop on identified thrust area related to environment

or any emerging area impinging on technology ,

innovation in regard to environment.

Chief Guest Profile:

Dr. Saif Ullah Khan is currently working in the Department of Civil Engineering, Zakir Husain Collage of Engineering

& Technology Aligarh Muslim University Aligarh. He did PhD &M.Tech in Environmental Engineering and B.Tech in

Civil Engineering from AMU. His specialized field of interest is water and wastewater treatment, Groundwater

remediation using advanced treatment techniques incorporating Electrochemistry and Nanotechnology. He has

been an active researcher and has more than 35 research papers published in reputed International journals

including Water Science and Technology (IWA), Elsevier journals including: Process safety and Environmental

Protection, Trends in Analytical Chemistry, Journal of Cleaner Production, Science of the total environment, Journal

of Molecular Liquids, Desalination and Water Treatment , International Journal of Environmental Analytical

Chemistry(Taylor & Francis), Water Environment Research(Willey), Environmental Science and Pollution

Research(Springer), RSC advances, (Royal Society of Chemistry), Nanomaterials (MDPI) mostly indexed in web of

science & Scopus with Google Scholar Citations more that 1200(i index 21; h index 16). His teaching interests

include physio-chemical treatment of wastewaters, industrial wastewater treatment and environmental chemistry.

He has been awarded with National level CSIR SRF Fellowship for pursuing his Doctorial

studies. He has

represented A.M.U. at various academic events including various International Workshops and conferences at both

International (Germany, Kingdom of Saudi Arabia, etc.) and National level fully sponsored by various agencies and

research organizations. He has supervised M. Tech dissertations various scholars uptill now.

Chief Guest: Dr. Saif Ullah Khan , DCE, AMU, Aligarh . Key Note Speaker

Topic: "Plastic Pollution -2023"

1. Prof.(Dr.) Saif Ullah Khan

F/o Department of Civil Engineering, Zakir Husain Engineering Collage & Technology A.M.U. Aligarh.

2. Prof. (Dr.) Ravi Kant Mangalayatan University

3. Dr. Ashok Purohit Mangalayatan University

4. Dr. Harit Priyadarshi

Theme of Workshop: "Plastic Pollution -2023" Sub themes:

- Covid-19 Pandemic and the Environment.
- Global Warming and Climate Change, Greenhouse Gases, Ozone Depletion.
- Deforestation.
- Endangered Species, Plants and Animals Challenges in Implementation, Compliance and Enforcement etc.
- Major ways to Protect the Environment Worldwide – Use of Non -conventional Sources of Energy; Groundwater Contamination/ Recharge; Water Harvesting Measures etc.
- Environmental Rule of Law and Environmental Ethics.
- Human Health and Environment.
- Sensitization of students (schools as well as college) on various environmental issues.
- Promoting environmentally sustainable practices.
- Creating environment awareness among masses.
- Engagement of target groups in environment friendly action and thereby inculcation of proper attitudes

towards the environment and its conservation through community interactions.

Convener: Dr.Harit Priyadarshi (Head of Department, Civil Engineering)

Activity Coordinator: Mr. Waseem Ahmad Khan, Assistant Professor, Civil Engineering)

1. Prof.(Dr.) Saif Ullah Khan , AMU, Aligarh
2. Prof. (Dr.) Ravi Kant,
3. Dr. Mahesh Kumar, Professor, DCE, AMU, Aligarh.
4. Dr. Ashok Purohit , Director , Research Unit, MU, Aligarh.
5. Dr. Abdul Wadood Siddiquee , Director Academic Research, MU, Aligarh.
6. Dr. Harit Priyadarshi , Head, DCE, MU, Aligarh.

Organizing Committee:

1. Prof. Mahesh Kumar (Professor)
2. Mr. Nasim Khan (Assistant Professor)
3. Dr. Haider Ali (Associate Professor)
4. Dr.Shagupta Parveen (Assistant Professor)
5. Dr. Talat Anjum (Assistant Professor)

“World Environmental Day 2023” Schedule

11.00 a.m. onwards

(5th June, 2023)

Guest Lecture on “Plastic Pollution & Its impact on Environment”, in Department of Civil Engineering, Mangalayatan University, Aligarh, Uttar Pradesh, India.

Event: How to enrich vocabulary?

Category of the Event: Language and Communication

Keynote Speaker: Dr. Anuradha Yadav

No. of Participants: 66

About the Event: The Department of Arts organized a seminar on "How to enrich vocabulary". The objective of the seminar was to make the students aware about the role of vocabulary for effective English.. The webinar was presided over by the Vice chancellor of the university and was attended by Prof. Jayanti Lal Jain, Dr. Dinesh Sharma and the other dignitaries and faculty of the university. A number of scholars from other universities joined the seminar.

The keynote speaker, Dr. Anuradha Yadav is a renowned scholar & experienced personality in academic.

. She presented her thoughts clearly and in a lucid way. The seminar was coordinated by Dr. Deepshikha

and the technical support was provided by Mr. Tarun At the end of the seminar a healthy question &

answer session was organized to enrich the knowledge of the participants.

Event: Barriers to communication and its importance.

Keynote Speaker: Dr. Deepshikha Saxena

No. of Participants: 68

About the Event: The Department of Arts organized a seminar on "Barriers to Communication and its Importance. The objective of the seminar was to make the students aware of various types of the barriers of the communication & how to overcome from barriers to communication. The seminar was presided over by the

Vice chancellor of the university and was attended by Prof. Jayanti Lal Jain, Dr. Dinesh Sharma, Dr. Y. P. Singh and the other dignitaries and faculty of the university. A number of scholars from other universities joined the seminar. The keynote speaker, Dr. Deepshikha Saxena is an experienced personality in academic. . She presented her thoughts clearly and in a lucid way. The seminar was coordinated by Dr. Shagufta Parveen and the technical support was provided by Dr. Anuradha Yadav. At the end of the seminar a healthy question & answer session was organized to enrich the knowledge of the participants.

Faculty of Science

Event: Debate on World Tobacco Day (Theme-Tobacco-Threat to our Environment)

Category of the event: Life Skills (Health and Hygiene)

Date: 31/05/2023

Organizer: Agriculture Department

No. of Attendees/Participants:22 students +10 faculties

Keynote speaker/Resource Person: Dr. Syed Danish Yaseen Naqvi

Syed Danish Yaseen Naqvi, obtained degrees of M.Sc and Ph.D in Plant Pathology (Mycology)with the specialization of Bio -

pesticides from Sam Higginbottom University of Agriculture, Technology and Sciences , Allahabad, India in 2006 and2010

respectively. He joined as an Assistant Professor (Mycologist)in December 2010in the Department of Plant Protection,

Hamelmo Agricultural College, Keren, Eritrea. Recently he joined dated on 17 th November 2020 as Associate Professor&

Head in Department of Agriculture, Mangalayatan University, Beswan, Aligarh. He handled research project as Principal

Investigators/ Co -PI funded by Japan International Cooperation agency, National Commission for Higher Education, Eritrea

and Eritrean Research Fund. 'Young Scientist', 'Scientist of the Year in 2018' and ' Dr. A. P. J. Abdul Kalam Scientist

Award in 2020' were awarded by the Society of Tropical Agriculture, India.

About the topic: Many people are unaware of how damaging smoking and chewing tobacco are to their lives and how passive

smoking can affect your loved ones who stay with the smoker most of the time. everyone must vow to stop using tobacco and

products made from it for life. It is never easy to leave the habit of smoking or chewing tobacco.

The main aim of this event was to create an awareness of the ill effects of tobacco and not to follow the practice in the future.

On the 31st of May, an event in the department was organized by the departmental faculty and some students who volunteered.

The program began with the HoD, Dr. Syed Danish Naqvi giving a welcome speech and presentation regarding tobacco day.

We addressed everyone present there and gave a small speech at the event.

Dr. Syed Danish spoke on the ill effects of tobacco and its addicting effects. A debate was also held on " No Tobacco" for the senior

students. They came up and spoke for and against the topic.

The Day was concluded with the awakening message to the youth against tobacco by Dr. Vikas. The event helped a lot in contributing

knowledge and awareness to the youth, especially teenagers who often find themselves in the trap of smoking and consuming

tobacco directly or indirectly.

Through this awareness program, we can improve the health of the youngster's lungs and increase the chances of living a long

and healthy life . In the end, we learned how harmful cigarettes are for students and that our health in the long run is more

important than being cool or popular.

Students and Faculties participated in the Program

Event: How to speak effectively in public?

Keynote Speaker: Dr. Shagufta Parveen

No. of Participants: 49

About the Event: The Department of Arts organized a seminar on "How to speak effectively in public?". The objective of the seminar was to make the students aware about communication & its importance in modern scenario. As speaking is the most

important act of human being in life. As we know that modern public speaking scholars normally use a classification system of three general purposes: to inform, to persuade, and to entertain . Public speakers are leaders who are able to inspire their audience to work harder to achieve their goals . A mastery of public speaking allows you to relate to the audience and gain their trust. As a skilled public speaker, you become likable and believable, and you will be able to inspire and even entertain the crowd . The seminar was presided over by the Dinesh Sharma and the other dignitaries and faculty of the university. A number of scholars from other universities joined the webinar. The keynote speaker, Dr. Shagufta Parveen is a experienced personality in academic. . She presented her thoughts clearly and in a lucid way. The seminar was coordinated by Dr. Deepshikha Saxena and the technical support was provided by Dr. Anuradha Yadav. At the end of the seminar a healthy question &

Institute of Applied Sciences Event Report

In-House Seminar on "Charged Particle Motion in E and B Fields"

Date: 01 June 2023

Venue: Shipra Hall, Room Number 002

Timings: 9:00 am to 10:00 am No. of Faculty and Students: 79

Speaker: Dr. Y. P. Sing, Professor of Physics

Dr. Singh did BSc (Hons.) Physics in 1999 and MSc Physics in 2001, from Aligarh Muslim University,

Aligarh. He has been the recipient of prestigious scholarships, such as Junior Research Fellowship (JRF)

and Senior Research Fellowship (SRF) from the Scientific and

Industrial Research (CSIR), GOI in the research area of Solar Physics. He did MPhil leading to PhD in 2004

and 2008 respectively from the Aligarh Muslim University, Aligarh in the field of Solar Physics. In his

doctoral these he studied Cosmic Rays Modulation of Galactic Cosmic Rays Intensity in the Heliosphere,

in which he discussed the recurrent modulations. This work has been successfully published in the peer

reviewed Journals of International repute like Solar Physics (Springer -Nature), Journal of Atmospheric

and Solar-Terrestrial Physics (Springer), Journal of Geophysical Research (American Geophysical Union)

and Astronomy and Astrophysics (A&A) etc.

Behaviour of a charged particle changes when it enters in an external electric or magnetic field, which

depends on entry of orientation. When a charged particle enters in the parallel electric field it will either

accelerate or decelerate depending on the nature of the charged particle. However, particle follows

parabolic path in a perpendicular electric field. This application is well used in Cathode Ray Oscilloscope

Path of a particle in E and B fields

Magnetic forces are always perpendicular to the plane containing the $\vec{V}$ and $\vec{B}$, hence magnetic forces

do not do work on a charged particle. When a charged particle moves along the parallel magnetic field it

remains un-deflected in the field as the angle between $\vec{V}$ and $\vec{B}$ is zero and sine of θ is zero. When a

particle enters in a perpendicular magnetic field it experiences a net inward force centred towards a

fixed point and the particle moves a circular path of radius r given by qB/mv . However, when a particle

makes an angle θ with the field direction, the particle follows a Helical path. Theory of such motion is

used to understand the concept of Magnetic Mirror and Magnetic Bottles.

On 01 June 2023, an in-house seminar on "Charged Particle Motion in E and B Field" was conducted at

Shipra Hall, Room Number 002. The seminar aimed to enhance the understanding of the motion of charged particles in electric (E) and magnetic (B) fields. The event was organized by Institute of Applied

Sciences and was well-attended by students and faculty members.

The seminar commenced promptly at 9:00 am, with Professor Y. P. Singh delivering a comprehensive

presentation on the topic of charge particle motion in E and B fields. The speaker skilfully explained the

fundamental concepts and principles governing the behaviour of charged particles in these fields,

providing real-life examples and practical applications.

The session proved to be highly informative, as Professor Singh elucidated the interplay between

electric and magnetic fields, illustrating their impact on charged particle trajectories. The audience

actively participated by asking insightful questions and seeking clarifications on specific aspects. At the

end of the seminar, Professor Singh assigned an optional assignment on the "Aurora and Van Allen

Radiation Belt" for those interested in exploring the subject further. This additional task provided an

opportunity for students to deepen their understanding and apply the knowledge gained during the

session. The seminar witnessed a vibrant participation from students across various disciplines. A total

of 73 students from the B.Tech, B.Sc, B.Sc. B.Ed. and BCA programs attended the seminar. Their enthusiastic presence added to the interactive and engaging atmosphere of the event. Seminar Lecture on "Charged Particle Motion in E and B Fields".

The in-house seminar on "Charged Particle Motion in E and B Field" was a resounding success. Professor

Y. P. Singh's expertise and engaging presentation style captivated the audience, fostering a better

understanding of the topic. The presence of other esteemed faculty members added further value to

We extend our gratitude to all the participants, including the students and faculty members, for their

active involvement and contributions. Such events serve as platforms for intellectual growth and

exchange of knowledge within our institution.

We look forward to organizing more informative and stimulating seminars in the future, aiming to nurture a

culture of continuous learning and academic excellence.

Report of the events.

Events: Yoga for flexible body

Category of the events: Yoga Activity

Key note speaker / Resource person: Miss Bhavana Raj

Details of The Events:

Venue: Yoga and Meditation center.

Date: 22/ May /2023

Timing: 7:00 to 8:00 A.M

A Yoga camp was organized at Mangalayatan University Aligarh. The topic of the yoga for flexible

body. Muscle stiffness most commonly arises after the overuse of skeletal muscles , which tends to

happen after a long period of minimal motion (e.g., after extended bed rest) or after engaging in new

exercises.. while discussing these problems mis Bhavna got various type of yoga and give complete

information about yoga

Yogasan for flexibility

- Yogic sukshma
- Surya Namaskar
- Chandra namaskar
- paramparagat dand baithak
- bhastrika Pranayam
- Nadi shodhan Pranayam

Overall the yoga program in the university was a great success all the preparation celebration and

participation outstanding. Everybody from Students and teachers to non teaching staff comes together to

make this event successful. this event had a very positive impact on creating awareness about the benefits

of Yoga in human life.

Bhavana Raj Head

Department of Education

Event: Language and Communication

Category of the Event: How to speak English fluently

No. of Participants: 111

About the Event: The Department of Education organized a Seminar on the language and communication. In this program the speaker Dr. Anuradha Yadav delivered his lecture and interacted

with the students about speaking English fluently. He told about the English language that how English

connects the whole world, so it is important to know it.

The seminar was presided over by the Vice chancellor of the university and was attended by Prof. Jayanti

Lal, Dr. Rajeev Sharma, Dr. Y.P. Singh, Dr. Saurabh Kumar and the other dignitaries and faculty of the

The keynote speaker Dr. Anuradha Yadav , a renowned scholar and faculty of department of arts, Mangalayatan University, Aligarh, presented his thoughts clearly and in a lucid way. The seminar was

coordinated by Dr. Anuradha Yadav and the technical support was provided by Dr.

Deepshikha Saxena. At the end of the seminar a successful question and answer session was organized

which increased the knowledge of the participants.

Date: 17/05/2023

Event: "Relevance of communication in globalization"

No. of Participants: 156

About the Event: The Department of Arts organized a Seminar on the skill development program "Relevance of communication in globalization". In this program the speaker Dr. Deepshikha

Saxena delivered his lecture and interacted with the students about the major feature involved for

effective speaking. The Program benefitted the student's skills and it's helpful for job seeking in special

field. The seminar was presided over by the Vice chancellor of the university and was attended by Prof.

Jayanti Lal, Dr. Dinesh Sharma, Dr. Y.P. Singh, Dr. Saurabh Kumar and the other dignitaries and faculty

of the university.

The keynote speaker, Dr. Deepshikha Saxena a renowned scholar and faculty of department of arts,

coordinated by Mr. Tarun Sharma and the technical support was provided by Dr. Durbadal

Outcomes: At the end of the seminar a successful question and answer session was organized which

increased the knowledge of the participants.

A Report on Survey Camp

(03 May 2023 to 31 May 2023)

Mangalayatan University, Beswan,

Aligarh – 202145

Mr. Waseem Ahmad Khan

(Coordinator of Event)

Assistant Professor, DCE

REPORT ON SURVEY CAMP-2023

The motive of the survey camp was to provide surveying training to the students and to enhance their various

skills including workmanships, co-operation abilities, swiftness and prior to these was exquisite endeavour.

INSTRUMENTS USED:

Following instruments were used to perform activities which comprised surveying, distributed and held by each

group separately.

i- Chain with its accessories.

ii- Auto level with tripod stand, leveling staff.

iii- Theodolite with tripod.

iv- Plane Table with tripod and alidade.

Ten days survey camp were divided into two phase for Diploma in Civil engineering (6 th semester) students of

Batch 2020. In first phase 9 days were for field work at M.U.Campus and in second phase one day for

calculation, result analysis, presentation/viva. Total 4 students were engaged and present at the survey camp,

which were divided into shift-I (9 a.m. to 11:30 a.m.) and shift-II (1:30 p.m. to 4:00 p.m.). The group leader was

provided with all the essentials equipments & instruments. Group monitored by our faculties were Mr.Waseem

Ahmad Khan (Camp In charge), Dr. Harit Priyadarshi (HoD), Mr. Nasim Khan

(Assisatnt Professor) including non teaching staffs Mr.Muniram Kunthal , Bhupinder Kumarr and Vijay Kumar.

Commencing with 1st Day (On 03 May):

It was decided that the students must be performed various exercise in all shifts and attendances taken two

times at the ground & lab physically. The weather seemed clear so after a visit of the survey field. After having

the attendances and students were informed regarding the task on that day before going to the field.The task

chaining was on that day.

In first day, Chain traversing In this how to range /align a line between various stations in and also calculate the

area of a given field (from Kirti stambh towards temple) by chain triangulation with the help of offset method

which was completed its on drawing sheets by all students with full enthusias.

On 2nd& 3rd Day (04 & 10 May) :

In this, Levelling of various stations with help of Rise and fall, H.I. method and also draw its road profile marked

between behind of Admission cell towards wall of survey lab in Sabarmati Block about a mean distance of 240

On 4th& 5th Day (11 & 17 May) :

The next task was measurement of horizontal angles of closed traverse and vertical angles of various electric

poles included their angle of elevation and angle of depression with both face left and right observations.

On 6th& 7th day (18 & 24 May):

In this, a ll the instruments were evenly handed over among group leaders and work was started at 10:00 a.m.

Then groups were taken and shown their respective starting stations. Group was performed by trigonometric

observations for calculating height of an electric pole and it's Reduce Levels like horizontal,

vertical. In next day,

horizontal and vertical distance of two stations for uneven ground surface with the help of trigonometrically

On 8th& 9th Day (25 & 26 May):

Further the activity regarding plane table surveying for the determination of area of closed traverse with the

help of radiation method in shift-I near Mahanadi block and in next day, plotting of inaccessible points with the

help of intersection method for platform(Near kirti stambh) at M.U.campus.On that day, students completed

their calculation work, graphs and sketches of all instruments used for camp file preparation in all respect.

On 10th Day (31 May):

Group wise viva-voice and its presentation was checked /analysed by our all faculty members of our

department.The best group was chosen out on the basis of their performance, knowledge gained and activities

performed. At last closing ceremony of survey camp was done,Where all students were addressed and

encouraged by Dr. Harit Priyadarshi (Associate Professor & H.o.D.) and our other faculty member Mr. Nasim Khan

in the field to motivate students about what they can do for a bright future as civil engineer in the concern field.

We are thankful to mainly our Finance officer & HoD sir for their approval regarding refreshment & guidance in

conducting this successfully and to active participation of students during this whole duration of camp.

According to the students,the camp was full of knowledge & enthusiasm.There was so much in those ten days and

surely they attained what was meant to be.The practical knowledge of surveying was precisely and intrestingly

attained by the students with the concern of teachers.Overall it was a complete task & if you ask, nobody could

define this exercises in single word except "THE INCREDIBLE CAMP".

Levelling by Height of Instrument(H.I.) Method

Chain Traversing

Transit Theodolite

Measurement of Horizontal Angles (By Theodolite)

Measurement of Vertical Angles (By Theodolite)

Height and Distance Problem (Case-I)

Height and Distance Problem (Case-II)

By Radiation Method By Intersection Method

Plane Table Survey

Calculation work in lab

Student list (Diploma Engineering VI th semester)

One-Week Workshop

“EARTH DAY 2023”

Date: 22nd April to 01 May 2023

Venue: Department of Geology

Aligarh Muslim University, Aligarh

(Under G20 – University Connect Programme) Time:

10:00 am to 2:00 pm.

CONVENER: Prof. M.E.A. Mondal , Department of Geology , Aligarh Muslim

University, Aligarh.

ACTIVITY COORDINATOR: Dr. Harit Priyadarshi , Associate Professor &

Head Department of Civil Engineering, Mangalayatan University, Aligarh.

NO. OF PARTICIPANTS: 185 (Including AMU and other

FIRST PRIZE IN POSTER COMPETITION: Miss. Anjali Chaudhary ,

Mangalayatan University,

THIRD PRIZE IN POSTER COMPETITION: Miss Gunjan Yadav ,

ABOUT EARTH DAY:

To Celebrate India’s G20 Presidency and in connection with G20 University connect

Programme, the Department of Geology propose to celebrate Earth day 2023 during

April 22 May 01, 2023. Earth Day is celebrated to show our support for our planet earth

and make pledges to do our bit in protecting it. We have only one earth. We must

protect our earth by contributing to the environment by planting trees, reducing our dependence on fossil fuels, cleaning up the waste. The proposed events will raise awareness of the importance of protecting our planet and its natural resources. Our planet needs our investment now. It is of paramount importance that we come together in order for a green, prosperous and equitable future. Theme of Earth Day 2023 we must “invest Planet ‘now before it is too late.

The Objectives of this year’s earth day aims at:

1. Involving emerging technologies to engage one billion global citizens in earth day challenge 2023 by collecting one billion data points to measure air quality, water quality, pollution and human health.
2. To advocate the citizens to mobilize and take action in the worldwide event by volunteering in various activities like clean ups and various other campaigns.
3. To provide education to the citizens on the environmental pollution and the need for protecting the earth.

Dr.Kalachand Sain, J.C. Bose National Fellow, Director, Wadia Institute of Himalayan Geology (An Autonomous Institute of DST, GOI), Dehradun.

Geohazards in the Himalaya and Plausible Mitigation

In-House Seminar on “Unlocking the power of Vedic Mathematics”

Date: 19 April 2023

No. of Faculty and Students: 75

Dr. Swati Agarwal earned her Ph.D. in Mathematics from Dayalbagh Educational Institute (Deemed University), Agra and has

accumulated more than four years of teaching experience in the field. Her primary research interest lies in Operations

Research. She has published about 9 research articles in various international journals of repute and holds 4 books to her

credit. Dr. Agarwal has presented her research papers at over 10 national and international conferences and has attended more

than 15 workshops and FDPs. Furthermore, she has reviewed few research articles for renowned journals such as Opsearch

(Springer-Nature), Annals of Operations Research (Springer -Nature), and International Journal of Systems Science (Taylor &

Francis). She is also a life member of several professional bodies, including the Indian Science Congress, MathTech Thinking

Foundation, International Association of Engineers, etc.

“Vedic Mathematics ” is an ancient and holistic system of mathematics that originates from the Indian subcontinent. This

system, which finds its roots in the Vedas, ancient sacred texts of India, presents a unique and efficient approach to solving

mathematical problems. What sets Vedic Mathematics apart is its ability to simplify complex calculations and provide

alternative methods for solving arithmetic, algebraic, and geometric problems.

Evolution of Numerals in Ancient India and Sixteen sutras of Vedic Mathematics

At its core, Vedic Mathematics is based on 16 primary Sutras (aphorisms) and 13 secondary Sutras, which serve as guiding

principles for mathematical operations. These Sutras offer quick and elegant solutions to mathematical problems that are often

considered challenging using conventional methods. Moreover, Vedic Mathematics encourages mental calculation, making it a

valuable tool for both students and professionals in various fields.

This seminar on Vedic Mathematics aimed to introduce participants to this remarkable system, shedding light on its historical

significance, underlying principles, and practical applications. Through this event, attendees gained a deeper understanding of

how Vedic Mathematics can simplify and expedite mathematical calculations, making it a powerful skill to possess in the

The In-house Seminar on "Vedic Mathematics" took place on the 19th of April 2023, at Shipra Block , Room Number 002,

from 10:00 am to 11:00 am. The seminar was organized by the Institute of Applied Sciences and was well attended by 59

students and faculty members who were eager to delve into the fascinating world of Vedic Mathematics.

Dr. Agarwal commenced the seminar with an engaging introduction to the history and significance of Vedic Mathematics. She

elaborated on the ancient roots of this mathematical system and how it can be applied in modern -day calculations to save time

and enhance problem-solving abilities.

During her presentation, Dr. Agarwal covered various topics related to Vedic Mathematics, including the Sutras, their

applications, and practical examples to demonstrate the simplicity and effectiveness of this approach. Her teaching style was

not only informative but also interactive, encouraging the audience to actively participate in solving mathematical problems

using Vedic techniques.

The seminar witnessed the active participation of total 69 students pursuing diverse disciplines, including B .Sc., B.Sc. B.Ed.,

B.Tech. and BCA along with 6 faculty members of Institute of Applied Sciences . This diverse representation underlines the

universal applicability and relevance of Vedic Mathematics across various educational

disciplines, providing attendees with a

well-rounded and inclusive learning experience. This event provided valuable insights into Vedic Mathematics and left

attendees with a newfound appreciation for this ancient mathematical system. The speaker's expertise and engaging delivery

ensured that the seminar was both educational and enjoyable for all participants.

The In-house Seminar on "Vedic Mathematics" conducted by Dr. Swati Agarwal was a resounding success. It offered a unique

opportunity for faculty members and students to explore an ancient yet highly relevant mathematical system. The seminar not

only enriched the mathematical knowledge of the attendees but also inspired them to incorporate Vedic Mathematics

techniques into their daily calculations.

We extend our heartfelt gratitude to all the participants, including the students and faculty members for making the seminar a

memorable event by their active involvement. We hope that such enriching academic sessions will continue to be a part of our

institution's educational endeavors, empowering our students and faculty with diverse knowledge and skills.

Educational Tour

National Gallery of Modern Art, New Delhi

Date:
11-04-2023

Category of Event:

Educational Tour, National Gallery of Modern Art (NGMA), New Delhi About the Tour:

To make aware DVPA students about master pieces of arts, an Educational Tour was planned to visit National Gallery of

Modern Art (NGMA), New Delhi.

Students and Faculty departed from campus in the early hours of 11 -4-23 with a huge applause and enthusiasm. Twenty

students of BFA and MFA programmes and three senior faculty including HoD, DVPA (Dr. Poonam Rani) proceeded for this

educational tour. After reaching Delhi around 11.30 AM, the team first visited the campus of NGMA near Janpath. All the

budding artists were moved by the displayed artefacts along with their intricate ambience. Dr. R.K. Ghosh explained the

thoughts and the background of each art work. Students stayed in NGMA up to lunch.

After taking the lunch, students and staff moved to National Museum, Delhi. Dr. Poonam Rani, explained the historical

background of Indian art with the examples of evolution of art in the different periods of history. The students curiously

observed and took notes of all important facts and figures for their future references.

After a very successful tour throughout the day, the students have returned to the campus in the late evening hours.

Events: Yoga Camp for Cervical spondylosis 2023.

Details of The Events

Venue: Mangalayatan University Shipra Hall.

Date: 5/APRIL/2023 TO 6/APRIL/2023

Number of Candidates - 25

A yoga camp was organized at Mangalayatan University Aligarh. The topic of the yoga camp was Cervical Spondylosis. spondylosis or cervical osteoarthritis is a physical condition caused by the wear and tear of bones and cartilage in the neck (cervical vertebra) region. This degeneration of the bones and cartilage causes chronic neck pain and can disrupt simple day - to-day activities. While discussing these problems Miss Bhavna got various types of yoga done and gave complete information about Yogasana.

Yoga exercises for cervical spondylosis

Start your journey to a pain-free life with these yoga poses:

Bhujangasana (Cobra Pose)

Ardha Matsyendrasana (Sitting Half-Spinal Twist)

- Dhanurasana (Bow Pose)
- Marjariasana (Cat Pose)

Setu Bandhasana (Bridge Pose)

- Matsyasana (Fish Pose)

Overall, the Yoga program in the University was a great success. All the preparation, celebration, and participation were outstanding. Everybody, from students and teachers to non-teaching staff, comes together to make this event successful. This event had a very positive impact on creating awareness about the benefits of yoga in human life.

Events: Yoga for concentration

Date: 25/ Feb /2023

A Yoga camp was organized at Mangalayatan University Aligarh. The topic of the yoga for concentration. Loss of focus can happen for many reasons. They include mental and physical health

problems, stress, the use of some medications, and a lack of sleep or and inadequate diet . . while

discussing these problems mis Bhavna got various type of yoga and give complete information about

Event: Confidence building

Category of the Event: Soft Skills

Keynote Speaker: Dr. Gaurav

No. of Participants: 61

About the Event: The Department of Arts organized a seminar on "Confidence Building". The objective

of the seminar was to make the students aware of various activities to make self positive & how it is

useful to make self effective & decent in professionalism. Confidence building is possible when we listen

everything keenly & attentively. The speaker explained that how personality is a silent mode of

communication & how to overcome from barriers to communication. The seminar was presided over by

the Vice chancellor of the university and was attended by Prof. Jayanti Lal Jain, Prof. R.K. Sharma, Dr.

Dinesh Sharma, Dr . Y. P. Singh and the other dignitaries and faculty of the university. A number of

scholars from other universities joined the seminar

The keynote speaker, Dr. Gaurav is a renowned scholar and an experienced personality in academic. . She

presented her thoughts clearly and in a lucid way. The seminar was coordinated by Dr. Deepmala and the

technical support was provided by Dr. Preeti. At the end of the seminar a healthy question & answer

session was organized to enrich the knowledge of the participants.

Capacity Development and Skill Enhancement Initiatives

Program: Cultivation of Honeybee

Category of the event: Awareness of trends in technology

Date: 23 /01/2023

Venue: Agriculture Farm

No. of Attendees/Participants: 29 students and 10 Faculties

Keynote speaker/Resource Person: Prof. Pramod Kumar, Professor, Department of Agriculture, Mangalayatan University, Beswan, Aligarh

Pramod Kumar obtained the degree of M.Sc. and Ph.D. in Agricultural Chemistry with the specialization

of “ Salt Affected Soils of Bulandshahar District and their Reclamation” from Chaudhary Charan Singh

University, Meerut, India. He joined Chander Shekhar Azad University of Agriculture and Technology,

Kanpur in 1983 and rendered thirty -six years of Yeoman’s Service covering areas of teaching research,

extension, and seed production. He published thirty Research Paper, three Lead Papers, two

books/Booklets, and many popular articles and obtained five awards during his service. He had been the

charge of the Regional Agricultural Research Station and Seed Project in CSAUAT, Kanpur for more

than twenty -five years. Presently, He is working as a Professor and Head of the Department of Agriculture, at Mangalayatan University, Beswan, Aligarh.

About the Topic: The word ‘apiculture’ comes from the Latin word ‘apis’ meaning bee. So, apiculture or

beekeeping is the care and management of honey bees for the production of honey and wax. In this

method, bees are bred commercially in apiaries, an area where a lot of beehives can be placed. Usually,

apiaries are set up in areas where there are sufficient bee pastures – such as areas that have flowering

plants. Bees are mainly reared for their honey. Besides that, we also obtain beeswax through beekeeping.

Bees produce honey from the sugary secretions of plants. Although honey is an important ingredient in

many food dishes, beeswax holds a lot of commercial significance too. It is used in the cosmetic and

medical industry, as well as a coating for cheese, and as a food additive. It is also used as the main

component for making candles and preparing polishes for shoe, furniture, etc.

Program Description: Prof. Pramod started the program with a small introduction about the honeybee.

He stated that Honey Bees are one of the most recognizable insects and are the most domesticated bee

species in the world . They are somewhat variable in color but are usually brown with a banded dull

yellow and brown abdomen. The head, thorax, and abdomen are densely covered in hair . He also

explained the advantages of honeybees and gave knowledge about how they should be cultivated with

safety to the students. He mentioned three most important points for cultivating honeybees in India i.e. (i)

Knowledge of the nature and habits of bees. (ii) Selection of a suitable location for keeping the beehives.

(iii) Management of beehives during different seasons.

Conclusion: Apart from honey, bee wax is also produced by honeybee which is used in preparing cosmetics and also used in industries for various works. To make the practice of beekeeping successful,

one should have proper knowledge about the nature as well as habits of bees.

STUDENTS PARTICIPATED IN LEARNING ABOUT CULTIVATION OF HONEYBEE

Program: Cultivation of Mushroom

Date: 15 /01/2023

No. of Attendees/Participants: 40 students

About the Topic : Unlike plants, mushroom cultivation is an indoor activity . It is possible to grow

mushrooms in a particular season under natural conditions. It is possible to grow mushrooms throughout

the year under controlled conditions. An additional advantage is that very little land is required for

growing mushrooms. A mushroom, also called toadstool, is the fleshy, spore -bearing fruiting body of a

fungus, typically produced above ground on soil or on its food source . The fleshy, edible fruit bodies of

numerous macrofungal species are called edible mushrooms.

Program Description: Prof. Pramod started the program with a brief introduction to mushrooms. He

said that In India, mainly four types of mushrooms, viz., button, oyster, paddy straw, and milky

mushroom are cultivated. Button mushroom accounts for 3/4th of the total mushroom production in the

country. Presently India is producing 201000 tons of mushroom and is ranked fifth in the total mushroom

production. He also mentioned the present scenario of mushrooms, he said that the production of mushrooms is increasing at the rate of 7%. Whereas the growth rate in India is between 30 -40%.

Moreover, mushroom production is expected to increase to 6 lakh metric tonnes by 2025.

Students and Faculties asked many questions regarding mushroom cultivation, which were answered by

Prof. Pramod. He also showed the mushrooms that he had grown in his lab.

Conclusion: Mushroom is valuable not only as food but also for its medicinal properties and the best

source of protein. The export of mushrooms is gradually increasing due to the high abroad demand.

Production of mushrooms is a very profitable industry. Household women and youth can be effectively

involved in this business.

In conclusion, we can say that mushroom production can boost the economic condition of rural youth and

rural women and thereby can help to improve the rural economy of the district as a whole.

Packaging of Mushroom

CULTIVATION OF MUSHROOM

University Library and Deapartment of Library and Information Science

Event (Topic):Training on 'Mangalayatan University eLibrary'

Date& Time: January13, 2023 (11.00 am -12.30 pm)

Organizer:University Library

Activity: Training/Workshop

Category of the event: Soft Skill

Participants: 37

University Library and DLIS of Mangalayatan University organized the training on "Mangalayatan

University eLibrary" on January 13, 2023 (11.00 am -12.30 pm) for faculty members, staff, students and

research scholars of Mangalayatan University to access the available library e-resources from anytime

anywhere. Libraries always strived hard to be committed to ensure full access to their range of services

and information sources and facilities to their clientele. Libraries have to invest heavily on the electronic

resources such as e-journals, e-books, and other databases. The best value from these electronic resources

and their services is highly expected. The optimum usage of these resources would be possible only when

proper and adequate access facilities are provided. Generally, all such online resources are made available

'anytime' through the library's website and over the IP range of the institute or university and on the

campus. But, the faculty members, research scholars, students on overseas assignment and others also

need online access to all such e-resources from wherever they are. This is possible with the help of ICTs

using remote access tools.

Dr. Ashok Kumar Upadhyay, University Librarian and Head DLIS welcomed the Expert and all the

The speaker was Ms. Vanshika Gautam, Customer Success Executive, with the Research Intelligence

portfolio of Rfread. She described about different modules of eLibrary along with some important part

described with practical presentation which really help to the library users to search the Mangalayatan

University Library Resources in a very systematic manner as well as to collect desired and relative

information remotely from anytime and anywhere.

All the participants actively participated in the training session and cleared their doubts in questions

answers session. The training session was very interactive and informative.

Date: 09/01/2023

Keynote Speaker: Dr. Manzoor Ahmad Najar

No. of Participants: 67

About the Event: The Department of Arts organized a seminar on "Barriers to Communication and its

Importance. The objective of the seminar was to make the students aware of various types of the barriers

of the communication & how to overcome from barriers to communication. The seminar was presided

over by the Vice chancellor of the university and was attended by Prof. Jayanti Lal Jain, Prof. R.K.

Sharma, Dr. Dinesh Sharma, Dr . Y. P. Singh and the other dignitaries and faculty of the university. A

number of scholars from other universities joined the seminar.

The keynote speaker, Dr. Manzoor Ahmad Najar is a renowned scholar & experienced personality in academic. He presented her thoughts clearly and in a lucid way. The seminar was coordinated by Dr.

Mohd. Jalauddin and the technical support was provided by Dr. Dubadal Bhattacharya Dr. Madhuwala

Maurya, At the end of the seminar a healthy question & answer session was organized to enrich the

knowledge of the participants.

Program: Practices of Natural Farming

Date: 06 /01/2023

No. of Attendees/Participants: 35 students +7 faculties

Pramod Kumar obtained the degree of M.Sc. and Ph.D. in Agricultural Chemistry with the specialization

than twenty -five years. Presently, He is working as a Professor and Head of the Department of

About the Topic: Natural Farming aims to drastically cut down production costs by encouraging farmers

to prepare essential nutrients and plant protection materials with locally available resources , thereby

ending the need for external and commercial inputs like fertilizers and other chemicals.

Program Description: The program was started with a brief introduction to Natural farming to the

students. He said that in natural farming there is no plowing, no tilting of soil, and no fertilizers, and no

weeding is done just the way it would be in natural ecosystems . Natural, farm -made pesticides like

Dashparni Ark and Neem Astra are used to control pests and diseases. Later, taking the program forward,

Dr. Sharda Dubey explained the advantages of Natural Farming. He also discussed the aim of Natural

Farming is to drastically cut down production costs by encouraging farmers to prepare essential nutrients

and plant protection materials with locally available resources , thereby ending the need for external and

commercial inputs like fertilizers and other chemicals.

Conclusion: Natural farming is a sustainable and resilient farming approach that aligns with the

principles of ecological balance and biodiversity . While it faces challenges, strategic interventions can

help overcome these and pave the way for a sustainable, healthy, and resilient food system. Natural

farming would benefit the environment by the animals fertilizing the grass and eating it, would benefit the

animals involved because they are living the way they are supposed to and would benefit the humans that

would consume the animals and products because it is natural with no harmful chemicals or hormones.

Furthermore, natural farming is a much better method of food production than industrial farming because

industrial food processing is closely linked to foodborne illnesses.

Practices of Natural Farming at Agricultural Farm

Students participated in the program

Date: 05/01/2023

No. of Participants: 55

About the Event: The Department of Arts organized a seminar on “How to speak efftetely in public?” The

objective of the seminar was to make the students aware about communication & its importance in modern scenario. As speaking is the most important act of human being in life. As we know that modern

public speaking scholars normally use a classification system of three general purposes: to inform, to

persuade, and to entertain . Public speakers are leaders who are able to inspire their audience to work

harder to achieve their goals . A mastery of public speaking allows you to relate to the audience and gain

their trust. As a skilled public speaker, you become likable and believable, and you will be able to inspire

and even entertain the crowd. The seminar was presided over by the Vice chancellor of the university and

was attended by Prof. Jayanti Lal Jain, Prof. R.K. Sharma, Dr. Dinesh Sharma and the other dignitaries

and faculty of the university. A number of scholars from other universities joined the webinar.

The keynote speaker, Dr. Manzoor Ahmad Najar a renowned scholar and an experienced personality in

Maurya. At the end of the seminar a healthy question & answer session was organized to enrich the

In-House Seminar on "Introduction to Differential Calculus and its Applications in

Date: 01 December 2022

Venue: Shipra Hall, Room Number 002

Time: 9:00 AM - 10:00 AM

No. of Faculty members and Students: 85

Speaker: Dr. Hibah Islahi (Assistant Professor, Mathematics)

Dr. Hibah Islahi earned her Ph.D. in Applied Mathematics from Aligarh Muslim University in 2021. Commencing her teaching

journey in the same year at Mangalayatan University, she has been deeply involved in both teaching and research. Her

research pursuits primarily revolve around Applicable Analysis, Special Functions, and related fields. Driven by her passion for

academic exploration, she has contributed significantly to the scholarly community, with over 10 research papers published

in esteemed international journals. Additionally, she has showcased her research findings at various international

conferences, further solidifying her commitment to advancing the field of mathematics.

The seminar, titled "Introduction to Differential Calculus and its Applications in Engineering," served as a platform to bridge

the gap between theoretical mathematics and practical engineering applications. It aimed to provide the first -semester

B.Tech and BCA students with a foundational understanding of differential calculus and demonstrate its pivotal role in

various engineering disciplines.

The seminar commenced promptly at 9:00 AM in Shipra Hall, Room Number 002. Dr. Hibah Islahi began by introducing the

fundamental principles of differential calculus, explaining concepts such as limits, derivatives, and differentiation rules. Her

clear and engaging presentation style immediately captivated the audience.

The core of the seminar delved into real -world applications of differential calculus within the engineering domain. Dr.Hibah

illustrated how these concepts are utilized in different engineering branches:

Mechanical Engineering: Calculating velocity and acceleration of moving objects, analyzing stress and strain in materials.

Some basic application of Differential Calculus in Mechanical and Civil Engineering to determine velocity and slope.

Electrical Engineering: Understanding rates of change in electrical circuits, analyzing waveforms, and solving problems

related to voltage and current.

Civil Engineering: Determining slopes and deflections in structures, analyzing fluid flow, and modelling heat transfer.

Computer Science and Engineering: Optimizing algorithms and data structures, analyzing performance metrics, and

modeling complex computational processes.

Interactive problem -solving sessions were integrated into the seminar, encouraging active participation from the students.

This hands -on approach allowed students to apply differential calculus concepts to solve engineering problems, thus

reinforcing their comprehension.

The seminar concluded with a vibrant question -and-answer session where students eagerly sought clarification on various

concepts discussed during the seminar.

The In -House Seminar on "Introduction to Differential Calculus and its Applications in Engineering" proved to be an

enlightening and educational experience for the first -semester B.Tech and BCA students. Dr. Hibah Islahi's expertise and her

ability to bridge the gap between theory and practice left an indelible impression on the

audience.

This seminar played a pivotal role in emphasizing the importance of mathematics, particularly differential calculus, in the

field of engineering. It is expected that the knowledge gained during this seminar will serve as a solid foundation for the

students' future studies and careers in engineering.

We extend our sincere gratitude to all the faculty members and students for their enthusiastic participation, making this

seminar a resounding success.

Mangalayatan University, Aligarh Art

Exhibition "Abhivyakti"

Venue: Gomti Kala Kunj (DVPA Art Gallery)

Date: 21-11-2022

Time: 10.00am-01.00pm

'Abhivyakti, an unique painting, Sculpture and Digital art works exhibition was held at Gomti Kala Kunj (DVPA art gallery) on 21 st Nov. 2022. This artwork is displayed by the students of the department of Visual & Performing arts, Mangalayatan University, Aligarh.

Prof. KVSM Krishna, honourable Vice Chancellor of Mangalayatan University has inaugurated the exhibition with a huge applause and enthusiasm. Dr. Dinesh Sharma (Registrar), Prof. J. L. Jain, Dean

and several directors and Head of the departments were also visited the exhibition. After the

inauguration ceremony, VC Sir and all the dignitaries took a round of the gallery. All the budding artists

explained their thoughts and the backgrounds of each and every art work before the curious visitors.

Sculptures were based on certain themes, some landscape theme -based paintings are also very attractive and eye soothing. The intricate designs and application of soft colour scheme on all these art

works have added a grand attraction to the viewers. In his speech, the honourable Vice-Chancellor

expressed his views that a painting is the right medium to convey many inner thoughts of mankind

which sometimes we could not express through our words. Dr. Dinesh Sharma, reiterated the

importance of paintings and sculptures on human life. Prof. Jayantilal Jain, Prof. Ullhas Gurudas and all

the departmental HODs were present on this occasion.

Dr. Poonam Rani, HOD - DVPA expressed her happiness on this occasion and informed that the

University has plan to exhibit different art works of the renowned artists of India from time to time under

this unique initiative.

Glimpses of the Event

Date: 2nd November, 2022

Event: Expert Lecture on Integrating Participative Teaching Learning Pedagogy in

No. of Participants: 54

Prof. Dinesh Pandey has experience of over 25 years in teaching and administration. As of my career

in teaching, research and administration is concerned, I have the privilege of serving in the field of Education for over 23 years, I

have worked for over a decade in one of the most prestigious institutions in the holy city of Varanasi (1998 to 2008) including

services as the core member of inspection team in a group of institutions in my home town. I was duly approved by the University

as Lecturer/Asstt. Prof. in the Institute of Education, on 30th May 2008 wherein I have taught and managed successfully B.Ed. &

M.Ed. Classes and as Coordinator of the IQAC, NAAC of the Institute earned 'A' Grade from NAAC. I have also worked in

Central University of Tibetan Studies as a Guest Faculty and had presented the University to the NCTE for B.A./ B.Sc.B.Ed.

Recognition from NCTE. I have been associated with the University as a member of its Curriculum Development Committee

About the Event : Institute of Education and Research organized Expert Lecture on Integrating

Participative Teaching Learning Pedagogy in Classroom on 2nd November, 2022 at 11:30 AM in

Amrawati Block. The speaker of the day was Prof. Dinesh Pandey. He reiterated the need to

make teaching learning process participative and motivate the learners. In this age of ICT where

the learners are informed and have access to diverse means of learning. The teacher should make

earnest effort to make teaching learning process interesting. The goal should be to keep students

on-task maximally and off-task minimally.

Prof. Dinesh Pandey demonstrated the use of teaching aids and blackboard effectively. He also focused his discussion on use of Flipped learning techniques in the classroom where teacher shall

give reading task in advance and shall then direct the students to discuss in the classroom. In this

way all students shall get engaged in teaching learning activities.

Prof. Pandey also emphasized that teachers shall use projects and assignment method. Teacher shall organize seminar presentations by students to optimize learning.

The lecture was very informative and all students participated with enthusiasm. All teachers of the department were present in the lecture. Dr. Deepshikha Saxena, Head of the Department gave the vote of Thanks.

Mangalayatan University, Aligarh Institute of

Event Report Lecture Session on

‘Role of Creativity in Schools’

Date: 01-11-2022

Time: 11.00am-12.00pm

Venue: DVPA Department

Speaker: Dr. Ramkrishna Ghosh

Faculty of DVPA Department, Mangalayatan University, Aligarh

Dr. Ramkrishna Ghosh is an Associate Professor of Sculpture in the Department of Visual and Performing Arts, Mangalayatan University, Aligarh. He has 21 years of teaching experience. He is a

very creative teacher. He loves teaching.

A Seminar was organized by the Department of Visual & Performing Arts on 01.11. 2022. Dr. Ramkrishna Ghosh gave a Lecture on ‘Role of Creativity in Schools’. It was an interactive session.

Students asked many questions. Students received many unknown facts about creativity from this

In that seminar, 15 students were present. Dr. Poonam Rani, HOD of DVPA was also present

there. Mr. Vilas Palkhe, Dr. Premlata, Mr. Ajay Singh and Mr. Uday Singh were also present. It was

a very good Lecture Session.

'Role of Creativity in Schools' is such an important topic in today's life that NEP 2020 also has given special attention to this topic. Most of the people think that Creativity is rare. Only high IQs have creativity. Creativity can't be studied. Creativity can't be learned. Creativity is limited to arts subjects, The creative process is fun: it should not be taken too seriously, Creativity is an in-born trait, limited to the talented few. These are the myths which have been associated with creativity. In this Lecture Session, all these myths were discussed in a simple manner.

We need to know that we are all creative. There is no such thing as non-creative. Creativity lives

within all of us. Creativity can be visible in painting, film, dance, pottery, writing, fashion, gardening,

poetry, drawing, photography, flower arrangement, interior design,

cooking, knitting, the way you dress, or your creative thinking and curiosity and so on. The

list really is endless because our creative self expression is endless. But we must

remember that Creativity can be taught, Creativity can be developed.

Department of Library and Information Science

Central Library

Event (Topic): Training on Manupatra (Legal Database)

Date& Time: November 23, 2022(12.00 pm -1.00 pm)

Organizer: DLIS and Central Library

Participants: 54

In this ICT era everyone is focusing on doing research to update knowledge, to prove a theory and contribute to developing knowledge in a discipline. But significance of research comes through research related documents reading and writing. A researcher always thinks why research is important. There are many reasons research is important. Researcher learn a skill from

writing research papers, cases etc. But in the process of writing research, researcher mostly avoid

some important points to think before writing which actually tarnish the quality of research.

With this perspective DLIS and Central Library of Managalayatan University organized the training cum Workshop on "Manupatra" on 23 rd November 2022 for faculty

members,staff,students and research scholars of Managalayatan University.

Dr. Ashok Kumar Upadhyay, University Librarian welcomed the Expert and all the Participants.

The speaker was Mr. J.B. Singh, Areas Sales Managerwith the Research Intelligence portfolio of Manupatra Information Solution Pvt.Ltd .He briefly described about Manupatra database along with some important part described with practical presentation which really help everyone to search the database in a very informative manner as well as to collect desired and relative All the P articipants actively participated in the training session and cleared their doubts in questions answers session.The training session was very interactive and informative.

Dr. Deepmala, Assistant Professor, DLIS, Mangalayatan University, Aligarh gave Vote of Mangalayatan University, Aligarh Department of Visual and Performing Arts Painting Workshop –on

"Madhubani Painting "

Speaker: Mr. Subrata Das

Asst. Prof. Jamshedur, Jharkhand

Date: 20-10-2022

Time: 10.00am-01.00pm Venue: Shipra (Hall)

(well-known painter)

A Renowned artist and painter Mr. Subrata Das was Invited as Artist. He is a well -known painter. He is

International Book of Record (for wood Artwork) And two times winner of Jamshedpur Got Talent.

A painting Workshop was organized by Department of Visual & Performing Arts at Shipra Hall on 20 Oct.

2022, no. of students participated 25. In this workshop, the artist firstly discussed about the suitable

medium for painting. Due to the demand of the students, he decided to demonstrate water colour techniques on paper to depict the style of Madhubani. He talked about the preparation of paper surface

and how to use water colours. He said. Drawing is the foundation of making a suitable painting. He also

focused on the specific designs of subject matter illustrating a piece from Ramayana mythological stories.

At this point he advised students to develop their observation power. According to him, people

of the
madhubani region used to create this type of painting on the outer wall of their homes.
In that workshop, 25 students were present. All the students were very excited and learnt many things.
They asked a lot of questions. Dr. Poonam Rani said that this type of workshop is very helpful for all the
students. It develops students confidence and creativity. Prof. Debasis Chakroborty, Prof. Vilas Palkhe,
Dr. Ramkrishna Ghosh, Mrs. Premlata, Mrs. Deeksha Yadav and Mr. Uday Kumar were also present. It
was a successful workshop.
Madhubani paintings are a type of folk -art form. The painting of Madhubani is represented by line
drawings filled with bright colours and contrasts or patterns. Using natural dyes and pigments, this
drawing is done with a number of materials, including fingertips, twigs, brushes, nib-pens, and
matchsticks. It is classified by its eye -catching geometric patterns. The Madhubani paintings consist of
ritual content such as marriage or birth and festivals. Due to their tribal motifs and use of vivid earthy
colours, Madhubani paintings are famous and can be easily recognized. The drawings are done with the
artists' formulated mineral pigments. Ideally,
Madhubani art is done on a newly plastered wall or a mud wall. The work is now being done on paper,
fabric, canvas etc for commercial purposes.
In this workshop, students have learnt that painting is two -dimensional art forms. They have come to
know that correct handling Line drawing in Madhubani is essential. Students have learnt how to make a
Madhubani Folk art of water colour.

Event Report Demonstration
session on"Portrait Painting".

Time: 11.00am-02.00pm

No. Of Student: 25

Speaker: Mr. Uday Singh

(Portrait Artist)

Portrait Artist Mr. Uday Singh was to present a live demonstration of traditional and contemporary techniques of water-colour painting. He has Assistant Professor of Painting in the Department of Visual and Performing Arts, Mangalayatan University, Aligarh. He has 4 years of teaching experience. He is a very creative teacher.

The primary objective of the Demonstration was to allow the participant students to become familiar with themselves through different techniques of the water -colour medium in an atmosphere of freedom for creativity.

At the beginning of the demonstration, Mr. Uday Singh explained the need for basic knowledge regarding the surface and medium of painting. Overall, the main focus was to appreciate the beauty buried in each of these technicalities of water-colour medium.

Thereafter, Mr. Uday Singh demonstrated the process of water colour painting such as creating light, medium and dark tones, their applications and detailing of characteristics of the subject.

Around 25 students attended this informative session which was ended through a question – answer dialogue between artist and the students.

In this demonstration, students have learnt that painting is two -dimensional art forms. They have come to know that correct handling water colour in portrait is essential. Students have learnt how to make a portrait with the help of water colour. Students have learnt to observe a model very attentively. They also have learnt to give an accurate expression in the model. They have learnt how to take a measurement for making a good portrait.

Report of the Cultural activities of

Department of Visual & Performing Arts (DVPA)

Art and Craft Workshop (2022)

Department of Visual & Performing Arts organized an Art and Craft Workshop was held from 15 to 17 Oct.

2022, at Shipra hall of Mangalayatan University. This workshop was organised to develop creative as well as

marketing skills of DVPA students as part of their curriculum related academic activities throughout the

year. In view of the popularity of the event, the students from various other departments also registered

themselves for participation. About 50 participants from various departments of Mangalayatan University

were registered for the event.

The workshop was inaugurated by Prof. KVSm Krashna the Honourable Vice Chancellor of M.U., also addressed the

august gathering on this occasion.

The students learned Jewellery making, Doll making, T - Shirt Painting, Paper Folder and other decorative item. About

30 students of B.Ed and 20 students of DVPA participated in the workshop. It was a great experience for the

At the end of the workshop, all the participants received the appreciation certificates.

Dr.ShobhaRani Kodesia, HOD -DVPA, expressed her happiness for successful completion of the Art festival and

thanked all participants and experts for their kind support.

Events: Yoga for Obesity

Date: 5/ October /2022

A Yoga camp was organized at Mangalayatan University Aligarh. The topic of the yoga for obesity.

Obesity and body weight gain are caused by an imbalance between energy intake and energy

utilization. Consuming excessive fatty foods is also a cause of obesity. Less exercise and sedentary

lifestyle are the main causes of obesity. Due to unbalanced behavior and mental stress, people start

eating more, which causes obesity. while discussing these problems mis Bhavna got various type of

yoga and give complete information about yoga

Yogasan for weight loss

- Plank pose (phalakasana) ...
- Bow pose (dhanurasana) ...
- Triangle pose (trikonasana) ...
- Bridge pose (setu bandha sarvangasana) ...
- Downward facing dog pose (Adho mukha svanasana) ...

- Chair pose. ...
- Warrior I pose (virabhadrasana) ...

Overall the yoga program in the university was a great success all the preparation celebration and participation outstanding. Everybody from Students and teachers to non teaching staff comes together to make this event successful. this event had a very positive impact on creating awareness about the benefits of Yoga in human life .

Date: 30 September, 2022

Event: Perspectives of communication

Keynote Speaker: Dr. Neelam Bhardwaj

No. of Participants: 70

About the Event: The Department of Arts organized a national seminar on the Perspectives of communication. The objective of the Seminar was to comprehend about the different perspectives in

communication. Communication is a part and parcel of everyday life. We cannot get success without

effective communication skills. This seminar was presided over by the Vice chancellor of the university. Several participants and other dignitaries and faculty of the university attended the

The keynote speaker: Dr. Neelam Bhardwaj, a well -known scholar of the department of English, M.U, Aligarh, delivered a valuable lecture on Perspectives of communication in a meaningful way. She

elaborated the nature and scope of different perspectives on effective communication skills. An effective audience will

understand the perspectives of the speaker and interpret what they are hearing through that lens, hence perception affect

on the communication skills of a person. The seminar was coordinated by Dr. Durbadal Bhattacharya and

the technical support was provided by Manzoor Alam.

Outcome: Through this Seminar, the audience understood the perspectives of the speaker and interpreted what

they are hearing through that lens, hence perception affect on the communication skills of a person. The students gained

a thorough understanding of the communication skills.

Events: Yoga for health and hygiene

Date: 28/ September /2022

A Yoga camp was organized at Mangalayatan University Aligarh. The topic of the yoga for health and hygiene. Hygiene is a set of practices performed to preserve health. According to the World Health Organization, "Hygiene refers to conditions and practices that help to maintain health and

prevent the spread of diseases." Personal hygiene refers to maintaining the body's cleanliness. while

discussing these problems mis Bhavna got various type of yoga and give complete information

Yogasan for Health

Topic :CHITRA SHIVIR- A CREATIVE WORKSHOP ON FOLK ART

About of activity:

An attractive folk art workshop was held on 24 -09-2022 at Shipra Hall of Mangalayatan University.

This programme was organised by the Department of Visual & Performing Arts ,Mangalayatan University as a cultural cum academic activity . The department made elaborate arrangements for publicity regarding this event through social media, internet ,e.mail etc. for encouraging young

talented artists to participate in the event.

At least 23 participants from outside the campus and DVPA students were present in the workshop. Essential accessories along with canvas and colours were provided to each participant.

The programme was inaugurated by Prof. KVSM Krashna , Vice Chancellor - M.U amongst other invited dignitaries. Dr. Mahesh Chandra Varshney, Head - Deptt. Of Painting, Sri Varshney Mahavidyalaya, Aligarh was the chief guest and the conductor of the Folk art workshop.

The participants received training regarding techniques and specialities of folk art forms, its importance and applications at present art scenario. Whole day workshop presentations were well appreciated by the participants.

Prof. ShobhaKudesia, HOD , Department of Visual & Performing Arts , Mangalayatan University and

Dr. Poonam Rani, coordinator of the workshop stressed the need to promote the Indian classical music among young generation people and expressed happiness over the successful organisation. The programme ended successfully with a vote of thanks by Dr. Poonam Rani.

List of Dignitaries:

1- Dr. Mahesh Chandra Varshney (chief guest)

Head- Deptt. Sri VarshneyMahavidyalaya, Aligarh

2 Prof. KVSM Krashna

Vice Chancellor- M.U

3 Dr. poonam Rani

Head- Deptt. Visual & Performing Art

Event: How to face an interview

Keynote Speaker: Dr. Manjoor Ahmad Nazar

No. of Participants: 80

About the Event: The Department of Arts organized one day Lecture programme on the How to face an interview. The objective of this lecture was to developing ability among the students regarding the

interview. The Vice chancellor of the university was the chief guest of this programme. Several participants and other dignitaries and faculty of the university attended the seminar.

The keynote speaker: Dr. Manjoor Ahmad Nazar, an erudite scholar of the department of English, M.U, Aligarh, delivered a valuable lecture on How to face an interview which carried great weight. He also

expounded the various face posture and manners while attending an interview and key points imperative for facing

interview. The lecture was coordinated by Dr. Durbadal Bhattacharya and the technical support was

provided by Miss Madhubala Maurya.

Outcome: At the end of the lecture a successful query session was held and feedback from the students was taken. The Lecture was very fruitful for the students that may eradicate the nervousness

among the students and improve their ability to deal with an interview.

Date: 8 September, 2022

Event: Barriers of communication and its importance

Keynote Speaker: Prof. Surat Singh

No. of Participants: 88

About the Event: The Department of Arts organized one day Lecture programme on the Barriers of communication and its importance. The objective of this lecture was to in depth understanding about

obstacles in effective communication . The Vice chancellor of the university was the chief guest of this

programme. Numerous participants and other dignitaries and faculty of the university attended the

The keynote speaker: Prof. Surat Singh , an erudite scholar of the department of English, M.U, Aligarh, delivered a worthwhile lecture on Barriers of communication and its importance which carried great

weight. He also explained the limitations and important channels of communication that are imperative for efficacious

use of communication in professional life. The lecture was coordinated by Dr. Raghvendra and the

technical support was provided by Ms. Madhubala Maurya.

students was taken. The Lecture was very productive for the students that may eradicate the nervousness among the students and to enhance their effective communication in personal as well as professional life.

Events: Yoga Camp for Arthritis 2023.

Date: 5/ September/2022

Number of Candidates - 35

A yoga camp was organized at Mangalayatan University Aligarh. The topic of the yoga camp was

Arthritis. About Arthritis - Most forms of Arthritis are thought to be caused by a fault in the immune

system that causes the body to attack its own tissues in the joints. This may be inherited genetically.

Other forms of arthritis can be caused by problems with the immune system or by a metabolic condition, such as gout. While discussing these problems Miss Bhavna got various types of yoga

Yoga exercises for Arthritis

Start your journey to a pain-free life with these yoga poses:

Yogic sukshma vyayam

1. Vishuddhi Shuddhi Kriya (Throat Chakra cleanse)
2. Prathana Kriya (Namaskara Mudra)
3. Buddhitat Dhriti Shakti Vikasaka Kriya (Back Crown cleanse)
4. Smarana Shakti Vikasaka Kriya (Top Crown Cleanse)
5. Megha Shakti Vikasaka Kriya (Medulla Cleanse)
6. Netra Shakti Vikasaka Kriya
7. Skandha- Tatha- Bahu-Mula-
8. Shakti Vikasaka (Developing the strength of the Shoulder-blades and joints)
9. Bhujanga Bandha- Shakti Vikasaka (Strengthening the Upper arms)
10. Kaphoni Shakti-Vikasaka (Strengthening the Elbows)
11. Bhujanga-Balli-Shakti-vikasaka (Strengthening the Fore-arms)
12. . Purna-Bhujanga-Shakti-Vikasaka (Developing the Arms)
13. . Mani-Bandha-Shakti-Vikasaka (Developing the Wrists)
14. Kara-Prathama-Shakti-Vikasaka (Developing the back of the Hand)
15. Kara-Tala-Shakti-Vikasaka (Developing the Palms)
16. Angula-Mula-Shakti-Vikasaka (Developing the Finger-Joints)

Overall, the Yoga program in the University was a great success. All the preparation, celebration,

and participation were outstanding. Everybody, from students and teachers to non teaching staff,

comes together to make this event successful. This event had a very positive impact on creating awareness about the benefits of yoga in human life.

Date: 3 September, 2022

Event: Strategies to remove barriers of Communication

Keynote Speaker: Dr. Raghvendra Singh

No. of Participants: 78

About the Event: The Department of Arts organized one day Programme on the Strategies to remove

barriers of Communication. The vital purpose of this programme was to construct the ability in students

to overcome with barriers of communication. The Head of the Department the chaired this

The keynote speaker: Dr. Raghvendra Singh, a learned scholar of the department of English, M.U, Aligarh, delivered a worthwhile lecture on Strategies to remove barriers of Communication. He also presented

the important strategies to overcome the barriers in communication that may helps significantly in professional life. The

lecture was coordinated by Dr. Raghvendra and the technical support were provided by Mr. Tarun

Outcome: At the end of the lecture a successful question answer session was held. The Lecture was

very dynamic for the students that may help to enhance their effective communication in a strategically way.

Events: MEDITATION SESSION 2023.

Events: Meditation session

Date: 1/ September/2022

A meditation camp was organized at Mangalayatan University Aligarh. The topic of the meditation camp was Meditation for peace of mind .Since time immemorial, meditation has been used to attain

enlightenment. Wise ones have touted it as a means to get rid of misery. Experiences and modern research show that meditation is helpful for life goals as regular and diverse as overcoming a traumatic heartbreak to increasing daily productivity. Modern -day meditators call it the food for the

soul and suggest that the practice can unlock doors to a better life. Read the benefits of meditation in

detail below. while discussing these problems mis Bhavna got various type of meditation and give

complete information about meditation

Benefits of meditation:

1. Reduces ageing
2. Provides more energy & efficiency
3. Helps Overcome anxiety and depression

4. Improves focus, attention, and memory
5. Helps in Healing and managing pain
6. Benefits your overall health

Overall the meditation program in the university was a great success all the preparation impact on creating awareness about the benefits of meditation in human life.

Participants Doing Yoga

Mangalayatan University, Aligarh Department of
Visual and Performing Arts "Clay-Modelling

Speaker/Expert: Mr. Nalin Chandra (well-known Sculptor and Painter) HOD, Dept. of
Fine Arts, Srinath University
Jamshedpur, Jharkhand, India

Date: 25-08-2022

Time: 10.00am-01.00pm Venue: Shipra (Hall)

Participants: Students/Faculty

A renowned Sculptor Mr. Nalin Chandra fascinated with the language of clay with early childhoods,

he uses the medium beyond its traditional applications, favoring a minimalist sensibility and the

involvement of the viewer. He always enjoys sculpting portraits, and create series of portraits. Experts love

the tactile quality of clay and prefer working with a terracotta clay.

He has completed half of dozens of projects and have good command over many software like AutoCAD

R.14.0- Micro cad Counsel, AutoCAD 2010 - Indo Danish Tool Room, CATIA V5/V6 - Adityapur Auto Cluster. He has published many papers in national/international journals and won many awards/prizes like

Art Exhibition awards, Sketch Competition prizes etc.

A Clay-Modelling Workshop was organized by Department of Visual & Performing Arts at Shipra Hall on

25 Aug 2022. A renowned Sculptor Mr. Nalin Chandra was the artist. He was welcomed by our DVPA students. It was basically a hands-on experience event. Students gained a practical as well as theoretical

In that workshop, 30 students were present. One of the students, Janhavi Pandey was present as a Model for

the

portrait. Dr. Poonam Rani, HOD of DVPA was also present there. Pt. Debasis

Chakroborty, Mr. Vilas Palkhe, Dr. Ramkrishna Ghosh, Mrs. Premlata, Mrs. Deeksha Yadav and Mr. Uday

Kumar were also present. It was a successful workshop.

In Clay-Modelling, the first requisite is clay. Clay is a good medium for exploring. Clay is almost plastic

material. It is the basic medium for Clay Modelling. Clay -modeling is strictly a

constructive or building up process. For sculpture students, Clay-Modelling is the first step. Clay

is very soft and it is easy to use. It can be easily twisted and can be used for making small as well as big

sculptures. this type of workshop is very helpful for all the students. It develops students confidence and

In this workshop, students have learnt that Sculpture is three -dimensional art forms. They have come to

know that correct handling of clay in modeling is essential. Students have learnt how to make a portrait

with the help of clay. Students have learnt to observe a model very attentively. They also have learnt to

give an accurate expression in the model. They have learnt how to take a measurement for making a good

portrait. This was an opportunity to learn how to work in "in the round".

Event (Topic): "Training and Development".

Date:23, August, 2022

No. of the Participants: 92

Category of the event: Awareness in Trends and Technology

Key note speaker/Resource person:

1. Dr. Rajeev Sharma (Department of Management) - Dr. Rajeev Sharma, an Assistant Professor in Department of Management, Institute of Business Management, Managalayatan University, Aligarh. He has an expertise skill in the area of economics and management. He had an experience of guiding students from last 8 years in Managalayatan University.

2. Dr. Anurag Shakya (Department of Commerce) - Dr. Anurag Shakya, an Assistant Professor in Department of Commerce, Institute of Business Management, Managalayatan University, Aligarh. He has an expertise skill in the area of statistics and research.

On 23 rd August, 20 22, an awareness programme was organizes by the Institute of Business Management, Mangalayatan University on the topic of "Training and Development". A large no of participants was participated in the events including students of the respective department. The

events were started with the words of key note speakers. The main objective of the event is to aware

participants about the importance of training and development from the perspective of employees working in different entities. Training is a short-term reactive process while development is designed

as a continuous pro -active process It basically the activities performed within a company for

enhancing the knowledge and skills of employees. The event also highlighted the types of training

provided by the companies and different organization for increasing the productivity. The training

may be of technical training, quality training, soft skill training and professional training.

The main purpose of training and development are-

1. Lowers Attrition
2. Prepares for upcoming challenges
3. Fosters Leadership
4. Growth of the company

ON DAY SEMINAR ON "SOFT SKILLS FOR PROFESSIONAL DEVELOPMENT"

DATE : 18/08/2022

VENUE : Auditorium

TIMING : 11 am – 1pm

NO OF FACULTY : 10

NO. OF STUDENTS : 78

GUEST SPEAKER : Ms. Lekha Bist

ABOUT THE SEMINAR:

Soft skills programmes were organized by the college to facilitate the students in recognizing their

skills and enhancing their potential. These programmes help students to have efficient interaction

with others and have a positive attitude. Various soft skill training programmes were organized on

18 April 2022 at Auditorium of Mangalayatan University, Aligarh.

Soft Skill is a term often associated with a person's "EQ" (Emotional Intelligence Quotient), the

cluster of personality traits, social graces, communication, language, personal habits, interpersonal

skills, managing people, leadership, etc. that characterize relationships with other people. Soft skills

contrast to hard skills, which are generally easily quantifiable and measurable.

Aim of Seminar-

1. The impact of soft skills training programs on head nurses performance
2. How soft skill is useful for students as academic.

She discussed about how to manage distractions and even 20% efforts can produce 80% output. As he stated that today's fast paced world is bombarded with information, it is crucial to develop effective time management skills like setting clear goals, prioritizing your work, managing distractions and using time blocking for different tasks.

She explained about one Research that Soft skills are equally important as hard skills. Technical hard

skills are no longer enough for head nurses to compete in this highly competitive work environment.

Therefore, soft skills are of paramount importance.

Soft skills are categorized as personal knowledge or in other words knowledge obtained from individuals or personal Caring is a nurse action to care someone else based on morality and humanity. Caring is influenced by soft skill that a nurse has

Key note speaker/Resource person:- Prof. (Dr.) Ashok Purohit

Prof. (Dr.) Ashok Purohit Highly experienced Faculty member of IBM having more the 20 years' experience in the field of Statics & research methodology. He works as a Professor (Mangalayatan

University Beswan, Aligarh).

About the Event

Date: - 17/08/2022

Organizer: - Institute of Business Management and Commerce

Number Of Attendees/Participants: - 55 Students

Event Description-

Activity report: On August 17, 2022, a guest lecture was arranged for the management and

commerce students. Dr. Ashik Purohit gave this guest lecture. This lecture's major goal is to spread

awareness of the critical role startups play in fostering innovation and economic expansion.

However, those entering the startup ecosystem must possess a certain set of skills due to the dynamic

and competitive nature of the entrepreneurial landscape. The key competencies needed to succeed in

the startup world are examined in this report. Startups often face uncertainties, market fluctuations,

and unexpected challenges. Entrepreneurs must be adaptable, resilient, and able to pivot when

necessary to navigate these uncertainties. In closing, the guest lecturer discussed Dr. Rajiv Sharma

(HoD-IBMC) and Prof. Siddharth Jain the importance of startups in boosting the economy and fostering greater independence in the business world.

Key Elements of Guest Lecture:

- Adaptability and Resilience
- Vision and Strategic Thinking
- Effective Communication
- Financial Literacy
- Leadership and Team Building
- Networking and Relationship Building
- Problem-Solving and Critical Thinking

Success in the startup ecosystem requires a multifaceted skill set. Entrepreneurs must combine technical expertise with soft skills, strategic thinking, and a relentless drive to overcome challenges.

Continuous learning, adaptability, and a passion for innovation are the cornerstones of startup success. As the startup landscape continues to evolve, cultivating these skills will be essential for

aspiring entrepreneurs to thrive in the dynamic world of entrepreneurship.

Department of Biotechnology and Life Sciences

Event: Bioremediation techniques

Category of the event: "Awareness of Trends in Technology"

Date: August 13, 2022

Organizer: Department of Biotechnology and Life Sciences, Institute of Biomedical Education &

Number of participants: 76

Resource persons: Dr. RK Sharma

Event Description

On August 13, 2022 , a lecture on " Bioremediation techniques" was organized by Institute of Biomedical Education & Research . Faculty and students from all department of University participated in this workshop. Purpose of this workshop was to bring academicians and students on a

single platform to get knowledge about Remediation of polluted sites using microbial process (bioremediation) that has proven effective and reliable due to its eco -friendly features.

Bioremediation can either be carried out ex situ or in situ, depending on several factors, which

include but not limited to cost, site characteristics, type and concentration of pollutants.

Dr. RK Sharma told about ex situ bioremediation techniques. He told that these techniques involve

excavating pollutants from polluted sites and subsequently transporting them to another site for

treatment. Ex situ bioremediation techniques are usually considered based on: the cost of treatment,

depth of pollution, type of pollutant, degree of pollution, geographical location and geology of the

polluted site. Performance criteria, which also determine the choice of ex situ bioremediation

He told explained the In situ bioremediation techniques. He told that these techniques involve

treating polluted substances at the site of pollution. It does not require any excavation; therefore, it is

accompanied by little or no disturbance to soil structure. Ideally, these techniques ought to be less

expensive compared to ex situ bioremediation techniques, due to no extra cost required for excavation processes; nonetheless, cost of design and on -site installation of some sophisticated

equipment to improve microbial activities during bioremediation is of major concern. Some in situ

bioremediation techniques might be enhanced (bioventing, biosparging and phytoremediation), while

others might proceed without any form of enhancement (intrinsic bioremediation or natural attenuation). In situ bioremediation techniques have been successfully used to treat chlorinated

solvents, dyes, heavy metals, and hydrocarbons polluted sites.

He further concluded that the foremost step to a successful bioremediation is site characterization,

which helps establish the most suitable and feasible bioremediation technique (ex situ or in situ). Ex

situ bioremediation techniques tend to be more expensive due to additional costs attributed to excavation and transportation. Nonetheless, they can be used to treat wide range of pollutants in a

controlled manner. In contrast, in situ techniques have no additional cost attributed to excavation;

however, cost of on-site installation of equipment, coupled with inability to effectively visualize and

control the subsurface of polluted site may render some in situ bioremediation techniques inefficient.

Consequently, cost of remediation apparently is not the major factor that should determine the bioremediation technique to be applied to any polluted site.

In the last of the session, coordinator Dr. Soni Singh thanked all participants for their kind support.

"Traditional Indian painting styles"

Date: 30-07-2022

Venue: DVPA Class Speaker:

Dr. Poonam Rani Faculty of

Dr. Poonam Rani is an Associate Professor of Painting in the Department of Visual and Performing

Arts, Mangalayatan University, Aligarh. She has received her Ph.D. degree in drawing and

painting

from Dr. B.R. Ambedkar University. She has displayed her talent in several Painting Exhibitions all

over India and participated in National Workshops and Seminars at Aligarh Muslim University, JJT

University-Jhunjhunu, Rajasthan, UP State Lalit Kala Academy Lucknow etc. She has a very keen interest in different research areas under Visual Arts. She has completed a research project on

paintings of Kalapsutra, a renowned Jain manuscript, which was funded by ICHR. She has 18 years of

teaching experience.

A Seminar was organized by the Department of Visual & Performing Arts on 30.07.2022 Dr.

Poonam Rani gave a Lecture on 'Traditional Indian painting styles'. It was an interactive session.

Students asked many questions. Students received many unknown facts about the traditional art from

In that seminar, 28 students were present. Dr. Ramkrishna Ghosh, Mr. Vilas Palkhe, Dr. Premlata, Mr.

Ajay Singh and Mr. Uday Singh were also present. It was a very good Lecture Session.

"Traditional Indian painting styles" is such an important topic for fine arts students. they given special

attention to this topic. Traditional Indian painting styles are a testament to the vibrant and diverse

culture of India. From Madhubani and Kalamkari to Warlike and Pattachitra, these art forms showcase

the artistic traditions, spiritual beliefs, and everyday life of the country In this Lecture Session, all these

all styles were discussed in a simple manner.

We need to know that we are all creative. There is no such thing as non -creative. Creativity lives within

all of us. Creativity can be visible in all tradition paintings like Madhubani Painting, Warlike Painting,

Kalighat Painting, Phad painting, Miniature Painting, Gond Painting, Kerala Murals etc. We must

Department of Visual and Performing Arts Painting Demonstration

"Portrait Painting "

Speaker: Mr. Bharat Bhushan Sharma (Portrait

Artist) New Delhi,

Date: 20-07-2022

Time: 11.00am-02.00pm Venue: Shipra (Hall)

A renowned Artist (Painting) With the realistic Drawing and Painting.

He uses different medium beyond its traditional applications, He

always enjoys Painting Portraits, and Caricatures. He is expert in Pastel colour ,
watercolour , Acrylic

and in Oil colour .

He has completed more then two dozens of Portrait of renowned and famous person of India and
have

good command over Story Illustration He has published a Book on Portrait Study by Dry Pastel .

‘Varnika’, a live demonstration-based painting workshop was held at M.U. Shipra block from 11
A.M. to

2 P.M. on 20-07-2022.

Eminent artist Mr Bharat Bhushan was invited to conduct the workshop and to present a live
demonstration of traditional and contemporary techniques of water-colour painting.

In the beginning, Dr Poonam Rani, HOD -Department of visual & performing arts, welcomed and
thanked

the guest artist and the honourable Vice-Chancellor to grace this occasion.

The guest artist and presenter was felicitated by the honourable VC sir with a bouquet and
memento.

Thereafter, Mr Bharat Bhaushan demonstrated the process of water colour painting such as
creating light,

medium and dark tones, their applications and detailing of characteristics of the subject.
Ms.Premalata,

faculty of DVPA acted as model in the live demonstration.

Around 30 students attended this informative session which was ended through a question –
answer

dialogue between artist and the students. Pt. Debasis Chakroborty, Sri Vilas Palkhe, Dr.
Ramkrishna

Ghosh, Mrs. Premalata, Mrs.Deeksha Yadav and Mr. Uday Kumar were also present.

Watercolour is most preferred painting medium. It’s easy to work with, and safe because it
requires

neither solvents nor mediums. But as with many things in life, simple can also be hard, and achieving the

art goals you have in mind can be challenging if you're not aware of a few

techniques and tools, which we'll review together here. You have to stay open to how watercolours

interact with pigments and the paper, and readjust all the time.

know that correct handling water colour in portrait is essential. Students have learnt how to make a portrait

with the help of water colour. Students have learnt to observe a model very attentively. They also have

learnt to give an accurate expression in the model. They have learnt how to take a measurement for

making a good portrait.

In-House Seminar on "Structure of SARS-CoV-2"

Date: 18th April 2022

No. of Faculty and Students: 45

Speaker: Dr.Harish Saraswat, Assistant Professor (Chemistry)

Dr.Harish Saraswat awarded his Ph.D. on the topic " Characterization of Cyclodextrin Inclusion Complexes with

Pharmaceuticals by NMR Spectroscopy and Molecular Modeling Studies" and currently working as Assistant Professor in

the Department of Chemistry, Institute of Applied Sciences, Mangalayatan University. His research is based on interaction

of host-guest molecule using beta cyclodextrin. He has published 4 research papers in reputed international journals and 1

Indian patent.He has also presented papers in conferences and workshops and also attended various national/international

conferences. He is also a member of Indian Science Congress Association.

"Structure of SARS -CoV-2". COVID-19 (Corona Virus Disease 2019) is an infectious disease caused by the novel severe

acute respiratory syndromecoronavirus -2 (SARS -CoV-2).It has developed into a global pandemic

over a course of few

months, disrupting modern society on a large scale that most of the people in the world have never witnessed in their

lifetimes. It has been believed that this virus had its origin in a species of bat and it was transmitted to human via a host.

Since then, human to human rapid spreading has been observed. This novel corona virus is very close to earlier reported

coronaviruses SARS -CoV-1, MERSCoV (Middle East respiratory syndrome) with regard to causing severe acute

respiratory distress, their surface protein and host cell receptor. The viruses can cause severe disease with pneumonia and

acute respiratory distress disorder. This virus has already infected millions of people, resulting in over one million deaths as

of this writing and the figures are continuously rising. Overall, people's lives and the global economy are being greatly

affected. The structure of this virus based on characterization techniques has been discussed in this seminar.

The transmission electron microscopic (TEM) image of SARS -CoV-2 inside a cell displays spherical viral particles that are

colored in blue. The virus comprises of three basic building blocks: a singlestranded RNA genome, viral membrane

composed of lipid bilayer and surface proteins. The RNA genome is composed of 30000 nucleotides and it encodes four

structural proteins namely, Nucleocapsid (N) protein, Membrane (M) protein, Envelop (E) protein, Spike (S) protein, and

many non-structural proteins (nsps) (Figure 1). The nucleocapsid (N) protein is a multi-purpose protein, which helps in the

formation of nucleocapsid to protect the genome. The M -protein is the most copious in the viral surface and its key role is

to support viral assembly as a central organizer due to its membrane -bending properties. The E -protein is the smallest

membrane protein comprising of approximately 76 –109 amino acid residues and it has a crucial role in virus assembly,

envelope formation, membrane permeability of the host cell and virulence. The S protein is an important structural

transmembrane protein comprising of 1200 –1400 amino acid residues on the outer envelope of the virus. The S protein is

responsible for virus entry as it recognizes the specific host -receptors located on the human cell surface. Host -guest

recognition is virus -specific, and the specificity decides both virus tropism and pathogenesis. S protein exists as a self -

assembled homotrimer in which each of the monomers is composed of two functional units, S1 and S2. S1 subunit is

accountable for host recognition whereas the S2 subunit is in charge of host -guest membrane fusion. The Nterminal domain

of S1 subunit is considered as carbohydrate recognition domain and the C -terminal domain is called receptor -binding

domain (RBD) as it supports host -guest interaction and particularly responsible for virus entry by recognizing protein

receptors of the infected lung cells.

Figure 1. SARS-CoV-2 Structure. (a) Transmission electron microscopic image of SARS -CoV-2 spherical viral particles in

a cell, (b) The virus is comprising of following basic building blocks: a single -stranded RNA genome (ssRNA), lipid

bilayer membrane and different proteins like nucleoprotein (N), envelope protein (E), membrane protein (M), spike protein

Figure 2. SARS -CoV-2 infection cycle displaying different steps. Potential targets for some selected antiviral drugs to

interfere in different steps of infection cycle are shown

The In-house Seminar on " Structure of SARS-CoV-2" took place on the 18th April 2022, at Shipra Block, Room Number

002, from 10:00 am to 11:00 am. The seminar was organized by the Institute of Applied Sciences and was well attended by

45 students and faculty members.

Dr. Harish started the seminar with an introduction of Corona Virus and then discussed the main structural features of the

virus i.e. SARS-CoV-2. He has also explain how and at what level, this virus affected the life of many human beings.

The seminar witnessed the active participation of total 40 students pursuing diverse disciplines, including B.Sc., B.Sc.

B.Ed., and B.Tech. along with 6 faculty members of Institute of Applied Sciences. This diverse representation underlines

the importance of coffee in daily life with their chemical constituents. The speaker's expertise and engaging delivery

The In-house Seminar on "Structure of SARS -CoV-2" conducted by Dr. Harish Saraswat is successful. It offered a unique

opportunity for faculty members and students to explore the effects of this virus on human health and how its cycle works.

We extend our heartfelt gratitude to all the participants, including the students and faculty members for making the seminar

a memorable event by their active involvement. We hope that such enriching academic sessions will continue to be a part

of our institution's educational endeavors, empowering our students and faculty with diverse knowledge and skills.

In-House Seminar on "History and Chemical Constituents of Coffee"

Date: 15 July 2022

Speaker: Dr.Sakshi Saxena, Assistant Professor (Chemistry)

Dr.Sakshi Saxena awarded her Ph.D. on the topic "Surface modified Bismuth Vanadate in Photoelectrochemical Splitting

of Water" from Dayalbagh Educational Institute (Deemed University), Agra and currently working as Assistant Professor

in the Department of Chemistry, Institute of Applied Sciences, Mangalayatan University. Her research is based on Solar

Water Splitting for Hydrogen Generation in order to achieve maximum solar to hydrogen conversion efficiency using

various modifications like (a) swift heavy ion irradiation (SHI), (b) doping and co -doping, (c) introduction of plasmons and

conducting polymers, (d) heterojunction formation (e) basic studies to understand the charge transfer mechanism across the

electrode electrolyte interface vis-a-vis morphology of nanostructured semiconductor electrode and (f) incorporation of

multiwall carbon nanotubes. She has published 4 research papers as first author and about 14 research papers as co -author

in reputed international journals. She has also presented papers in conferences and workshops and also attended various

national/international conferences, symposium and webinars.

"History and Chemical Constituents of Coffee". Coffee is a popular drink in the world. It is made from the roasted beans of

coffee pods usually in a powdered form. Among 70 species of coffee, only three are cultivated. 75% of the world's

production of coffee is provided by *Coffea arabica* , about 25% by *Coffea canephora*, and less than 1%

by *Coffea liberica* and others. No one knows exactly how or when coffee was discovered, though there are many legends

about its origin.

An Ethiopian Legend

Coffee grown worldwide can trace its heritage back centuries to the ancient coffee forests on the Ethiopian

plateau. There, legend says the goat herder Kaldi first discovered the potential of these beloved beans.

The story goes that that Kaldi discovered coffee after he noticed that after eating the berries from a certain tree,

his goats became so energetic that they did not want to sleep at night.

Kaldi reported his findings to the abbot of the local monastery, who made a drink with the berries and found that

it kept him alert through the long hours of evening prayer. The abbot shared his discovery with the other monks

at the monastery, and knowledge of the energizing berries began to spread.

As word moved east and coffee reached the Arabian peninsula, it began a journey which would bring these

beans across the globe.

The Arabian Peninsula

Coffee cultivation and trade began on the Arabian Peninsula. By the 15th century, coffee was being grown in

the Yemeni district of Arabia and by the 16th century it was known in Persia, Egypt, Syria, and Turkey.

Coffee was not only enjoyed in homes, but also in the many public coffee houses – called qahvehkhaneh –

which began to appear in cities across the Near East. The popularity of the coffee houses was unequalled and

people frequented them for all kinds of social activity.

Coffee Comes to Europe

European travelers to the Near East brought back stories of an unusual dark black beverage. By the 17th

century, coffee had made its way to Europe and was becoming popular across the continent.

In the mid-1600's, coffee was brought to New Amsterdam, later called New York by the British.

The main constituents of coffee are caffeine, tannin, fixed oil, carbohydrates, and proteins. It contains 2 –3%

caffeine, 3 –5% tannins, 13% proteins, and 10 –15% fixed oils. In theseeds, caffeine is present

as a salt of

chlorogenic acid (CGA). Also it contains oil and wax.

Thus, this interesting discovery of coffee opens a challenge for the students to know the detailed compositions

as well as procedure for making a coffee.

This seminar on "Coffee that makes everything possible" aimed to discuss general introduction, history, chemical

compositions and procedure of making coffee. Through this event, attendees gained a deeper understanding of what are the

chemicals used for making a taste of India i.e. coffee and what is the history behind this.

The In-house Seminar on "History and Chemical Constituents of Coffee e " took place on the 5th June 2022, at Shipra

Block, Room Number 002, from 10:00 am to 11:00 am. The seminar was organized by the Institute of Applied Sciences

and was well attended by 45 students and faculty members.

Dr.Sakshi started the seminar with an introduction to the history and composition of the coffee. She elaborated on the

constituents of coffee and how is it make for drinking purpose.

The seminar witnessed the active participation of total 45 students pursuing diverse disciplines, including B.Sc., B.Sc.

The In-house Seminar on " History and Chemical Constituents of Coffee " conducted by Dr.Sakshi Saxena is successful. It

offered a unique opportunity for faculty members and students to explore about coffee and its various types.

of our institution's educational endeavors, empowering our students and faculty with diverse knowledge and skills .

Event: Celebrated World Fruit Day

Category of the event: Life Skills (Health)

Date: 01 /07/2022

No. of Attendees/Participants:30 students +31faculties

Keynote speaker/Resource Person: Dr. Akanksha Singh, Assistant Professor, Department of Agriculture, Mangalayatan

University, Beswan, Aligarh

Dr.Akanksha Singh has been working at Mangalayatan University as an Assistant Professor (Plant Biotechnology) Since

2019. She did her Master's and Ph.D. Degree in Plant Biotechnology from NDUAT, Kumarganj, Ayodhya during 2010 -

2012 and 2013 -2018 respectively. She done her research in Master's on Genetic, biochemical and molecular studies on

salinity tolerance in rice mapping population and in Ph.D on Distribution and molecular characterization of rice for high

iron, zinc and its correlation with molecular markers. She has around 6 Years of working experience as an Assistant

Professor. She received DST INSPIRE Fellowship during Ph.D Program. She has also received various recognitions and

has more than 20 publications to her credit.

About the Topic: Fruits are an important part of a healthy eating pattern and a good source of required

vitamins and minerals. Fruits are also acknowledged for their vital role in the prevention of diseases

caused due to the deficiency of vitamin A and vitamin C. Fruits also provide a vast range of health -

boosting antioxidants.

Event Description: "HAVE FRESH FRUITS IF YOU WANT TO LEAD A FRUITFUL LIFE " With an objective to

create and educate students about the importance and consumption of fruits in a regular diet, the students of

agriculture celebrate Fruit Day by taking part in the event to promote the idea of "Eat healthy live healthy ". This type of

activity helps the students to understand the importance and consumption of fruits in their regular diet making the

youngsters get motivated to eat healthy stuff instead of junk food. The occasion was graced by the presence of our

honorable Vice Chancellor Prof. K.V.S.M.Krishna, and Prof. Ullas Gurudas (Dean Academics) . The program was started

by the Dean of Academics Prof. Ullas Gurudas and Addressed by the honorable Vice Chancellor Prof. K.V.S.M.Krishna.

was celebrated to teach students the health benefits of fruits – one of Mother Nature's most amazing foods. In a nutshell,

kids were found to be quite thrilled and were positive about the fact that fruits are better than junk foods. Head of the

department, Dr. Danish , stated that about 90 percent of a child's brain develops by the age of five and hence parents must

ensure that children have a daily intake of one fruit. He also asked the parents to replace junk food with fruits as it would

stimulate memory and fight infections. The day closes with the formal vote of thanks proposed by Dr. Akanksha Singh.

She heartily thanked our honorable Vice Chancellor Prof. K.V.S.M.Krishna , Dean Academics, Prof. Ullas Gurudas ,

and distinguished participants for their active participation throughout the event. The event came to an end with his

vaedictory address.

Conclusion: The Coronavirus pandemic has left us wondering about our health. It is high time we pay attention to

strengthening our immunity, which protects us from diseases. It is time to pick Fruits and vegetables that possess a high

potential to do so.

Lecture delivered by Dr. Harit Priyadarshi (HoD, Department of Civil Engineering)

Brief introduction about the event was given by Prof. K.V.S.M.Krishna

Home>Department>Institute of Biomedical Education and Research
Institute of Biomedical Education and Research
About the Institute
Welcome to the Department of Biotechnology & Life Sciences and Department of Pharmacy at Institute of Biomedical Education and Research (IBMER), Mangalayatan University, Aligarh. We started our journey in the year 2007. Over the last 15 years, we have grown our expertise and competence in the core area of Biotechnology and Pharmacy. If you have an interest in Science and health care, then you need to consider Biotechnology & Pharmacy as a carrier option. Biotechnology is the study of living organisms and to make useful products for the well being of human health. Modern biotechnology encompasses diversified areas of Biomedical, Industrial and Environmental Science. Pharmacy is the study of many features of drugs; including their design, manufacture and formulation into a medicine and how they work in the body. Pharmacists are the vital members of the health care system in both community and hospital settings. Biotechnologists turn into an expert in medicines with a detailed understanding of the scientific bases of diagnosis and therapy. Our courses also provide you with the many general skills needed, after you qualify as a Biotechnologist and Pharmacist. We offer you the opportunity to become a confident and competent health care professional. The Department of Biotechnology & Life Sciences came into existence in June 2007; first batch graduated in 2011. Biotechnology field itself has a specialized science stream that leans heavily towards biology and a technology stream. The Biotechnology department offers B.Sc. Biotechnology, M.Sc. & Ph.D. Programs in Biotechnology. The department has state of the art laboratories and well qualified and experienced faculty members from reputed National and International Institutes. The main focus of Biotechnology department is to provide excellent teaching, training and research facilities for students. The department is actively involved in organizing Conferences, Seminars, Workshops, trainings and awareness campaign regularly. Students, Research Scholars & faculty members have received several awards and recognitions and are life members of many reputed National and International Scientific and Medical bodies like ICMR, WHO, American society of Microbiology, Indian society of public health & hygiene and Indian Science Congress. Vision "To create a good platform for excellent teaching and applied

research for the upliftment of the society and to develop professionals to employ processes and applications for the betterment of the mankind".MissionTo adapt and update students with rapidly changing technologies through self-improvement with continuous learning and professional ethics.To enable students for community-collaborative learning processes beyond classrooms in various disciplines of biotechnology and life sciences.To develop and train biotechnology professionals who can contribute and make improvement of biotechnological services and products.To nurture individuals who are effective contributors towards growth of the nation.Message of the Head of the InstituteProf. (Dr.) Rakesh Kumar SharmaQuickLinksProgramsCareer OpportunitiesFaculty Members

BSc Agriculture Course Details: Subjects, Scope, Career, Jobs Opportunities, Eligibility, Admission, Salary and More

BSc Agriculture course full form is Bachelor of Agriculture. India's agriculture sector is the country's largest employer. According to the Situation Assessment Survey 2021, animal farming accounts for around 16% of an agricultural household's revenue. Therefore, we can see witness that, Agriculture in India has made great strides.

With time, rising urban and rural incomes also boosted appealing opportunities in the Indian agriculture sector. Supporting laws and reforms, as well as the acceptance of digital technology and considerable investments in the sector, have all been spectacular over the previous decade or two.

Since the 1950s, the Indian agriculture business has seen tremendous transformations as a result of many policies and reforms. Ideally, in the last five years, the change has occurred at an unprecedented rate and witnessed disruptive innovations giving rise to lucrative employment prospects.

In this blog, we'll look at some of the most desired agriculture degrees, eligibility criteria, curriculum, scope and top job opportunities.

BSc Agriculture Full Form

Bsc Agriculture stands for Bachelor of Science in Agriculture. It is a four-year undergraduate degree course that offers students scientific expertise and technical competencies to better farming methods, crop production, and food security with the use of fresh agricultural science and technology.?

What is BSc Agriculture Degree?

BSc Agriculture is a four-year undergraduate program that focuses on agricultural scientific research and activities, including Genomics and Plant Biotechnology, Agricultural Microbiology, Environmental Sciences, Agronomy, and so on.

This course covers agricultural science as well as the effective application of contemporary agricultural technologies and equipment in real-world situations. Agriculture is the backbone of our Nation's economy and primarily focuses on recruiting well-versed agriculture professionals. Hence, graduates of the BSc

Agriculture course will always have potential jobs in India.

The career scope for a BSc Agriculture graduate is vast.

Agricultural officials, agricultural scientific researchers, and agricultural strategists are just a handful of the high-profile jobs accessible to BSc Agriculture graduates.

BSc Agriculture Objectives

BSc Agriculture is a bachelor's degree programme in agriculture and its applications. It is a professional degree in agricultural science recognised by the Indian government.

This course is designed to prepare students to apply modern agricultural tools and procedures in a practical setting.

Soil science, water resources and management, agricultural and livestock management, geomatics, and a few aspects of genomics are covered in depth.

The course curriculum's basic methodology is to educate students on how to construct modern and

effective agricultural methods to increase overall productivity.

Students can study all of these fundamentals and put them into practice while working in the field.

Provide job opportunities in many agricultural departments, ranging from technical issues to business possibilities, production, and sales.

BSc Agriculture Course Details in India

The bsc agriculture course admission is designed to deliver a knowledge base that meets the needs of agriculture, allowing the graduates to enter the job market with more specific and relevant skills. The courses allow for a thorough understanding of the latest developments in the field, and the industry-specific skills to apply. Here are the highlights of the BSc Agriculture degree-

Full Form Bachelor of Science in Agriculture
Course Level Bachelor
Course Duration 4 Years
Eligibility 50% Marks in PCM/PCB/ Agriculture in 10+2 or Equivalent
Course Fee INR 50,00 to INR 1,00,000
PA Examination Type Semester Admission Process Entrance Exam or Merit Based
Average Salary After Degree INR 6 LPA
Recruiting Companies After Degree JK Agri Genetics Ltd, HPC Biosciences Ltd, Godrej Agrovet Limited, Kaveri Seed Company Ltd, DuPont India, Cargill, Bayer, Syngenta, Food Corporation of India, NABARD, etc.?

Bachelor of Science in Agriculture

BSc Agriculture Course Duration

BSc Agriculture is a four-year program that deals with various topics related to multiple farming methods and their benefits and issues related to specific agricultural practices to increase productivity while reducing soil erosion and pollution. Graduates with a BSc Agriculture can operate in various agricultural departments, from technical matters to enterprise prospects and production to sales.

BSC Agriculture Course Eligibility Criteria after 12th

Students wanting to pursue a BSc in Agriculture must comply with the following requirements:

Students must have scored 50% Marks in PCM/PCB/ Agriculture in 10+2 or Equivalent

Students who have finished their intermediate in the field of agriculture are also eligible to enrol in the course.

Some universities hold their own entrance exams or common entrance exams to determine whether or not students are qualified for the course.

BSc Agriculture Admission Process in India

The admissions process varies depending on the institute. Some universities offer direct BSc Agriculture admission based on merit and a personal interview, while others require prospective

candidates to take national, state-level, or university-level entrance exams.

Direct Admission:To be considered for admission, students must complete the college application form, whether online or offline, before the application deadline.

Entrance Exam-Based Admission:Admission is granted based on the results of these exams, followed by various rounds of counselling sessions, which often include GD and PI.

BSc Agriculture Course Fees

Depending on the institute's facilities and services, BSc Agriculture fees range from INR 50,000 to INR 1,00,000 LPA. Some universities and institutes have their own fee structure, which can alter from year to year. A few colleges also provide part-time courses that may include internships and fieldwork.

BSc Agriculture: Subject & Syllabus

The BSc Agriculture course is structured into eight semesters to allow students to complete it promptly. Students will master the fundamentals of plants, agricultural economics, and human science during the first year of the course. They will interact with disciplines such as basic agricultural engineering, entomology, and microbiology in the initial three years. They will also improve their interpersonal and entrepreneurship development skills. In their last year, they will gain practical field experience in agronomy and agricultural statistics. Below are the semester-by-semester disciplines that BSc Agriculture students are typically taught in college:

Semester 1	Semester 2	Basic Science and Humanities	Agricultural Economics	Rural sociology and constitution of India
Comprehension and communication skills in English	Plant biochemistry	Introduction to computer applications	Educational psychology	Agricultural finance and cooperation
Principles of agricultural economics	Trade and prices	Agricultural marketing	Fundamentals of agribusiness management

BSc Agriculture Future Scope in India

In India, the agriculture industry is large, and graduates with a degree in agriculture sciences have a myriad of possibilities. Agriculture research organizations may be found in every state in India, and they work to produce cutting-edge crop development and agricultural equipment. Experts in agriculture research and promote new organic farming methods so that our farmers can produce chemical-free crops. Professionals who have finished a BSc in agriculture can work in this field and find the finest prospects to work on modern agricultural technologies. By advancing their professions in a relevant field, they will be able to advance instantaneously.

Graduates with a bachelor's degree in agriculture can work in the agriculture industry in both India and other nations. There is a multitude of work prospects for these graduates in the agriculture area. Food processing, dairy, poultry, fertilizers manufacturing, FMCG, and educational institutions provide the best employment options for such professionals. Professionals with a BSc Agriculture can qualify for these roles and obtain valuable work experience in the agriculture industry. Graduate students can choose from a wide range of professional options. They can get a stable career with a competitive salary in this industry. Additionally, there are self-employment opportunities for graduates with a BSc Agriculture degree. They can start their own consulting firm and advise farmers on how to improve their farming operations and crop yields.

Graduates can use modern agricultural practices on their own farms to produce a large amount of produce. They can even start their own dairy farm and other kinds of animal husbandry operations. In a nutshell, agriculture is a big, never-ending industry that contributes significantly to our economy. Also, BSc Agriculture students have a lot of options for further education. Following undergraduate studies, students can pursue a variety of MSc in Agriculture course or MBA degrees in agriculture. Many agricultural organizations, Extension agencies, Research organisations, commercial farming, and other organisations are conducting research and teaching projects relating to agriculture today.

After BSc Agriculture, the Government of India's Gazetted post of Agricultural Officer (Agronomist) is one of the most coveted jobs in the public sector. Following graduation, an applicant can undertake a PhD or sit for the ARS (Agricultural Research Service) exam.

Top 7 Career or Jobs Opportunities after BSc Agriculture Degree

Demand for qualified professionals in agriculture has risen in recent years. Agriculture has undergone a modernised revolution as a result of technological breakthroughs, and such specialised and knowledgeable personnel have emerged. They might work in research and development as well as administration to guarantee that crop growth is improved while input expenses are kept to a minimum.

Graduates can work in both the government and private after completing the degree. Agriculture is becoming increasingly important, which means more job prospects in the field. Here are the top 7 most demanded career opportunities:

1. Assistant Plantation Manager

Harvesting and other operations associated with the cultivation of crops or vegetables are managed efficiently and profitably by the Assistant Plantation Manager.

2. Agriculture Officer

Agriculture officers work with farmers and agriculture-related businesses. An agriculture officer's primary responsibility is to assist them in increasing agricultural productivity.

3. Agricultural Research Scientist

Agricultural Research Scientists start by conducting research. They are concerned primarily with the biological mechanisms of diverse items and their relationships with products and processes, and they include both laboratory and fieldwork.

4. Agriculture Technician

Agricultural technicians operate in the fields of food, fibre, animal experimentation, production, and processing, devising new ways to increase crop productivity and alleviate suffering from a disease.

5. Seed Technologist

Seed technologists assist seed growers by providing them with seed machinery operations, seed planting, and seed scouting.

6. Plant Breeder

Plant breeders in India explore and develop new tactics, tools, and technology to boost crop yields.

7. Agriculture Development Officer

An Agriculture Development Officer works in the same way as an agriculture officer to enhance soil productivity and other intensive agriculture techniques.

How to Choose Top BSc Agriculture College?

Agriculture is one of India's fastest-growing industries. Because of its favourable growth, it is drawing a large number of students. Before picking a BSc Agriculture College, students should bear the following characteristics in mind:

Academic Excellence

Program Curriculum

Research Methodology and Techniques

Exposures (both national and international)

A conducive and diversified campus environment to live in.

Top Companies Hiring BSc Agriculture Graduates

The agriculture sector has become one of the leading job providers in the country. Graduates of the BSc Agriculture course play a key role in developing and growing the agricultural sector. Therefore, if you are a graduate of the BSc Agriculture course and want to grab a great job opportunity in the agriculture sector, you can apply with these top companies-

JK Agri Genetics Ltd

HPC Biosciences Ltd

Godrej Agrovet Limited

Kaveri Seed Company Ltd

Food Corporation of India

Indian Forest Services

Indian Council of Agricultural Research

National Dairy Development Board

Benefits of Pursuing BSc Agriculture Course

A BSc Agriculture provides students with the knowledge and abilities they need to manage agribusiness, conduct research, work in the agricultural field, perform field surveys, and manage many aspects of farming techniques. With the increasing pressure of job-related competition, the need to improve one's skills and knowledge is quite significant. Some of the benefits include high salaries in the world of agriculture, career prospects and employment opportunities after completion.

The BSc agriculture course is a wide-ranging subject, making it very rewarding and interesting. It encompasses almost every aspect of agriculture including farming and forestry, science, technology and many more. Hence, if you need to sharpen your mind to have a successful career in the field of agriculture and farming, then a BSc degree in Agriculture is a good option to pursue.

BSc Agriculture Program

Required Skills for BSc Agriculture Course

Agriculture is a profession that demands a person with a great deal of patience, the ability to pay attention to little details, and outstanding observational skills. Only those with a genuine enthusiasm for agriculture should pursue this field. Some of the competencies required for a BSc Agriculture course are listed below:

Initiative for Forward Planning

Time Management & Organization Skills

Communication abilities

Analytical abilities

IT skills and commercial awareness

Ability to market and sell

BSc Agriculture: Related FAQs

Q1 - What is the best option after BSc Agriculture? Agriculture Officer, Agriculture Junior Engineer, Researcher, Forest Officer, Agriculture Graduate Trainee, Agriculture Field Officer, and more positions are attainable after obtaining a BSc Agriculture degree. Apart from this, you can opt for self-employment options. Candidates who are interested in learning more about

agriculture can enrol in a master's degree programme such as MSc Agriculture.Q2 - Is BSc Agriculture easy or hard?When compared to other Biology courses such as MBBS, Veterinary Medicine, and so on, BSc Agriculture might be considered a simple course. This course is easy because it focuses on real applications rather than theory.Q3 - Is BSc Agriculture a good career?Yes, BSc Agriculture has good career scope. After completing a BSc Agriculture program, you will have little difficulty finding a job. It creates numerous job opportunities in both the public and private sectors.Q4 - How many years is BSc Agriculture?BSc Agriculture course usually takes four years to complete.

Q1 - What is the best option after BSc Agriculture?

Agriculture Officer, Agriculture Junior Engineer, Researcher, Forest Officer, Agriculture Graduate Trainee, Agriculture Field Officer, and more positions are attainable after obtaining a BSc Agriculture degree. Q2 - Is BSc Agriculture easy or hard?

When compared to other Biology courses such as MBBS, Veterinary Medicine, and so on, BSc Agriculture might be considered a simple course. This course is easy because it focuses on real applications rather than theory.

Q3 - Is BSc Agriculture a good career?

Yes, BSc Agriculture has good career scope. After completing a BSc Agriculture program, you will have little difficulty finding a job. It creates numerous job opportunities in both the public and private sectors.

Q4 - How many years is BSc Agriculture?

BSc Agriculture course usually takes four years to complete.

The agricultural sector is one of the most diverse and complex. This industry has been around for centuries and has undergone many changes throughout its history. It is a multifaceted business that uses varied and complex means to meet the increasing demands for food. The agriculture sector is a key source of revenue and employment. There is an ever-growing demand for food and products, and the industry needs to find new ways to meet the rising needs. The agriculture industry needs people with a broad range of abilities and experiences who can work as agricultural technicians, managers, scientists and more.

In addition to the career opportunities, another benefit of the course is that it helps the students develop a broad range of skills that are often needed by the agriculture industry. With this background, it is no surprise that the agriculture sector is the main career option that graduates of the BSc Agriculture course can choose. To fulfil your professional dreams in the agriculture sector, here is a prestigious university offering in-demand agriculture programs.

Mangalayatan University, a UGC-accredited institution, was founded in 2006 to nurture and polish the knowledge of all of its students to achieve success. For this reason, MU has engaged highly qualified teachers and provides the greatest campus facilities, as well as an active placement cell to help aspiring students advance in their careers. Agriculture Courses offered at Mangalayatan University are-

B.Sc (Agriculture)

B.Sc Agriculture (Agronomy/ Horticulture)

SOURCE (WEB): <https://www.mangalayatan.in/blog/b-sc-horticulture-vs-b-sc-agriculture-which-course-is-better-after-10-plus-2.html>

=====

The advent of technology, the Government's progressive policy, and the improved farming infrastructure is reinvigorating the agriculture sector. Thereby new career opportunities are emerging in agriculture. Today to make a successful career in agriculture, there are various popular professional courses, which acquaints students with various facets of agriculture and its related specializations. B.sc Agriculture and B.sc Horticulture are two popular courses in the field of agriculture, and students who want to make a career in agriculture often remain in dilemmas between these two courses. Through this post, we will discuss about major differences between B.sc Horticulture and B.sc Agriculture course on the basic tenants of the core focus area, generic syllabus, and career opportunities.

What is B.sc Horticulture Course?

B.sc Horticulture is an undergraduate programme of three years, focused on the study of cultivating vegetables, fruits, flowers, tea, etc. During three years, students are taught theoretical and technical aspects of horticulture, cultivation, plant protection, postharvest management, processing, storage, and marketing of fruits, vegetables, ornamentals, medicinal & aromatic plants, spices, and crops plantation.

A Horticulturist works to improve crop yield, quality, nutritional value, and resistance to insects, diseases, and environmental stresses.

Upon completion of B.sc Horticulture, students can go for M.sc Horticulture.

B.sc Horticulture is a prestigious degree, which is accepted and recognized in all Indian Universities and government organizations.

Although, there are also good career prospects of B.sc Horticulture its scope is limited to cultivating vegetables, fruits, flowers, tea, and other plants that grow in small space and things needed for them to thrive.

What is B.sc Agriculture Course?

B.sc Agriculture course is an undergraduate programme of four years focused on farming, food production, techniques involved in farming/ cultivation/ irrigation. During four years, students go through rigorous theoretical and practical education and learn fundamentals of cultivation of a various range of crops, innovative methodologies to enhance soil fertility and enhance food production.

An agriculture graduate works on technical aspects of food/crop production, livestock maintenance, essentials of water resource management, soil science, poultry management, etc.

This course unlocks the door of great scope in the matter of higher studies. After completing B.sc in Agriculture, students can pursue M.sc in Genetics, Plant Pathology, Horticulture, Plant Entomology, Agricultural Economics, and Soil Science, etc.

B.sc Agriculture is a prestigious degree, which is accepted and recognized in all national and international Universities. And in the matter of employment opportunities, agriculture is considered as one of the recession-free employment areas and one of the most diversified fields than ever before, offering decent employment and self-employment opportunities.

B. Sc Agriculture Vs. B. Sc Horticulture: Difference in Core Area and Curriculum

Major curriculum of B.sc Agriculture:

Plant Biochemistry, Principles of Agricultural Economics, Farm Power and Machinery, Energy Sources and their Application in Agriculture, General Entomology, Agricultural Microbiology, Soil Microbiology, Fundamentals of Statistics, Irrigation Water Management, etc.

Major curriculum of B. Sc Horticulture:

Crop Physiology, Livestock, and poultry production technology, Principles of plant biotechnology, Principles of agricultural sciences, Agricultural and industrial microbiology, Agribusiness management, etc.

The Core Difference Between B. Sc Agriculture and B. Sc Horticulture:

B.sc Horticulture programme emphasizes the study of plant health, pest control, and nutrient content. This three-year degree programme primarily focused on laboratory testing of plants, the evaluation of soil properties, and real-world fieldwork projects, in which students learn to develop natural methods to repel insects and parasites that destroy cultivated plants.

B.sc Agriculture is focused on the effective implementation of modern agricultural techniques and discover innovative ideas to boost food production and soil fertility. This is a multidisciplinary programme in which students develop a concrete fundamental concept of Agricultural Economics, Agricultural Marketing, Horticulture, Soil Science, etc. Unlike B.sc Horticulture, the dimension of B.sc Agriculture is huge and unlocks lucrative avenues of employment opportunities and higher education. B.sc Agriculture graduates play a significant role in discovering new techniques of cultivation and organic farming.

B.sc Horticulture vs. B.sc Agriculture: Scope, employment opportunities, and career options:

Employment Opportunities after B.sc agriculture:

There is no dearth of employment opportunities after completing B.Sc Agriculture. Today, the advent of technology is transforming this sector and creating new employment opportunities for agriculture graduates. There is a great demand of professionals in sectors like food processing, dairy industry, poultry industry, fertilizer Production Company, FMCG, and institutions.

Higher education opportunities after B.sc Agriculture:

Master's in Genetics, Master's in Plant Pathology, Master's in Horticulture, Master's in Plant Entomology, Master's in Agricultural Economics, MBA in Agribusiness, Master of Food Science, etc.

Employment opportunities after B.sc Horticulture:

Horticulture is part of agriculture, therefore after completing graduation in Horticulture one can make a career as a Horticulture officer, Section officer, Landscaping officer, Food Safety Officer, Agriculture Field Officer, Horticulture Manager, Farm Manager, Nursery operator, etc.

Higher education opportunities after B.sc Horticulture:

After completing B.sc Horticulture one can go for M.sc Horticulture.

B. Sc Agriculture Vs. B. Sc Horticulture, Which Course is Better?

In the matter of employment opportunities and higher education, B.sc Agriculture is better than B.sc Horticulture.

Why Choose Mangalayatan University for B.sc Agriculture?

State-of-the-art infrastructure, upgraded labs, and hi-tech classrooms make Mangalayatan University the best institute for B.sc andMsc Agriculture admission.

Top-notch teaching faculty and guest lecturers from top Indian Universities.

Excellent practical training and internship opportunities in top organizations.

Top Courses After 12th for Commerce Students: High Salary, Career Options & Scope 2026-27

What Should I Do After 12th Commerce?

Selecting the best commerce course after the 12th is perhaps one of the most critical decisions that a student makes.Commerce courseis a broad subject packed with opportunities in finance, accounting, business, law, and economics. Whether you aspire to be a chartered accountant, a business analyst, or even a digital marketing professional, there is a commerce program for you. With the increasing need for qualified professionals in the field of commerce, the right course choice opens the gates to a lucrative and rewarding career.

Why Choosing the Right Course After 12th Commerce Matters

The correct course in commerce not only makes you a strong candidate in the subject but also prepares you for future challenges. Every course follows a different career path and specialization. For example, a student who loves numbers may choose B.Com or CA, while someone interested in law might go for BBA LLB. The earlier you decide what interests you, the better it is to plan your commerce course admission and career roadmap. It also helps in saving time, energy, and money spent on switching courses later.

List of Top 10 Courses After 12th for Commerce Students with High Salary in 2026

Here is a table listing the top 10 commerce courses after 12th for students in India. These courses are known for offering stable careers, high salary and industry relevance:

List of Top 10 Courses After 12th Commerce with High Salary	Course Name	Duration	Eligibility	Salary Range (Per Annum)

Top 5 Professional Courses After 12th Commerce

Professional courses are required for specialist career positions. Once 12th commerce is completed, students may take

CA (Chartered Accountancy): Suitable for numbers and law.

CS (Company Secretary): Suited for students who want to specialize in corporate laws and governance.

CMA (Cost & Management Accountant): Suited for those who wish to work in costing and management accounting.

CPA (Certified Public Accountant): Internationally accepted certification.

CFA (Chartered Financial Analyst): Perfect for investment and portfolio management jobs.

These professional commerce courses provide in-depth domain knowledge and increase your employability.

Top Government Job Opportunities After 12th Commerce

Following 12th commerce, various government job opportunities exist:

Banking Exams: IBPS Clerk, IBPS PO, SBI PO, and RBI Assistant are available for commerce graduates.

SSC CHSL & SSC CGL: Provide employment such as auditor, accountant, and tax assistant.

UPSC and State PSCs: Commerce students are eligible for civil services exams.

Railway and Defense Exams: Commerce students can appear for exams such as RRB NTPC, Indian Navy AA, etc.

Government Accountant Posts: A B.Com degree is enough to apply for posts such as junior accountant and auditor.

These jobs offer job security, good remuneration, and retirement benefits.

Best 5 Creative & Design-Oriented Courses for Commerce Stream Students

Not everybody studying commerce would prefer to deal with numbers; some would prefer something creative. Here are some of them:

B.Des in Fashion Designing: This course prepares students for dynamic careers in the fashion and apparel industry.

BBA in Marketing & Advertising: Deals with brand management, advertising, and creative promotions.

Bachelor in Event Management: Suitable for those interested in managing and coordinating events.

Bachelor in Mass Communication: Combination of media, journalism, and content production.

Graphic Designing or Web Designing: Short courses or degrees can result in high-income creative professions.

Commerce students themselves can also venture into the creative aspect and make passion a career.

Why Commerce Is a Smart Choice: Scope and Future Growth

Commerce isn't limited to just accounting and business. It's a clever decision because

Besides graphic design and web design, there are numerous other opportunities.

Growth in Government Sectors and the Private Sector: Finance experts across companies, managers, and analysts are keenly required.

Opportunities Abroad: ACCA, CFA, and CPA degrees are recognized worldwide.

Easy Entrance into Entrepreneurship: Commerce graduates make excellent entrepreneurs who can start their own businesses.

Stable and Respected Profession: In law, finance, marketing, or HR, commerce offers long-lasting success.

With the right commerce course, your future can be both rewarding and full of diverse opportunities.

=====

UG and PG Full Form: Course Details, Admission, Eligibility, Entrance Exam, Fees, and Top Colleges

Education plays a crucial role in shaping one’s career and future success. In India, after school, students pursue higher education through UG (Undergraduate) and PG (Postgraduate) courses offered by well-known universities and colleges. These courses serve as the foundation for specialised knowledge and career advancement.

In this article, we explain the UG andPG, explore course details, admission procedures, entrance examinations, fees, top colleges, and why Mangalayatan University, Aligarh, is a preferred choice for students.

What is the Full Form of UG and PG?

UG:UG stands for Undergraduate. An undergraduate course is the first phase of higher studies that students undertake after completing 10+2 (higher secondary education). Such courses typically last for 3 to 4 years and award bachelor's degrees.

PG: PG stands for Postgraduate. A postgraduate course is pursued after obtaining an undergraduate degree. PG courses provide advanced studies in a professional sector and last for 1 to 2 years, awarding master's degrees.

Difference Between UG and PG Degree Courses

Below are some difference between UG and PG programs

Difference Between UG and PG Courses	Feature	UG (Undergraduate)	PG (Postgraduate)
Eligibility		10+2 (Higher Secondary)	UG Degree
Duration		3-4 years	1-2 years
Degree		Awarded	Master’s
Focus		Foundational Knowledge	Specialization
Examples		BA, BSc, BCom, BBA, BCAMA, MSc, MCom, MBA, MCA	

UG courses lay the academic groundwork, while PG courses refine skills and deepen expertise, making candidates more competitive in the job market.

List of Top 10 Best UG Courses in India

India offers a diverse range of UG courses in various streams: Some of the most popular include?

Bachelor of Arts (BA)

Bachelor of Science (BSc)

Bachelor of Commerce (BCom)

Bachelor of Computer Applications (BCA)

Bachelor of Technology (BTech)

Bachelor of Laws (LLB)

Bachelor of Education (B.Ed)

Bachelor of Pharmacy (BPharma)

These programs cater to various interests and career aspirations, including humanities, sciences, commerce, law, education, and management.

List of Top 10 PG Courses in India You Can Pursue After Graduation

Postgraduate programs provide advanced theoretical and practical knowledge. The top 10 PG courses include:

Master of Computer Applications (MCA)

Master of Science (MSc)

Master of Arts (MA)

Master of Commerce (MCom)

Master of Education (M.Ed)

Master of Technology (MTech)

Master of Social Work (MSW)

Master of Journalism and Mass Communication (MJMC)

Master of Laws (LLM)

These courses are ideal for graduates who want to specialise and move into leadership or expert roles in their respective fields.

Eligibility Criteria for UG and PG Admissions

UG Courses Eligibility:

They should have done 10+2 from any recognised board.

They must have a minimum aggregate mark range from course to course (usually 45%–60%).

A few courses will have subject-specific eligibility (e.g., BSc with science stream).

PG Courses Eligibility:

They should have a relevant UG degree from a recognised university.

The minimum required percentage usually varies from 50% to 60%.

Professional courses may require work experience or a certain entrance score.

Entrance Exams for UG and PG Programs

While many institutions offer direct admission, several reputed universities conduct entrance exams for merit-based selection:

UG Entrance Exams:

CUET (Common University Entrance Test)

NEET (Medical courses)

JEE Main (Engineering courses)

NID/NIFT (Design and Fashion)

PG Entrance Exams:

CAT / MAT / XAT (MBA)

GATE (Engineering)

NET / SET (Lectureship & Ph.D.)

PGCET (State-level PG programs)

Entrance exam performance plays a key role in securing admission to top institutions.

Fee Structure for UG and PG Courses

The fee structure varies depending on the type of course, college, and infrastructure:

Course Level	Government Colleges	Private Colleges
UG	5,000 – 50,000/year	30,000 – 1,50,000/year
PG	10,000 – 1,00,000/year	50,000 – 2,00,000/year

Scholarships, education loans, and financial aid options are available in many institutions, including Mangalayatan University, Aligarh.

Top 10 Colleges in India Offering UG and PG Programs

University of Delhi (DU) Delhi

Jawaharlal Nehru University (JNU) Delhi

Banaras Hindu University (BHU) Varanasi

Jadavpur University Kolkata

University of Mumbai Mumbai

Christ University Bangalore

Jamia Millia Islamia Delhi

Manipal University, Karnataka

These colleges are known for quality education, faculty, infrastructure, and placement support.

Boost your Future Career with the U.G & PG Program

U.G & PG Program

SOURCE (WEB): <https://www.mangalayatan.in/blog/top-10-engineering-colleges-offering-admission-without-jee-mains.html>

Students who have a strong interest in engineering but are struggling to pass the JEE Mains exam don't have to worry. In India, a large number of prestigious engineering schools admit B.Tech students without requiring JEE Mains marks. These schools take into account direct admission through management quotas, merit-based admission, and alternative entrance tests. Given how quickly technology is developing, enrolling in a B.Tech engineering program at a reputable university guarantees a solid foundation in creativity, research, and employable skills.

With the help of top-notch facilities, knowledgeable instructors, and fantastic placement chances, students can concentrate on computer science, mechanical engineering, civil engineering, electronics, artificial intelligence, and data science, among other fields. If JEE Mains isn't your path, there are always other methods to become a great engineer. Below is a list of the top 10 engineering colleges in India that provide B.Tech admission without JEE Mains, ensuring every aspiring engineer gets a chance to shape their future.

Best Engineering Courses After 12th in Uttar Pradesh, India 2026-27 Session

After the 12th grade, engineering remains one of the most popular career choices for students. Selecting the right B.Tech programme is essential, as it influences employment prospects across various fields, including artificial intelligence, manufacturing, IT, space technology, and construction. In light of the emergence of new-age fields, students must explore both traditional and contemporary engineering specialisations that align with their interests and long-term goals.

Numerous B.Tech programmes are available in India, each focusing on a specific industry. There is a field suited to you, irrespective of your passions: software development, robotics, civil projects, or vehicle design. Besides traditional engineering degrees, interdisciplinary courses that combine fundamental engineering disciplines with AI, IoT, and data science are becoming increasingly popular. The best engineering programmes to enrol in after the 12th are listed below:

Electronics & Communication Engineering (ECE)

Artificial Intelligence & Data Science

Automobile Engineering

Biotechnology Engineering

Aerospace Engineering

Chemical Engineering

=====

The business management program industry is a critical part of the global economy and plays a vital role in shaping the way that businesses and organizations operate. It is constantly evolving in response to changes in technology, the economy, and society as a whole, and is essential for the success of any organization.

The management industry includes a wide range of businesses and organizations that are responsible for planning, organizing, and directing the activities of other people. This can include everything from small businesses and startups to large corporations and government agencies. Many different functions fall under the umbrella of management, including financial management, human resources management, marketing management, and operations management. These functions are typically carried out by managers and leaders who are responsible for making strategic decisions and implementing plans to achieve the goals of the organization. In this blog, we will discuss the value of pursuing an MBA degree, its future scope and career opportunities.

What is MBA Degree?

An MBA (Master of Business Administration) is a professional degree program that focuses on business and management concepts, theories, and practices. It is designed to prepare individuals for leadership and management roles in a variety of industries and sectors. The program typically includes coursework in areas such as finance, marketing, operations management, and strategic planning, as well as practical experience through internships or capstone projects. Most MBA programs require students to have a bachelor's degree and work experience before enrolling and are typically completed in two years of full-time study.

The demand of MBA Degree

The demand for MBA degrees has consistently remained high over the years due to the belief that it provides a solid foundation in business management and leadership skills. Many individuals seek out an MBA degree to advance their careers and increase their earning potential. Employers also value MBA graduates as they are seen as well-rounded and capable of handling various business tasks and responsibilities. Additionally, the globalization of business has increased the demand for MBA degrees as they are seen to gain a competitive edge in the international market. Overall, the demand for MBA degrees will likely continue to remain strong in the future as businesses continue to look for talented and skilled professionals to lead their organizations.

Why should you choose an MBA Degree?

There are many reasons why you should choose to pursue an MBA degree. Some common reasons include: Career advancement: Many people pursue an MBA to advance their careers, either by

gaining new skills or by increasing their marketability to potential employers.

Networking opportunities: MBA programs often have a strong focus on networking, and students can make valuable connections with their classmates and professors that may be helpful in their future careers.

Increased earning potential: According to some studies, MBA graduates often earn higher salaries than their non-MBA counterparts.

Exposure to a wide range of business disciplines: MBA programs cover a wide range of business disciplines, including finance, marketing, and operations, which can give students a well-rounded education in business.

The opportunity to switch careers: An MBA can be a good option for people who are looking to transition into a new career field, as it can provide the necessary business knowledge and skills to make the transition.

Ultimately, the decision to pursue an MBA should be based on an individual's specific career goals and needs. It is important to carefully consider the pros and cons of an MBA program before deciding.

Top 13 Future Scope of MBA Degree in India

The future scope of an MBA admission is bright as the demand for skilled and knowledgeable business professionals continues to grow in various industries. Some of the potential career paths for MBA graduates include:

Banking & Finance: As the banking and finance industry continues to evolve, the scope of an MBA degree in this sector is also growing. With an MBA, professionals can gain a deeper understanding of financial management, banking operations, venture capital and corporate finance. This makes it an attractive option for those looking to enter or advance in the banking and finance sector.

Management consulting: MBA degree holders in the field of management consulting have been playing a key role in the development and growth of businesses in recent years. With the increasing demand for experienced professionals, there is tremendous scope for MBA degree holders in this field and they have a lot to offer to companies. Therefore, the future of MBA degree holders in management consulting will be very promising.

Investment banking: Investment banking is an industry that is continually evolving and transforming. The future scope of an MBA degree in investment banking lies in its ability to provide graduates with specialized skills for the sector such as financial analysis, risk management and corporate finance. With these skillsets, MBA graduates can be competitive candidates for various positions within the industry.

FMCG: With the rise of digital marketing, MBA programs have become more customized to meet the growing demand in the FMCG industry. With an MBA degree, graduates can gain insights into areas such as product packaging and customer segmentation, customer service and supply chain management. Furthermore, MBA graduates have a strong understanding of strategic planning, which is key to success in the ever-changing FMCG industry. Therefore, an MBA degree provides a great opportunity for those looking to pursue careers in this sector and stay ahead of the competition.

IT Sector: MBA degrees are gaining more popularity in the IT sector due to the advent of new technologies and digitalization. An MBA degree can not only help IT professionals to understand how technology works but also equip them with the necessary skills to develop innovative solutions. Moreover, it helps in developing leadership qualities which are highly sought after in the IT sector. Therefore, having an MBA degree is becoming increasingly important for those

who want to stay ahead of their competitors and make a successful career in this field.

Hospital & HealthCare:As more hospitals are turning to technology to improve patient care and cost-effectiveness, there is a growing need for professionals with knowledge of both business and health systems. With the growing demand for highly trained professionals in the healthcare sector, MBA degrees in this field have been gaining considerable popularity. The scope of an MBA degree in the healthcare sector is vast and includes roles such as hospital administration, strategic planning, financial management and leading teams.

Retail Management:The MBA degree in Retail Management is a popular choice for those looking to understand the dynamics of the retail industry and its evolution. It is also seen as a great option for those who want to learn how to manage a business in the retail sector. The scope of an MBA Degree in Retail Management is broad, with graduates not just managing stores and operations, but also understanding all aspects associated with it, including customer insights, marketing strategies, market analysis and more.

E-commerce:MBA degrees have become increasingly popular in the age of digital transformation and e-commerce. With the advancements in technology and the increasing importance of online businesses, MBA degrees are becoming an essential tool for those looking to launch their e-commerce ventures. The scope of an MBA degree in e-commerce is immense as it covers a wide range of topics such as digital marketing, product management, customer experience and more.

Consumer Durable:As the demand for professionals with an MBA degree in consumer durables increases, the future scope of acquiring this degree is growing. Therefore, with the growth of digital media, e-commerce and other innovative technologies, MBA graduates will be able to use their expertise to create new opportunities for innovation in the domain of consumer durables.

Automobile:The automotive industry is undergoing a huge transformation due to the introduction of automation and artificial intelligence. This has created a need for MBA graduates with expertise in this field, who can help the industry to stay competitive and future-proof. An MBA degree in Automobile also provides students with a wide range of career opportunities which could include consultancy work, product management roles, business development roles, or even setting up their start-ups.

Manufacture Industry:The manufacturing industry is one of the most rapidly growing industries today, with numerous opportunities for growth and expansion. MBA graduates are well-positioned to take on roles in almost any area of manufacturing from designing new products to managing production processes. Furthermore, the combination of an MBA's technical know-how and business acumen provides a unique combination that is highly sought after by employers across many industries.

Entrepreneurship:There is a growing trend of people wanting to start their businesses. This has led to an increased demand for MBA degrees in entrepreneurship. The future scope of this degree is very bright, as more and more people are recognizing the benefits of being their boss. With a degree in entrepreneurship, you will be able to start your own business and achieve success on your terms.

Travel & Hospitality:The Travel and Hospitality sector is one of the fastest-growing sectors in the world. The future scope of an MBA Degree in the Travel & Hospitality sector is bright and the demand for qualified professionals in this field is quite high. With the increase in international travellers, the demand for well-trained professionals to manage hotels, resorts, cruise ships etc., is also forecasted to rise.

=====

Today, we are living in a disruptive world that is changing constantly, so if you want to make your career in this constantly transforming world, then what skills do you need to have to make a better career. Because if the world is changing, then it will require new skills, so you also need to change yourself and learn new and demanded skills. How can you do so, For this, you must have two crucial skills: a highly demanded degree and a different mindset. If we talk about the most valued and demanded degree, then it's an MBA course degree, and once you take MBA admission to it, you will have a different mindset because everyone wants to take MBA admission program, but they are unable to develop a different mindset. However, you can do so by choosing this esteemed course.

Top 12 Benefits of Studying an MBA Course at Mangalayatan University Aligarh:

Advanced Skills: Students can enhance their leadership, strategic thinking, and decision-making abilities by enrolling in MBA programs, which frequently offer advanced training in business and business management course.

Networking Opportunities: Business schools frequently have large networks of former students and industry contacts, which can be helpful for job openings and career advancement.

Career Advancement: Gaining an MBA can improve one's chances of landing a job, increase one's earning potential, and open doors to career advancement in the business sector.

Specialization: Students can concentrate on their areas of interest by choosing to specialize in a particular area of business, such as marketing, finance, or entrepreneurship, which is a feature of many MBA programs.

Global Perspective: In today's interconnected world, business schools with an international reach can offer a global perspective on the subject.

Personal Development: A common focus of MBA programs is on both professional and personal development, which aids in students' personal development and helps them become capable leaders.

Higher Education Option: If you are willing to study further after an MBA course, then you will have this option. You can go for a Ph.D. in any particular field, for instance, finance, marketing, HR, or business management. So, an MBA degree provides you with the option to study further.

Start-Up Opportunity:If you are eager to build your own company, then you can do it by starting a service provider company in human resources, marketing, sales, or finance after earning an MBA degree. It depends on the specialization that you take during your admission.

High Salary:Once you complete your master of business administration degree, you will have a diverse range of job options to choose from, and these job profiles are highly valued, esteemed, demanded, and significant because you will be paid well for them.

Opportunities for entrepreneurship:India's expanding economy offers a favorable climate for business endeavors, and an MBA can give you the know-how and abilities you need to be successful in this setting.

Developing Conversational Ability:For professionals to thrive, effective communication is a fundamental skill. Even though it might not be as valuable as "hard skills" like building a P&L model, communication is still important. Your ability to effectively communicate ideas to individuals at various organizational levels and ensure that everyone can cooperate to achieve a common objective can be enhanced with the aid of an MBA.

Improved Time Management:Obtaining an MBA necessitates balancing demanding coursework with extracurricular activities, in addition to other personal and professional goals. Obtaining an MBA can assist you in developing effective time management skills, which are both in-demand by employers and important life lessons.

It's crucial to remember that the advantages of an MBA can change based on a person's specific career goals, the program, and the state of the business world at large.

BCom Course Details: Full Form, Admission, Eligibility, Subjects, Top Colleges, Fees, Exams, Scope

Bachelor of Commerce (B Com) is a three-year undergraduate degree program in India, designed to focus on business management, accounting, taxation, finance, banking, law and management sector. For students hoping to pursue jobs in business, finance, or administration, it is among the most sought-after degrees. Students graduate with a solid basis for future professional studies like CA, CS, CMA, MBA, or MCom, thanks to the course's analytical, managerial, and communication abilities.

Usually lasting three academic years, the BCom study is broken up into six semesters. Core studies, electives, and practical sessions are all included in each semester. In order to increase job preparation and expose students to the industry, some colleges also provide internships or project work during the last semester.

Students must have finished Class 12 or its equivalent from an approved board in order to be eligible for aBCom admission. Although students from the Commerce stream are most equipped for the course, many universities also admit students with backgrounds in the arts or sciences, depending on their admissions rules. Although this varies by institution, most schools require a minimum of 45–50% in Class 12.

BCom stands for Bachelor of Commerce. It is a three-year degree in the field of commerce, finance and business administration. Nearly all Indian universities offer the BCom, a basic degree that supports a variety of career pathways.

Although "BCom" is the basic title, it can take on several forms depending on the institution or area of expertise. These consist of BCom LLB (Integrated Law and Commerce), BCom (General), and BCom (Hons). The diversity shows how the training can be tailored to the student's professional objectives.

Top BCom Courses in India

Let's break down the most popular types of BCom programs available in India:

1. BCom General

The most popular BCom form is this one. It covers a wide range of subjects, including economics, taxation, auditing, business law, and accounting. For students who wish to broaden their knowledge of trade and maintain flexibility in their job choices, it's perfect.

2. BCom Honours

Students can concentrate on a particular area, such as accounting, finance, or economics, with BCom Honours, a more focused and intensive version of the main course. Students who intend to pursue professional courses or postgraduate studies select this course because of its more thorough and research-focused curriculum.

3. BCom with Specialisation

A lot of universities have also started offering BCom courses with specialized industry stream courses to boost a student's career. Popular specializations include:

BCom in Accounting and Finance

BCom in Banking and Insurance

BCom in Taxation

BCom in Financial Markets

BCom in Computer Applications

BCom in International Business

Bachelor of Commerce Course Overview

The three-year undergraduate Bachelor of Commerce (BCom) program focuses on business fundamentals, accounting, finance, and commerce. Students are prepared for jobs in the corporate, banking, finance, and taxes industries. The course gives students the academic and practical information they need to improve their managerial, entrepreneurial, and analytical abilities.

BCom Eligibility Criteria after 12th

Depending on the university and the nation, different requirements may apply for a Bachelor of Commerce (BCom) degree. Nonetheless, the following are the general requirements:

Academic Requirement: a minimum of 45–50% (depending on the university) in 10+2 from an accredited board. Economics, mathematics, or commerce may be required courses at some schools.

Age Limit: Most institutions don't have a set upper age limit.

Admissions Procedure: Based on entrance tests (such as CUET, NPAT, or SET) or merit (Class 12 grades).

Relaxation: By government regulations, reserved groups may get reduced cut-off standards.

BCom Admission Process

While each college may have a different admissions procedure, most BCom courses include the following steps:

Application Process: The majority of universities have an online application process in which you must submit your information, attach the required files, and pay a fee.

Entrance examinations: While some colleges use merit-based admissions, others administer entrance examinations for BCom admissions.

Merit-based admission: Grades from the 12th grade are frequently used to determine admission. Your chances of getting accepted into a prestigious college rise with higher grades.

Detailed List of BCom Subjects

A thorough grasp of many facets of commerce is intended to be provided by the BCom courses and curriculum.

BCom Course Skills

Numerous talents that are useful in the workplace can be developed with the aid of a BCom education.

Financial Acumen: Knowledge of budgeting, financial analysis, and financial statements.

Analytical Skills: Data evaluation, financial report interpretation, and well-informed decision-making.

Company Knowledge: A thorough comprehension of economic considerations, management concepts, and company processes.

Accounting Proficiency: Knowledge of accounting software, procedures, and principles.

Communication Skills: Proficient written and verbal communication is essential for presentations and corporate relations.

Problem-Solving: Recognizing problems, weighing choices, and putting solutions into action in a business setting.

Legal Awareness: An understanding of company governance, rules, and commercial laws.

Marketing Insight: Knowledge of consumer behaviour, marketing tactics, and market research.

IT and Software Skills: Expertise in information technology applications and business-related software.

Teamwork and Leadership: Managing teams, collaborating on projects, and exercising leadership.

Challenges Faced by BCom Students

Academic Challenges: Keeping up with the most recent developments in the field while managing the demanding homework.

Intense Competition: Due to the large number of students choosing BCom, there is fierce competition for prestigious universities, internships, and employment opportunities.

Balancing Theory and Practice: It can be challenging for students to strike a balance between theoretical knowledge and practical abilities.

Exam Pressure: There might be a lot of pressure to do well on tests and get good grades.

Keeping Up with Changes: Students must keep up with the most recent rules and trends because the banking and commerce industries are always changing.

Limited Practical Exposure: Students may find it difficult to apply their knowledge in real-world situations due to a curriculum that doesn't offer adequate practical exposure.

Career Uncertainty: Selecting the best career path can be challenging and stressful due to the abundance of options.

Skill Development: It can take time to acquire new abilities, including technical expertise, leadership, and communication, but doing so is essential.

Internship Opportunities: It can be difficult to find relevant internships to obtain real-world experience.

Financial Restraints: For certain students, paying for their education—including tuition and study materials—can be a major hardship.

Juggling Work and Study: Students who work part-time jobs to pay for their education may find it challenging to manage their time between work and school.

Why Choose Mangalayatan University Aligarh for BCom Admission

Compliant Curriculum: Provides a 4-year Honours with Research track, a contemporary, diversified curriculum, and flexible exit alternatives.

Industry-Oriented Learning: Hands-on experience via financial simulations, case studies, and internships.

Research Component in Final Year: Students who choose Honours with Research complete a guided project or dissertation, which is perfect for jobs requiring analysis or academia.

Competitive Exam Support: Integrated government, CA, CS, and CMA exam preparation.

Qualified Faculty & Mentorship: Gain knowledge from seasoned industry professionals, PhD holders, and chartered accountants.

Mangalayatan University, Aligarh, offers UGC-approved course, industry relations and career-oriented programs and thus it is among the top options that a child who wants to master commerce can choose.

Symbiosis College of Arts and Commerce, Pune

Narsee Monjee College of Commerce and Economics, Mumbai

Shivaji College, Delhi University

Vivekananda College, Delhi University

Mount Carmel College, Bangalore

Amity International Business School, Noida

K J Somaiya College of Arts and Commerce, Mumbai

These private colleges are highly regarded for their commerce programs and facilities.

Enhance Your Career Growth with aCommerce Program

Why Choose Mangalayatan University Aligarh for Commerce Admission

Many factors make Mangalayatan University a good choice for admission to commerce programs such as bcom and mcom courses. In Aligarh, Uttar Pradesh, Mangalayatan University is the top private university. It offers a thorough commerce course for students who want to become certified public accountants. It is well known for its highly skilled faculty, cutting-edge facilities, first-rate learning environment, expansive campus for studying, placement support, and numerous other features that will help you advance your knowledge and abilities to become an authority in your field. Here's a list of acceptable explanations:

Extensive Curriculum: MUA's commerce program is designed with students' needs, interests, and career goals in mind.

Accreditation and Recognition: MUA is recognized by the AICTE, the University Grant Commission, and a number of other Indian educational authorities.

Modern Infrastructure: Mangalayatan University gives you access to the most up-to-date resources needed to develop the advanced abilities and expertise needed to teach.

Knowledgeable Faculty: MUA is home to exceptionally talented instructors who are authorities in their domains.

Industry Collaboration: After earning your degree in commerce, you will have the chance to connect with professionals in the field who can help you progress your career.

100% Placement Support: Students are hired by esteemed domestic and international companies with the assistance of Mangalayatan University's top placement support team.

These are the main reasons Mangalayatan University is one of the best private institutions for mcom and bcom admission. You can choose where to enrol in your commerce program, but be sure to pick the best institution that can support both your academic and personal growth. At Mangalayatan University, you can take advantage of both. Keep in mind that you have control over the decisions you make that will impact your future. Choose the appropriate college for your commerce admission as a result.

B Pharmacy Course Details: Subjects, Eligibility, Admission, Career Scope, Job Opportunities & Salary (2026)

B Pharmacy education has evolved tremendously over the past few years. Moreover, today's ruthless covid-19 times has proved it more clearly. Due to the ongoing infectious scenario,

pharmacy has become the essential key element of the health care system. The sector is playing a big role in influencing the living standards, curing diseases and safeguarding the lives of the community in the best way possible.

Pharmaceutical education has adopted good practices that ultimately resulted in the formation of dependable and ethical professionals without merely dispensed drugs. Among the largest exporters of medical goods worldwide, India ranks 12th. The export value of India's drugs and pharmaceuticals was 24.44 billion US dollars in FY21. The role of the Pharmacist has developed into being more than just a drug dispenser. From primarily being a drug dispenser to becoming medical counsellors, educators, researchers, management experts, etc., a degree holder in Pharmacy is witnessing an ocean full of exciting opportunities.

Wondering if Bachelor of Pharma course is the right degree for you? Well, this blog covers major Pharmacy related topics including what is B. Pharmacy, eligibility criteria, job opportunities, the scope of B. Pharmacy in India, required skill set and much more, in detail.

Reading this blog will help you to make a sound and wise decision about your future.

B Pharmacy Course Objectives

Among all countries, India ranks 3rd for pharmaceutical production in terms of volume and 14th for value. Over 3,000 domestic pharmaceutical manufacturers operate in the country.

The Bachelor of Pharmacy course is a four-year undergraduate degree program that is designed to provide students with a very comprehensive pharma education. Its focus has broadened to encompass such aspects as hospital pharmacy, industrial pharmacy, clinical practice, and traditional healing systems, among others. Due to better professional growth, rewards, and recognition as a professional, it is considered one of the most attractive healthcare degrees.

As a student of Pharmacy, you will study a wide range of medicines, formulations, dosages, and therapeutic effects on the human body.

B Pharma Full Form

B Pharma stands for Bachelor of Pharmacy. It is a 4-year undergraduate degree course that offers all-round knowledge and skills in pharmaceutical sciences, including drug formulation, development, and healthcare system.

It is a 4-year undergraduate degree course that offers all-round knowledge and skills in pharmaceutical sciences, including drug formulation, development, and healthcare system.

B Pharmacy Course Details after 12th

Among the topics covered by the B Pharmacy program are biochemical science and the healthcare business. Make sure you pick a college offering pharmacy courses that are accredited by the All-India Council of Technical Education (AICTE) as well as the Pharmacy Council of India (PCI).

In general, the curriculum includes synthesis of pharmaceutical formulas, formulation of dosage forms, chemical, instrumental, and preclinical analysis of the drugs, testing on laboratory animals, patenting and marketing of the new drugs, among other subjects.

Salary After Bachelor of Pharmacy Degree Course in India

Pharmacy graduates have several job opportunities in India. Salary levels within this profession can also vary from company to company depending on the type of work one does.

Job Role	Salary (Per Year)
Pharmacist	INR 2 – 4 LPA
Medical Representative	INR 3 – 5 LPA
Clinical Research Associate	INR 3 – 6 LPA
Drug Inspector	INR 6 – 10 LPA

Salary (Per Year)

With experience, salaries can increase significantly.

Future Scope of B Pharmacy Course in India

In India, B Pharmacy is an employment-oriented course. Based on India's Economic Survey 2021, the domestic market is projected to grow 3x in a decade. Despite growing challenges in the Indian pharma industry, 58,000 new jobs are forecast to be created by 2025, as the industry is expected to grow up to 45%. Upon graduation, the student can apply to different government sectors, pharmaceutical companies, or open their own pharmacy.

Approximately 6.6% of the total merchandise exports of the country come from the pharmaceutical sector. As of May 2021, India had exported 586.4 lakh COVID-19 vaccines to 71 countries, including grant (81.3 lakh), commercial exports (339.7 lakh), and exports through COVAX (165.5 lakh). More than 200 countries in the world import drugs from India, with the US being the

largest market. Globally, generic medicines account for 20% of the country's exports, making it the largest provider.

In India, many companies and government agencies are hiring students from B Pharmacy programs and there are many other opportunities for B Pharmacy students interested in taking positions abroad. With this degree, you will have a wide range of job possibilities in the pharmaceutical industry like drugs and medicines, medicinal chemistry, pharmaceutical engineering, etc.

Graduates can work at pharmaceutical companies in a variety of departments such as Packaging and Marketing, Quality Control, Production, etc. Students interested in further study in pharmacy can pursue the Master of Pharmacy (M Pharm) program after completing the B Pharmacy degree.

Best Career Options or Jobs Opportunities after B Pharmacy Course

By 2030, the Indian pharmaceutical market is expected to reach US\$ 120-130 billion and reach US\$ 65 billion by 2024. Students completing a pharmacy course have a wide range of career options. Their educational background makes their job roles extremely diverse and flexible. They can work as a pharmacist or for a pharma company. Both the public and the private sectors offer an abundance of opportunities for students. The government sector can be a career path for you. Besides this, you also have the option of working in an overseas company.

Graduates can work in government hospitals, private hospitals, clinics, and private medical shops. Also, you can establish your own consultancy or a medical shop.

There are a wide variety of rewarding careers available to a graduate after they complete a B Pharmacy such as:

Analytical Chemist

Food and Drug Inspector

Hospital Drug Coordinator

Chemical Technician

Drug Technician

Health Inspector

Research Officer

Pathological Lab Scientist

Research & Development Executive

Making Prescription to Patients

Clinical Researcher

How to Choose Top B Pharmacy College?

The number of pharmacist schools throughout the country has been growing over the past few years, but students who do not wish to relocate can enroll at any good B Pharma college in their respective hometowns.

Aspirants should consider several factors when choosing the best institute, depending on their courses. To simplify the process of selecting and applying to the best pharmacy colleges, here are some parameters for prospective students. When deciding which is the best B Pharmacy college to attend, candidates need to consider the following factors:

Location of the Institute

Experienced and Skilled Faculty

Top Companies Hiring B Pharmacy Graduates

In India & abroad, you can find pharma jobs at leading companies as a B Pharmacy graduate. A variety of job vacancies are available, it just needs the right combination of skills, dedication, and company to be competitive. Here are the top 5 pharma companies where you can get your desired job profile:

Reddy's Laboratories

Glenmark Pharmaceuticals

Benefits of Doing Bachelor of Pharmacy Course

Since medicine began, pharmacology has existed. The role of a pharmacist is growing as the medical industry expands. Using their expertise in making sure patients get their prescription medicines, pharmacists help patients get well in time. In recent decades, the pharmaceutical industry has undergone many changes. On the other hand, automated technology and the internet have greatly impacted the pharmaceutical industry. Using technology has completely changed the way pharmacists perform their profession's daily duties.

Considering the precise nature of pharmaceutical science, the demand for qualified pharmacists will never cease. With the expansion of healthcare facilities, along with advancements in healthcare in general, the demand for well-versed pharmacists has increased. Therefore, there is a dire need for qualified pharmacists to work in hospitals and retail pharmacies. The following are five reasons why a career in pharmaceuticals could be rewarding:

Opportunities for Career Diversity

Stable Employment

Flexible Working Conditions

Reputable & Recognized Profession

Opportunity to Help Others

Required Skills for B Pharmacy Course

To be successful in your career, not only is any degree important, but you must also develop highly relevant skills. The development of these skill sets is essential to a student's overall development and makes an individual capable of coping with a wide range of challenges and situations. The following skills are needed by B Pharmacy students to keep pace with evolving pharmacy practices:

Communication skills and Interpersonal skills

Medicinal and scientific research skills

Curiosity and Persuasive skills

Business skills like marketing, organizing

Science wizard and technical skills

Sharp memory and Human skills

Therapeutic and counselling skills

Medical writing and ethics

Determinant and consistency skills

Adaptation ability to dynamic situations

Multitasking skills and Learning skills

After B Pharmacy Which Course is best?

When one is done with a B. Pharm several advanced courses can boost your career depending on your chosen career path of interest. Here are some of the best courses to consider: Below are some of the best courses to consider:?

Master of Pharmacy (M. Pharm)

PG Diploma in Clinical Research

PG Diploma in Pharmaceutical Quality Assurance

MS in Pharmaceutical Sciences (Abroad)

Regulatory Affairs Certification

Certification Courses?

SOURCE (WEB): <https://www.mangalayatan.in/blog/bsc-nursing-course-unlocks-the-doors-of-dignified-secure-and-well-paid-career.html>

=====

B.Sc. Nursing- A Course That Unlocks the Doors of Dignified, Secure, and Well-Paid Career

According to the founder of modern nursing, Florence Nightingale, "Nursing is an art: and if it is to be made an art, it requires an exclusive devotion as hard a preparation as any painter's or sculptor's work."

In India where maximum students are after glamorous careers like Doctor, Engineer, CA, and Lawyer; the same there is special education field where competition is still not so fierce and their career scope is immense bright. Yes, it is Nursing Course, which is continuously gaining popularity among students. Nurses deliver unprecedented contributions in the health care industry, without them neither great medical feat can be achieved nor patients can be cured of diseases. Nurses never come to the limelight for their work, but their contributions make them special and dignified.

With time, the landscape of Nursing course is changing. Gone are the days, when this field was considered women-centric but now men have too ventured into this course. B.sc Nursing is a popular undergraduate degree of four years which prepares qualified human resource.

BSc Nursing Course Overview

The course is an excellent blend of theory and practical. During the course, students are taught

Anatomy & Physiology

Biochemistry & Microbiology

Psychology & Sociology

Pathology & Genetics

Child Health Nursing

Mental Health Nursing

Midwifery & Obstetrical

Nursing Nursing Research & Statistics

Practically students learn to work in a variety of specialties, they work independently and as part of a team to assess, plan, implement, and evaluate care.

The job responsibilities of Nursing professionals are to take care of the sick and the infirm

people, assist and aid doctors during examinations and operations, and to handle the administrative responsibilities of Hospitals. BSc nursing career scope in India and abroad is immense, the way private and multi-specialty hospitals are mushrooming, after completing the course students can make a great career in India and abroad. Notable thing is that India has emerged as the largest provider of nurses to foreign countries. In the developed European countries, there is a scarcity of skilled Nurses. Therefore, in the lure of high compensation and a better lifestyle, after gaining significant experience maximum Indian nurses move to the European countries and establish a successful career.

Eligibility Criteria for B.Sc. Nursing:

Students who have completed 10+2 in Physics, Chemistry, and Biology with 45% marks from any recognized board/ institute, they are eligible for B.sc nursing admission.

B.Sc. Nursing Career Scope in India and Abroad:

Upon completion of B.sc Nursing, students can get employment opportunities in private hospitals, nursing homes, and NGOs.

Indian Railways, PSUs, and the Indian Armed Force, also release vacancies for B.sc Nursing degree holders.

B.sc Nursing graduates also can get employment opportunities in prestigious organizations like The Indian Red Cross Society, Indian Nursing Council, and various State Nursing Councils.

There also option of higher studies after B.sc Nursing, students can do postgraduation in nursing like ambulatory care nursing, cardiac nursing, cardiac intervention nursing, critical care nursing, emergency nursing, and paediatric nursing, etc.

There is a great demand for B.sc Nursing graduates in European countries and the USA.

=====

BCA full form is Bachelor of Computer Applications. It is a three-year undergraduate degree program that helps students learn to solve challenging problems in today's fast-moving technology world. A Bachelor of Computer Application degree is the core of Computer Science in today's world. bca admission is a three-year degree program. This degree is for those who want to study computer science, software engineering, information technology, information security, and networking technology.

The degree focuses on the design, development, and deployment of software systems with a special focus on the design and analysis of software security. Moreover, in the world of programming, there are many opportunities to make money as an expert in your field. As a computer programmer, you can find different types of software, including databases and web software. In general, it pays well along with diverse career prospects.

The BCA course equips students with a diverse range of IT skills, fostering proficiency in programming languages like C, C++, Python, and Java . It also includes training in Database Management Systems (DBMS), cybersecurity, operating systems (Windows, Linux), computer networks, software development methodologies, and web development technologies such as HTML, CSS, and JavaScript.

BCA stands for Bachelor of Computer Applications. It is three years undergraduate degree course which equips students with theoretical as well as practical knowledge in computer science, with importance on subjects like programming, software development and information technology. The goal is to prepare students for a career in the information technology field.

BCA Course Objectives

The BCA program's goals are to provide a solid academic foundation from which a career in sophisticated computer applications course can be fostered.

The main goal of a BCA degree is to provide students with the knowledge and abilities necessary for professions in the software sector, as well as with the application of computers.

To deliver high-quality computer education to advance logical programming and computing abilities.

To implement cutting-edge methods and procedures in teaching, learning, and assessment.

To encourage innovation and the pursuit of perfection in computer applications.

Establish a solid foundation in computer basics.

Equip the graduates with remarkable leadership, communication, and problem-solving abilities.

Educate the learners to offer qualified solutions to challenges that arise in the actual world.

BCA Course Highlights

The undergraduate degree BCA degree course is broken up into six semesters and covers computer science and its theoretical underpinnings. Students learn data structures, database systems, and computer networks in the BCA course. Since most sectors depend on computer applications and specialists for the proper operation of their firm, the BCA degree has a wide range of potential opportunities for undergraduates.

BCA Course Details:

The Bachelor of Computer Applications (BCA) provide various computer applications and concepts and computer languages and software engineering. The areas addressed include data structures, World Wide Web, databases and networks. It's the type of course that prepares students to work in IT and the software industries.

BCA Course Duration in India

Bachelor in Computer Application course is a three-years and six semester undergraduate degree program. After completing high school, the best bachelor's degree programme for students who want to pursue careers in IT is BCA?. With an emphasis on fields associated with computer applications and technology, this course equips the student with a variety of career prospects.

BCA Admission Eligibility Criteria after 12th

BCA course eligibility criteria requirements for admission to the BCA course are determined by the college students who wish to apply. The availability of certain resources, the number of applicants for the course, the location of the college, etc., all have an impact on eligibility. Additionally, a few universities and institutions may need students to pass exams with high marks to be admitted. A minimum score of 50% is required for students to pass their 10+2 examination from an accredited board. The learning involves applicants to be at least 17 years old to enrol.

BCA Course Subject and Curriculam

The bachelor of computer application? degree course is designed to provide students with a solid foundation in computer science and IT. The BCA course is a three-year course. In this BCA course, students cover many subjects that equip them with theoretical knowledge and practical skills. Here's a general overview of the subjects you can expect to study in a BCA program:

bachelor of computer application

Salary After Bachelor of computer application Degree Course in India

For graduates in the sector, there are numerous employment prospects along with the choice to pursue higher education.

The average bachelor of computer application salary for a graduate in India is INR 3.7 LPA, according to PayScale. Depending on

Years of Experience,

Skills & Expertise

As a result, students can advance their careers by enrolling in certificate programs and master's degrees if they earn more expertise or study more.

Future Job Scope After BCA Course in India

A constant demand exists in the market for knowledgeable tech enthusiasts as the IT industry continues to grow and envelop industries like business and medicine. There are numerous work opportunities for BCA aspirants. BCA graduates have access to a wide range of highly sought-after IT-based positions.

Today, a wide number of options, including web design, programming skills, system administration, and other fields, are available to BCA graduates, giving the degree a wide range of application possibilities. Additionally, as the global IT sector advances toward greater heights, demand for tech professionals is only increasing.

The vast BCA scope provides the students with a wealth of opportunities. It has several benefits, including stream adaptability. BCA has a colossal amount of potential. Following course completion, one may pursue employment or further education. There is also the option of entrepreneurship.

If you have so many abilities, you could work for yourself or create your application. There are numerous software MNCs that hire BCA graduates. One can secure great opportunities in MNCs if they have professional exposure and all the skillset.

Go for further courses like the MCA and PhD if you seek in-depth understanding in this area. MCAs may choose to concentrate on management information systems, systems development, or other areas. After earning their MCA, candidates can work as lecturers at any reputable college.

Top 10 Career or Jobs Opportunities after BCA Degree Course

BCA program is a skill-oriented course -therefore acquiring a job is comparably simpler for individuals as compared to strictly academic programs like BSc or BCom. This is especially true for individuals who want to directly explore work options upon finishing their undergraduate degree. For BCA graduates, there are attractive career prospects in both the public and private sectors. So, if you're wondering what to do after completing BCA, here are several career opportunities that fall under its BCA scope:

System Engineer -A system engineer's duties include controlling a system's management, business, and engineering components. They identify and fix issues inside a system, frequently create new ones, and even upgrade the hardware.

Computer Programmer -A computer programmer develops, alters, and evaluates programs that affect how well computer systems or applications work. They work together with programmers to translate their concepts into instructions that a computer can execute.

Network Administrator -The components of hardware and software of a computer are the focus of a network administrator's responsibilities. They establish upgrades for networks, find bugs and repair them, and provide solutions for any issues that can impair the computer network's functionality.

Web Developer -Candidates for the position would create and manage websites as technicians. As they may use their understanding of HTML, PHP, and JAVA in their projects.

Web Designer -With the use of coding, a web developer analyzes, develops, and administers web pages. They work to build websites that are visually appealing and easy for users to browse by integrating texts with audio, pictures, and video.

Data Analyst -collects, cleans, and interprets data sets to identify trends, patterns, and insights that inform business decisions.

Cyber Security Analyst -protects an organization's digital assets, network, and systems from cyber threats, hacking, and data breaches.

Mobile App Developer -designs, builds, and maintains applications for iOS and Android, translating business requirements into functional, high-performance code.

Technical Support Executive -is an IT specialist that monitors, maintains and troubleshoots computer systems, networks and software applications on behalf of workers or clients of an organization.

Top Companies Hiring BCA Graduates

The number of BCA jobs available after graduation has grown over time. Graduates can select from a wide range of industries giving attractive work prospects because of the broad scope. For BCA graduates, there are several job prospects across the private and government sectors. Many reputable employers seek out recent graduates with degrees to provide employment opportunities.

The following is a list of renowned employers of BCA graduates:

Tech Mahindra, etc.

Benefits of Doing BCA Course in India

A BCA is among the most affordable alternatives one can have. Given that it gives students all the necessary training to study computer science and applications, a BCA is a crucial degree for the job market of today. A BCA can assist you in building a multifaceted career in the business since there is an increasing need for qualified IT engineers. Healthcare, IT, finance, commerce, transportation, technology, and education are among the industries where a BCA degree might land you a job. Moreover, Engineers in the field of computers are among the highest paid nowadays. Your degree will assist you in starting a career from scratch, and as you progress in the field, this network will assist you in locating the ideal employment opportunities in India or overseas.

Candidates who enrol in the BCA program receive comprehensive experiential learning and gain a thorough understanding of programming languages like Java, Python, etc. Additionally, students engage in a variety of real-world projects that greatly advance their technical knowledge and prepare them for careers in the sector. These abilities can assist students in obtaining internships and work experience while they are still in school, which will enable them to improve their CVs and launch a prosperous career. Furthermore, numerous government agencies, including the Indian Railway, the Military Engineering Services, and public sector banks, offer unique job openings for BCA graduates. A BCA is therefore your best choice that will allow you to pursue many employment opportunities.

Required Skills for BCA Course

BCA professionals must possess both soft and hard abilities to excel in their chosen professions. Among these abilities are:

Quantitative Analysis Skills

Computer Skills

Investigative Skills

The ability to operate despite the stress

Interpersonal Competence

BBA vs BCA Which Course is Best: Eligibility Criteria, Career, Fees, Duration, and Salary

A major decision for your career may be between a Bachelor of Computer Applications (BCA) and a Bachelor of Business Administration (BBA). The main goal of a BBA degree is to provide students with a thorough understanding of administrative and business management. In order to prepare students for a variety of roles in the business world, it covers a wide range of subjects, including finance, marketing, human resources, and operations. A BCA degree course, on the other hand, is mostly focused on IT and computer applications.

It offers a thorough understanding of systems management, programming languages, and software development, making it a great option for anyone hoping to work in the technology industry. Although there are good career prospects associated with both degrees, your interests and professional goals should guide your decision.

BBA is a three-year undergraduate degree program that has been designed for those who are willing to become business leaders in various sectors. The goal of a BBA program is to help students become more adept managers and business people. Marketing, finance, operations management, organizational behaviour, and human resource management are among the topics covered in the curriculum. It combines classroom instruction with real-world experience through project work, internships, and case studies. Graduates of BBA programs are qualified for managerial positions in a variety of industries, including banking, finance, marketing, and human resources. The goal of the course is to produce professionals who can comprehend, effectively manage, and make strategic decisions regarding business operations.

The three-year BCA undergraduate program is designed for students who wish to work as data administrators, engineers, or software developers. Teaching a solid foundation in computer science and its applications is the main goal of a BCA program. Programming languages (Java, C++, and Python), database administration, networking, software engineering, and web development are just a few of the topics it covers. In order to guarantee that students obtain real-world experience, the course offers substantial practical training through lab sessions, projects, and internships. Graduates of BCA programs are qualified for technical positions in network administration, software development, IT consulting, and other fields. The goal of the course is to create professionals who can effectively design, oversee, and maintain IT systems and software.

Eligibility Criteria for BBA Course after 12th

Applicants must have completed their 10+2 grade from an accredited board.

All stream students are allowed to apply for the BBA course at Mangalayatan University, Aligarh.

Students must have taken mathematics in their 12th class to apply for the BCA course at Mangalayatan University, Aligarh.

LLB Course Details, Admission, Full Form, Duration, Eligibility, Top Colleges, and Career

Do you have a strong determination to pursue a career in law? If so, then you have visited the right website and have chosen the relevant article that will help you learn every important detail about the LLB course. The Bachelor of Legislative Law (LLB) program provides a comprehensive understanding of a range of legal topics. Constitutional law, corporate law, property law, criminal law, contract law, and civil law are among the topics covered in the law bachelor's program.

If specialization is chosen, the three-year LLB program may extend to five years in certain circumstances. A bar exam and an internship are probably required after graduation before you can practice law, though some programs offer specializations. In this article, we will explore every significant piece of information that is required to know before taking admission to an LLB program. Therefore, let's start your law journey with Mangalayatan University, Aligarh.

LLB stands for Bachelor of Laws or Legum Baccalaureus (Latin). The genitive plural legum ("of laws") is where the "LL" in the degree's abbreviation originates. Usually, the first letter is doubled to create an abbreviation for a plural, especially from Latin.

LLB Course Details

The LLB is a three-year law degree program that has been designed for those students who are interested in building their professional careers as lawyers or corporate advisors. The Bachelor of Legislative Law course is pursued at the undergraduate level at Mangalayatan University, Aligarh. A wide range of subjects are covered in this course, like contract law, criminal law, constitutional law, tort law, property law, administrative law, jurisprudence, international law, and legal research and writing.

Students learn both theoretical and practical learning through moot court exercises, internships, and legal clinics. Exams, coursework, presentations, moot court performances, and dissertations or theses are examples of assessment methods. This three-year LLB course is pursued by those students who have already completed their undergraduate degree in their

desired field, like BA, B.Com, or B.Sc., and want to pursue a law degree.

=====

Both LLB (Bachelor of Laws) and LLM (Master of Laws) are two most popular degrees in the highly significant and evergreen discipline of Law, in India or abroad. These degrees offer a rather wide range of career opportunities in the Government as well as the private sectors. The most prominent among these employment avenues are the following --- district and high courts, companies & corporate houses, law firms, government departments and judicial offices, schools & universities, NGOs, media, banking & finance, insurance, broadcasting, politics, etc.

LLB course focusing on foundational legal principles and practices and LLM program focusing on specialization in areas such as corporate law, criminal law, or international law.

To provide more information about these two hugely popular law courses/degrees in India, including the major difference between LLB and LLM, and also about the admissions to these courses in India, the in North India, this concise blog has been written responsibly and generously.

Difference Between LLB and LLM Courses in India and Abroad

The LLB (Latin Legum Baccalaureus) is an undergraduate law degree, regarded as being the very first step towards becoming a qualified lawyer or barrister. After achieving LLB, the students are eligible to start practicing in the legal sector, or pursue the higher-level course of LLM. But, to start practicing law officially, the LLB holders are required to undergo a legal training course.

The duration of the LLB admission in India is generally three years, and its curriculum covers all most common and useful areas of law (the seven core modules), which are helpful to a host of careers. Thus, the LL.B. degree is the minimum/basic qualification to practice law. The equivalent degree to this, is the B.L. degree.

The LL.M. (Latin Legum Magister) is the postgraduate degree in legal sector. This postgraduate law course, offers knowledge and expertise in certain desired areas/segments such as Civil Law, Criminal Law, Business/Commercial Law, Intellectual Property Law, and so on. Hence, the LLM degree is not compulsory to become a professional lawyer; however, it is certainly very beneficial in the concerned area of the legal sector.

The LLM may be completed in just one year in India also. Its curriculum covers all topics, issues, and policies linked with any specific segment of law, say, the intellectual property rights (IPR).

Here, it may also be just noted that the minimum qualification for admission to the LLB course is (10+2) standard or its equivalent. While, for admission to LLM course, the minimum eligibility qualification is LLB/BL or its equivalent.

Syllabus, Eligibility and More

4. Global Networking Opportunities

In the world today, networking is more critical than ever. With your MBA application online, you are linked to a network of future professionals, experienced teachers, global alumni, and visiting business professionals. Your network opens doors to potential collaboration, employment placement, mentorship, and lifelong connections. From multinational internships to global case competitions, your online MBA program will expose you to individuals who can shape your future.

5. Specialisation in Your Area of Interest

The beauty of an online MBA program is that it is versatile. If you are interested in finance, marketing, operations, human resources, data analytics, or international business, there is a specialisation that is tailored to your career goals. These specialised courses give you thorough domain knowledge and make your profile highly relevant to certain industries. When choosing your online MBA course admission, you are free to choose your studies by your profession as well as your field of interest so that you can create long-term success opportunities for yourself.

6. Improved Leadership and Management Skills

Online MBA is not just about commanding—inspiring teams, making informed decisions, and leaving a mark. An MBA online program develops these skills in you through group projects, strategic games, role-playing activities, and leadership development. You'll be equipped to lead teams, handle projects, and solve complex business issues. These are not just professional skills; they're skills that will serve you in every aspect of your professional and personal growth after applying to your online MBA course admission.

7. Access to Better Job Opportunities

Throughout the globe, companies are looking for astute business minds and decision-makers. With an online course, you become eligible for various job openings over your undergraduate degree. From investment banks and consultancy firms to startups and Fortune 500 companies, recruiters target candidates with MBA online course information showing strategic thinking and analytical ability. You also gain access to quality job fairs, campus recruitments, and executive search firms.

8. Credibility and Prestige

An MBA is not just a certification—it's a symbol of commitment, intelligence, and skill. It tells a lot about how willing you are to make yourself a better person and professional. Employers, clients, and peers respect the value associated with an MBA degree, especially from highly reputable institutions. It confers upon you greater credibility in leadership roles, client interactions, and strategic discussions, and leadership roles. Your process to achieve MBA online degree lends depth to your profile and makes you more visible in a competitive setting.

9. Experiential Learning through Internships and Case Studies

An MBA online degree is not just about books—it's driven by real-world learning. Internships, live projects, simulations, and case study analysis get you to experience the dynamic business world for yourself. These hands-on experiences are seamlessly integrated into the MBA curriculum so that you're not just studying theory but also acquiring decision-making, critical thinking, and analytical skills. Whether you're working for a multinational firm or a startup, this experience sets you apart as a job-ready graduate.

10. Confidence Building and Personal Development

Besides professional acumen, an MBA program transforms you as an individual. You develop assertive communication, task prioritisation, stress working, and collaboration with various individuals. It is about self-learning, grit, and forging high character. From bogged-down group presentations to leading a business simulation within time limits, your MBA course application process inculcates mental resilience, emotional quotient, and a go-getter attitude that is applicable in every walk of life.

=====

Management has been a hugely popular professional discipline/field in India, particularly for past many centuries, just like the disciplines of engineering, medical, commerce, law, and sciences. Again, due to vast, varied, and ever-growing businesses and services in various economic sectors, highly talented and innovative management professionals are essentially required in individual companies and firms, and at varying hierarchic levels. Moreover, the intense and ever-increasing competitions in the world of businesses and services/professions further enhance the imperative requirements of veteran and ingenious management professionals and executives in various economic sectors in India or any country abroad. Hence, affluent and prolific business management courses are at present, among the hugely popular and highly sought-after professional courses in India and abroad.

Why Management Education Matters

The discipline or subject of management exclusively deals with efficient and profitable corporate governance, the desired growth and diversification, and the organizational leadership. Thus, impeccable management is inevitable for any smooth and legally secure, steadily thriving, and lucrative & growth-oriented business or service, regardless of the economic field.

Depending upon their respective levels of degrees in management and the specialization areas/fields, the management executives can serve a company/firm from the entry-level to top management-level positions and can achieve a rather progressive and well-paying career in the field concerned.

Specialisation in BTech Computer Science and Engineering Program

Computer Science Engineering (CSE) specializations give students the chance to focus more on particular areas of interest within the larger discipline of computer science. The following are a few typical CSE specialties:

Artificial Intelligence(AI):This field focuses on creating intelligent machines that are capable of tasks like computer vision, robotics, machine learning, and natural language processing that normally call for human intelligence.

Data Science & Big Data Analytics- The study of methods for drawing conclusions and knowledge from sizable and intricate databases is the focus of data science and big data analytics. Students gain knowledge of machine learning, statistical modeling, data analysis, and data visualization.

Cybersecurity:Focuses on defending data, networks, and computer systems from online threats and attacks. Students gain knowledge of cybersecurity legislation and regulations, network security

protocols, ethical hacking, and encryption techniques.

Software Engineering- The principles and procedures of designing, creating, testing, and managing software systems are the focus of software engineering. Programming languages, software design patterns, agile approaches, and software quality assurance procedures are among the things that students study.

Cloud Computing- The study of providing computer services (including servers, storage, databases, networking, software, and analytics) via the internet (the cloud) is known as cloud computing. Students gain knowledge of virtualisation, cloud security, deployment methodologies, and cloud infrastructure.

Internet of Things (IoT): This field focuses on tying commonplace items and physical equipment to the internet so they can exchange and gather data. In a variety of fields, including smart homes, healthcare, and industrial automation, students study sensors, actuators, communication protocols, IoT platforms, and applications.

Computer Networks: Focuses on the study of the structures, protocols, and communication systems that allow computers to share resources and data. In addition to learning about new technologies like 5G and Internet Protocol version 6 (IPv6), students also study network design, routing algorithms, and network security.

Mobile Computing- Mobile computing is the study of creating services and apps for portable electronics like tablets and smartphones. Students gain knowledge of mobile operating systems, mobile security, user interface design, and mobile app development.

BTech CSE Admission Process at Top BTech CSE College in Aligarh, Uttar Pradesh

The admission process for B.Tech Computer Science generally entails the following steps:

Entrance Exam: Take the mandatory entrance exams like JEE Main, JEE Advanced, or state-specific engineering entrance exams.

Counselling Process: After the entrance exam results are declared, participate in the counselling process conducted by various engineering institutions.

Seat Allotment: Based on your rank in the entrance exam, along with your preferred choices and seat availability, you'll be allotted a seat in a particular institute.

Begin your Tech Journey with BTech CSE Program

BTech CSE Program

B.Tech Computer Engineering Course Salary Scope

Numerous career options in a variety of industries become available to graduates with a BTech in Computer Science and Engineering (CSE). For CSE grads, the following are some typical career routes and professional roles:

Software Developer/Engineer

Technical Support Engineer

Why Choose Mangalayatan University Aligarh for BTech CSE Admission

By selecting Mangalayatan University in Aligarh for your B.Tech in CSE, you are choosing an education that is both well-rounded and prepared for the future. With its NAAC A+ accreditation and UGC recognition, Mangalayatan University guarantees a respectable and high-quality education. The AICTE-approved B.Tech CSE program complies with national academic requirements. It is an appealing option for prospective tech workers because of its affordable cost, practical curriculum, excellent instructors, modern infrastructure, and extensive placement support. Through industrial partnerships, innovation-centred learning, and elective projects, the university promotes research and entrepreneurship. The program encourages holistic development and is revised frequently to incorporate cutting-edge technologies like AI, ML, Big Data, IoT, Blockchain, and cybersecurity throughout the semesters.

A B.Tech in Computer Science and Engineering (CSE) gives you the information and abilities you need to succeed in the ever-changing IT sector. A solid basis in theoretical ideas, real-world applications, and in-demand specializations is provided by this extensive four-year program.

A B.Tech CSE degree offers a flexible foundation for a variety of job pathways, regardless of your employment goals, be they software development, data science, cybersecurity, or something else entirely.

Selecting the appropriate university is essential. Think about things like placement records, industry partnerships, teacher experience, and of course, the cost of the course. With an emphasis on the development of both technical and soft skills, industry-recognized certifications, and first-rate placement assistance, Mangalayatan University Aligarh (MUA) provides an alluring B.Tech CSE curriculum.

B.Tech CSE Course Related FAQs

Q1 - Is B.Tech CSE a good career opportunity? A Bachelor of Technology in Computer Science Engineering (CSE) is a great way to pursue a career. This field focuses on the highly sought-after skills of computer technology, software development, and problem-solving. CSE graduates have many job opportunities, such as software developers, data analysts, cybersecurity experts, etc. With its high earnings and opportunities for career advancement, the tech sector is expanding quickly. A B.Tech in CSE can lead to a steady and fulfilling job if you appreciate logical thinking and have an interest in computers and technology.

Q2 - What is the B.Tech in Computer Science course program? The design, development, and use of computer hardware and software are the main topics of the four-year undergraduate engineering program known as the Bachelor of Technology in Computer Science. Programming languages, data structures, algorithms, database management systems, operating systems, computer networks, software engineering, artificial intelligence, and machine learning are just a few of the many subjects it covers.

Q3 - Why Pursue a B.Tech in Computer Science? A B.Tech in computer science is a fantastic option, yes. It provides a wide range of tech employment options and is in high demand. You can pursue careers as a web developer, cybersecurity specialist, data scientist, or software engineer. It offers a solid basis for a prosperous career in the technology sector.

Q4 - What are the eligibility criteria for B.Tech CS? You must pass physics, chemistry, and math in the 12th grade to be eligible for a B.Tech in computer science. A score of at least fifty to sixty per cent is necessary. Additionally required is passing an admission exam such as JEE Main or JEE Advanced. Different colleges may have different requirements for eligibility.

Q1 - Is B.Tech CSE a good career opportunity?

A Bachelor of Technology in Computer Science Engineering (CSE) is a great way to pursue a career. This field focuses on the highly sought-after skills of computer technology, software development, and problem-solving. =====

The general and familiar undergraduate degree called Bachelor of Technology (B.Tech) is designed so that holders will possess the techniques knowledge and skills necessary for a fruitful career in the field of engineering and technology. The practical detail and theoretical background of BTech course and further study allows students to specialize in the facilities subject like electronics, computer science, and civil engineering.

Due to the faster advancement in technology, B.Tech graduates are in demand on most areas of industries and thus would be a good choice for the future engineers. In order to equip students for actual work needs, the program encourages creative thinking, effective problem solving and collaboration.

Full Form of B.Tech

BTech stands for Bachelor of Technology. This undergraduate degree is conferred to students in numerous engineering and technology programs of study. Thus, the given curriculum ensures graduates acquire the right knowledge and skills for functioning in the engineering field by combining the theoretical information with practical experience.

B.Tech Course Details

Particulars	Details
Course Name	B.Tech Full Form Bachelor of Technology
Duration	4 Years
Eligibility	10+2 PCMA
Admission	Merit / Entrance
Fees	INR 1–1.5 Lakh Per Year
Salary	INR 4–12 LPA
Top Recruiters	TCS, Infosys, Wipro

Bachelor of Technology

Merit / Entrance

INR 1–1.5 Lakh Per Year

TCS, Infosys, Wipro

B.Tech Course Duration

The B.Tech course on average takes four years divided into eight semesters in Mangalayatan University, Aligarh. In every semester, different subjects, practical exercises, and projects are undertaken, and students develop a sound knowledge of engineering principles and the ways in which they can be implemented.

B.Tech Eligibility Criteria after 12th

To take admission to the B.Tech. course, applicants must meet certain B.Tech. eligibility criteria, which are crucial for B.Tech. admission at Mangalayatan University, Aligarh. They are listed below:

Students must have completed their 10+2 from an authorized board.

They should have at least 50% marks.

Only students with a science background are permitted to take admission to the B.Tech course at MUA.

These are the basic B.Tech. eligibility parameters.

The Curriculum of the B.Tech Course

Elective courses, practical training, and core engineering subjects are usually included in the B.Tech. curriculum. Students obtain practical experience through project work and internships. While electives give students the chance to study specialized topics, core subjects might include programming, physics, chemistry, and mathematics. To ensure holistic development, the curriculum also places a strong emphasis on soft skills like teamwork and communication.

Bachelor of Technology Course Subjects

The B.Tech program offers a broad range of courses that are intended to give students a solid foundation in engineering concepts. Typical topics consist of:

Engineering Mathematics

Engineering Physics

Engineering Chemistry

Computer Programming

Digital Logic Design

Electrical Circuits

Mechanics of Solids

Fluid Mechanics

Microprocessors

Structural Engineering

Career Opportunities After a B.Tech Degree Course

The job opportunities for B.Tech programme graduates are numerous in various sectors across the world. They can practice as network administrators, software developers mechanical and electrical engineers and civil engineers among others. Furthermore such graduates with a B.Tech. can also work in research and development or further their education through an MBA or

M.Tech. Today engineers are found needing in all sectors as a result of increase use soft emerging technologies, and this makes B.Tech graduates easily to be absorbed into the job market.

Skills Needed for the B.Tech Course

Students should have a combination of hard and soft skills to succeed in a B.Tech. program. Important competencies consist of:

Analytical and Problem-Solving Skills: Technical competencies which involve analysis and problem solving are the ability to asses complex problems and develop feasible solutions.

Technical Skills: Technical competence is awareness of engineering discipline and experience with relevant programs.

Communication Skills: In most of the team projects and during presentations, good writing and speaking skills are important.

Time Management Skills: The opportunity to use time wisely to combine work in extra clubs, organizations or other projects with studying.

Teamwork Skills: Teamwork skills are essential for effective working on tasks and assignments in organisations.

Adaptability Skills: The flexibility with which an individual or organization acquires and can apply knowledge of new ways and machines efficiently is known as adaptability.

Critical Thinking: The power to estimate information and arrive at intelligent decisions making is referred to as critical thinking.

Attention to Detail:Accuracy in technical tasks that ensure the impeccable quality and reliability is called attention to detail.

Challenges Encountered By B.Tech Students

B.Tech students frequently encounter several difficulties while pursuing their education. Typical difficulties consist of:

Heavy Workload:Students must handle a lot of homework and projects due to the rigorous curriculum, which can be stressful.

Time management:It can be challenging to strike a balance between your personal life, extracurricular activities, and academic obligations.

Technical complexity:Complex subjects like programming and advanced mathematics can be difficult to understand and require more work.

Industry-Relevant Skills:It can be overwhelming to keep up with the latest innovations and trends in the engineering field, but staying current is crucial.

Financial Restraints:Some students may be concerned about the total cost of their education, which includes tuition and other fees.

Pressure from internships:Getting an internship or a job placement may put additional pressure on one's performance in the classroom and on the job.

5 Ways to Overcome Problems Faced by B.Tech Students

These five strategies will help B. Tech students get past their obstacles:

Time management:Develop a schedule that will guide the achievement of set goals on projects, school work and free time.

Get Assistance:When asking questions, to remove confusion, or to understand better complex topics, engage with peers, tutors, and professors.

Experience in the Real World:To impose practical use of what has been learnt in classes, students should undertake internships and practical exercises.

Handle Stress:Teaching tips to reduce the academic pressure and save the mental health such as, practicing mindfulness, meditation or exercise, etc.

Networking:Exploring one's connections and going through an opportunity to tell in the technology field can be done at workshops, seminars or industry forums.

Key Distinctions Between B.Tech and BE Courses

While undergraduate engineering degrees in engineering are similar, there are some important differences between the B.Tech. and BE programs:

Focus: While BE is more theory-oriented, B.Tech places more emphasis on real-world applications and practical experience.

Curriculum:While BE courses may concentrate more on theoretical knowledge, B.Tech programs frequently include more hands-on labs and workshops.

Career Path:While BE graduates may lean toward management or research and development roles, B.Tech graduates usually pursue careers in technical roles.

Institution Type:While BE is typically connected with traditional engineering colleges, B. Tech is frequently offered by polytechnic institutions and universities with a technical focus.

Success Tips for B.Tech Students

Stay Organized: Remain organized by using apps or planners to efficiently manage your time.

Establish a Robust Foundation:To succeed in advanced topics, concentrate on mastering foundational subjects.

Take part in projects:To improve your practical skills, take part in practical projects.

Network:Make ties with colleagues, instructors, and business leaders to find opportunities and advice.

Keep Up with:To stay current, keep up with developments and trends in the industry.

Practice Solving Problems:To hone your analytical skills, work on a variety of case studies and problems.

Seek Help:If you're having trouble understanding a concept, don't be afraid to ask your teachers or fellow students for assistance.

Significance of B.Tech in the 21st Century

In the twenty-first century, the rapid advancement of technology has made a B.Tech degree extremely significant. The need for qualified engineers with the ability to design, develop,

and implement new technologies is rising as long as industries keep innovating.

Graduates with a B.Tech are essential for tackling global issues, promoting economic growth, and making contributions to industries like information technology, manufacturing, healthcare, and renewable energy. This degree is a valuable asset in today's job market, as it provides a solid foundation for a successful career.

Begin your IT Journey with aBTech Program

Why Choose Mangalayatan University, Aligarh for BTech

Mangalayatan University is the best B.Tech College in Aligarh is for students who are willing to enrol in this course and want to make their professional careers as engineers. There are some valid factors to consider MUA for your B.Tech admission. They are as follows:

Strong Faculty:Mangalayatan University, Aligarh, has skilled educators with a background in business.

Modern Infrastructure:It has cutting-edge facilities and laboratories.

Industry Links:Working together for internships and placements with top businesses.

Opportunities for Research:Students are encouraged to take part in projects involving research.

Holistic Development:Emphasis is placed on extracurricular and academic activities for holistic development.

Reasonably priced:Excellent instruction at a competitive price point.

Positive Environment:A welcoming atmosphere with committed mentorship and support services for students.

Obtaining a B.Tech degree provides many career options in diverse engineering and technology domains. B.Tech graduates have a strong foundation in skill development, practical training, and a demanding curriculum, making them well-suited to the demands of today's workforce.

Aspiring engineers should consider Mangalayatan University because it provides the tools and assistance needed for students to succeed in both their academic and professional endeavours. Then, what are you waiting for? You are the maker of your life. Just make the right choice to make your future bright. The B.Tech admission is open at MUA. Apply Now!

Remember: Your success is the outcome of the choice that you make today!

BTech Course Related FAQs

Q1: How to take Admission in BTech Course?You have two options to take admission to a B.Tech course. Either you can appear for national or state-level entrance exams like JEE Main or get direct admissions based on merit. At Mangalayatan University, Aligarh, you can take direct admission to the B.Tech program.Q2: Can I do BTech Admission without JEE?Absolutely, some private universities offer direct admission based on 12th marks or their own entrance exams, like Mangalayatan University. You can apply for admission with at least 50% marks in your 12th grade.Q3: What is a BTech Degree Course?Bachelor of Technology (BTech) is a 4-year engineering program focused on practical and theoretical knowledge in various fields like IT, mechanical, and civil engineering.Q4: What is BTech Course Salary in india?After getting your B.Tech degree, you can earn between 3–10 LPA, depending on the specialization and company.Q5: Can I do BTech Course Admission after 12th?Yes, BTech is typically pursued after completing 12th grade with a science background (PCM/PCMB).Q6: Are 12th Marks Important for BTech Course?Yes, especially for merit-based admissions in some universities.Q7: Is 70 percent Good in BTech

Degree Course?Certainly, 70% is considered a good score and can help in placements.Q8: Is BTech Easy to Pass?Nothing is easy in life. It depends on your interest and effort, but consistent study and practice make it manageable.Q9: What does BTech stand for?Btech stands for Bachelor of Technology.Q10: What are the Fees for BTech Program in India?B.Tech course fees may range from 1–4 lakh per year, depending on the university.

Q1: How to take Admission in BTech Course?

You have two options to take admission to a B.Tech course. Either you can appear for national or state-level entrance exams like JEE Main or get direct admissions based on merit. At Mangalayatan University, Aligarh, you can take direct admission to the B.Tech program.

Q2: Can I do BTech Admission without JEE?

Absolutely, some private universities offer direct admission based on 12th marks or their own entrance exams, like Mangalayatan University. You can apply for admission with at least 50% marks in your 12th grade.

Q3: What is a BTech Degree Course?

Bachelor of Technology (BTech) is a 4-year engineering program focused on practical and theoretical knowledge in various fields like IT, mechanical, and civil engineering.

Q4: What is BTech Course Salary in india?

After getting your B.Tech degree, you can earn between 3–10 LPA, depending on the specialization and company.

Q5: Can I do BTech Course Admission after 12th?

Yes, BTech is typically pursued after completing 12th grade with a science background (PCM/PCMB).

Q6: Are 12th Marks Important for BTech Course?

Yes, especially for merit-based admissions in some universities.

Q7: Is 70 percent Good in BTech Degree Course?

Certainly, 70% is considered a good score and can help in placements.

Q8: Is BTech Easy to Pass?

Nothing is easy in life. It depends on your interest and effort, but consistent study and practice make it manageable.

Q9: What does BTech stand for?

Btech stands for Bachelor of Technology.

Q10: What are the Fees for BTech Program in India?

B.Tech course fees may range from 1–4 lakh per year, depending on the university.

Are you eager to embark on an incredible journey in science and innovation? Are you excited to shape your future as a data analyst, biotechnologist, or research scientist? If yes, then you have landed on the perfect page. .

A B.Sc degree is one of the most significant and well-renowned undergraduate programs worldwide. This program is specially designed for students from science and commerce backgrounds. It caters to students passionate about professional careers in the ever-evolving IT sector. A Bachelor of Science course is known for its versatility, academic rigour, and remarkable career opportunities.

In this article, we will explore every significant detail required to pursue this degree. So, are you ready to begin your exciting academic journey with Mangalayatan University Aligarh—a leading, recognized, well-established, well-renowned, and affordable private college for every student who dreams of becoming something in their desired fields? If yes, then let's get started.
